The man who came to dinner  
—and stayed for nineteen years

NINETEEN YEARS AGO—about eight years after we first began pushing sound out of this station—a not very enthusiastic young man came to dinner at our place.

Put his product on the air? Pipe good money into ozone? Buy something he couldn't SEE—FEEL—COUNT the pages of? Well—he would! And he did! And he's used WOR for 19 years from the day he first strolled in.

Today the story of his success is one of the brilliant group of more than 100 success stories we've talked so much about. Flanking it is the story of a maker of bread who's also used WOR for 19 years.

Presently a considerable number of smart people came to stay with us. Eight of them have profitably used WOR for 17 years. Another man has had us coast his entertainment into the homes of hundreds of thousands of people in 430 counties in 18 states for 16 years—two others for 9 years—twenty, or more, for 6 years.

The only reason why WOR is here to tell this story is the same reason why these advertisers are still with the station: WOR sells everything—fast—at low cost—to more people—more often—than any other station in the United States.

our address is 1440 Broadway, in New York WOR

Upcoming

Jan. 15-17: Mid-winter conference of Advertising Assn. of the West, Hotel Santa Claire, San Jose, Calif.

(Other Upcomings on page 53)

Business Briefly

NAMED BY WRFD • Taylor-Boroff Co. named as national representative by WRFD Worthington, Ohio, effective Jan. 2. Station is 5 kw daytime AM outlet on 880 kc. James R. Moore is general manager, Edgar Parsons station manager and Robert Burns national sales manager.

MIDWEST SCHEDULE • Lebon Co., Chicago (Mulchide roofing) in February starts schedule of quarter-hour recorded musical shows in 12 midwest markets, 26-week minimum, and will renew quarter-hour live show on WLS Chicago. Agency, Schwimmer & Scott, Chicago.

REGIONAL PROJECT • Hanford Hotel, Mason City, Ia., names Schoenfeld, Huber & Green, Chicago, to handle advertising. Regional radio expected to be used.

AM, TV PLANNED • Adams Corp., Beloit, Wis. (Korn Kurls), which recently named Earl Ludgin Agency, Chicago, to handle its account, expects to buy radio and TV this year. Details not set. Montgomery McKinney is account executive.

TEST CAMPAIGNS • Venice Maid Co., Vineland, N. J. (food), names Schoenfeld, Huber & Green Agency, Chicago, to direct advertising. Test radio and TV campaign to be started this month in Buffalo.

CUNNINGHAM & WALSH ELECTS NEW OFFICERS

CUNNINGHAM & WALSH, New York, formerly known as Newell-Emmett Co., last week elected following officers: Fred H. Walsh, president; John P. Cunningham, executive vice president; Earl H. Ellis, George S. Fowler, G. Everett Hoyt, Robert R. Newell, and William Reynolds, vice presidents; Richard L. Strobridge, secretary.

In new organization, Newman McEvoy will continue as director of media. Present Cunningham & Walsh radio and TV clients include: Liggett & Myers Tobacco Co.; Western Electric Co.; Sunshine Biscuits; American Telephone & Telegraph Co.; Kirkman & Son; Southern Railway System; American Lead Pencil Co.; Denver & Rio Grande, Inc.; Northwest Airlines; Wheeling Steel Corp.; E. R. Squibb & Sons.

avery-KnodeL named

avery-KnodeL Inc. appointed national representative for WROL Knoxville, Tenn. Harry E. Cummings, of Jacksonville, Fla., will continue to represent WROL in Southeast.
Here's real news for an advertiser looking for a big sports audience in New England!

"Elbie" Fletcher, Boston Braves' first-sacker, has joined "Bump" Hadley, erstwhile Yankee moundsman and veteran air-waves luminary, to give the WBZ sports department a double attraction.

With a mighty assist from Fletcher, Hadley will not only handle his current shows on radio and TV... but also be able to deliver his tremendous following to an additional sponsor or two.

Yes, you now can get two national sports figures... at economical cost... on WBZ. Backed by WBZ's 50,000 watts, Hadley and Fletcher will carry your program to sports fans throughout approximately 80 per cent of prosperous New England. For details, check WBZ or Free & Peters.
Another Sponsor Approves . . .

and Renews . . .

First Federal of Rochester again on WVET

The Fulton Lewis Jr. program offers a ready-made audience . . . network prestige at local time costs with pro-rated talent costs. Though currently sponsored on more than 300 stations, there may be an opening in your city. Check your local Mutual outlet—or the Co-operative Program Department, Mutual Broadcasting System, 1440 Broadway, New York City 18 (or Tribune Tower, Chicago 11).
"Young Love" is that merry, warm-hearted comedy of college-vs.-marriage, with Janet Waldo and Jimmy Lydon scoring as a pair of star-crossed campus lovers. The hilarious complications of a secret student marriage have kept a big and growing audience howling for more.

*Billboard* says: "a happy blend of... slick production... bright scripting."

*Cue* says: "fun to listen to."

*Hollywood Variety* says: "it's a winner... the kids can't miss."

*CBS* says: you couldn't ask for a nicer show to go steady with, than this fast-paced, top-comedy CBS Package Program, from the able stable that put "My Friend Irma" and "Our Miss Brooks" in the winner's circle.

Looking for the biggest?

Daytime, too, station breaks on WCBS are New York's biggest buys.

By day, all ten of Pulse's “Top Ten” network programs—plus seven of the ten biggest local programs—are on WCBS. And thanks to our rotating average-rating plan, WCBS station break advertisers get next to several of these big-audience shows each week (they don't just reach the same listeners each day).

Night and day, WCBS station breaks give greatest circulation at lowest cost per thousand. Let us prove it!

Represented by Radio Sales
Mr. Heggan

Bob E. Zeh, vice president, copy director and account executive with Henni, Hurst & McDonald, Inc., Chicago, for three years, resigns. Before joining HH&McD he was with J. Walter Thompson Co. for 10 years as group head and copywriter.

Benjamin C. Bowker named president of new advertising and public relations agency, Bowker & Co., Toledo, Ohio. Parent offices of new agency will be in Toledo, but temporary offices are presently located in Manhattan Bldg., New York. Mr. Bowker resigned as director of public relations and assistant to the president and assistant to chairman of the board of Willys-Overland Motors, to form his own agency.

Robert E. Bousquet, with Lever Bros., New York, for 25 years, appointed executive vice president of Chambers & Wiswell Inc., Boston. Appointment is effective tomorrow (Jan. 3).

Carl Rhodes and Lyman Avery shifted from Detroit office of J. Walter Thompson Co. to New York office.

Lee Strahorn, formerly in charge of production of Lucky Strike shows for Foote, Cone & Belding, joins New York staff of Young & Rubicam with production assignment on Fred Waring TV show.

William E. Becker, former account executive with Chris Lykke & Assoc., San Francisco, joins William E. Guymon & Assoc., same city, in similar capacity.

Catharine Finerty, copywriter for Anderson, Davis & Platte Inc., New York, elected vice president and member of agency’s board of directors.

Lee Strahorn joins radio and television department of Young & Rubicam, New York. He previously was with Foote, Cone & Belding and was independent radio producer for the last year.

W. J. Frost elected vice president of Kenyon & Eckhardt Ltd., Toronto.

Sidney Garfield, of Garfield & Guild, San Francisco, named chairman of management section of National Advertising Agency Network.

Winius-Drescher-Brandon Inc., St. Louis, effective tomorrow, (Jan. 3) changes name to Winius-Brandon Co. Enno D. Winius remains with firm as its president and C. A. Brandon retains his position as senior vice president. John M. Drescher resigns from agency. Operations will continue from present address, 1706 Olive St., St. Louis.

Robert Black, formerly public relations director of Milton Weinberg Adv. Los Angeles, joins Dan B. Miner Co., same city, as assistant radio and television director. He previously was with KFT Los Angeles as manager of recording division.

Eward Smith joins New York staff of Brooke, Smith, French & Durance Inc.

George R. Lamont joins Young & Rubicam Ltd., Toronto, as office manager and supervisor of media.

Offers FM Hours Views

EDITOR, Broadcasting:

I read with interest the protests against the proposed FCC minimum hours regulation in your Dec. 19 issue.

All of those who expressed opposition to the proposal apparently do not realize that there is adequate provision in the proposed regulation for "hardship" cases; however, it would seem that there are many cases of limited hours operation by FM affiliates which can hardly be justified on any reasonable basis. I think it is clearly the desire of the Commission to do everything reasonable possibly so as to avoid the necessity of any FM station going off the air for economic reasons.

Three 50 kw AM network affiliates in Chicago operate their FM transmitters only a limited schedule. With more FM homes in the Chicago area than there are radio homes in any one of seventeen states, doesn't the moderate expense for an extra engineer and power seem justified when there are no programming costs whatsoever involved? The ever increasing number of FM only and TV-FM sets (without AM) are further reasons for duplication of operating hours.

Every area and every station has its own particular problems with regard to FM, but it certainly does not seem unreasonable to require a 50 kw AM station to keep its FM transmitter on the air in Chicago.

I honestly feel that a good guide post for the Commission would be to inquire whether or not the increased cost of operation due to full-time FM duplication exceeded the cost of the janitorial and ushering staff in any one week.

Edward A. Wheeler,
President
WEAW (FM) Evanston, Ill.

What Ails Radio

EDITOR, Broadcasting:

...So many small town radio stations over the past year have been grumbling and wondering what is wrong with business, and why more retail stores, or local accounts don't advertise more with them. In the first place, the very first line of defense, the first voice that listeners hear, their announcers, in a great many cases are the lowest paid group of any in the business, especially in the South. It's that announcer's voice and personality that first conveys the message to the listener, hence he should not only be a well paid person, but one with that personality that sells to the listener and for the client. What do we find in most small town stations? We find that there are announcers who are getting $40 for 40 hours and no overtime.

I realize some of these announcers are not worth more, but why fool with that kind. Pay a decent salary and expect and "get" good announcers. If a station cannot afford good announcers, management and continuity writers, then they should not have installed a station and expect to give the public the only kind of radio that makes for good listening.

Second; Why must any radio station "double spot"? If they are an independent station, they have plenty of time, and if they are a network station, they can certainly shift programs around to where they can handle spot announcements without double spotting. A great many of the small town stations seem to think that "programs" are taboo, and lean to spot announcements because they sell quicker. Do they not intelligently try to sell a local client on programs? Or do they take the lines of least resistance and sell spots? The answer can be found in most any small town station.

I've proven over the past five years as manager of station WOLS Florence, S. C. and also at WBUY Lexington, that programs will sell for a client if properly put over. A small town station must present programs and radio generally as good or near as good as the 50,000 watt network stations, or later, find not much local audience.

Nat L. Royster,
WHED Washington, N. C.

**Feature of the Week**

BATTLE against the nation's worst enemy—the germ—is waged with weighted punches each Thursday at 4:30 p.m. in the *Fight for Life* series over KUSD Vermillion, S.D.

Irving R. Merrill, KUSD general manager and treasurer of the Fight for Life Advertising Committee, adds, "so far as we know it represents the first time in the history of American radio that the (health) groups have united to present a single series of radio programs of public health education over a single station."

The program, considered by Mr. Merrill as the best promoted one the station ever has carried, delivers its message—that of combating disease—to the public with distinctive impact. Format resembles a blow by blow radio account of a boxing bout. In one corner is the germ-infested disease (e.g. "Churchyard Cough," the tuberculosis attacker) and in the other, "Johnny Public." Invited guests describe various aspects of the problem to announcers who set up boxing ring atmosphere with appropriate sound effects. Gov. George T. Mickelson, endorser of the series, appeared on the first program.

Total budget for the series, which started Oct. 20, 1949, and will last through June 1 this year, is $1,433.00. Mr. Merrill explains, all of which is made up by contributions from the 13 participating health groups. Radio time, including program and spot announcements, is donated by KUSD. Key sponsors in addition to the station are the South Dakota State Dept. of Health and the U. of South Dakota school of medicine. Other participants include medical associations, tuberculosis, mental

(Continued on page 86)

**On All Accounts**

A FEW blocks away from the White House in Washington, James Gordon Manchester, 34-year-old hustling account executive, is showing advertisers that radio not only can help sell corn to rural dwellers, but also sell packaged frozen shrimp to inlanders. His position as radio and television director at Lewis Edwin Ryan Advertising Agency, he admits, means he sleeps, eats, and thinks radio.

While philosophy now usually takes a back seat to more practical subjects directly related to the advertising business, Mr. Manchester began his studies in the books of Plato, Socrates, Descartes and the other scholars. A descendant of a long line of college professors, Gordon (he seldom uses his given name) decided to test his mettle elsewhere. He gave up philosophic studies at various schools—"the U. of the South, Sewanee, Tenn.; American U. of Washington, D.C., and of Vermont, Burlington, Vt.—to find "peace of mind" in radio production in New York City.

Gordon pegs his original interest in radio to strong,及相关固定, to an inborn fixation for the dramatic. Radio, he believes, has these qualities wrapped up in a powerful pocket and it was his decision in 1940 to unwrap the trappings.

Gordon feels that all his life he has been one step out of the classroom. His father, Dr. Allen W. Manchester, now retired, was president of Storrs Agricultural College (now the U. of Connecticut) prior to becoming a member of Franklin D. Roosevelt's inner government circle of intellectuals. Dr. Manchester served in three successive executive posts in New Deal agricultural agencies. Quick to note this, Gordon says he knows to whom to refer problems on foods.

The list of educators does not stop with his dad. Gordon's mother was a Columbia U. professor. His two brothers are college professors, John Wilbur at U. of Maine and Alden Cee at Harvard U. (Gordon speaks of them as "John Alden"). His own name, he says, was put together by his mother "who had a crush on Harry Lauder and believed James Gordon sounded Scotch." When he talks of his family, Gordon threads through decades of American history. His forebearers— a Brewer—were religious persecution and reached New England soil in 1621. In the same century, other ancestors—

This mama boxer had exactly nine puppies.

And nine is exactly the number of years that W·I·T·H has been providing advertisers with the biggest bargain in Baltimore radio.

The way W·I·T·H does it is this: first, W·I·T·H regularly delivers more home listeners-per-dollar than any other station in town. And second, in addition, a survey made under the supervision of the Johns Hopkins University showed that of all radios playing in drug stores, 34.6% were tuned to W·I·T·H.

That means that a little money does big things on W·I·T·H. Call in your Headley-Reed man today and get the whole W·I·T·H story.
ABC TOP COMMAND

MARK WOODS, president of ABC since 1942, last Thursday was elected vice chairman of the network and Robert E. Kintner, executive vice president since 1946, became president.

Edward J. Noble, principal stockholder in the network, continues as chairman of the board.

The change was said to have been made to free Mr. Woods from administrative duties and enable him to make wider use of his persuasive abilities as a salesman.

The shift in top command at ABC last week was not unlike that which occurred at NBC a month ago when Niles Trammell, also celebrated as a salesman, was moved from president to chairman of the board, and Joseph H. McConnell, a crack administrator, was elected president.

Mr. Kintner, as executive vice president, has been assuming more and more top administrative assignments in the past year, to permit Mr. Woods to concentrate his energies in high-level troubleshooting on sales, talent and programming problems.

Salary Question

Both Messrs. Woods and Kintner have five-year contracts with ABC signed only a year ago. As president, Mr. Woods receives $75,000 a year, and as executive vice president Mr. Kintner was paid $50,000. Whether salary changes were involved in the change of positions last week was not known.

With his election last week—effective Jan. 1—Mr. Kintner became the youngest president of a major network. He is 48 years old.

Although no official comment was made on the subject, it was learned authoritatively that the position of executive vice president at ABC will be abandoned.

The elevation of Messrs. Woods and Kintner to new jobs was not regarded in informed quarters as suggesting renewed activity in the often rumored negotiations of the sale of ABC.

Recent reports of reawakened buyer interest in the network have been denied by all sides.

That Mr. Noble, who, as principal stockholder in unquestioned control of the company, is the man to say yes or no to any buyer proposition, was not entirely closed

ing the door to a future sale was indicated, however, in the vigorous facilities expansion that the network has carried on for the past year.

The acquisition of several million dollars worth of television studios and equipment in New York and Hollywood was seen as enhancing the real value of the network and inevitably influencing

any sale price.

Mr. Woods, a veteran broadcaster, entered radio in the early 1920's as a financial officer, assistant secretary and office manager of the AT&T subsidiary company that operated WEAF New York (now WNBC).

After the formation of NBC he joined the network in an executive capacity, rising to assistant executive vice president and administrative officer.

He became president of the Blue Network Inc. when it became a separate entity from NBC in 1942. Mr. Kintner joined ABC—his first venture into radio—after his release from Army duty in 1944.

Before the war, in which he served as a lieutenant colonel, Mr. Kint-

'49 REVENUE

By J. FRANK BEATTY

GROSS broadcast revenues from time sales rose 4.5% to $345 million for 1949, according to NAB, but industry profits continued their downward trend. Operating costs were up 4% for 1949, NAB estimates.

Annual estimates of the industry's financial status for 1949 were made by Dr. Kenneth H. Baker, NAB research director, and C. Meryl Sullivan, assistant director, on the basis of a sampling of the membership along with comparisons with FCC 1948 figures and the status of business.

The gross income figure of $345 million for 1949 compares with FCC's 1948 total of $416,720,279. Gross income comprises station and network time sales after trade discounts but before deduction of agency commissions.

National spot business continued its sharp upward trend last year, rising from 1948's $104,759,761 to an estimated $118,425,000, an increase of 13%. This category runs far ahead of other sources of broadcast income in rate of increase.

Overall average of station profits before federal taxes was 17.1% in 1948. Dr. Baker said, but "it is expected that 1949 will be the second consecutive year in which they have been less than 20%. They may fall as low as 16% in 1949."

Actual profits after deduction of federal taxes, however, will run under 10%, it was indicated on the basis of tentative calculations.

The continued upward trend in operating costs brought this figure from $342.9 million in 1948 to $356.3 million in 1949, according to NAB's calculation.

These figures, it was explained, "do not preclude the possibility of large increases in expenses in the case of individual operations engaged in AM-FM-TV expansions."

Dr. Baker said local retail business "has consistently been underestimated. In 1948 it amounted to $170.9 million (instead of the estimated $157 million). An evaluation of reports from stations and an overall appraisal indicates another 5.3% increase for 1949, bringing the revenue from this source to $180 million."

Network revenues will show a drop of 3.3% below the 1948 gross, it was estimated, declining from $133,723,098 to $129.3 million in 1949.

Revenue to stations increased from $314.7 million in 1948 to $333.6 million in 1949, a gain of 6%. The increase was derived entirely from local retail, regional and national spot business, it was pointed out.

A large part of the station increase was ascribed to business done

Vol. 38, No. 1  WASHINGTON, D. C., JANUARY 2, 1950  $7.00 A YEAR—25c A COPY
CBS REALIGNS

SIX high CBS executives were given new jobs last week in what the network described as a move to integrate television and radio activities in the areas of programming, sales, program business affairs and general program operations.

A seventh executive, Davidson Taylor, for more than two years vice president and director of public affairs, resigned.

Under the realignment William C. Gittinger, former vice president in charge of AM network sales, becomes vice president and assistant to the president—a senior management assignment.

Hubbell Robinson, Jr., vice president and director of radio programs since 1947, becomes vice president in charge of network programs with general direction of all programming, both radio and television.

J. L. Van Volkenburg, vice president and director of television operations, becomes vice president in charge of network sales, directing sales for both radio and television.

James M. Seward, vice president in charge of operations, becomes vice president in charge of business affairs, network programs. Mr. Seward will handle all negotiations and contracts regarding network talent, rights and programs, literary clearances and budgets for the program department and CBS package programs, and will direct business affairs for the operation of all CBS program subsidiaries.

Falknor Made V. P.

Frank Falknor, one of radio's pioneer engineers, assistant general manager of the CBS-owned WBMM Chicago, becomes vice president in charge of program operations, and will move to CBS headquarters, New York. All departments and divisions of radio and television "having to do chiefly with putting programs on the air" as well as general service departments will be grouped under Mr. Falknor, the network announced.

Sig Mickelson, now director of public affairs and production manager of the CBS-owned WCCO Minneapolis, becomes CBS director of public affairs, succeeding Mr. Taylor but without the title of vice president. Mr. Mickelson a month ago was slated to move to New York as director of the CBS division of discussion [Broadcasting, Dec. 5]. With the resignation of Mr. Taylor, Mr. Mickelson's new assignment was changed to the big job.

The network's official announcement of Mr. Taylor's resignation said he had taken that course because he felt he could not work effectively under the plan of reorganization.

The essence of the changes at CBS was an integration of television and radio functions—an organizational concept that was in direct antithesis to the recently inaugurated redesign of NBC.

The unification of CBS command over the various program functions of radio and television was in contradiction to the NBC policy of establishing separate entities of radio and television with individual commands.

Veterans at CBS

All of the executives, save Mr. Robinson, are veterans in the service of CBS.

Mr. Gittinger joined the network in 1934 as director of sales development. Soon afterward he became sales manager. He was elected vice president in charge of sales in 1940.

Mr. Van Volkenburg joined CBS in 1932 as general manager of the network-owned KMOX St. Louis. In 1936 he became assistant to H. Leslie Atlass, CBS vice president in charge of the Western Division at Chicago. In 1945 he moved to New York as general manager of CBS Radio Sales.

He became director of station administration in 1948 and a few months later was elected vice president and director of television operations.

Mr. Robinson joined CBS in 1947 as vice president and director of programs. His radio experience began with Van H. Robinson, which he joined in 1933, rising to a vice presidency. In 1944 he became vice president and director of programs of the Blue Network.

A year later he joined Foote, Cone & Belding as vice president in charge of radio, leaving that post in 1947 to go to CBS.

Mr. Seward has been with CBS since 1933 when he became a member of the production department. He was promoted to assistant treasurer in 1934, to associate treasurer in 1935, to vice-president of operations in 1942. He became vice president in charge of operations in 1948.

Mr. Falknor joined CBS in 1933 as chief engineer of WBWM Chicago. In 1937 he was promoted to chief engineer of the network's Central Division. From 1943 to 1945 he served in the Army, leaving as a Lieutenant Colonel to rejoin CBS as general manager of KMOX. In November 1945 he became assistant to Mr. Atlass in

PARAMOUNT

PARAMOUNT PICTURES Inc., under court anti-trust decree, to separate its theatre-owning and movie production-distribution interests, last week filed applications with FCC to cover disposition of holdings in WBBK (TV) and WBK (FM) Chicago and WSMB-AM-FM New Orleans [Broadcasting, March 7, 1949].

To Paramount's accompanying request for action prior to Jan. 1, date set for the formal initial steps to effect the separation of interests, the Commission on Thursday afternoon observed that Paramount, and not the court, had set the date. The FCC declared it couldn't process the applications on such short notice. FCC reported Thursday morning the applications were filed. Letter of transmittal was dated Dec. 22, FCC said.

Under the Paramount reorganization plan, submitted to the U. S. District Court for the Southern District of New York, it is promulgated to formalize a realignment, previously announced, whereby complete divestiture of the two new firms would be accomplished in three years. Certificates of interest in the theatre company are not convertible into stock until the holder has given up all of the stock in the new picture firm.

According to the transfer applications filed with the Commission, United Paramount Theatres would own 90% of the stock of Balaban & Katz, licensee of WBBK and WBK, from Paramount Pictures. United Paramount Theatres also would own 50% interest in WSMB Inc. through a multiple transaction. Other 50% interest in WSMB is retained by Maison Blanc Co.

In the WSMB transfer, Paramount Pictures is to turn over to United Paramount Theatres its

Transfers Station Interests

DRAWN FOR BROADCASTING by Sid Hix

"Better wear these for protection, Flitwick, some station managers get quite abusive when they learn it's a P.I. deal we offer them!"
**FM Audience**

**ARB Studies D. C. Area for NAB**

**AN AUDIENCE comprising 7.2% of the Washington metropolitan area population, or 102,200 people, listens to FM broadcasting an average of 1 hour, 46 minutes per day, according to a study conducted by Radio Broadcasting Research Co. for the NAB FM Executive Committee.**

- **Techniques Utilized**
  - Results of the study, prepared by Arthur C. Stringer, NAB staff director and secretary of the FM Executive Committee, are based on field work employing both diary study and interview techniques. This field work was conducted Oct. 15-31.
  - The survey shows that 51,288 families (15.2%) in the area own at least one FM receiver.
  - The estimated total of FM sets in the area is 138,120, with 2 people owning sets in 73.2% of the families.
  - The results are based on 24,220 actual sets and recorded type of equipment as well as length of ownership.
  - Average length of FM set ownership was found to be 15 months, distributed as follows: FM-AM, 10.9%; FM:FM-AM, 10.9%; FM:FM-AM-TV, 9.1%; FM-TV, 4.5%.

**Producers of Washington owned sets, capable of receiving FM, and ownership percentages, are:**
- **Philco**: 17.3%; RCA-Victor, 10.9%; Stromberg-Carlson, 8.2%; Zenith, 8.2%; Emerson, 7.5%; Westinghouse, 6.4%; Admiral, 5.8%; Silvertone, 5.5%; Magnavox, 4.5%; 19 others, 26.2%.

**American Research Bureau used an area sample of 1,000 persons for the FM set study, and its findings were based on a sample of 96 persons.**

**Recording programs are compiled in terms of people, not families.**

**Personal Interviews**

Besides the diary study, 982 personal interviews were conducted with heads of the family group.

**Members of the NAB FM Executive Committee, besides Mr. Mansin, are Matthew H. Bonebruke, KCOS-FM Oklahoma City; Victor C. Diehm, WAFL-FM Haslet, Texas; Ray A. Furr, WIST (FM) Charlotte, N. C.; Milton L. Greenebaum, WKNY-FM New York, and Edward A. Wheeler, WEAF (FM) Evanston, Ill.**

---

**NBC's Report on 1949, a voluminous document, is released today (Jan. 2) covering the network's achievements in radio and TV programming and financing, and alignment of top executive personnel for more efficient operation in both types of broadcasting. Some of the report's highlights follow:**

In sales, the total gross income of its 294 affiliated stations and network facilities reached an all-time high. Television network sales alone were five-fold over 1948, which were ten-fold over the preceding year, 1947. The total gross network radio billings for the year were higher than those of any other network.

On Jan. 1, 1949, NBC had 24 stations on its television network, and by Dec. 15 the figure had zoomed to 55, 28 of which were interconnected and 27 non-interconnected.

**WDAK Columbus, Ga., was added to the NBC radio network to bring the total number of radio affiliates to 171, and contracts were signed with KIT Yakima, Wash., to join the network on Jan. 1, 1950. Six radio stations improved their power.**

By Dec. 1, 26 NBC radio affiliates were operating companion FM stations, as compared with 87 on Nov. 15, 1948. Four other stations also had construction permits, and two had applications pending for permits.

**Top Echelon Changes**

On Oct. 7, the NBC board of directors elected Niles Trammell, network president, to the position of chairman of the board, and upon the recommendation of Mr. Trammell, elected Joseph H. McConnell as president. Mr. McConnell, 43, came to NBC recently, where he had been executive vice president. He had been with RCA for 12 years.

In order to cope with the great expansion of NBC television, Sylvestor L. (Pat) Weaver, head of radio and television for Young & Rubicam, and a former top advertising executive for the American Tobacco Co., was named to head the newly-created television network.

Meanwhile, at the end of the year, separate organizations were in the process of formation for radio, television, and owned-and-operated station operations.

**New accounts sold by NBC during 1949 included U. S. Steel's Theatre Guild on the Air; The Assn. of American Railroads, The Railroad Hour; Bristol-Myers, Bristol the Bank; Riatz Brewing, Duffy's Tavern; Gulf Oil, We, The People; Wildroot, Sam Spade; American Tobacco Co., Light Up Time, and Liggett & Myers, Perry Como.**

In the daytime, NBC sold Kraft the 15-minute five-day-a-week Marriage For Two, and Sealsite the 15-minute five-day-a-week Dorothy Dix Show. Procter & Gamble brought Welcome Travelers, a half-hour daytime series, Monday through Friday, to NBC from a competing network and also purchased NBC's Lorenzo Jones.

In addition, these six NBC-created package programs were sold during the last two months of 1949: Draguet to Liggett & Myers; Baby Snooks Show to Lewis-Howe; The Hall of Ivy to Schlitz Brewing; Screen Directors Playhouse to RCA Victor; One Family to Miles Labs, and Richard Diamond to Helbros Watch Co.

82% Renewal

Eighty-two per cent of the 1949 NBC advertisers renewed their contracts during 1949. Twenty-seven of these advertisers have been on NBC for over 10 years.

New business came from 26 U. S. advertisers on the NBC radio network, while evening advertisers at the end of the year were using a greater proportion of NBC's affiliated stations than ever before.

The average program was carried by 148 NBC stations, or 87.6% of all stations, with 141 stations or 83.9% of all affiliates for 1948. In 1945 the average program was carried by 82.1% of the stations.

Concomitant with the television set sales (of 7.5 million at year's end) was the tremendous growth of stations in the U. S. In January 1949, NBC had 24 stations. By December 1949, the total was 55, or more than double the number at the start of the year.

New advertisers and old flocked to NBC television. Bringing in new programs, some of them NBC packages, were R. J. Reynolds Tobacco, 93% of sets equipped; magnificent Carpet Mills, Bulke, U. S. Tobacco, P. Lorillard, Firestone, Pabst Sales Co., Miles Labs, American Cigar & Cigarette Co., Chesterfield, Bristol-Myers, Lever Bros., Cities Service, Gulf Oil, Admirial, Elgin-American, Roson Art Metal Co. and Hamilton Watch.

Of the well-established programs continuing on NBC television throughout the year, Milton Berle's Texaco Star Theatre remained the nation's number one program by a wide margin; Climax was the number two Theatre and Philco Television Playhouse ranked among the top dramatic programs, as did the Kraft Television Theatre, video's longest-running continuous drama show.

Gillette Safety Razor Co.'s Friday night boxing bouts were a top sports attraction.

Maintaining its top position in the world of research and engineering for video, NBC was authorized by the FCC to build the nation's first experimental protected high frequency station in Bridgeport, Conn., which was completed by the end of 1949. Elimination of venetian-blind type of interference for tanglefree results was proposed by O. H. Hanson, NBC vice-president.

(Continued on page 69)
The Laundryman Calls

More and more housewives are deciding to do their laundry at home, and more and more empty-nested laundries are wondering what to do about it. One hundred and thirty such laundries, members of the Chicago Laundry Owners' Assn., have found a solution.

Early in 1949 the association picked up an inexpensive tab on a local show built by WBBM-CBS Chicago. It is called Pickup Time, and is custom-styled for the laundry group. The format requires a personalized approach, as the daytime show needs to appeal directly to housewives in the home.

Business of Broadcasting

One of a Series

The sales message is of necessity "institutional," but not in the usual formalized sense. Because no specific item or concern could be promoted in 15 minutes, the show "sells" time-saving and health-saving qualities of laundry service.

The program was designed to sell laundry service and also to back cash-laden competition of the major soap manufacturers, who last spring were spending an estimated $30,000 weekly in time alone on Chicago stations. Their appeal to thrift and economy was basic.

Because WBBM has a high listenership rating early in the morn-

ing, John W. Shaw Agency, Chicago, asked station executives to work up a program with mass appeal to women. Program Director Al Morrey and Local Salesman Stan Levey developed a show around a fictitious but friendly laundry route man, Patrick O' Riley.

Fifteen announcers were auditioned for the part, but each was found to have a voice that was too professional or false. Show planners found exactly what they wanted—a warm, friendly personality and a voice that could sell good will—in Val Sherman, WBBM program manager who had been away from air work for about six years. Mr. Sherman re-transferred his talents to the microphone to sing and talk the role of Patrick O' Riley.

Adlibs Show

Val adlibbed the entire show, building patter and songs around jokes sent in by listeners. The five women sending in the best jokes each week are given a week's laundry service free. Mr. Sherman, who has a deep, resonant baritone voice, works with Singer Jeanne MacKenna and a five-piece musical combo headed by Harold Kartun.

Mr. Sherman and Miss MacKenna are used also by Shaw agency in live presentations before non-member laundry owners in the city and suburbs to get them to join association activities. The agency believes it has converted the association from a "strong tendency" to use newspaper space. This was proved previously because a laundry owner can list his name and address for reference. No specific laundries or addresses are mentioned on the air because of the 120 members and time limitations, which means that non-members can actually benefit from the advertising without paying for it.

During the past year, the association has made an all-out effort to re-establish a wide public relations front. All advertising was suspended in the war years, when every laundry had a surplus of orders. Radio this year has been the core of the group's campaign, and the show is frequently backed-up by 60-line ads in daily newspapers on radio pages.

The reason for a renewal contract early in December, in the opinion of John Toomey, executive secretary of the association—"Pickup Time is maintaining for our laundries more of a normal level of business. Laundry business is down all over the country, but it's down less in the Chicago area because of our radio promotion."

Radio's Good Effect

Association President John G. Shaw (no relation to John W. Shaw of the agency) is convinced "radio has a psychologically good effect for an association campaign, because it has substance and consistency to it.

"In addition to customers and potential customers, the program is followed with interest by laundry plant owners and their families. The format of the show, with Patrick O' Riley's personality, makes the laundry route man a pretty good guy. The general good tone and public relations value of the show seem to be appreciated all around," he observed.

The association was organized in 1909 as a local trade group, and has members from Chicago proper and its many suburbs. Most of the members contribute to the advertising program on a pro rata assessment based on the number of routes operated by each laundry.

"Handling advertising for a good-sized trade association calls for equal parts of strong planning, patience, perseverance and good luck," Jack Shaw of the agency concludes.

Cites Pre-Planning

"In every association there are a few who don't believe in what you're propagating. They are the targets for your arguments. If you can talk to the skeptics with enough strength and conviction, you can make your point with the whole committee. Pre-planning here is more important than on any other type of account. It is vital that you spell out exactly what you mean to do so there is no gap or misunderstanding. Take those tactics with a reasonable amount of good luck and you can get a campaign started. Once in motion, the most important thing to do is to continually merchandise your campaign to individual members. Let them know exactly how it's working and what good it is doing them."

Account Executive Larry Scott and Radio and Television Director Robert Zelens have worked with the station in the informal approach to commercials advocated by CBS. The talkative and friendly messages have been enhanced by the techniques of Val Sherman, known in Chicago as the "near-beer Arthur Godfrey."

The show is a three-a-week feature, Mon.-Wed.-Fri., 8:30-8:45 a.m. Laundry owners are getting good results, and Mrs. Chicago lives an easier life.

Easy-Going commercials are planned carefully in advance for an effortless approach. John Toomey (l), secretary of the Chicago Laundry Owners' Assn., confers with Val Sherman (c), Pickup Time's Patrick O'Riley, and John G. Shaw, president of the association.
DON LEE RENEWAL PROPOSED

By RUFUS CRATER

IN A DECISION which may guide its approach to future network-affiliation problems, the FCC proposed last Wednesday to renew the licenses of Don Lee Broadcasting System's five owned stations for want of a penalty short of a "death sentence." (Closed Circuit, Dec. 30, 1949)

The Commission found Don Lee guilty of violating FCC's network regulations which deal with network affiliation agreements, and give affiliates the right to reject network programs. However, the majority said in a 4-2 proposed decision:

"Except in an aggravated case, the Commission is reluctant to impose a sentence on a licensee which not only terminates his existing operations but would preclude him from holding any other radio licenses. Had we the authority to order a suspension, assess a penalty or impose some other sanction less than a 'death sentence' we should have no hesitancy whatsoever in doing so in this case.

"When made final, the decision will bring FCC one step nearer solution of the cases in which four owned stations of NBC and three of ABC have been put on temporary licenses [Broadcasting, Nov. 9, 1949]. FCC has said it is holding up these renewals pending the Don Lee decision because similar questions are involved. Another key to solution of the ABC and NBC cases is the pending spot representation question, which also is delaying renewals for four CBS owned stations.

Don Lee, West Coast regional which consisted of 37 stations at the time of the hearing in January 1947, is licensee of KGB San Diego, KDB Santa Barbara, KFRC San Francisco, and KNX Los Angeles. All would get renewals under FCC's proposed decision.

Other Applications

In the case of other Don Lee applications, the Commission proposed to (1) put the San Francisco television bid into the pending files until the freeze is lifted; (2) grant a petition for a renewal of KGB's application for 95 kw on 1380 kc and hold further hearing on technical issues; and (3) continue KFRC's FM application in hearing status for further scrutiny of technical aspects.

FCC's 4-2 split on the renewal question saw Chairman Wayne Coy and Comr. Freda B. Henneck voting "no," while Comrs. J. Sterling, E. M. Webster and Robert F. Jones voted to renew. Chairman Coy and Miss Henneck issued separate dissonant opinions, and Comrs. Webster and Jones wrote additional concurring opinions.

The majority's reluctance to employ the "harsh" penalty of license refusal, and its announced desire for a lesser sanction, were taken as indications that renewed efforts would be made to secure cease-and-desist and voluntary authority for some other intermediate penalty. Comr. Hennock said in her dissent that "it would certainly be salutary" for Congress to consider the problem of regulating other serious sanctions if possible.

Insuance of a proposed rather than final decision occasioned surprise, since (1) no contest is in sight on the merits of the case; (2) the party, and (2) the decision is to renew, not deny. FCC authorities said the procedure was employed so that Don Lee would have opportunity to protest any of the findings and conclusions to which it objects. Whether the network would thus bring its licenses again is another question.

The majority held flatly that Don Lee had violated the network regulations. The majority decision said:

"This is not a case in which the FCC is instituting an action to enforce regulations, as in particular [Lee Allen Weiss, Don Lee board chairman, formerly vice president and general manager], were not actually violating the conduct and their attitude toward the Chain Broadcasting Regulations, or any that their actions amounted to violations of the regulations.

However, in light of their statements it is apparent that the violations of these regulations were either deliberate or the result of complete indifference. Weiss clearly admitted in his testimony that he did not believe in the enforcement of Commission regulations which he felt were inconsistent with the economic interests of Don Lee.

He regarded these portions of Don Lee's network affiliation contracts which were being alleged as Chain Broadcasting Regulations as necessary evils imposed by the Commission and that, if strictly adhered to, they would prevent Don Lee from broadcasting as it was carried on by Don Lee. To him, the interests of the network were paramount and economic practicalities governed the conduct of the network toward its affiliates rather than the provisions and purposes of the Commission's regulations.

The intent of the regulations to insure that licensees remain in control of and responsible for the operation of their stations was effective.

But the absence of authority for FCC to impose any intermediate penalty left the majority "disposed to afford Don Lee a final chance to demonstrate its ability to comply with the Commission's rules and regulations in the light of theenucination of their scope and import in this decision."

Further, the majority noted. Mr. Weiss last January filed an affidavit "in which he undertook personally guarantee that, in the future, Don Lee would not, in any manner, violate the Commission's Chain Broadcasting Regulations."

Comrs. Coy and Hennock, however, argued pointedly for denial, and Comr. Jones said his vote for renewal was promised on FCC's own terms. The Commission's rules and regulations for hearing despite "complaints and other facts" which "parallel the prima facie evidence" on which Don Lee was set for hearing in the future.

"Since no other major networks' licenses have been designated for renewal...

(continued on page 31)

W. B. DONER (I), president of W. B. Doner & Co., Detroit advertising agency, chats with Max Shaye of Grosse Poinete Foods and Big Bear Markets at a cocktail party celebrating the 13th anniversary of Doner firm last month.

AWARDS SHUNNED

Networks Chilly To Project

By EDWIN H. JAMES

"POSTPONEMENT" of the first which was announced for Jan. 13 in New York [Broadcasting, Dec. 19, 1949] was under consideration last week because of the reported inability of networks to work out a present in the project.

Television Beat magazine, Mr. Stanton said:

Speaking quite frankly, I tend to resist the whole concept of awards in the creative field. For one thing—and this is generally true to writers and editors as well. For another, such critical appreciation as major networks give their radio as they do in creative fields, there is a chance that the public can be sought out by the public.

For example, when a book wins a Pulitzer prize or a movie wins an Oscar, the public attention is focused on the product and the acclaim has a very constructive effect. In radio and television, however, by the time the prize is awarded the public has no opportunity to sample the product that was singled out for recognition.

In addition, the fact that networks have explored very carefully both within and without their organizations that time I have gone through it I have come away with a rather negative side, the book, the film, to say.

Mr. Stanton's sentiments were vigorously seconded last week by Sydney H. Eiges, NBC vice president in charge of press who has coordinated NBC activity in the awards projects. Mr. Eiges explained that after Mr. Berle had agreed to participate that the NBC executives followed suit.

The names of ABC and Mutual executives also appeared on the sponsoring committee announced three weeks ago. That the interest of those two networks in the award was hardly warmer than that of CBS and NBC was indicated in the report that both ABC and Mutual had authorized Mr. Eiges present them at one or more meetings held with the award sponsors, neither bothering to send a representative to the ceremony.

Since the awards were intended to be given network programs, it seemed the sponsors of the project would be hard pressed to sell tables at the dinner; if it came off, unless the networks suddenly warmed up to the whole idea.
AN ESTIMATED 11,680,385,000 radio listener impressions were obtained for public service projects during the first 40 weeks of 1949 by The Advertising Council Inc., New York, according to the group’s year-end statement issued last week. During that period, the council reported, it enlisted support for 13 top-priority campaigns and minor support for 34 other projects.

During 1949, 137 network and regional radio advertisers cooperated with the council by presenting public service material on programs regularly. In addition, more than 150 sustaining programs of the four major networks participated in the council’s Radio Allocation Plan, broadcasting messages on a regular schedule.

Substantial Gain

The listener-impressions figure represented a gain of 75,490,000 over the same period last year.

All sponsored simulcasts broadcast a number of messages in support of council projects, the report stated. These included Arthur Godfrey, We, the People, Break the Bank, the five World Series games and a few others. Television support of campaigns is on the increase, the group stated, and improvements in services offered by the council to TV advertisers, networks and stations, will be made this year.

CLAY MORGAN

Resigns as NBC Executive

CLAY MORGAN, assistant to the president for 12 of his 13 years as a NBC executive, has resigned from the network to become an independent public relations and publicity consultant.

Prior to joining NBC in the fall of 1936, Mr. Morgan had spent 17 years with the French Line in New York, for 13 of which he was the firm’s director of publicity and public relations.

Niles Trammell, NBC board chairman, stated: “We wish every success to Clay Morgan in the service he plans to carry on with individual clients who can use his great experience in public relations.”

ANAHIST ON MBS

Buys ‘Falcon,’ Quiz Show

THE Anahist Co., New York, which announced earlier this month it was interested in buying colds, is sponsoring two national network programs [CLOSED CIRCUIT, Oct. 31] effective Jan. 1 on 345 MBS stations.

The company sponsors The Falcon Sunday 7-7:30 p.m. and True or False Saturday, 5-5:30 p.m. Contracts were placed through Foote, Cone & Belding, New York.

FCC IN ’50

A HOST of major policy decisions vitally important to radio and television dominates FCC’s list of “things to do in 1950.”

Many were on the list a year ago. Others have been added by developments during the current year.

Comr. George E. Sterling calls them “the most perplexing and important problems and unanswered questions” that have faced government and the radio industry since “the days of the Hoover Conferences of 1922, 1923, and 1924.” His list—and he points out that they are problems to which both government and industry are directing their efforts—include:

“the destiny of FM;”
“the impact of TV on aural broadcasting;”
“whether we shall have a new North American Regional Broadcasting Agreement and, if so, at what cost;”
“the clear-channel docket;”
“the TV allocation structure including the vital color issue, Phonovision and Stratovision;”
“whether or not an allocation of microwave frequencies should be made for theatre television;”
“ interconnection of broadcasters’ inter-city relays [for television]” with those of common carriers, and interconnection of the facilities of common carriers;”
“utilization of the spectrum as it concerns industry versus government;”
“final implementation of the Atlantic City Convention (on international radio);”
“frequency allocations dependent on the success of the Provisional Frequency Board and the next High Frequency Broadcasting Conference;”
“the plight of the Western Union;”
“whether or not there should be a merger of the international radio equipment companies.”

FCC is not the sole or final authority on the solution of some of these matters, particularly those involving international arrangements. But, said Comr. Sterling: “I feel certain that the Commission during the New Year will put its shoulder to the wheel for the purposes which it has in mind, if only one of the problems on which it has responsibility and jurisdiction, with the intent of looking back next year at this time on a year of considerable progress.”

On the strictly broadcast front other problems await decision. These include the question of the (Continued on page 36)

BROADCASTING • Telecasting
PRESENT level of radio expenditures will be continued in 1950 by several national advertisers, supporting the facts and predictions in the annual BROADCASTING forecast published in the Dec. 26 issue. Their replies were received too late for inclusion in the forecast.

Some increase in total station revenues is forecast by sales and representative interests, whose replies also arrived too late for the all-industry roundup.

Additional comments follow:

Advertisers

Hudnut Sales Co., New York, is putting “a great deal of money in radio” since taking over the Walter Winchell program as of Jan. 1, according to D. L. Bryant, advertising director. “We will also be advertising through the chain store group on television,” he added, and predicted the Warner and Hudnut companies will have a very prosperous year in 1950.

International Harvester Co., plans to spend the same amount for radio in 1950 as it spent in 1949, though budgets have not been analyzed, according to W. O. Maxwell, assistant manager, Consumer Relations Dept. Mr. Maxwell said the company’s only TV experience in 1949 was a brief exploratory program on WGN-TV Chicago during the International Livestock Show, and the firm has no immediate television plans.

Nash Motors is figuring on an increase in both radio and television budgets during 1950, according to J. B. Huntress, assistant director of advertising and sales promotion.

Great Atlantic & Pacific Tea Co. operates on a fiscal year ending in February and has not made up advertising budgets, according to Hudson S. Robbins, of Business Organization Inc., New York, public relations counsel for the company. “So far,” he said, “our advertising in connection with the recent anti-trust action has been limited generally to newspapers and radio stations receiving our regular consumer advertising.”

E. R. Breech, executive vice president of Ford Motor Co., predicted the company and the entire automotive industry will continue to play a major supporting role in the nation’s economy.

J. R. Davis, sales and advertising vice president, estimated the industry’s 1950 market between 5 million and 6 million vehicles.

Stations

James G. Riddell, general manager of WXYZ, Detroit, expects little change in the 1950 time sales picture and hopes to maintain expenses on the present basis. “Business in Detroit depends so much on the automobile business that it is watched very closely by all Detroit business concerns,” he said. “It appears that automobile business in 1950 will be highly competitive which will mean better business conditions in Detroit.”

Mr. Riddell

Anticipating a 3% increase in radio revenue, Hugh Terry, vice president and manager of KLZ Denver and NAB District 14 director, looks for a 5% gain in operating expenses with general business remaining at the 1949 level. He said, “Total dollars in radio should be increased slightly due to more intelligent and more intensified sales efforts, but the radio dollar (AM, FM, TV) will go in greater amounts to the better stations and networks, with possible decreases otherwise. More attention to operating costs should keep profits up. This area is diversified and growing in sales and population. Business should be good in 1950.”

John R. Bailey Jr., manager of KVOC Casper, Wyo., foresees no change in overall radio revenues but an increase in sales to the license, especially in the automotive and department store categories. He figures general business will be at the 1949 level. “We should do better,” he added, “as we are a comparative newcomer.”

Speaking for the J. G. Long stations (Long Texas Group), Bryan Powell, general manager, said general business in the Southwest Coastal Area will be “much better,” but competition will equalize any gains for the stations.

Representatives

George W. Bolling, president of the Bolling Co., station representative, expects a bigger revenue year overall, locally and nationally, with AM time sales going up 8.5% and TV 50%. Largest increases will come from drug, auto, TV, food and beverage fields, he believes.

General business will increase about 4% next year, he predicted, with radio operating expenses going up 6%.

G. W. Brett, vice president and sales manager of The Katz Agency Inc., New York, looks for an overall bigger year for radio in 1950. AM and TV will increase their volume, he thinks, and general business will improve. He points out, however, that “business will not bestow its favors evenly; they will vary with local economic conditions and competition,” adding that members of his firm are “bullish in our outlook.”

BMB Study

BMB’S REPORT of its second nationwide study of station and network audiences moved into the list of last week. BMB for the second time was forced to postpone the announced date for delivery of the subscribers and to members of the American Assn. of Advertising Agencies and of the Assn. of National Advertisers.

The report had originally been scheduled for publication around the first of December, that date being later postponed until Dec. 27. After delays in tabulation it was made another postponement necessary, Dr. Kenneth Baker, NAB director of research who is super-

Kirst’ by Butcher

HARRY C. BUTCHER, former CBS vice president and present president of NBC’s KIST, Santa Barbara, Calif., never misses a chance for a good promotion stunt. Mr. Butcher decided during the Yuletide season he should make use of the station’s antenna which towers over the city from atop the town’s tallest building. He ran up a wreath of mistletoe to the top of the mast “so the entire population can feel free to get ‘KIST’ for Christmas.”
CBS PHOENIX CASE
Boies Denies Signing Letter

L. C. BOIES, sheriff of Arizona's Maricopa County, did not sign the letter which carried the names of several local officials in protest against the CBS switch of its Phoenix affiliate, from KOY to KOOL, Broadcasting has been told.

A Dec. 22 telegram bearing his name said the "purported signature" on the letter "is not mine," that "allegations in [the] letter are not consistent with facts," and that "it [is] heartily deplores my name being used in such reprehensible and unauthorized manner."

The letter in question, sent out over the names of several local authorities, reportedly went to CBS affiliates throughout the country [Broadcasting, Dec. 19, 1949]. It said "your future is threatened." and warned that "if a deal' can be made in Phoenix, 'a deal can be made in your town.' Effective Jan. 1, CBS moved its affiliation from KOY, which feeds CBS programs to KTUC Tucson, to Gene Autry's KOOL and to KOPO Tucson, in which the CBS cowboy star has an interest as well as to KCKY Coolidge, the latter two on a "bonus" basis. KOY, KTUC and KUSN Bisbee, comprising the Arizona Network, meanwhile have signed with Mutual-Don Lee, also effective Jan. 1.

ANY resemblance between loss of blood and a network affiliation may be entirely coincidental but apparently that doesn't hold true at KTUC Tucson. Ariz. Lee Little, president and general manager, demonstrates fact that KTUC is switching from CBS to Mutual, while actually donating a pint of blood taken by nurse at the right. Meanwhile, Mr. Little may be musing whether the potential recipient of the blood will begin giving CBS cues, promoting that network or even become baldheaded. In any event, CBS moves its affiliation from KTUC to KOPO, in which Gene Autry holds stock. Affiliation was slated to become effective yesterday (Jan. 1).

NEW NARBA HOPE

HOPES for success in reaching a new NARBA treaty shot upward last week as Cuba, whose channel demands imperiled negotiations at Montreal last month, formally subscribed to the interim "status quo" policy of other nations.

At the direction of Cuban President Carlos Prio Socarras, this decree was issued by the island nation's Minister of Communications, Arturo Illas Cuza:

"In order to insure the successful conclusion of this conference (NARBA), it is essential that during the recess and until a new agreement is adopted, the nations abstain from any action with respect to the assignment of radio stations which would prejudice the future negotiations of this conference.

This includes the authorization of changes in the power or frequency of the new frequencies or the creation of new frequencies assignments that could have the effect of producing a greater number of interference stations in other countries."

U. S. State Dept. officials immediately launched plans to get U. S. preparations for the Feb. 1 U. S.- Cuban conference in motion. Initial meetings may be held this week. It was also recommended that the industry advisory delegation be permitted to attend the conference along with government delegates.

Cuba for 'Status Quo'

With the NARBA conference in recess until April 1, the U. S.- Cuban sessions are designed to work out an agreement on frequency assignments for Cuba. The far-reaching nature of Cuba's demands, affecting U. S. clear, regional and local channels, led to the current recess in the conference itself [Broadcasting, Dec. 5, 12, 1949].

Havana Meet

The U. S.- Cuban meeting will be held in Havana. FCC Comr. Rosel H. Hyde, who headed the U. S. delegation at Montreal, is expected to go to Havana in the same capacity, although no official announcement has been made.

Yet has there been any announcement of the place for the April 1 resumption of the full NARBA conference, except that it will be in the U. S.

While U. S. authorities appeared pleased by Cuba's "status quo" decree, the announcement did not make clear whether the status quo relates to Cuban assignments made prior to the expiration of the full NARBA conference, except that it will be in the U. S.

Mr. Streibert said: "Of course we are known primarily by the name WOR. The only purpose of the change in our corporate name is to make it more descriptive of our broadcasting and television activities." The change became effective the first of the year.

BOIES OUTLETS
KLAC-AM-TV Not for Sale

KLAC and KLAC-TV, Los Angeles stations owned by Dorothy Schiff, are not for sale, Mrs. Schiff announced last week. In a formal statement, she reported turning down two offers in excess of a million dollars.

"From progress reports of late, it appears that KLAC-TV will be one of the first television stations in a major city to strike the black," her statement said.

Declaring that it is her intention to remain in the television and radio business, her statement made no mention of KYA, but it is understood that the San Francisco station also has been withdrawn from the market.

Mrs. Schiff was known to have been negotiating for sale of the stations even after Warner Bros. withdrew as a buyer last Aug. 2.

The film company had offered $1,045,000 plus paying for the capital improvements of Warner Bros. and in TV as well as deficits resulting from operation. Entire deal reportedly came to approximately $2 million. It is further reported that news of Warner Bros. money went into operating KLAC-TV while the sale was pending. This sum was to have been included in the sale price. It is now owned Warner Bros. by Mrs. Schiff and is to be repaid over a four year period.

BAMBERGER CHANGE
Name Now General Teleradio

A CHANGE in the name of the corporation operating WOR New York from Bamberger Broadcasting Service to General Teleradio Inc. was announced Friday by Theodore C. Streibert, WOR president. The company also operates WOR-FM WOR-TV, both New York, and WOIC (TV) Washington.

In making the announcement, Mr. Streibert said: "Of course we are known primarily by the name WOR. The only purpose of the change in our corporate name is to make it more descriptive of our broadcasting and television activities." The change became effective the first of the year.

Jolliffe's Ratings

RADIO'S science's 10 major developments during the past 50 years were listed last Friday by Dr. C. B. Jolliffe, executive vice president of RCA Laboratories. They are: 1. wireless communication; 2. electron tube; 3. radiotelephone communication; 4. radio broadcasting; 5. all-electronic television; 6. facsimile radio-photo and Ultrafax; 7. radio navigation and direction finding aids—Longshoan, Telenavigator, S. radar; 8. radio remote control; 10. microwave radio relay systems.

Fort Industry Moves

THE FORT Industry Co. announced the removal of its headquarters offices on Dec. 28 from 500 New Center Bldg., Detroit, to 199 Pierce St., Birmingham, Mich. Telephone numbers are Birmingham 4760 (for calls from Birmingham and for long distance calls other than Detroit), and Jordan 4-5910. The Fort Industry Co. owns and operates WSPD-AM-FM-TV Toledo; WWVA-AM-FM Wheeling, W. Va.; WMMN Fairmont, W. Va.; WLOK-AM-FM Lima, Ohio; WAGA-AM-FM-TV Atlanta; WGBS-AM-FM Miami; WJBK-AM-FM-TV Detroit.
TULSA, OKLAHOMA ANNOUNCES THE APPOINTMENT OF

JOHN BLAIR and COMPANY

AS NATIONAL REPRESENTATIVES!

It takes a big, powerful station to cover a powerful big state like Oklahoma! KRMG, Tulsa, is ready to do the job, and reach plenty of neighboring territory to boot, with 50,000 watts daytimes, 10,000 watts nights. That’s plenty of power to bring a big audience outstanding local entertainment and popular ABC programs... the kind of fare that quickly makes loyal listeners that mean profitable sales for advertisers!

KRMG is now on the air. Under the able leadership of Robert B. Jones, Jr., KRMG is dedicated to put new life into Tulsa radio... by applying aggressive management methods... by bringing Tulsa and Oklahoma the best in live radio talent!

Your John Blair man is ready now with full information on KRMG, its markets, its programs, its availabilities. If you want sales in the rich Oklahoma market, ask your John Blair man about KRMG, today!
CLARIFICATION of Sec. 1.342 of FCC’s rules, requiring that licensees file with the Commission copies of management and bulk time sale contracts, is sought in letter to Guilford Jameson, president of the FCBA.

The FCBA letter indicated that widespread confusion has been evidenced as to interpretation of the rule and especially so since the publication of the Commission’s opinion in the WAPB Ponce, F. R., renewal case [Broadcasting, Oct. 24, 1949].

FCBA, on recommendation of its Committee on Practice and Procedure under chairmanship of Leonard H. Marks, Washington radio attorney, requested FCC to appoint a special committee to work with the FCBA group in attempting to resolve some of the ambiguities in the FCC rule.

The PCBA letter pointed out that “broadly interpreted, the provisions of Sec. 1.342 would require the filing of many papers and documents which may not be of any interest or concern to the Commission” and would entail “a tremendous amount of unnecessary work” on the part of both FCC and applicants.

In some cases, it was explained, this broad interpretation of the requirements of the rule “would result in a real hardship by making confidential business information available to competitors, employees and members of the public.”

According to the new interpretation of the WAPB ruling, the letter continued, every licensee or permittee who employs a manager must file a copy of any agreement covering his employment, must file agreements for the sale of two hours or more per day to the same purchaser, and must file all agreements relating to time sales to brokers for resale.

Interpretation of Management

Under the previous interpretation, the letter explained, use of the word “management” in the rule generally was understood to mean management agreements “such as the Commission has dealt with in the past, and not employment contracts.” Thus if the broader interpretation is correct, which includes the latter, why not also require filing of employment contracts for assistant managers, station managers, chief engineers and others who manage and operate stations, the letter queried.

It was further noted that such employment contracts under the new interpretation would be open to public inspection, including provisions for compensation. Likewise, detailed terms of pacts for sale of two hours or more to sponsors of sporting events such as baseball, etc., would be made available to competitors and others without just reason. The letter asked that if such data was actually needed by FCC, “consideration should be given to the desirability of treating these agreements as confidential documents in the same manner as network affiliation contracts.”

Another point of dispute in interpretation, the letter indicated, is whether contracts must be filed covering news and transcription services and music performance rights. Even FCC staff members have disagreed on this, it was said.

The letter explained the industry generally in the past has considered “bulk” time sales to distinguish ordinary time sales from bulk sales to brokers “who exercise varying degrees of control over the time involved.” The new interpretation appears to have broadened this definition, it was said.

Ralph Edgar

RALPH EDGAR, 29, WGR Cleveland announcer, died Dec. 22 at the city’s Huron Rd. Hospital following a two-month illness. He is survived by his wife, the former Isabelle Loomis, and a daughter, Lynne Ellen, 2.

Edward Sellers

Edward L. Sellers, executive director of FM Assn., prior to its merger with NAB, joins NAB this week as FM director. FMA last week was completing the dissolution process following action of its board in accepting NAB’s merger invitation [Broadcasting, Nov. 21, 28]. Arthur C. Stringer, who has been handling FM activities for the past year in connection with his other duties, is expected to work through the secretary-treasurer’s office, though President Justin Miller has not yet announced the exact form the realignment will take. Mr. Stringer devotes the three-month period prior to NAB conventions to staffing of the annual equipment exhibit, one of the nation’s largest industrial expositions.

Mr. Sellers joined FMA a year ago. Previously he had been with the Washington bureau of Associated Press. He is a graduate of Roanoke College and took post-graduate work in journalism at Washington & Lee. He was a naval aviator in World War II.

**TIME SALES**

**FCBA Urges Clearup In FCC Rules**

**EDWARD SELLERS Named NAB FM Director**

Mr. Sellers
Mitch on Record

RECORDED version of "Mitch’s Pitch" the sales-instigating talk delivered at the 17 NAB district meetings by Maurice B. Mitchell, director of Broadcast Advertising Bureau, is available at McKennon Recording Studios, New Oregonian Bldg., Portland, Ore. D. R. McKennon, studio president, said the "pitch" was recorded at the District 17 meeting held last month at Portland. It is available on tape or disc.

LEVER PLANS
Merchandising Staff Named

LEVER Brothers merchandising department organization in the firm’s new New York offices was announced last week by W. W. McKee, vice president in charge of sales for Lever.

The department will continue to operate under the direction of Frederie Schneller, general merchandising manager. Three assistant merchandising managers have joined Lever in New York. They are: James G. Gammell, former sales promotion manager for the Osborn Mfg. Co., who is in charge of merchandising for Surf, Lifebuoy, Swan and hotel sales; H. E. Wholley, formerly with Swift Co., who is in charge of Lux Toilet Soap, Lux Flakes, Silver Dust and Glycerine; A. C. West, previously with Standard Brands, who is in charge of Rinso, Spry, Breeze and bulk edibles.

The newly created Lever post of assistant merchandising manager for copy and art is held by Julian Bers, formerly with Federal Advertising. William B. Bisker, previously with DuPont Co., has been named merchandising office manager.

Mr. Schneller and the assistant merchandising managers are located at Lever’s temporary quarters, 80 Varick St. in New York. Mr. McKee is at the company’s temporary executive headquarters at 608 Park Ave.

KENT ESTATE
Value Exceeds $9 Million

Estate valued at $9,130,971.11 was left by A. Atwater Kent, radio manufacturer and philanthropist, according to first accounting recently submitted by executors to Los Angeles Superior Court. Executors are now holding $4,004,921.67 cash, $5,116,153.94 in stocks and bonds and $8,896.10 in sundry assets, they stated.

Almost $5 million was left in his will to friends, employees, charities and educational institutions by Mr. Kent, who died March 4, 1949. To his widow, Mable Lucias Kent, he left $2 million in cash and income from 20% of stock of Atwater Kent Mfg. Co.

ELWELL URGES CONTINUED COOPERATION

BROADCASTERS are not now required to obtain a CAA facility certificate for their antenna towers but they may stir up legislation imposing such a requirement unless they continue to cooperate with the agency, according to CAA General Counsel R. E. Elwell.

In a letter to Arthur W. Scharfeld, Washington radio attorney who had posed the question [Broadcasting, Oct. 31], Mr. Elwell wrote:

"While the present law does not require radio antenna tower owners to obtain a facility certificate, once the FCC has granted the owner a lawful right to operate air navigation or obstruction lights on the tower, the CAA has in the past received the full cooperation of the owners of such towers.

"It is to be hoped that this spirit of cooperation, for the common welfare, will continue. If the Administration finds, in the future, that lack of cooperation on the part of such owners and operators creates a situation that is detrimental to air commerce, legislation will, in all probability, be sought to require that all such towers be lighted in accordance with CAA standards and that owners thereof secure certification of such lights as air navigation facilities.

"On behalf of a client, Mr. Scharfeld had written the CAA that he found no law requiring a broadcaster to file an "application" form received from CAA. The application was ACA Form 114, entitled "Application for Rating of Air Navigation Facility and Lawful Authority to Operate a True Light."

"Under the circumstances, in view of the obligations imposed by the filing of ACA Form 114, I am of the opinion that my client should not apply for something that it doesn’t need, although we should be willing to file the information called for in the application form," Mr. Scharfeld wrote.

He said that on the basis of earlier communications with the agency he was advising the client to file the other form sent out by CAA—ACA Form 117, "Notice of Construction or Alteration of Structures, or Construction of New Landing Areas."

CAA authorities have explained that for years they have sent these forms to stations which get FCC grants for antenna structures requiring use of 300-millimeter flashing code beacons. Their purpose, they said, is to permit CAA to certify the light as an air navigation facility upon which pilots can rely in flight.

SPECIAL Treasury Dept. citation for promoting sale of U. S. Savings Bonds presented to WIOD Miami, Fla.

TWO CITIES—SOUTH BEND AND MISHAWAKA—ARE THE HEART OF THE SOUTH BEND MARKET

The city of Mishawaka begins where the city of South Bend ends. They are separated only by a street. The two cities form a single, unified market of 157,000 people.

Be sure to count both cities when you study this market. It makes a big difference. Here’s how: in 1948, South Bend ranked 90th in the nation in food sales, with a total of $36,129,000. But when Mishawaka’s 1948 food sales are added, the total becomes $45,385,000—and South Bend-Mishawaka jumps to 69th place! A similar picture is reflected in all other sales categories in this two-city market.

Don’t forget, either, that South Bend-Mishawaka is only the heart of the South Bend market. The entire market includes over half-a-million people who spent more than half-a-billion dollars on retail purchases in 1948.

And only WSBT covers all of this market.

FIFTY THOUSAND WATTS OF SELLING POWER
Follies of 1949

THE SATISFACTION with which an informed listener may think back upon the programs offered by network radio in 1949 will be to some extent diluted by a glance at current popularity ratings. It is quickly to be seen that with some exceptions the more popular programs of 1949 were also the more popular programs of 1948.

The obvious conclusion is that if new programs were created in 1949, most of them were either inadequate to attract large audiences or, assuming they contained potentials, were abandoned before having a chance to draw a crowd. 1949 was a year in which it could have been logically expected that new program ideas would be vigorously cultivated in radio, for television for the first time became a contest for the audience in some 50 markets. The fact that most of the “new” only upon the surface of the myst within the long established formats — mysteries, for an outstanding example — could be taken to mean that a large part of the creative energy in the business was being turned away from radio and toward television.

There is little doubt that television has evoked widespread interest among writers, directors, and actors who have heretofore concerned themselves with radio or with stage or films. The fact that many who have been accustomed to the high pay of more established mediums have been willing to work for television at relatively modest rates is a clear indication of the degree to which video has aroused their professional curiosity.

In 1949, television programming on the whole showed the results of this creative interest. There was a freshness and inventiveness in a satisfying proportion of television fare — enough to stimulate hope that further experimentation would adduce a healthy art form.

Television, however, is confronted with a greater danger of falling into mediocrity than radio ever was. The inordinate demands that television imposes upon its program producers and participants are very easily the creative strength at its disposal. To some degree this already has been manifest.

For example, one format that has been in increasing use in video is the mystery, for which the supply of story material is greater than for other dramatic formulas. Mysteries have flourished in such abundance that some television station owners have been obliged to protest to the networks originating them. The protests have been based not only upon the number of the puzzles, but also upon the questionable taste of some of them.

Programming for radio and television is still programming for the American home. There is going to be a fierce fight for the attention of the home audience. The fight can produce imaginative programs in good taste or repetitious formulas of improper standards.

Broadcasters have a good programming record, as attested by the volume of radio and television receiving set sales. We believe the record will be maintained by those broadcasters and telecasters — by far the majority — who know that it is good business to air good programs.

Smile When You Say That!

RADIO'S ROCKY ROAD in the area of libel and slander jurisprudence becomes more tortuous with TV's advent as a mass medium. In New York, Federal Judge Conger has ruled that defamation ad libbed via TV is slander rather than libel. In the particular case before him he went even farther, and ruled that it was "slander per se" and therefore actionable. The case involved a charge in 1948 by Elizabeth Bentley, the Un-American Committee star witness, over NBC-TV on a program sponsored by General Foods, that a Government official was a Communists.

Thus, the ruling broadens the body of law which has placed the sound broadcaster in what was once described as the "dilemma of self-destruction." It's not only what you say on TV, but how you say it. A leer with a voice inflection could bring more in damages. A smile, conversely, might mitigate them.

The Conger decision once again points up the need for explicit Federal legislation to save broadcasters and telecasters harmless from libel uttered over their facilities by candidates for public office. A licensee now has three alternatives: (1) he can accept a political talk, without censoring it, and run the risk of suit in which he cannot win; (2) he can obey state laws which forbid him to broadcast defamation and risk his license at the hands of the FCC; (3) he can exercise his prerogative to forego political broadcasts altogether, for which he might be ruled to do the public service job he would like to do, and at the same time forego the revenue.

And that's only part of it. In addition to political broadcasts, what does children inadvertently happen to someone, while in the program's ad libbing?

The courts repeatedly have held that radio is a field preempted by the Federal Government as interstate commerce and therefore isn't subject to state jurisdiction. We hope the next session of Congress gets around to legislation that will allow the broadcaster and telecaster to lead reasonably normal lives beyond those calculated risks indigenous to this business in which there's never a dull moment.

Cuba's Olive Branch?

SOMETHING has happened again in Cuban radio. President Carlos Prio himself has stepped into the NARBA controversy. Through his Minister of Communications, Arturo Illas, he has decreed that, pending a new NARBA agreement, nothing be done that would augment or produce interference to stations in other countries.

That can be viewed only as a conciliatory gesture in the direction of the U.S., which has been reprimanded from Cuba via indiscriminate censorship on our clear and regional.

It is not plain from the context of the decree whether this means an immediate return to allocations which existed prior to last March 29, when the NARBA treaty expired. It is clear, however, that Cuba's highest echelon wants no acrimonious ether war.

So it appears the NARBA problem is not insoluble. The State Department already is making plans for the preparatory sessions to begin next week in advance of the Feb. 1 meeting in Havana and prior to resumption of the NARBA conference itself on April 1 in the United States.

We hope that Cuba does return to the March 29 status quo, so conversations can start from diplomatic scratch.

Our Respects To—

CLAUDE ERNEST HOOPER

E. HOOPER, a name that has become practically a common noun signifying the audience appeal of a radio program, did not enter the field of program ratings of his own free will, but at the insistence of the publishers of the country's biggest national magazines.

It all began in the fall of 1934, six months after Mr. Hooper and L. M. Clark had left Daniel, Bickel & Staff to set up their own market research shop, specializing in magazine readership studies. The magazine publishers were extremely concerned over the emigration of many of their best advertisers to network radio.

They felt that the claims of all networks of the whole audience of 20 million radio families at all times needed some deflation. Cooperative Analysis of Broadcasting, functioning under the joint auspices of the Assn. of National Advertisers and the American Assn. of Advertising Agencies, declined to release their ratings to a competitive medium, so the publishers asked Clark-Hooper to provide them with a reasonable facsimile of the CAB service.

Loath to turn down good customers and prospects, Clark-Hooper's President Hooper was even less willing to have anything to do with the recall technique then used by CAB.

"It's more of a reflection of the frailties of human memory than a measurement of listening," he informed the startled magazine men. "I'll do your radio survey," he added, "but I'll do it my own way."

The Hooper way was — and is — the coincidental method of asking people what they are listening to while they are listening. This technique, he explains today as patiently as if he had not explained it thousands of times before, gives memory no time to go wrong: it gets from a listener a report of his own behavior at the time, not a delayed report of the radio habits of the whole family; it is akin to a measurement of advertising effectiveness because in counting a program's listeners it counts the only people that program can possibly influence; finally, it permits the use of the telephone for interviews, providing more interviews at less cost per program period.

The magazines contracted for six-monthly surveys, each to cover listening in the 16 cities of the networks' basic areas — the northeaster and the northeaster states — from 7 to 10 p.m., seven nights a week, one week in each month. Clark-Hooper reserved the right to distribute copies of each report to other interested parties and most of their profits on the job went for getting these copies to advertisers.

BROADCASTING • TELECASTING
CONFLUENCE*

where the CONFIDENCE of millions meets the INFLUENCE that sells!

The wholehearted CONFIDENCE of the world’s richest and largest Italian market and the INFLUENCE of the station that has been part of the fabric of their lives for so many years form one great potent force that results in sales.

True enough, you speak to over 2,100,000 listeners with active buying power. But far beyond these statistics is the greater strength that makes your sales message a compelling force. It is the trust, the respect and the deep affection of these families for WOV.

It is all this CONFIDENCE plus WOV’s great INFLUENCE that gives you CONFLUENCE — the plus delivered only by WOV.

Respects

(Continued from page 32)

and agencies.

When the six months had ended, both sides were satisfied. The magazine had sufficient information to prove that the total radio audience was divided among the various networks and stations, with no one getting all the listeners. Enough advertising executives had indicated a willingness to pay for a continuation of the radio reports to persuade Clark-Hooper to keep them going.

And they've kept going ever since, adding hours and cities as the networks expanded, but retaining their pristine basic character, measured by the comparative audience attraction of competing network programs for listeners in cities where the programs of all four networks are equally available.

In 1938 Clark-Hooper was dissolved and C. E. Hooper Inc. took over the radio audience measurements. It is significant that most of the Hooper executives are still with him, comprising two-thirds of the corporation's officers and directors today.

Makes Pacific Presentation

The next milestone in the Hooper history was an invitation to attend the Pacific Coast AAAA's fall meeting in Del Monte, to present a plan for Pacific Coast sectional radio reports. Representatives of four companies—Crossley Inc., which collected and compiled the data for CAB; Ross-Federal and Hooper-Holmes, who had made surveys for individual stations, and the Hooper firm—were given an hour apiece to present their plan to a committee of 28 members, representing stations, networks, station representative firms, advertisers and agencies. Mr. Hooper left a hospital bed where he was recovering from pneumonia to make his pitch, returning to bed immediately afterwards. His convalescence was appreciably aided by the news that the committee had unanimously selected his plan.

Presenting his first Pacific Coast report in December 1939, Mr. Hooper was somewhat discomfited when the Los Angeles broadcasters told him the report was fine for the Pacific Coast networks but not much good to the stations and he should please get out a city report for them, showing the division of audience among all stations serving Los Angeles. When he told them it couldn't be done they told him they would provide the service and to go home and work it out.

Three months later he was back with the first City Hooperings Report, managing a service which today covers more than 100 markets, including Hawaii, and there's an invitation to get it started in Bermuda which Mr. Hooper hasn't yet found time to accept.

That first City Report, by the way, was a single chart which when spread out was about the size of a desk blotter but was multifaceted to fit easily in a man's pocket—the first step toward the Pocket Piece which today is as much a part of the radio newsman's impedimenta as his rate card and fountain pen.

The word "Hoopering," incidentally, had not been born at the time of that first City Report. The term, today as ubiquitous as American radio itself, first appeared on a tablecloth in New York's Hotel Marguerie, when Paul Warwick—Warwick & Legler, with whom Mr. Hooper was lunching, objected to the length of the answer to his question: "What do you sell?"

At about this time, the Hooper organization was retained to tabulate and compute the postcard returns of NBC's first All-County survey, a job that gave them an understanding of coverage measurements that has been the source of area reports of various types. From it have also stemmed the various Hooper proposals for industry-wide coverage studies which began before BMB was established and are still forthcoming. The most recent, sent to the BMB board in November, recommended that BMB continued in its present form, but that it achieve a "higher standard of precision" for its measurements by adopting the Hooper Area Coverage Index technique.

Fast-Thinking Pays Dividend

Mr. Hooper's aggressive salesmanship and the growing acceptance of Hooperings inevitably clash with the CAB, which, like the most non-professionally run operations, was slow to meet the daunting competition of this fast-thinking, fast-acting individual entrepreneur. Prodded by advertisers and agencies, whom Hooper had convinced, CAB dropped its recall technique for the coincidental method pioneered by Hooper. Immediately the users of these reports began to wonder why they should pay two organizations to do the same job. Wonder led to talk, to action, and in July 1946 the CAB suspended operations, after arranging for C. E. Hooper Inc. to

WHY TAKE SECONDARY COVERAGE of Virginia’s First Market?

Regardless of claims, if you’re trying to cover Greater Norfolk from the outside, nature’s terrain made it impossible.

Only Greater Norfolk stations can cover it. And only WSAP can cover it at lowest cost.

Available advertising rates from Ra-Tel will prove it. WSAF..."solving advertising problems" in Virginia’s First Market.

Management

H OWARD S. MEGHAN, CBS vice president and general executive, is in New York for three weeks. During that time he attended the network conferences and year end meetings.

A. M. (Vic) MORGAN, president and general manager of WJNY, Lowell, Mass., for two years, has been with the radio industry for 30 years.

DICK CAMPBELL, general manager of KOME-Tulsa, OK, and appointed publicity chairman for Tulsa Chamber of Commerce in 1950.

JOHN J. ROHRER, commercial manager of KTRY-Bastrop, La., named manager of KTRY branch studios in Monroe, La.

J. A. (Archie) MORTON, general manager of KXJZ, Minneapolis, appointed radio chairman for March of Dimes campaign in Washington State.

S. R. SAGUE, president of WSBS Cleveland, presented with citation plaque from Cuyahoga County Council of VFW for station’s cooperation in producing weekly series of VFW programs.

FRED RABELL, manager of KSON San Diego, is confined to his home recovering from a heart attack.

SIG MICKELSON, director of public affairs and production manager at WCCO Minneapolis, given leather portfolio for distinguished service by Minneapolis Chamber of Commerce.

Mr. Mickelson becomes director of the Discussions Div. of CBS Jan. 18.

ERNEST LEE JAHNCKE, ABC vice president in charge of station relations, is the father of a boy, Redington Townsend, born Dec. 27.

Mrs. Maurice Barrett

ANNA BARRETT, wife of Maur-ice Barrett, WPAF Paterson, N. J., program director, died Sunday, Dec. 18, at her Washington Heights home after an illness of seven months. Mrs. Barrett had been known on the stage, from which she retired in 1927, as Anna Bernardi.
fill the balance of its unexpired subscriptions.

After such a victory some men would have been content to rest on their laurels, but not Claude Ernest Hooper. He was born May 31, 1898, in Kingsville, Ohio, into the family of a Baptist minister more interested in saving souls than dollars. Young Claude soon realized that whatever went into his pockets would go there through his own efforts. At nine, he launched his first business venture, hiring a man to grind horseradish for him each Saturday morning and spending the day taming two huge bucks in the fresh con?d?ment from door to door, selling it to housewives at 10¢ a cup. If business was good he’d swagger home with as much as $4 in his pocket. “I’ve never been so rich since,” he says with a rueful smile.

After working his way through high school in Chicopee, Mass., Mr. Hooper donned a d'oughboy’s khaki suit. Discharged a year later, he entered Amherst and coincidentally became a salesman of aluminum ware, with such success that he sold 15,000 kit sets. At 15 he was set to training other student salesmen. This extracurricular activity not only carried him through Amherst (AB, 1921) and the Harvard Graduate School of Administration (MA, 1923), but also financed his sister’s education.

Headed West

Following the advice of Horace Greeley and the footsteps of Emily Judson Reed, who had attended Smith while he was at Amherst, Mr. Hooper went west all the way to Yakima to go to work for Miss Reed’s father in the Liberty Savings & Loan Co. A year later he returned east to become advertising manager of the Harvard Business Review, but in 1927 went back to Yakima to change Miss Reed’s name to Mrs. Hooper. Their daughter, Mary Stuart, 18, is now a freshman at her mother’s alma mater.

In 1926 Mr. Hooper moved to Scribner’s Magazine as advertising manager, leaving three years later for an account executive’s berth with Doremus & Co. In 1931, with the depression setting in, research seemed a more salable commodity than financial advertising, so he joined forces with Daniel Starch, under whom he had worked at Harvard, who was then in business in New York. In 1934, Mr. Hooper and Dr. Starch disagreed about technical considerations, and Clark-Hooper was formed.

While braving with CAB, Mr. Hooper had been working to meet the demand for rating figures projectable to all U. S. radio homes. During the war, two figures were issued with ratings projectable to the 80 cities with populations of 25,000 or more and in January 1948 the first U. S. Hooperating appeared.

A month later the Hooper organization began publishing monthly New York City Teleratings, measuring TV audiences on the nation’s first video market. Plans called for a national TV report to start in October 1949, but the rapid spread of TV across the country brought so much pressure and coverage outside New York that the date was advanced to May.

Expense in Television

Like other video pioneers, Mr. Hooper found the expenses of his TV service far in excess of its income, making some belt-tightening necessary. By the end of the year, however, he could report that, after only six months, TV-Network Hooperating subscribers were contributing one third of its total revenue from all network programs. As much as the income from the 15-year-old AM network reports.

Looking to the future, C. E. Hooper foresees the need for more information on the impact of advertising, particularly in view of the costs of television, far above those of any other medium. Accordingly, in November, he launched this new, two-page, weekly Impact Rating. He also is gearing his organization to deliver more frequent and more detailed local reports—and to deliver them faster than ever before—in response to anticipated demands for information about the effect of television on a city’s listening and buying habits and the differences between TV and non-TV communities.

Of medium height and build, his brown hair well mixed with grey, Mr. Hooper gives the impression of inexhaustible vitality. His handsomely designed normally wear a smile that seems to say “Everyone is my friend, especially you.” He is always intent on the business at hand, whether he’s doing the talking or the listening. To meet him once is to understand why he is famed as “the best salesman in the whole research field.”

An avid outdoor man, Mr. Hooper can be found skiing in Vermont, shooting pheasant in South Dakota or flying casting in a mountain stream whenever opportunity offers. He commutes to New York from South Norwalk, Conn. His clubs are: Harvard, Players, Amherst (New York); Tavern (Chicago); Bohemian (San Francisco); Shore and Country (Norwalk); Tokeneke (Darien); Fly Fishers (Roscoe, N. Y.). He is a member of American Marketing Assn., Market Research Council and Delta Tau Delta.

**KRMG TULSA**

Kerr at Dec. 23 Debut

KRMG Tulsa, Oklahoma’s third 50 kw station, officially began operation Dec. 23 amid impressive ceremonies highlighted by the appearances of U. S. Sen. Robert S. Kerr (D-Okl.), principal owner, and station and civic officials.

KRMG is an ABC affiliate, licensed to All-Oklahoma Broadcasting Co. and beginning full time on 740 kw with 50 kw day and 10 kw night, directionally. Construction and engineering work was completed in mid-December, four and half months after ground was broken [Broadcasting, Aug. 8, 1949].

Robert B. Jones Jr., KRMG general manager, reported fine reception on the station’s signal from throughout Oklahoma, Missouri, Kansas and Texas.

Sen. Kerr, introduced by Cal Finney, famed columnist, entertainer and story-teller, told listeners that the “amazing miracle of modern radio has done more than any other agency to bring the ancient U. S. Sen. Robert S. Kerr touch with one another.” He outlined KRMG program plans which he said would take heed of the interest of the “rank and file.”

KRMG uses an RCA BTA 50F1 transmitter with low-power consumption tube. Control rooms are equipped with flexible control system built by RCA and all studios and control rooms are designed for diffusion of sound.

McIntosh and Inglis, consulting engineers, handled technical preliminaries for KRMG, using two helicopters to more re the station’s field strength [Broadcasting, Dec. 12, 1949]. Use of the helicopters in adjustment and measurement of the KRMG antenna system resulted in a saving of six weeks’ time, according to the station.

All-Oklahoma Broadcasting Co. comprised several stockholders of WEEK Peoria, of which Sen. Kerr is president, and includes among others D. A. McGee. Sen. Kerr and Mr. McGee head Kerr-McGee oil properties in Tulsa.
qualifications of applicants and licensees involved in anti-trust decisions— a point on which applications of major motion picture producers and others are being held up.

Another is the National Assn. of Radio Station Representatives' complaint against networks representing affiliates for the sale of spot advertising, on which hearings were completed last January.

The Commission also has made it clear that it thinks it’s past time for another full-fledged network investigation, though inadequate funds and the demands of other business haven’t permitted it as yet. There has been speculation that FCC would ask Congress for a probe appropriation in 1950.

FCC also has before it a long-pending proposal to revise the multiple-ownership rules, on which hearings were wound up in late January 1949, and an even older plan of a proposed reorganization program at least 51% of its air time from the city in which its main studios are located.

There is also a possibility that 1950 will see a major FCC staff reorganization. Plans have been detailed to the Civil Service Commission. They envision a functional reorganization into four bureaus: Broadcast, Safety & Special Services, and Field Engineering & Monitoring [CLOSED CIRCUIT, Dec. 12].

A review of 1949 policy decisions finds these actions in the lineight:

1. Repeal of the Avco Rule requiring that competing bids be invited when stations are up for sale [BROADCASTING, June 13].

2. Reversal of the long-standing “Mayflower Decision,” thus giving licensees the right to air their own views provided they treat advocates of differing viewpoints with “fairness” [BROADCASTING, June 6].

3. Adoption of a rule banning giveaway giveaways. [BROADCASTING, Aug. 22], though the rule was subsequently suspended pending outcome of current court tests.

Court decision could be forthcoming in 1950.

4. Realignment of FCC procedures, including institution of a separation-of-functions system [BROADCASTING, June 6].

6. By most standards the most complex problem tackled by the Commission in 1949 was television. Though the study had been set in motion in late 1948, the full agenda was not formulated and made public until mid-1949.

Involving color, prospects for use of UHF, revision of standards, a proposed VHF-UHF allocation and many corollary problems, the proceeding got under way with hearings on the color question in late September.

The color proceedings continued into November, are due to resume in late February, and seem unlikely to be completed before Spring. Then the other TV problems must be approached. The VHF licensing freeze meanwhile is still in effect and, most observers agree, seems likely to continue until fall at least.

The NARBA Question

Another major 1949 problem which remains is NARBA of old expiration March 29. Conferences looking to the formulation of a new one got underway in Montreal in September and continued until U.S.-Cuban impasse was reached on far-reaching Cuban channel demands. The State Dept. rejected Cuba’s proposals and the conference broke up early this month to resume April 1 in the U.S. after U.S.-Cuban negotiations starting in Havana Feb. 1.

In the field of new-station applications, FCC in 1949 continued to withhold approval, assisted by a slower pace of new filings.

Applications for new AM stations stood at 329 on Dec. 15, 1949, as compared to 554 a year earlier. The number of these in on-going hearing dropped from 283 to 266.

FM applications are described as “current.”

The number was 86 a year ago and in mid-November was 49, of which 28 are in hearing as against 31 in December 1948.

Television applications naturally are on the rise, since the Freeze was in effect throughout 1949. There were 311 on file in mid-December 1948 and 353 a year later. The number of these in hearing is the same—182—for FCC has designated no new hearing cases since the freeze was imposed in late September 1948.

LIQUOR ADS

Treasury Officials To Appear At Senate Group Hearing

OFFICIALS of the Treasury Dept.’s Internal Revenue Bureau are expected to appear as initial witnesses Jan. 12 before the Senate Foreign Commerce Committee. Legislators prepared to converge on rarily abandoned), is one of the first sessions touching on radio and communications, is slated for the second session.

Others include probe of lobbying activities, and broad review of the Communications Act, indicated by Nation & State & Foreign Commerce Committee [BROADCASTING, Dec. 26, 1949].

Meanwhile, top Congressional members have indicated the past fortnight that Congress will lump together annual funds for FCC, FTC and other independent agencies with those for other government branches before either house votes on appropriations measures.

Subcommittees would continue to act on budget requests but they would be correlated in one “package” before House and Senate Appropriations Committees.

LINCIONTON AM

FCC Proposes Denial

INITIAL decision reported by FCC Thursday to deny application of Carolina-Piedmont Broadcasters Inc. for a new AM station at Lincionton, N.C., to operate on 1080 kwh with 1 kw day.

Hearing Examiner Basil P. Cooper found that the applicant had failed to present satisfactory evidence or exhibits to show that the proposed station would operate in conformity with FCC’s rules and standards and would not cause interference to WWGP Sanford, N. C. No adequate showing has made either regarding areas and populations to be served within the several contours of the station, the report found.

Carolina-Piedmont is composed of Dr. L. A. Crowell Jr., president 28.04%; Dan Boyd, vice president and part owner Glenn Mills Inc., vice president 3.74%, and R. S. Reinhardt Jr., insurance, secretary-treasurer 3.74%. There are 18 other stockholders.

KCBQ San Diego joins Southern California Broadcasters Assn. Group now has 47 members.

Small Space—Big Story

Grand Rapids, Michigan

BROADCASTING * Telecasting
Paramount
(Continued from page 20)

50% interest in Paramount Richards Theatres Inc., a subsidiary theatre operating firm which in turn is the 50% owner of WSBM Inc. United Paramount Theatres is to acquire the other 50% interest in Paramount Richards for about $3,500,000 from E. V. Richards Jr.

The reorganization plan presented the court specified that these various transactions were to take place on and between Dec. 31 and Jan. 3. It was for this reason prompt FCC action on the station transfers was sought.

DuMont's Status

It is proposed that Paramount's 20% interest in Allen B. DuMont Labs., television manufacturer and operator of WABD (TV) New York, WTTG (TV) Washington and WDTV (TV) Pittsburgh, is to be included within the new Paramount Pictures Inc., as likewise subsidiary Paramount Television Productions Inc.'s KTTLA (TV) Los Angeles.

Each of the two new Paramount firms would be allowed to own five television stations under FCC rules, whereas Paramount now has that maximum if the Commission were to make final its proposed finding that the film company controls DuMont. DuMont has TV applications pending for Cincinnati and Cleveland in addition to the three stations it operates.

Concerning its refusal to act immediately on the transfer requests, the Commission noted that Paramount stated "that the stock transfer must take place on Jan. 1 or 3, 1950, pursuant to the court decree, that it has not been possible to file these applications at an earlier date, and that if the Commission cannot determine whatever issues are involved in these transfers prior to Jan. 1, 1950, that the Commission grant the applications subject to such later considerations and determinations as the Commission might make." To this FCC added: It is noted that you characterize the transfers covered by these applications as involuntary. We do not understand that the consent decree adjudicated the specific transfers for which applications have been filed with the Commission. Nor do we understand that the transferor was adjudged liquidated as of Jan. 1, 1950; but that such sale was chosen voluntarily by the transferor in its reorganization plan filed with the court.

Further, the Commission does not understand the District Court decree to deprive the Commission of its responsibility under the Communications Act to pass upon the qualifications of the transferee to be a licensee of the Commission.

The Commission is unable to process these applications in sufficient time to make a decision thereon prior to Jan. 1, 1950, as you requested. The Commission will consider the transfer applications on their merits as soon as possible in the light of the problems involved therein.

Officers of United Paramount Theatres include the following:

Leonard H. Goldenson, vice-president of Paramount Pictures in charge of theatre operations, president and director; Walter W. Gross, general counsel of Paramount Pictures theatre department, vice president, director; the late William H. O'Brien, secretary of Paramount Pictures, secretary-treasurer and director; J. L. Brown, assistant to the treasurer of Paramount Pictures, assistant treasurer; Simon B. Siegle, controller of Paramount Pictures theatre department; John A. Coleman, member Adler, Coleman & Co., stock brokerage, director; E. Chester Gersten, president of the Public National Bank of New York, director; William T. Killborn, president of Flannery Bolt Co., Bridgeville, Pa., director; Walter Marshall, president of Western Union Telegraph Co.

As of Oct. 31, 1949, Mr. Goldenson was reported owner of 1,100 shares individually and of 700 shares jointly with his wife of Paramount Pictures.

NAMES BIDDLE
To Advise Defense Trust

NATIONAL Security Resources Board has named Eric H. Biddle, State Dept. official, as consultant on civil defense planning. Appointment was made last Wednesday by John R. Steelman, presidential assistant and acting chairman of the board.

CBS
(Continued From page 20)

Chicago and assistant general manager of WBBM.

Mr. Mickelson joined WCCO in 1943 as a consultant in establishing a new department and became WCCO news director in June of that year. In 1946 he became director of news and special events public affairs and production manager. He is a past president of the P. N. E. in 1948 was made director of National Assn. of Radio News Directors.

Taylor Joined in '33

Mr. Taylor joined CBS in 1933 as an announcer and entered the network's production department later that year. In 1937 he became director of the CBS music division and a few months later became assistant to the vice president in charge of broadcasts and shortly afterward assistant director of programs.

In 1944 he became chief of the radio section of the Psychological Warfare Division of SHAEF, succeeding to Jig William S. Paley, then president and now chairman of CBS, in the post.

In 1945 Mr. Taylor rejoined CBS as director of programs and before the end of the year was elected vice president and director of programs. When Mr. Robinson was hired for that job in 1947, Mr. Taylor became vice president and director of public affairs.

AGENCY EXPANDS
Cecil & Presbrey Adds 12

WITH acquisition of the Electric Auto-Lite Co., Toledo, account, a nearly $3 million advertiser, Cecil & Presbrey, New York, will add at least 12 new executives. All are former employees of Newell-Emmett Co., which previously held the account and which dissolved a fortnight ago to become Cunningham & Walsh.

T. J. Maloney, partner of Newell Emmett, had previously been announced as joining Cecil & Presbrey. The account executive on Auto-Lite will be Frank Gilday, who held the same post at Newell Emmett. Mr. Gilday had been associated with Newell-Emmett since 1942 and before that was with Mr. Maloney in the latter's agency.

The new television director at C&P, George Foley, joined Newell Emmett's public relations department in 1946. In 1947 he was named an account executive and when the agency organized the television department in 1948, Mr. Foley was called on to head that operation.

Auto-Lite sponsors Suspense on CBS-TV, Tuesday, 9:30-10 p.m.

May Use Radio

R AILWAY Express Agency, New York, has appointed Fuller, Smith & Ross, New York, to handle its advertising effective Jan. 1. Radio may be used.

The Answer to a Disc Jockey's Prayer . . .

by DAVEN

It is now possible to minimize the chance for human error in program control work. The Daven Company has once again pioneered in the field of audible communications controls, and developed a foolproof Miniature Switch. This type*, SW-1000, is a notebly compact, low voltage, low current control. It is a cam operated single pole double throw switch, with an Off position in the center. An outstanding feature of the SW-1000 is that it may be obtained on standard Daven attenuators without increasing the overall dimensions.

This switch may be used to:

- Operate a relay which can start a turntable movement.
- Function as a cueing control.
- Control indicator lamps.

This switch is rated at 1 Amp.—48 Volts. Available on Daven A-360 Under Desk & Pedestal Attenuators.

*Pat. Pend.

For further information write to Dept. BD-3
In the Public Interest

[Editor's Note—In The Public Interest this week is devoted to Christmas public service activities reported last week by stations at the conclusion of their holiday efforts. A rundown of other Christmas promotions and programming was in Broadcasting, Dec. 19, 1948.]

KFH Fetes Children
On Christmas Eve, 1,500 underprivileged children in Wichita, Kan., were guests at the first annual Christmas program and party jointly sponsored by KFH and KFH-FM, the Salvation Army and the Wichita Amvets. The party, a good portion of which was broadcast, ran from 2 to 4 p.m. Candy, nuts, fruits and toys were donated by the local merchants and collected by the Amvets for distribution during the party by Santa Claus. On the two Saturdays preceding the big Christmas party, a two-hour show was held for adults and children. Admittance to this show, called the "Christmas Neighbor's Club," was obtained by canned or preserved "good stuffs" which were turned over to the Salvation Army.

Goodwill Gesture
An international gesture of goodwill that featured two stations plugging each other's programs and brought joy to a 5-year-old burned boy and a 9-year-old orphan girl was offered by WTOP Washington and CJCH Halifax, Nova Scotian. All Christmas week, late-night listeners heard Gene Klavan of WTOP and Norman Riley, CJCH disc jockey, collect Christmas greetings and toys for the two children. Mr. Riley told Mr. Klavan he had heard about the injured Washington boy, Mike Rector, and asked the Washington announcer if Christmas greetings collected in the Maritimes for Mike, could be sent him via Mr. Klavan. Agreeing to this, Mr. Klavan said he'd like to return Canada's kindness. He was told that Marjorie Dobbin, orphaned since she was two and a hospital case all her life, was coming home for her first Christmas to St. Joseph's orphanage in Halifax. The Washington announcer saw to it that Marjorie received 87 presents and 100 cars.

Aids Salvation Army
WHHH Warren, Ohio, aided the Warren Christmas Charity Shows Inc. with gifts for the area's needy which were distributed by the Salvation Army. On Dec. 16, a four-hour disc show was aired. The disc spinners were recruited from among the area's most prominent civic leaders, business and professional men who asked each listener to pledge a sum for gifts for the needy. Both the station and the Charity Shows Committee reported results far beyond expectations.

WTAG Helps Girl
In Worcester, Mass., a 20-year-old girl named Arlene was assured of having a specially constructed artificial arm after one announcement during the five-a-week "Letters to Santa" feature on WTAG-FM's "Julie's 'n' Johnny" program. Miss Chase read a letter from Arlene, a cardiac case whose left arm had been amputated because of blood clots. Julie and Johnny returned to their office to find pledges totaling $250, just 10 minutes after they'd signed off the air.

WLS Neighbors Club
Again this year, WLS Chicago's Christmas Neighbors Club was active in solicitation of funds from listeners for purchase of children's hospital equipment. Contributions amounted to about $40,000—the yearly average since 1946. In the 14 years since the club was organized by WLS staff members and Dr. John W. Holland, Midwest listeners have given over $10 million dollars.

Patients Remembered
Exceeding all expectations was the Christmas Card campaign conducted in Havre de Grace, Md., by WASA's Dick Jockeys Norman Wain and Dick West. Listeners were asked to send in cards which the station would then distribute to patients in local hospitals who otherwise might not receive one. When it became evident that there would be more than enough cards to go around, the campaign was altered to have listeners send greeting cards which would help to brighten hospital wards during the holiday season. Over 2,500 cards of every size, shape and description were sent to WASA studios.

WNBK Collects Presents
WNBK (TV) Cleveland's Three and Easy program devoted its Christmas period schedule to collecting presents for the Holy Family Homes for Children. Vocalist Ken Ward, Jack Elton, pianist, and Tom Haley, announcer, decorated a tree on their show and viewers sent presents to put under it. To give each orphanage and children's home an unprejudiced selection, the boys wrote the names of the 20 homes on slips of paper and the one chosen was drawn from a hat during the television show. On the Friday before Christmas, the tree was transported to the Holy Family Home along with all the presents.

Old Newsboys Fund
WJW Detroit offered a week-long schedule of Christmas programs. One of the highlights was on Fri- day, Dec. 16, when the station sponsored the 26th annual "Old Newsboys Goodfellow Fund" pro-
Listening. Not only did he get his dog for Christmas but employees of Ward's organized a campaign to raise from $1,200 to $1,400 so Georgie can have a Leader dog when he grows up.

Christmas Seal Day

In keeping with the spirit of Christmas giving, WWJ Detroit "gave a day" to help prevent tuberculosis. Mention of the Tuberculosis and Health Society Christmas Seal sale was made on 24 shows and newscasts Dec. 14.

Collection Depot

Personnel of WWDC Washington manned a collection depot for Christmas gifts for distribution to the District Home for the Aged and the Infirm.

**WLAW Upheld**

The Licensee of a station can reserve to himself the final decision as to what programs will best serve the public interest, according to a precedent-making ruling by a federal judge in Boston on Dec. 23. Ruling upheld the right of a station to break a contract if it believes a proposed program does not best serve the public interest.

U. S. Judge Francis J. W. Ford, in delivering the finding, dismissed a civil suit brought by the Massachusetts Universalist convention against WLAW Lawrence. Suit alleged breach of contract in WLAW's refusal to broadcast a sermon on last Easter Sunday. It asked damages and an order forcing WLAW to broadcast the sermon next Easter.

The Universalist organization filed civil suit asking damages and a court order requiring WLAW to broadcast the rejected sermon next Easter. WLAW, represented by James Lawrence Fly of Fly, Fitts & Sheubruk, moved to dismiss the suit for "failure to state a claim upon which relief can be granted." Summarizing the case, Judge Ford's decision states: "Plaintiff's contention is that under the Communications Act the business of radio broadcasting is affected with a public interest and that, in consequence, contracts between the owner of a broadcasting station and persons seeking to broadcast are likewise affected with a public interest. Therefore, the plaintiff urges that the Communications Act, in imposing on licensees a duty to broadcast in the public interest, by implication, confers on those contracting for broadcasting time a right, notwithstanding any contractual provisions for rejection of programs, to have their material broadcast except where the content of the broadcast is not in the public interest.

"Such an interpretation of the Communications Act must be rejected," the decision declares. "Certainly the act does not confer on anyone any right to broadcast any material at any time, whether or not it has a contract for such a broadcast. Nor does there seem to be any basis for the implication of such a right. Where is nothing in the Act to indicate that the mere fact that one party to the contract is a licensee under the Act gives to the other contracting party any greater rights than those which the law ordinarily gives to parties to a contract."

Radio Exhibit Room

WALTER EVANS, Westinghouse Radio Stations, Inc. president, officially starts a "History of Radio" exhibit room at the Carnegie Museum in Pittsburgh next Tuesday (Jan. 10), his firm has announced. During the KDKA (Pittsburgh) Day program of the Pittsburg Radio and Television Club on that date, Mr. Evans will present an item of historical significance to the Museum as the official beginning of the new room. The exhibit will be opened to the public during National Radio Week next November.
HORSE RACE programming in itself is not bad broadcasting, but the determining factor rather is how much of it is used in relation to other subject material and in what manner it is presented.

In brief that is indicated to be the general conclusion of FCC Hearing Examiner Jack P. Blume in his initial ruling fortnight ago to renew the license of WTUX Wilmington, Del. [Broadcasting, Dec. 26]. WTUX was the subject last spring of Commission investigation upon complaint by Wilmington police alleging that the station's race results broadcasts aided illegal gambling [Broadcasting, June 20, July 4, 1949].

The decision commented, however, that no consideration had been given "the repeated requests" of the Wilmington Police Dept. "for general rules on horse racing programs to guide all stations, since this proceeding is obviously not the appropriate forum for such rule-making."

The decision did not indicate whether FCC might be planning such a rule-making proceeding to tackle the racing program problem, which would be patterned after the lottery and similar cases.

'National Problem'

The Wilmington police in their requests for such general rules to ban or restrict racing shows had emphasized that the problem of broadcast aid to bookies and illegal gambling is not a one-station or one-community matter, but rather a national problem since radio signals cross municipal boundaries.

In the WTUX initial ruling, Examiner Blume concluded that the programs questioned "were not intended or designed to be of assistance to persons engaged in unlawful activities, but were subverted to that end." He added that although they were not so designed, they were aired "with an almost reckless disregard of their potential use for this purpose."

In favoring renewal for WTUX, the examiner noted that the station's basic program policies were in the public interest although actual programs in some instances did not fully implement these policies. He observed that WTUX was a relatively new station and was managed by newcomers to radio who, "because of financial limitations, were without the benefit of experienced radio counsel."

The decision further observed that when the station owners did retain counsel and during the hearing "previous programming errors were pointed out, applicant's principals were quick to attempt to remedy them." Thus, before the hearing concluded, WTUX had curtailed its horse race broadcasts to the point where Wilmington police stated they no longer were an aid to illegal betting, the decision said.

The examiner also gave consideration to what remedial purpose would be served by refusal to grant renewal and noted the police had stated further that to delete WTUX would not assist in their law enforcement program "since other stations carrying similar bookmaking establishments with the racing information needed by them."

In considering further whether deletion of WTUX would serve any remedial purpose, the initial decision found that WTUX "has devoted substantial periods of time to the needs of civic, charitable, religious and other community organizations, and has provided the only source in Wilmington of valuable foreign language broadcasts, both of which community services would be eliminated if the station were not granted a renewal."

Particular notice was made of WTUX's promises as to future programming, the examiner said. He added that these promises played such a large role in considering renewal that were it not for the Commission's rule providing for full three-year renewals, he would have been inclined to recommend only a one-year renewal, but the applicant could alternatively show the promises were put into execution.

While observing that minority interests properly must be served by specialized programs, the decision indicated that WTUX had effected a program imbalance through the substantial amounts of afternoon time devoted to 1290 Sports Parade on which racing news was aired. The decision said that WTUX up to the hearing not only aided the results of races and mutual prices paid, but also a large variety of other information such as scratches, track conditions, off-times, predicted post-times, jockey changes and insertions.

Until the hearing, the decision continued, WTUX had no policy of delaying the broadcasts of results which were given on the average of four and six minutes after a race and in some instances within one or two minutes of a race.

"The record herein does not establish that the average listener, or even the listener interested in horse racing as a sport, requires the detailed type of information about horse racing broadcast by Station WTUX, or needs to learn the results of the races with the rapidity with which they were broadcast," the decision said. "Moreover, it is reasonable to assume that persons engaged in legal betting at the race track would not be listening to these broadcasts," it added.

Business Legal

Concerning the sponsorship of the racing reports by Armstrong Daily Sports Inc., "publisher of a daily 'scratch sheet' devoted to horse racing information," the decision stated the Armstrong publication enjoys second class mail privileges and is not considered "in the same class as racing publications which are devoted exclusively to supplying tips on races." It also noted several courts have found Armstrong's business and publications to be legal enterprises.

"However, the legality of a business or of a product is not the sole test of its suitability for broadcast advertising," the decision said, continuing, "In the instant case, the sponsor's publication is so closely identified with illegal betting on horse races as to raise a serious question as to the suitability for radio advertising."
Don Lee Renewal
(Continued from page 22)

hearing while the instant proceeding has been pending, equal justice under the Commission’s network rules requires that the licenses of Don Lee Broadcasting System be renewed,” Comr. Jones declared.

Comr. Webster saw a possibility that in some future case an applicant in similar circumstances “may—without claiming that it is not engaged in alleged violations, and without assuring the Commission of an intent to operate henceforth in conformance with the provisions of the Act or the rules and regulations—cite the Don Lee case as precedent for renewal of its license without hearing.”

But, he observed, “every individual case must be judged on the basis of its merits. I do not consider that my position in this case precludes me from reaching a different conclusion as to what would serve public interest in another case based upon the peculiar circumstances of the case under consideration.”

‘Violations Shown’

Chairman Coy stated flatly that “the licensee has violated the network regulations. He has stated on the record that he did not believe in the enforcement of the regulations which he felt were inconsistent with the economic interests of the stations. In this manner the station officials have manifested a flagrant disregard for the management of the station. If a licensee can continue to reap the benefits from the use of a public frequency despite the fact that he exercises no control over the manner of its use, and in a case in which the frequency has been used in a manner that violates fundamental policy of the FCC, he has acquired what, in my view, is a perpetual right to use the frequency in any manner that he sees fit. . . .

The Commission found that Don Lee’s formal, standard affiliation contract “conforms in its terms to the Chain Broadcasting Regulations,” but that the network and its officials had “caused,” “forced,” or “induced” affiliates to give up rights granted by FCC’s rules.

The majority held that Don Lee exerted “unmitigating and insistent pressure” on affiliates, sometimes including implied threats to break off affiliation.

The Commission particularly cited Don Lee dealings with KVCC Redding, KVEC San Luis Obispo, KPXM San Bernardino, KFRE Fresno, KDON Monterey, and KYOS Merced, Calif.; KMO Tacoma and KWLK Longview, Wash.; and KON Portland; KNRN Roseburg and KFJJ Klamath Falls, Ore.

Mr. Weiss, it was pointed out, said that because of his experience in operating stations ranging from 250 to 500,000, and because he had FCC and industry respect, he felt he was justified in substituting his judgment for that of a licensee whose experience was limited to operation of one station.

He contended, however, that Don Lee had not used force or coercion. Further, he stated, the network and its affiliates had a clear understanding that the final decision on station policies was to be made by the licensee. Conversations and correspondence with affiliates, he said, must be viewed in the light of that understanding.

NAB Advertising List

BIBLIOGRAPHY on “Public Service Aspects of Advertising,” has been compiled by NAB’s research and library staffs. They will be mailed by NAB on request. The list is divided into four groups—public interest and welfare, information and education, consumer attitudes, and economic aspects.

Orr Agency Promotes Two EXECUTIVES of the Robert W. Orr & Assoc., New York agency, were promoted last week. They are John H. Baxter, vice president in charge of creative activities, who has been appointed executive vice president and member of the board of directors, and Eldon Sullivan, vice president named assistant to the president and board member.

Specially Designed

JOHNSON PHASING EQUIPMENT

Illustrated is a perfect example of Johnson craftsmanship—phasng equipment exactly duplicating style and color of transmitter cabinets.

All Johnson phasing equipment is individually designed for the job. Adequate safety factor of all components, ample front panel control and adjustment of each circuit is provided.

In addition, Johnson Phasing Equipment offers optimum circuit design, heavier components with a wider range of tuning adjustments and automatic switching from directional to non-directional operation.

Johnson, for many years a leading supplier of antenna phasing equipment, manufactures units with power ratings from 1 to 50 kw. Standard as well as custom cabinets to match your equipment are made in the Johnson plant.

Your inquiries are always welcome.

MARCH OF DIMES

Adds to Radio-TV Staff

SIX STAFF members to augment the Radio-Television Div. for the 1950 March of Dimes campaign were named last week by Howard J. London, director of motion pictures, radio and television for the National Foundation for Infantile Paralysis.

Those added to the Radio Div. are: Jeanne C. Austin, former commercial writer and assistant daytime script supervisor for J. Walter Thompson; Barbara Boothe, former television writer for Standard Brands and member of the writing staff of CBS; Ann-Lou Davis, previously a radio writer for Compton Advertising; Joe Grate, former CBS producer and director; and Edward E. Scovill, former director of public affairs for CBS, Washington.

John Becker continues as assistant to Mr. London with Kirk B. Alexander as production assistant, Charles C. Bennett as radio script writer and Michigan Kroll as script editor. John Swallow is West Coast production chief in Hollywood and Jack Fisher serves as Chicago national radio representative.

Connie Martin Ryan, formerly with Veterans Hospital Camp Shows and CBS trade news editor, is handling radio publicity for the campaign.

‘50 Outlook

(Continued from page 25)

of National Broadcasting Sales Ltd., Toronto, looks for slightly larger radio revenue next year, with the overall picture rising 4 or 5% and the Canadian industry undergoing a 6 to 7% increase. He expects a slight (3%) increase in general business and a jump of 5% in operating costs.

The here-tofore undeveloped French-language market will aid radio in experiencing a 10-15% rise in volume, according to John R. Fox, general manager of Omer Ranaud & Co., representative firm in Toronto.

The “increased interest in Canada by U.S. customers, especially soap companies, who are buying local programs, spot announcements, and quarter-hour programs,” will help make 1950 a good year for Canadian radio, according to A. McDermott, sales manager of Westinghouse Electric Corp., Toronto, and Automotive sponsors also will contribute to the increase in AM spot and sales.

Overhead will increase, but general business will go up with it, says Mr. McDermott.

Manufacturers

Westinghouse Electric Corp. will increase TV set output 75% in 1950, according to F. M. Sloan, manager of the Home Radio Division, with factory facilities being increased one-third. Increased efficiency will make possible reductions in cost of sets, he said.

Mr. Sloan predicted the unprecedented demand for that exhausted radii and TV sets at Christmas will be projected into the first quarter of 1950. Despite record production, the Westinghouse division was unable to fill orders and the biggest problem in the fourth quarter was not sales but allocation, he said.

The long-range market for television shows great promise, he added, with over 24 million families to come within range of TV stations by the end of 1950.

John W. Craig, vice president of Aveo Mfg. Corp. and general manager of its Croyle Division, said: “The sale of 10 million radio sets in 1949 and the fact that fail and winter buying have produced an actual shortage of radios in the market, firmly refute the contention made in the earlier days of television that radio was on its way out.” He estimated there would be a market in 1950 for some 6 million home radios, 3 million auto sets and 3,200,000 TV sets.

Dr. W. R. G. Baker, vice president of General Electric Co. and general manager of its Electronics Dept., predicts the electronics market will set new records in 1950, spurred by TV’s “tremendous sales potential” and a substantial market for radios and radio-phonographs.

The public will spend over $800 million for TV receivers, plus $60 million for licences, he said. Color TV is at least five years away on a national scale, he explained.

Dr. Baker believes the nation will have 300 TV’s local by the end of 1951. He says TV and radio have their respective spots in the field of public service and one will not replace the other. He referred to the surprising consumer demand for small radios and radio-phonographs in the last quarter of 1949.

AFRA VS. WSTV

NLRB Upholds Union Claim

NATIONAL Labor Relations Board last Friday upheld recommendation of a trial examiner that WSTV Steubenville, Ohio, “cease and desist” certain alleged unfair labor practices in its bargaining relations with American Federation of Radio Artists.

Case arose from a charge filed by AFRA’s Pittsburgh local, Nov. 10, 1948, that the Valley Broadcasting Co., WSTV licensee, had refused to bargain with the talent union. Trial Examiner filed his recommendations last summer [Broad-casting, May 16, 1949]. The labor board noted that AFRA was the duly-designated representative and urged Valley Broadcasting Co. to “cease and desist” from refusing to bargain collectively and engaging in other unfair practices. Order affects announcers, newscasters, sound effects men and those who play records and transcriptions. Musicians are excluded.

CATHOLIC SERIES

Three 1950 Programs Open

THE National Council of Catholic Men yesterday (Sunday) launched two of its 1950 program series and the third is scheduled to begin on Thursday of this week.

The Rt. Rev. Monsgr. Fulton J. Sheen, nationally known religious speaker, began his 21st series on The Catholic Hour (NBC, Sunday, 6:30 p.m. EST), and Clare Boothe Luce, author, lecturer and former member of Congress, was the first guest of Fr. Urban Nagle on the new Hour of Faith (ABC Sunday, 11:30-12 noon EST). On Thursday, Jan. 5, Fr. Richard Ginder, associate editor of the magazine, The Priest, will begin a series of talks on the MBS program series called Faith In Our Time (Thursday, 10:15-10:30 a.m. EST).

FILMED, processed, edited and narrated completely by fast-moving WBAP-TV newsroom personnel is "Texas News," a 10-minute newsreel recently named the nation's best by the National Association of Radio News Directors.

Aired at 6:45 p.m. Sunday, Tuesday, Thursday, Friday and Saturday* on the Star-Telegram's WBAP-TV, an average "Texas News" covers eight stories — four from the Dallas area, and four from the Fort Worth area. No story is over 24 hours old, and many of them develop as late as two hours before air time.

"Texas News" staffers often travel over 300 miles by auto or chartered plane to get one story. Their filmed stories have been telecast repeatedly over NBC and other stations across the nation.

"Texas News" is a top example of station programming. WBAP-TV, the Southwest's first television station, can serve you best in the Fort Worth-Dallas area. Complete facilities for live programs, commercial film production (program or spots) are at your disposal at WBAP-TV. Contact the station or Free & Peters for details.

*Sponsored by Texas Electric Service Co. Tues., Fri., Sun. and the Southwest Chevrolet Co. on Thurs.
NBC Television Network last week asked interconnected affiliates to clear time for the two-and-a-half-hour Saturday night program that Sylvester L. (Pat) Weaver Jr., NBC vice president in charge of television, has been shaping up for more than two months.

The network advised its affiliates it would compensate them at their regular half-hour network rates for five half hours, 8-10:30 p.m., Saturday. The affiliates were told the program was scheduled to begin Feb. 4.

According to Mr. Weaver's plan, the two-and-a-half-hour show will be sold to several sponsors, whose commercials will be telecast on a rotating basis. There will be three one-minute network commercials in each half hour.

The regular 30-second chain breaks prevailing in ordinary network schedules and available to stations for spot sales will not be disturbed, a network spokesman said.

It was understood that NBC-TV would need to clear its Saturday night program on at least 15 stations if the project were to succeed. Stations must agree to carry the entire two-and-a-half-hour show if they carry it at all. A network spokesman was careful to point out that although the show fell within network option time, affiliates could reject it if they chose.

The exact format of the program that NBC intends to put in the Saturday night period was not yet disclosed. It was known, however, that Mr. Weaver had been contemplating a "Saturday night on the town" which would cover a variety of entertainment. The idea is that the home audience will be taken to the theatre, to night clubs, to the movies and to other sources of amusement without leaving home.

By distributing the cost of the show among a number of sponsors, whose commercials will be changed among the various half-hour segments from week to week in order to give them equal time advantages, the cost-per-sponsor will be less than that an individual advertiser would have to pay for a half-hour program of similar merit, according to Mr. Weaver's plan. Whether NBC-TV had acquired sponsors for the program was not known. In its message to its stations, the network did not identify possible sponsors nor did it explain the format of the show.

FOLSOM REPORTS

Says TV Rise Unprecedented

A SPECTACULAR rise, unprecedented in the industrial history of the United States, has been made by television, according to a year-end statement by Frank M. Folsom, president of RCA.

"During October, after only three years of production, television achieved the going rate of a billion-dollar-a-year industry," Mr. Folsom said. "No other enterprise of the past has moved so far in so short a time."

Pointing out that it took the automobile industry more than 10 years to reach a similar mark, Mr. Folsom said the wholesale value of all TV sets purchased by the American public exceeds $1 billion—another unequalled record.

Set Demand Great

"So great was the public demand for television receivers, particularly in the last half of 1949, that some of the major producers were from two to eight weeks late in deliveries," Mr. Folsom said. "The total number of sets produced and sold during the year amounted to 2,500,000, or 500,000 more than had been predicted. In New York City alone, the number of television sets in use rose to 1 million."

Turning to 1950, Mr. Folsom said the outlook is exceptionally good, assuring that industry may be expected to produce and sell between 3,500,000 and 4 million receivers, bringing the total number of sets in use by the beginning of 1951 to more than 7 million and the potential television audience to at least 25 million persons.

"To achieve new production records in 1950," Mr. Folsom continued, "industry reports indicate that capacity will be increased by nearly 50%. This will be accomplished through the addition of new manufacturing facilities. The only limiting factor that can be foreseen at this time will be, as it was in 1949, the ability of component parts manufacturers to keep pace with demand."

He cited as one of the outstanding developments in TV during * * *

DON LEE'S KTS(L) (TV) MARKS 18 YEARS IN TELEVISION

TODAY KTS(L) (TV) Los Angeles operates secure in the knowledge that the area boasts a set circulation in excess of 300,000, but W6XAO started just 18 years ago knowing its maximum audience did not exceed five sets.

Besides observing the Yuletide season, the Don Lee Broadcasting System last month celebrated the 18th anniversary of KTS(L) which first took to the air as W6XAO Dec. 23, 1931. Present at the start were the late Don Lee, founder of DLBS; Harry Lubcke, now director of television research, and a staff of three men.

Despite the long history of Don Lee in television, the firm is still looking forward to its future, according to Willet H. Brown, DLBS president. In his words, "television is not 'old hat' to Don Lee Television-KTLA (W6XAO). Television is not merely a matter of looking at the record; to us television remains a challenging future."

Mr. Brown is not a man who believes in the status quo. He recognizes that pioneering still remains for his organization.

"Until 1939," he reminds, "we were obliged to manufacture all of our equipment, including receivers, to carry on. However, we managed to continue leading the way, albeit scarcely more than a 'baby' ourselves in a then truly infant industry. Now during television's similarly trying introduction to commercial operation, Don Lee seeks further progress. What we enjoy today in TV is not the ultimate; there's more to come."

The spirit of Don Lee's continued forward movement in television as guided by Lewis Allen Weiss, board chairman, and President Brown, is reflected in their recent selection of Charles Glett, motion picture executive, as vice president in charge of television, and Cecil Barker as executive producer, thereby injecting motion picture thinking into television.

"Don Lee has engaged in TV research and operation for a longer period than any other network," Mr. Brown points out. "Recently Don Lee also participated in the development of the new 'Electra-Zoom' lens for television cameras. And so it goes; Don Lee continues to seek the proverbial better mousetrap, content only with the most, and best possible, since the days when we built the first structure ever erected specifically for television atop Mt. Lee" (overlooking Hollywood).

Among the various historical television accomplishments claimed by the Don Lee organization are:

- May 10, 1931—First time in Los Angeles that a television image was transmitted from one side of a room to the other on newly developed all-electrical equipment.
- Dec. 23, 1931—W6XAO, one of the first—if not the first—television transmitters of the present-day type, went on the air, telecasting one hour per day, six days a week.
- May 21, 1932—First known reception of television images in an airplane. Made in a Western Air Express tri-motored plane, carrying Los Angeles news representatives.
- March 10, 1932—First showing of full length motion picture, "The Crooked Circle," then being shown in theatres.
- March 23, 1932—First television coverage of a disaster by means of rapidly processed newsreel film, showing scenes of Long Beach earthquake.
- April 4, 1933—First showing of current Pathé newsreels.
- Aug. 30, 1937—Published seven rules for taking motion pictures intended for TV, formulated from having telecast three million feet of movie film.
- Dec. 23, 1940—Mt. Lee television completed, the largest, highest and most complete plant built specifically for television up to that time.
- Sept. 30, 1946—First tennis match to be played on a television stage, when National Champion Ted Schroeder, and others, participated in exhibition matches on regulation court set up on stage of Mt. Lee studios.
- Dec. 23, 1946—Fifteenth anniversary of W6XAO on the air. To that date station had telecast 7,331.6 hours and exhibited 13,601,600 feet of film via television.
- May 21, 1947—Started first sustained daytime telecasting with several weekly presentation of "Queens for a Day" radio program and presented simultaneously.
- April 1, 1948—Telecast first symphony west of New York, with Los Angeles Philharmonic.
- Dec. 7, 1948—First Air Force plane-to-television station images. Air Force B-17 used to show viewers extensive scenes of greater Los Angeles from air. Images beamed directly from moving plane to trans-
Aside from making it technically possible for Don Lee to launch itself in television, Mr. Lubcke has substantially contributed to the lore of television in the west. While still a student of engineering at the U. of California in Berkeley, he built his first television set. He recalls reception with this set of TV transmission from Washington, D. C., in 1926-27; it was nothing more than a repetitious image of a girl bouncing a ball, transmitted by a man named C. Francis Jenkins via the two-megacycle band.

Also before graduating from college, Mr. Lubcke had delivered a technical paper at a meeting attended by Philo Farnsworth. Impressed with the youth, Mr. Farnsworth offered him a job at his laboratories. Upon graduation, Mr. Lubcke became assistant director of research, working directly under Mr. Farnsworth. From there he went south in 1930, where he contacted the late Mr. Lee, Mr. Weiss and Mr. Brown, talked television, and has been with the organization ever since.

Thanks to Mr. Lubcke’s memory, historians may learn that the first Los Angeles TV fan was Howard Tremaine, a motion picture studio engineer, who had built his own set. From him came telephone calls and notes commending the station’s programming and transmission in its early days. From an audience which was so personal, Mr. Lubcke has seen television grow to a mass communications medium in Los Angeles.

Now that television’s next big technical step will be color, Mr. Weiss and Mr. Brown have a man with an ideal background for the post they created as director of television research in charge of color—Mr. Lubcke. While he will venture no guesses on the “when” of color television, Mr. Lubcke firmly believes that the system to gain commercial approval will not be one existing system but rather a combination of two or more.

SUMMING up the position of the technical progress of his organization, Mr. Brown says:

"Don Lee is proud that it developed and demonstrated successfully the first all-electronic system known west of the Mississippi and is very proud for having assisted in the formation of present-day approved standards. This projection goes on in the new-developing TV film-recording system Don Lee will use."

TELECASTING on Channel 2, KTSL transmits on 66-72 mc., 15,000 kw, with live and tape. Its current transmission site atop Mt. Lee is approximately 2,200 feet above sea level but the plan is to move the site to Mt. Wilson as possible. FCC approval has been sought.

Overseeing Don Lee’s television operations is Charles Glett, vice president. Mr. Glett formerly was managing director of the Motion Picture Center and previously a vice president in charge of David O. Selznick production and studio operations. His is a background in motion pictures which extends from financing through production. Additionally he has had experience in the production of industrial films as well as in talent management. During the war he supervised more than 20 film production units while serving as an officer with the Signal Corps.

Mr. Glett states frankly that he believes TV to be a motion picture medium—whether the fare is produced live or on film. But he hastens to explain that "when the man with the screwdriver got off the motion picture camera, the motion picture business became creative." The time is past, he says, when an electronic engineer is all that is needed on a television camera. He has no objection to a cameraman who also knows electronics, but he insists that his cameramen have an understanding of such matters as lighting and setting up.

Not at all one-sided in his view of television as a motion picture medium, Mr. Glett readily admits that there are facets of TV production from which the motion pictures could profit. He cites an example the sustained "take" of a live television show which calls for a performer to go through the length of the program whether it is 15, 30 or 60 minutes in length. This he feels will certainly alter the existing brief "takes" of motion pictures which are sometimes as short as 30 or 60 seconds.

Mr. Glett does not believe in running sustaining "live" programs for a prolonged period of time. In fact he would consider it ideal if KTSL telecast no such programs, except for public service programming. Thus, most "live" KTSL programming is commercial except for those segments which are being showcased for sale, and the public service programming.

He fully recognizes that a program has to be seen to be bought but doesn’t think it need run interminably as a sustaining. The station selects programs which are considered likely entertainment and they are thoroughly rehearsed before ever being seen on the air. Additionally, a "preview" technique is being developed to show programs to a studio audience via closed-circuit. Each attendant is provided with a card for critical comment. After compiling the comments along with the critiques of the station’s staff, program revisions may be undertaken. When the program is then adjudged ready to roll, it may be telecast a few times and kinescoped. With this visual presentation, the station’s sales force has a handy product to sell. That which is sold may be put on the air and that which lacks commercial appeal need not have endless money expended, Mr. Glett reasons.

At the present time, KTSL is telecasting approximately 20 hours weekly on a Monday through Friday basis. Within 60-90 days, Mr. Glett intends to expand the station’s schedule to include weekend nights and by spring he hopes to add about 10 hours of daytime programs to the station’s weekly schedule.

Of the present average of 20 hours each week, about one third is live, including remotes. Kinescoped programs, obtained through the station’s affiliation with Dumont, presently provide about two more hours a week; early in 1950 this will be increased by two more hours. All other programming seen on the station is film.

In addition to this mode of operation, Mr. Glett told TELECASTING definite plans have been drawn to evolve a motion picture workshop group as still another source of programming. He said that the first story property had been obtained and only formal negotiations had to be completed before an announcement is made. This group will work in both live (Continued on Telecasting 12)

HISTORIC pieces that typify Don Lee pioneering in television:

Above—The first transmitter used by W6XAO for over-the-air transmission in October 1931 when Don Lee was operating from Seventh and B-streets and the initial signals were picked up on a receiver in a vacant lot a block away. Later the distance was increased to 10 miles. Transmitter is shown without its protective cabinet.

Below—Harry R. Lubcke, director of TV research in charge of color for Don Lee-KTSL(W6XAO), explains component parts of the first-known TV receivers in Los Angeles to his daughter, Joanne, now 13. Joanne is believed to be the veteran television of her generation, the Lubcke home having had a television set since before she was born.
ON THE FIRST day of September 1949, Keith Kiggins took occupancy of the second floor of the building at 343 Lexington Ave., New York, and set out to build an organization that would live up to the new gold letters on the door, reading "Edward Petry & Co., Inc.—Television Department."

Reason for the new office space, half a mile across Manhattan from the Petry headquarters at 42d and Madison, was the same as for the new department, itself. Edward Petry, president of the company that has been among the leading station representative organizations since the early 30s, had been thinking about television and sound radio and had reached some definite conclusions.

Mr. Petry observed that when

Divorce of the Visual From the Aural

Keynotes Firm's Television Success

"AM was in its infancy, station representatives believed they could represent competing stations in the same market. In founding The Petry Co. 17 years ago we felt differently and established the now accepted practice of exclusive representation." He continued: "And now ever since television came to life as an advertising medium, every radio representative has faced the temptation to rationalize the feasibility of a combined AM-TV sales operation.

"His thinking goes somewhat like this: Ownership of stations is often the same; in many agencies the buyer is the same; often, too, the advertiser is the same. Why, then, shouldn't the seller be the same?"

"That's an easy bill of goods to sell yourself," he commented. "It's cheaper; it's easier. And it's just as good . . . isn't it? You don't need initiative, added effort, the willingness to invest considerable money in a new and separate operation. Actually, you don't need to do anything. Long live Status Quo!"

"But let's not kid our stations, advertisers or ourselves," Mr. Petry advised.

"At the risk of being called simple and old-fashioned," he said, "we maintain that a good salesman must first of all believe in and be enthusiastic about what he has for sale to the exclusion of all else. For the salesman who really deserves the name there are no two ways about it. He simply cannot wholeheartedly and honestly sell two things which compete for the same advertising dollar. He can't sell Sunday supplements and daily papers—or car cards and billboards—or network radio and spot—or AM and TV—no matter what their superficial similarities."

Mr. Petry explained, "We at the Petry Co. believe this so completely that we have entirely separated our

AM and TV sales direction, sales force and sales promotion—even down to physical separation of our office space. As a matter of fact, we have even been kidded about the fact that our AM salesmen don't even know our TV men, and vice versa. There's some truth in that. We want it that way.

"We believe that's the way to do a better job for our stations, for advertisers, and for their agencies," he concluded.

Kiggins for TV

Turning from thought to action, Mr. Petry engaged Mr. Kiggins, veteran network executive, to build and operate his TV division. Mr. Kiggins, who had topped off his long service in sales and station relations at NBC and ABC with two years as an officer and consultant of Television Assoc., agreed with the Petry reasoning and went to work to carry it out.

By the end of September, Mr. Kiggins had his office space well populated. There were—and are—five salesmen: Douglas MacLatchie, who had joined the Petry sales staff in February, moving from WFIL-TV Philadelphia; William Cornish, former agency radio and TV director and time salesman for the DuMont TV Network and DuMont's own video stations; Donald P. Campbell, veteran network salesman with NBC, ABC and MBS experience; Robert S. Wilson, formerly in charge of cooperative program sales for Mutual's Central Division; Richard Arbuckle, previously space representative for

  KRON-TV offices and studios in the San Francisco
  Chronicle Building, 5th and Mission Streets, San Francisco
IN the first 11 months of 1949 the number of television advertisers increased by over 210%. Between the December 1948 and November 1949 reports, total advertising jumped from 651 to 2,195. The number of reporting stations increased from 41 to 86 with television markets going from 23 to 51 in the 11 month period.

Total advertisers increased from 1,891 to 2,195 between October and November of 1949, the latter figure excluding the spot and local business of two stations which did not report.

This information is based on results supplied to Telecasting by the N. C. Rorabaugh Co., publisher of the monthly Rorabaugh Report on Television Advertising. Network figures cover all stations for the entire month and are obtained directly from the networks' headquarters. Spot and local business information is supplied by the stations and covers the week of Nov. 6-12. Two stations did not report their business in November.

Total network advertisers moved up from 76 in October to 78 in November. Although this would indicate the network field had set-tled down for the fall-winter season, there were seven network sponsors who dropped entirely from the picture while nine new ones entered. In addition to those nine, there were four advertisers included in the October total who placed additional business in November. Conversely, several advertisers who were included in the totals for both months decreased their time purchases. A few new sponsors in November made their time purchases for special onetime-only programs.

New Advertisers

Goodyear Tire & Rubber Co. started the half-hour Paul White-
man Goodyear Review on 40 stations. Ford Motor Co. purchased time on 12 stations for two, hour-
long telecasts each day, five days a week, from the United Nations. Gulf Oil Corp. switched its We the People from CBS-TV to NBC-TV and increased the number of stations to 29.

The biggest losses between the two months were the hour-long Fireball Fun-for-All sponsored by Buick Div. of General Motors and Crusade in Europe backed by Time Inc. The Buick program appeared on 35 stations and Crusade in Europe on 35.

The 78 different network adver-
tisers in November sponsored 95 shows. ABC dropped from 18 ad-
vertisers in October to 15 in November. CBS went from 35 to 33 and the DuMont TV Network lost one advertiser, giving it four in November. Four new advertisers appeared on NBC for the November total to 36. (If an ad-
vertiser sponsors more than one program on a network he is counted only once for that network. If he sponsors programs on more than one network he is counted in the total for each network where business is placed.)

Total advertisers in the national-regional spot field increased by 21, going from 399 in October to 420 in November for the reporting stations. There were 75 newly active advertisers, the dif-
f erence being due to accounts dropped. Most of the addition and deletion activity was confined to

The first year is the hardest. 1949 was a year of accomplishment and achievement for “The Eyes of the South.” A steady and persistent schedule of topflight programs has already established a record set population in the Atlantic area.

1950 will be even more significant. For the policy of market dominance with superior programs will be maintained — and augmented.

If Atlanta is on your television planning board—and it should be—get the facts about WSB-TV from your Petry man.
Experts Criticize at NTFC Forum

Folsom Reports
(Continued from Telecasting 3)

variety and quality of television programs.

Mr. Folsom said the social implications of TV's wide public acceptance already are becoming apparent and that there is much evidence to show that it is becoming an influential factor in establishing closer family relationships—reversing a trend set in motion by other modern developments.

Sound Position

While the progress of television held the spotlight during 1949, sound broadcasting steadily advanced, Mr. Folsom said, far from being doomed—as some pessimists predicted—broadcasting continued to function as the greatest single medium of mass communication available to the American people. Reflecting the soundness of its position is the fact that the radio industry expects to profit still between 8 million and 10 million receivers during 1950. Moreover, there is every reason to believe that there will be a market for 6 million to 8 million radio sets and records an indeterminate period in the future," he said.

Commenting on the phonograph field, Mr. Folsom said that in October, "only seven months after the 45 [45 rpm record] was introduced, the new records were being produced and sold at the rate of 20 million a year and the new record players at the rate of 65,000 a day." Mr. Folsom concluded: "The major advances of the radio-television-phonograph industry in 1949 are but proof of still better things to come. At no time in the history of the radio-electronic arts have conditions been more favorable for continued growth and expansion in service to the American people. To the fulfillment of this promising outlook, RCA wholeheartedly dedicates its facilities and services in scientific research, manufacturing and communications."

Antiquated and inefficient television film projection equipment used by video stations across the country was named last week by National Television Film Council as one of the major causes of poor retention of films in TV homes.

At the group's third quarterly forum, held Wednesday at New York's Astor Hotel, stations were criticized by several of the speakers for using "equipment nothing better than a type of imported "portable projection machines" in the telecasting of film. No specific stations were named, such as network originating stations, and it was agreed by an indepth few exceptions the situation was general.

While most of the producers are aware that film for video can be improved, it was agreed that even tailor-made TV film an educational job among stations is necessary before transmission will be of quality level.

Morning session on distribution was headed by John Mitchell, United Artists television sales manager, and W. W. Black, vice president of Official Television, both New York. Mr. Mitchell revealed that UA is adopting a policy of omitting submission of audition prints to video stations for the latter to sell in favor of selling directly to the advertiser. He feels that there is a big untapped market for TV films if advertisers are properly contacted. According to Mr. Mitchell, his firm's experience with stations has not been profitable, as station sales organizations are inadequate.

Pointing out that advertisers are interested in continuity—larger packages such as a series of programs—Mr. Black invited qualified producers to submit such packages for distribution to stations and advertisers. Official TV, he said, is conducting research to ascertain the type of film that will justify production of a large series. He decried the omission of audience and merchandise promotion plans with TV films.

"The distributor," he said, "must be organized to visit advertising agencies with fool-proof presentations," Film must equal or surpass so-called "live program." "Money," he concluded, "is waiting and available for financing of films if investors can be shown market and profit possibilities through station and sponsor acceptance."

Mr. Folsom defined the time rate as any good for video according to Russ Johnson, newly appointed vice president of Jerry Fairbanks Productions, East Coast office, and stations are not-joining with antiquated projection equipment. Mr. Johnson, who recently resigned from NBC-TV's film department, questioned the merit of photographic sound for television film, pointing out that FM transmission, used in TV, is the most critical in the world.

"Many films need better productions, as well as better equipment," he said. "Even if you could get a picture," he added, "the present electronic tube will not reproduce it, and the present film stock is not used, no matter what it is."" Favorable Factors

He stressed as factors favorable to the use of film the recording of programs for perpetuation, the overcoming of time zone differences and elimination of cable costs. "It's a waste of money to produce a program, throw it into the air and lose it," he emphasized.

High key illumination with no more than 1-00 ratio between the darkest black and the lightest white, or one-sixth of the lighting ratio used for motion picture was advocated for production of television films by Dr. Frank Back, inventor of the Zoomar lens.

Speaking at the afternoon session on production, headed by Henry Morley of Dynamic Films, New York, Dr. Back outlined several reasons why films, that show up well in screening look badly on home receivers. The most important factor, he said, is the increase in contrast differences, causing loss of half-tones, of detail in shaded areas, and blackness at the picture's borders. Explaining that each link through which a film must pass before reaching home sets acts as a gamma amplifier, sometimes increasing the film's half-tones five times its original gamma reading, Dr. Back stressed the need of either processing negatives to low gamma readings or working with low contrast to begin with. Another method, he said, is to light as if photographing in color, avoid bright highlights and deep shadow areas.

Mr. Paskov concluded the meeting with the outline of NTFC television station manual, to be published shortly by the council. The manual outlines everything a station manager thought by council experts to be necessary to efficient operation of video station film departments.
Mr. PETRY

TV DIRECTORS

Networks Recognize Guild, Avert Strike

A threatened strike by New York television directors against three major networks and WOR-TV New York was averted last week when the companies recognized the Radio & Television Directors Guild as bargaining unit for floor managers.

The guild already had been recognized by ABC-TV and NBC-TV as representing floor managers, but until last Thursday CBS and WOR-TV had contended that class of employees at their studios had not claimed the guild as a bargaining unit. Floor managers at CBS and WOR advised the companies at mid-week that they had chosen the guild to represent them. The ensuing recognition of the guild on behalf of the floor managers averted a strike that the guild had threatened to call for Dec. 31.

At the same time the companies and the guild accepted a proposal by Frederick Bullen, executive secretary of the New York State Board of Mediation, that negotiations of the union’s demands for wage raises and revisions in working conditions proceed for another month.

The guild’s contracts with ABC-TV, CBS-TV and NBC-TV expired at midnight Dec. 31. The acceptance of the state mediator’s proposal virtually insured a no-strike period to Jan. 31.
A mong the station's most successful commercial formats are weekly wrestling pickups from the Hollywood Legion Stadium sponsored by the TV Buys Bureau, five individual banders gathered together to defray the cost. Commercials call for the use of each dealer during the series, utilizing no more than one or two commercials a cent uate their neighborhood locations and an effort is made to personalize the dealer as a local neighborhood. The dealers handled a station traffic directly traceable to television, as well as sales results.

Camels, through Westy Ely Co., has been sponsoring boxing via the NBC networks, another local interest in the weekly bouts each Friday from the Hollywood Legion Stadium has run high and handling of the commercials by the cigarette firm has been a source of particular comment. Ample product identification has been enjoyed without hammering. Summing it up, Mr. Hoag describes it as the "happy service of two masters—sponsor and viewer, alike."

Two other highly successful programs have been sponsored by Thrifty Drug Stores (chain) through the Nelson Weinberg Advertising Agency in Los Angeles. One is locally produced and titled, What's The Name of That Song, featuring Bill Gwinn as m.e. Thursdays through Saturdays. Essentially audience participation program, product mentions are happily managed by the m.e. and commercials well integrated.

The same sponsor's second program is a kinescope feature from DuMont, titled Cavalcade of Stars, seen on Monday evenings. It is a good example, according to Mr. Hoag, of a national network caliber program priced properly for single market sale.

O ther examples of KTSN success stories:

Klever Kook, a seasoned flour process, had used newspapers and radio before buying a participation on KTSN. Directly coincident with the first use of TV, sales showed a noticeable hike, according to Lockwood - Askafords, the management.

Utilizing a one-minute spot as a test and anticipating mild results, Fralunga Ice Cream through The Tullis Co. purchased a Friday night spot to announce a weekend TV special. Viewers were advised they could phone a certain number or visit their neighborhood dealer. Not only were the local dealers happy over the broadcast, but the phone girls handled all the calls physically possible for 45 minutes following the spot.

On a participating show featuring Norma Young in a variety of household hints, a self-sealing jar was demonstrated and viewers were told to send their checks to a given box address. Although results were not made known, more than 20 checks were mistakenly directed to Miss Young in addition to known sales increases at the two Buick's department stores, carrying the one exclusively in the Los Angeles area.

To plug its children's line, Karl's Shoe Stores, thru its agency, J. B. Kiefer Inc., purchased showings of 16 cartoons. Commercials featured specific models. Stores reported selling out the lines advertised within a couple of days following each telecast. One of the most satisfying agen
cy-client reactions, according to Mr. Hoag, came from Challenge Cream & Butter through Ross Sawyer Inc., for three weeks of TV via KTSN. The plans were to buy additional time in San Francisco and Mr. Hoag "regretfully" had to report that Don Lee as yet, does not have a San Francisco station operating.

**PHONEVISION**

Zenith Asks for Tests Now

ZENITH RADIO Corp. asked FCC last Thursday to let it proceed with its proposed $400,000-plus test of Phonevision in the Chicago area without the hearing which the Commission has ordered [TELECASTING, Aug, 8, Dec, 1949].

Most of the questions raised by FCC for the hearing can best be answered after the tests and some results may be obtained before the tests begin, it was stated by A. K. Wheeler of the Washington law firm of Wheeler & Wheeler.

The commission pointed out that Zenith proposes to test its system of subscription television for three months in some 300 homes, charging each subscriber $1 for each Phonevision setup he wishes to see. The subscribers will also have standard TV broadcast sets, so they may choose between standard and Phonevision programs.

To put it simply, the company hopes to make a profit on the experiment, Zenith said it would give all proceeds to charity. Zenith's "pay-as-you see" system of subscription TV is a broadranged multiform system which is an "assembled" that can be uncranshambled only by means of a "key" signal sent by standard telephone lines, has been on the air from Zenith's own tower at K2XBS since March 1947. Its technical feasibility has been proven, the petition asserted, adding:

Whether the system will operate successfully has yet to be determined. Here the large number of lines connected to the same local exchange has yet to be determined. Here are subscribers remaining question to be answered is whether the system will make the primitive of "pay-as-you-see" television. The primary objective is to obtain a definitive answer to that question.

Zenith maintained that its proposed systems were even more limited than those of Muzak Corp, which FCC authorized in 1941 with respect to Muzak's "pay-as-you-

**Ratings**

- With the exception of Los Angeles, all NBC stations carry Los Angeles programs.
- The increase of $250 per hour was the most noticeable change.
- The increase in the ratings was due to the higher costs of production and advertising.
- Mr. Hoag explained that each studio would be converting a non-television studio site into a usable one.

---

**O F the station's average of 20 hours of programming week-
lv, 12 are commercial, according to Robert Hoag, sales manager. A thorough reading of the station's rates and schedules discloses a scale of production charges and Mr. Hoag promptly explains that each such cost estimate is made as the specific program's needs are made known. In the matter of film facilities, "rates listed include film facilities. If film programs require rehearsal of an announcer, the cueing of additional material or sound effects, etc., a film facilities charge is made at the rate of $40 per hour for such rehearsal, with minimum of one half hour re-
quiring."
FRED FREELAND's innate inventiveness and technical approach to all things—including television—are birthrights from his father, an industrial engineer and former Swiss bell ringer in Vaudville. Any bell ringing Fred now hears comes from befuddled moments of video in his work as television director of Ruthrauff & Ryan, Chicago.

Always interested in creative dramatics and factual electronics, Fred is one of the few agency TV men permitted to call his own shots in station control rooms. Director of TV shows and spots for 30 accounts, Fred spends much of his time on film commercials.

His fascination with films began (and almost ended) in his hometown of Middlebury, Ind., when he was nine years old. The exploits of Harold Lloyd were being reeled off in the Freeland basement on 2,000 feet of highly explosive nitrate film when the can caught fire. The house, and Fred's head, were saved by a quick-thinking father who threw the reel out the back door. Immediately, he turned his efforts to production of pseudo radio and stage shows in the living room, surrounded by pulleys, mikes, curtains, props and turntables.

After years of homespun his- trionics, he became a full-fledged announcer at WTRC Elkhart, Ind., when he was 14 and a Middlebury High School sophomore. His first job, at $3 a week as a substitute announcer, was snatched through the program director, who had tutored him in mike technique. "When it came time for me to ask for a job, he couldn't say no and prove he wasn't teaching me anything," Fred says.

When WHBC Canton lured him with a $20-a-week announcing job, he adjourned to Ohio, remaining there until 1941. There he produced and announced shows, mainly musicals.

While auditioning applicants for an amateur hour one evening, he heard a "real cute gal who tried to sing, but couldn't. Her name was Norma Faust—and she still can't sing," Fred says. They were married in Canton, and now have a 13-year-old son, Dick. They now live in Ft. Wayne, Ind., where Fred spends his weekends.

At the time of his marriage, Fred was fast becoming a sound expert. He offered his services and the station facilities, both free, to an industrial film producer. Together they shot location movies for such organizations as the Timken Co., Republic Steel. Fred later produced movie shorts for Warner Bros. 

Fred's next job was in uniform—he entered the Army. Going from Mississippi to Louisiana to Texas, he worked on an infantry radio staff and aided in production of several CBS network shows from WHAS Louisville. On his return to civilian life, he went to the Studebaker Corp. in South Bend, Ind., as foreman in the high frequency static suppression department. Locked in his laboratory daily for security reasons, he developed noise abaters for Army vehicles.

Transferring to WOWO Ft. Wayne, operated by Westinghouse along with WGL (later sold) and the experimental FM station, WCIA, Fred was one of a program staff of 100, but in nine months became production manager.

Early in the war he produced the film feature "Bombs Over Ft. Wayne" for the local civilian defense unit. The documentary was later taken over by the War Dept., and released nationally. It earned an Army citation for him in 1942.

While at Westinghouse, Fred became involved in the television department operations, and earned three patent awards from the firm for inventing (1) a mixing circuit for long-set shots, akin to a traveling mask in the movies, (2) an electronic zooming lens, and (3) a pulse-time transmission system, a single instead of a double unit.

After putting TV technical and programming theories to test at the Farnsworth experimental station there, he went briefly to WBZ-TV Boston as director of television. He returned to Ft. Wayne in January 1948 to promote and produce the Hoosier Hop, 20-year-old western and folk show, and special productions, including several for the Indiana State Fair. After turning out television film commercials and more industrial movies as a freelancer, he was hired by WBKB (TV) Chicago as production assistant last January. From there it was a quick jump to Ruthrauff & Ryan in June.

Fred directs or supervises all of the agency's TV shows and film commercials, most of which are made in Chicago. With enough technical knowledge to know his own limitations, Fred has a simple formula for successful shows and commercials—"Shoot everything as a minute movie, and follow motion picture techniques exclusively."

advertisers using one to three stations. Biggest new spot account reported was for Rorabaugh in November, in point of size of account, was D. I. Clark Co., which placed business on 11 stations. No big spot accounts dropped or decreased their station list to any extent with the exception of Kaiser-Frazer Corp., which dropped from 16 stations in October to two in November.

The Dodge Div. of Chrysler Corp., which had placed spot business in only a few stations during the October check week, increased its schedule to include 31 stations in November. Eleven new stations were added by the Alliance Mfg. Co. for 38 in November while American Tobacco Co. and Pioneer Scientific Corp. bought 10 new outlets. They placed business on 49 and 26 stations respectively in November. Berrus Bulova Watch Co. continued as heavy users of television spots.

Greatest Gain Local

Greatest gain in the number of advertisers was made in the local field. This category jumped from 1,416 advertisers in the October report to 1,697 for November.

Food & Food Product advertisers, which have consistently led in the number of active sponsors, gained 50 new accounts for a November total of 345 (Table II). Although one network sponsor was lost—Derby Foods Inc. which had backed a half-hour segment of Super Circus—substantial gains were made in the spot and local fields.

Advertisers of Automotive, Automobile Equipment & Accessories increased by 30 to remain in second place with 271 accounts. One new advertiser jumped in this classification—Buick Div. of General Motors. Spot advertisers remained at 14 with the gain being made at the local level.

Increased ratings in this classification kept Household Furnishings, Equipment & Supplies in third place with 247 advertisers. Hotpoint Inc. sponsored a special one-hour Thanksgiving Day program on 18 stations and Nash-Relina
tor Corp. which had started participations in the Monday through Friday Homemakers Exchange in October was included in the Novem
ber report. Three new spot advertisers were added and the remaining gains were made locally.

In fourth place for number of accounts was Radios, TV Sets, Phonographs, Musical Instruments, & Accessories with 239 advertisers. Although the number of network advertisers remained at five in November, Admiral Corp. started a second program, Larks Eye, on NBC TV stations. There was one new spot advertiser, with the remaining 35 new accounts being placed locally.

BING CROSBY Enterprises, Holly-
wood, in first television film ven-
ture, has been signed to produce 10-26 minute films for Procter & Gamble’s Firestone Theatre series on NBC eastern TV stations. Ac-
cording to agency for P&G, Compton Adv., Hollywood, each film will cost between $8,000 and $12,000. Production to get underway after Jan. 1 will be directed by B & W Prod., which is to produce series for P&G for Teleplay Produc-
ductions.

Standard Television Corp., New York (film distributor), concluded agreements with every major Rank, London, for distribution by Stand-
ard of 75 feature films; aggregate production costs are said to have been $50 million. About 50 films never shown in U.S. have been
made in past two years, according to Standard. Others, such as “I Know Where I’m Going,” “Waterloo Road,” etc. have already been box office hits during U.S. theatre runs.

KTLA (TV) Los Angeles has started filming of its first one-hour film series The Comics. Based on comic strip characters, series is made up of films leased from Universal International. Among the comic strips to be filmed are 13 episodes of Flash Gordon, Red Barry, Ace Drummond, Tim Tyler, Smiling Jack and Don Winslow series. Two different series are being shot each week, in 20-
minute segments.

Caston Productions, Hollywood, doing series of 13-quarter-hour films, called Sketchbooks, is making 55 films. Each film will be based on book and is made up of 13 one-hour episodes of films. Films will depict interesting people in various parts of U.S. Shooting already has started in California and Arizona, later to be extended to rest of country. Film has gone to Europe for European series to be combined with this group . . . Dixie Dugan,” half-hour TV film based on comic strip character has been prepared by Drink Productions, Hollywood. Plans are to produce two half-hour film episodes weekly for series. Jean Gerard is producer, Al C. Ward directs and Helen Parrish, film actress, is starred.

Alan Brown, formerly with Time Inc. and recently special assistant to Secretary of the Navy, has joined the Princeton Film Center, Princeton, N. J. Mr. Brown will be director of client relations as well as executive assistant to the presi-
dent. He now resides in Princeton but will spend a large part of his time in New York office . . . United World Films, New York, recently completed six one-

Penguin Pictures Inc., New York, producing filmed musical series, “I Thee Wed,” planned as a 15-
minute weekly episodes. Cost of series said to be less than compar-
able live show. Series currently being offered to national sponsor and will be re-released thereafter on market-by-market basis.

General Films Division of Televi-
sion Corp. of America, western branch, Alameda, Calif., announces its new studio which opened last September are operating on full seven-day schedule. Not all this production has been contracted for, but John Convery, general man-
der, believes in the diversity of films and other films currently being made in the famed Mexican back-log of all types of film for future calls. All sound and camera equipment being used is latest 1950 type. New sound stages and out-
door sets and buildings make this one of the largest studios in coun-
tryp devoted to exclusive production of TV films, it is said.

The Broadcasting Yearbook and your business...

the only single source book of radio-tv information, facts, and figures...

How much do advertisers spend for spot, network, regional and local campaigns—who handles the account?
Which are the top radio-TV advertising agencies—their gross billings?
You'll find these answers—and many, many more hard-to-get facts—plus the following exclusive features in the 1950 BROADCASTING • TELECASTING Yearbook.

Gross network billings by advertisers, by agencies, by product classifications, by months
Comparative radio costs vs. newspapers and magazines
Year's top ratings and program trends, awards
Economic analysis of 1949 broadcast advertising
Advertising agencies (and personnel) handling radio-TV accounts
National and regional advertisers directory
More than 50 directories covering AM-FM-TV stations, executive personnel, equipment manufacturers, national representatives; film, transcription and related services.

These and a thousand facts/charts more are the BROADCASTING • TELECASTING Yearbook, classified under easy-to-find headings, indexed for quick reference.

There's nothing like the Yearbook for radio-active agencies, advertisers or any radio-connected business. It's your indispensable year round tool.

The Yearbook comes free to BROADCASTING subscribers as of February 1, but a limited supply of copies will be available at $5.00 each.

$7 pays for 52 weekly issues and includes 1950 Yearbook.

Please enter a year's subscription to BROADCASTING immediately and be sure to send me the 1950 Yearbook, free of charge, as part of this subscription.

☐ I enclose $7.00 ☐ Please bill me

City Zone State
With more and still more telecasters it's Du Mont TV camera equipment because of outstanding dependability.

**DU MONT**

Type TA-124-B

Image Orthicon Chains

Many TV stations either on the air or under construction, are Du Mont-equipped throughout. That means the Du Mont Type TA-124-B Image Orthicon Chain for studio and remote pick-ups, alike.

But of even greater significance is the growing use of Du Mont cameras and auxiliary equipment by TV stations originally using other makes of equipment; by intra-store television demonstrations; by wired television installations; by movie producers experimenting with television production possibilities; by TV training schools; by government agencies both here and abroad.

The Du Mont advantages are many: Split-second action through quick set-up; finger-tip controls; superlative image pickup with precise electronic viewfinder checkup; accessibility for time-saving inspection and immediate maintenance; handy matched units, jiffy-connected, for all required power, synchronizing, amplifying and monitoring functions, plus the latest camera effects.

But the outstanding characteristic of this popular Du Mont Type TA-124-B Image Orthicon Chain is dependability. That, in the final analysis, is the all-important consideration. For "The show must go on," regardless.

Consult us on your TV plans and requirements. Literature on request.

CLEAR CHANNELS

Farmers Urge Power Boost

CLEAR-CHANNEL stations' frequencies should be "held inviolate by international agreement" and power increased to permit further service to farmers, the American Farm Bureau Federation resolved Dec. 15 at its 13th meeting, affirming a resolution adopted in 1946 and reaffirmed in 1947 and 1948. Sub-stations are advocated by the federation to serve special needs of farmers.

Service by KFI Los Angeles to the Great Western Live Stock Show held in that city a few weeks ago was praised in a letter sent to General Manager William B. Ryan by C. J. Lump, representing the Great Western Live Stock Assn.

KXXL RENO CASE

FCC Issues Initial Decision

INITIAL decision to deny renewal of license to KXXL Reno, Nev., and dismiss as moot a request to sell the station to Chet L. Gonce, its original owner, was reported by FCC last Wednesday. KXXL destroyed by fire in November 1948 and off the air since that time, assigned 951 w on 1230 kc.

Hearing Examiner Fanney N. Litvin found that Byron J. Samuel, now sole owner, had acquired without Commission consent the one-third interest he held by Edward Margolis and Frederick W. Kirke, who had been partners with him in station. The report showed further that Mr. Samuel did not desire to renew the KXXL license and did not wish to rebuild or operate the station.

The examiner found that Mr. Samuel wished renewal only for the purpose of transferring it to Mr. Gonce for cancellation of a $10,000 debt due the latter. At the hearing, Mr. Samuel further stated he wished to "withdraw" both the renewal request and the transfer bid. Mr. Gonce was given FCC approval in 1947 to sell to Mr. Samuel and his associates for $30,000.

Edward A. Malling appointed sales manager for component parts in General Electric Receiver Div., Syracuse, N. Y. He has been with company since 1935.

CARROLL GARDNER appointed account executive for Frederic W. Ziv Co. Formerly general manager of WLEX Lexington, Ky., he will cover Florida and Southern Georgia with headquarters in Jacksonville. Mr. Gardner formerly was general manager of WAPI Birmingham and later was with WMBR Jacksonville.

Mr. Gardner AIR KING PRO- DUCTS Co., Brooklyn, N. Y., reports its new console and table model television receivers will make use of rectangular video tubes. Called "soft-lite full view," tubes are said to show picture exactly as it is telecast from transmitting station with no loss of view from cut corners or masking.

COMMODORE JOHN D. SMALL, executive assistant to the president of Emerson Radio and Phonograph Corp., New York, named vice president of corporation in addition to his present duties. ABRAHAM ROSEN, controller, appointed assistant treasurer. A. A. VOGEL, former assistant controller, named controller, JOSEPH LONGIN, former assistant controller, named assistant to the executive vice president.

Dr. ALBERT W. HULL, assistant director of General Electric Research Lab., Schenectady, N. Y., retires. He will continue to serve company as a consultant.

Equipment

ELIZABETH K. TAYLOR appointed as assistant secretary of AT&T, first woman in organization to hold that post. She joined company in 1921 as stenographer and later became secretary to the president.

TUBE DIVISIONS of General Electric Co., Syracuse, N. Y., announce following appointments: E. F. PETERSON named manager of sales of tube divisions, with headquarters at Schenectady; L. B. DAVIS appointed manager of receiving tube division at Owensboro, Ky.; and K. C. DeWALT named manager of cathode ray tube division at Syracuse.

UNIVERSAL MOULDED PRODUCTS CORP., Philadelphia, announces marketing of Reelset, portable tape recorder with 'twin-track' which eliminates interruption for rewinding; automatic tape threader, and volume indicator.

Read what Frank Marx, Vice President in charge of Engineering, American Broadcasting Company, says: "For the past two years A. B. C. has successfully used magnetic tape for rebroadcast purposes ... A. B. C. recorded on AMPLEX in Chicago ... 17 hours per day. For 2618 hours of playback time, the air time lost was less than three minutes: a truly remarkable record."

SPECIFICATIONS

Frequency Response:
At 15" = 2 db. 50-15,000 cycles
At 7.5 = 2 db. 50-7,500 cycles
Signal-To-Noise Ratio: The overall unweighted system noise is 70 db. below tape saturation, and over 60 db. below 3% total harmonic distortion at 400 cycles.

LaGrange Local

FCC Issues Initial Decision

FIRST local station for LaGrange, Ill., metropolitan Chicago community, is proposed in an initial decision issued by FCC for tonight at 11:00 p.m. to grant the bid of The LaGrange Broadcasting Co., for 500 w daytime on 1300 kc there.

Hearing Examiner Fannyn N. Livingood found that the proposed station’s 0.5 mV/m contour would include a population of 3,196,259. The report indicated only slight interference would occur with WMO! Aurora, Ill., WKAN Kankakee, Ill., and WOOD Grand Rapids, Mich. Although the station would serve but 67% of the Chicago metropolitan district, the examiner felt the waiver of the Commission’s 90% requirement was justified in view of the first local outlet to be afforded LaGrange. LaGrange Broadcasting is a partnership of Russell G. Salter, first- and second-time owners WAUX Waukesha, Wis., and Charles F. Sebastian.

was inadvertently scheduled Jan. 2, legal holiday.

KOJF Havre, Mont.—Granted petition for renewal of license and application for license to cover FM station.

December 23 Application

On All Accounts (Continued from page 16)

Manchesters—followed the Brewers to the U. S.

Gordon’s stint in New York radio production, copywriting and other agency work was stopped temporarily in 1942 when Uncle Sam beckoned and he donned a Navy uniform. The war took the young Manchester away from memories of Williamson, Conn., near Hartford, where he was born, and out of Gotham’s mee. In the service, he was trained as an electronics engineer in the Navy, transferred to the Marriees in the Pacific, and later, as a liaison officer attached to the Air Forces. Finally, he wound up with the Navy again in Hollywood on Naval film production. Latter assignment lasted three months and added to his basic grounding already gained in film work.

Back from the war in 1944, Gordon re-entered agency freelance work in New York. Four years later, he joined the Ryan agency, at 726 Jackson Place N. W., Washington. Since that time, Gordon has aided in the agency’s mounting radio billings.

Selling Ability

Selling is the main credo breathed by Gordon. His successes have been pinned to ability to place advertising. This ability has been cultivated through meticulous testing, results of which in the Washington area, he found, warranted printed advertisements in the daily papers. Principles involved have been carried still further into other market areas.

In one of these tests, Mr. Manchester found that rural and lowincome people in Washington, Virginia and part of Maryland, were receptive to radio introduction of an unfamiliar corn meal brand name, Covered Wagon, duxed by Mills Stream Cereal Co., Bonner Springs, Kan. A good slice of the budget went into placements on the WINX Washington disc jockey show endorsed by Jerry Strong; on the WRNL Richmond, and on WVAR, Arlington, Va. How Gordon sells rough ground corn meal to this population can be seen from the following sentence taken out of context of typical radio copy: “Honest to Pappy’s buckskin britches friends—you’ve never eaten corn meal makins ‘til you’ve used Covered Wagon corn meal.”

Heavy Radio Scores

For the more cultivated taste in the city, Gordon draws on the appeal of the fried shrimp delicacy, packed frozen. But the principle is the same—heavy radio placement. In this case, all placings are spot. Again success.

In Minneapolis, and other such markets, Gordon reports that surprisingly the mass consumer is unfamiliar with the tang of shrimp. Only a thin sprinkle of connoisseurs were aware of its attraction. National placement of one-minute spots in 48 markets made known Jekyll Island frozen shrimp. Other packaged food brands which he handles are Dixiana-South and Dewkist. Another account placed by Mr. Manchester is that of the Mid-Atlantic Div. of Safeway Stores (supermarket chain).

Gordon likes the use of 100%
Programs

KWK Pasadena, Calif., today (Jan. 2) doing two-hour on-the-spot broadcast of Tournament of Roses parade, Pasadena, Station will feed broadcast to Armed Forces radio stations and to eight California stations including KMPC Hollywood; KFAC KLAC Los Angeles; KIEV Glendale; KRNO San Bernardino; KROM Santa Maria; KSPA Santa Paula; KVNT Ventura. Carnation Co. (ice cream) sponsoring Broadcast on KWK; Carnation Milk Dealers on KVEN. Bill Garr, KWKK Special Events Director, is in charge of production. Parade announcing chores are being shared with him by Wes Mears and Bob Wilson.

French Salute

NNEW York new broadcast special Salute to French Radio Dec. 27, 9-9:30 p.m. in celebration of 50,000th program produced by International Division of Radio Diffusion Francaise. Program included excerpts from French programming.

New WMBG Show

FIVE-minute show on WMBG Richmond has been recently inaugurated under title Washington Correspondence. Program features station’s Washington correspondent giving day-by-day account of happenings in nation’s capital and hints as to what further developments can be expected. Show is sponsored by International Wood Products Co., Richmond, Mon.-Wed.-Fri. 6 p.m.

Early Xmas Viewing

THREE Cincinnati TV stations made Christmas Day “TV Day” all day in that city. WKRC-TV went on the air at 8 a.m. Christmas morning from a local orphanage; WPCO-TV placed a test-pattern on at 6 a.m. and began regular telecasting at 7, and WLWT (TV) began telecasting at 8 a.m. Early programming was designed to accommodate recipients of TV sets as Christmas presents.

Students Take Over

ONE of the tenth anniversary features of KVFD Ft. Dodge, Iowa, was inauguration of series, “School Day,” in which students from local high schools and junior college take over operation of station and its FM affiliate, KFMY, from 6 p.m. to midnight. Students doing for shows they produce, give play-by-play of games of interest to listeners. Students also take complete charge of stations’ operations.

‘Something To Do’

NEW show, Something To Do, on WTMJ-TV Milwaukee, finding enthusiastic reception from children and their parents here has been named. Thurs.-Wed., 5-5:30 p.m., and teaches children simple arts and crafts. Prizes donated by sponsor, Boston Dept. Store, Milwaukee, are awarded to nine children in viewing audience weekly and children participate in show during following week.

Christmas Every Day

LATE last November, WPBR Baltimoric’s locally produced program sent out listeners to send in letters about people who express Christmas cheer throughout the year. Special committee selected 10 best letters and sent invitations to writers to bring the persons they had written about to study by special 45-minute broadcast last month. During program, revolver, a pin cushion, a letter writer, and Santa Claus gave prizes to women who were selected from around St. Nicks. Choir and interviews with personalities rounded out show.

Teen-Age Talent

YOUNG people who have organized themselves under name, Tele-Teen Talent Inc., produce Spotlight on Tomorrow, half-hour variety show on WLWD (TV) Dayton, Ohio. Time and facilities of station are loaned to group by WLWD. Shows feature songs, instrumental selections, comedy routines and dance numbers. Program is also carried by WLWT (TV) Cincinnati and WLWC (TV) Columbus.

Mid-Winter Baseball

BASEBALL is already “hot” with bi-weekly half-hour Hot Stove League show on WNOR Norfolk, Va. Featuring Earl Harper and Jack Ruggiero, station’s baseball announcers, program gives listeners late baseball developments and news, and interviews baseball celebrity guest. Special feature of show is three inning baseball quiz game. Teams of three men each are headed by Messrs. Harper and Harris. Correct answers to questions merit home run for team. Incorrect answers count as strike outs. Ushers of quiz will be “Hot Stove League World Series” between two champion teams which will be played off before regular WNOR baseball season begins.

Youth Program

SPECIAL program on WTVR (TV) Richmond featured five 10-year-old boys who demonstrated work being done in Richmond YMCA with boys in the city. Boys were members of physical educational program at the YMCA and performed acts of balancing, tumbling, pyramid building and so forth for the televising and studio audience. Entire show, emceed by Jack Lewis, sports announcer for WTVR, was made up of boys’ performances.

STEEL OUTLET

Expect WEIR on Air May 1

CONSTRUCTION of a 1 kw station, WEIR, operating unlited on 1420 kc, is to begin this week, according to a report from Steubenville, Ohio, where the outlet will be located. Station will have studios in both Weirton and Steubenville, covering an area of more than 300,000 population. It is scheduled to be on the air May 1.

According to the report, the call letters, WEIR, will honor Ernest T. Weir, chairman of National Steel Corp. and its subsidiary, Weirton Steel Co. Station will be operated by Tri-State Broadcasting Co., a recently-formed West Virginia corporation, president of which is Thomas E. Milisop, also president of Weirton Steel Corp. and mayor of Weirton, W. Va.

THREE WOR New York advertisements, conceived and written by Joseph Creamer, station’s promotion director, are included in Joe Simon’s 1949 Newspapers Advertising Annual, collection of year’s outstanding ads in American newspapers.

STATION BIDS

FCC Reports on WDIA, KLX

INITIAL decision has been reported by FCC to grant application of KLX Oakland, Calif., for power increase on 910 kc fulltime from 1 kw to 5 kw directional.

Commission meanwhile reported initial decision to deny WDIA Memphis, Tenn., request for switch from 250 w daytime on 730 kc to 250 w fulltime on 1240 kc.

In the KLX case, the initial ruling by Hearing Examiner Penney N. Litvin found that the proposed power increase would not cause objectionable interference to any other station and that the proposal would be in “substantial compliance” with the Commission’s rules and engineering standards. With increased power KLX would expand its 0.5 mV coverage from present 1,525,600 persons to 1,605,800 persons, the report estimated.

Hearing Examiner J. Fred Johnson, Jr. recommended denial of the WDIA bid because the proposed operation would not meet minimum engineering requirements for coverage of residential and business areas and further on ground of interference with WENK Union City, Tenn., and KWKAT Stuttgart, Ark. Examiner Johnson found no evidence in the record that WDIA had violated any laws regarding lottery and gift enterprises, which also had been an issue in the case.
Help Wanted

Manager
Manager for 250 watt successful small northwestern station. Give monogram and radio station history. Box 246D, BROADCASTING.

Traffic manager. Male, must be experienced, have and use full ABC affiliation in midwest. Give experience, background, references and photo. Box 313D, BROADCASTING.

Allis-Chalmers Repeat

ALLIS-CHALMERS Manufacturing Co., Milwaukee, has ordered a live repeat broadcast of the National Farm and Home Hour from NBC Chicago for Mountain and Pacific Coast Time zones. Starting Jan. 7 at 1:30 p.m. CST each Saturday, reaching the additional zones at 11:30 a.m. and 12:30 p.m. respectively. Program is aired regularly at 12 noon CST. Agency is Bert S. Gittins, Milwaukee.
Feature

Promotion

Each year, the holiday season brings in a new wave of excitement and anticipation for the Christmas season. This year, RCA has released a new booklet, titled “Christmas Comedy Will Against Cooperation,” which contains various promotional pieces for the season. The booklet is designed to be distributed to new TV set owners, conventions in RCA Exhibition Hall, and through company distributors. The booklet is intended to promote the Christmas comedy series and attract potential sponsors.

The booklet is divided into several sections, including Christmas season display, graph folder, FM in '50, birthday celebration, andWOV Pilgrimage. The booklet also contains maps and graphs, which are intended to be used by RCA salesmen to show the audience and pressure for new orders.

The booklet is a valuable tool for RCA salesmen, as it provides them with a comprehensive guide to promote the Christmas comedy series and attract potential sponsors. It is an important part of the company's strategy to increase sales and maintain their position in the market.
'49 Revenue
(Continued from page 19)

ny the 230-old stations that went on the air last year.
Revenue to stations from sale of network time declined between $1.5 million and $2 million as compared to 1948.

"Regionally, the revenue picture has changed," according to Dr. Baker. "In 1948 the New England region reported an increase in local business; this year (1949) this area reports the greatest decrease. On the other hand, local business on the Pacific Coast has shown a marked improvement in 1949 as compared with losses in 1948. The West North Central Region (Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Kansas, Missouri) again reports sizable increases in retail business.

The largest percentage increase in national spot business was reported in the East South Central Region (Kentucky, Tennessee, Alabama, Mississippi). Important increases were also reported in the Middle Atlantic, Pacific and Mountain Regions.

"While the Pacific and Mountain Regions appeared to enjoy large increases in revenue this year, they seem to have been hardest hit by increases in operating expenses. The New England and West North Central Region shows decreases in expenses, although both of them showed increases last year."

NAB's tabulation of 1949 estimates against the FCC's official 1948 figures follows:

WINS CASE

Pope Charges WFDR (FM) 'Avco Rule' Move

ITALO-AMERICAN Publishing Co., seeking FCC approval of its $512,500 purchase of WINS New York, in its bid for the WINS facilities [BROADCASTING, Dec. 19, 1949] is seeking to "reinvoke the programming and add it to those serving the foreign-language need. . . ."

The question is not what James Lawrence Fly has said about foreign-language broadcasting in general. It is what does this Commission say about his concrete proposal. We say the question requires a hearing. The WINS group conceded they made an "inadvertent mistake" in saying Mr. Pope himself had told them he could employ only a few of them at WINS. They said the statement was made instead by Mr. Pope's son, Gene Pope.

To this II Progresso replied with an affidavit asserting that no representations concerning the future employment of WINS personnel was made at the hearing.

Further, it was contended, II Progresso's acquisition of WINS would not necessarily mean the number of foreign-language stations would be increased, since it will be required to sell WHKM Jersey City, now a foreign language outlet, which might become a general service station under new owners.

WINS, owned by Crossley Broadcasting Corp., is on 1010 kc with 50 kw day and 10 kw night.

**Theatre for Sale**

The five story office and theatre building, known as the Guild Theatre Building, at 243-247 West 52nd Street, New York City, will be offered for sale in proceedings for the reorganization of West 52nd Theatre Co., Inc., Debtor, at a Public Sale to be held on January 19, 1950, at 3 P. M. at Room 1305, United States Court House, Foley Square, New York City.

The building is of steel frame and concrete construction, with both theatre and office space. The theatre seats approximately 956 seats in balcony and balcony. The offices are on the 2nd, 3rd, 4th and 5th floors and run along approximately the whole length of the building and 20' in depth. The office space has a separate entrance and is serviced by the automatic push button elevator to the fourth floor.

The theatre space is occupied by Mutual Broadcasting Company on a month to month basis as a radio broadcasting station for Station WOR.

The property will be sold subject to a past due mortgage of $557,500.

Further details of the bidding of the property may be obtained from the Trustee or his counsel.

ABC Top Command
(Continued from page 19)
next was a noted newspaper reporter and columnist.

A graduate of Swarthmore College, he joined the New York Herald Tribune, first as a financial reporter and later as a Washington correspondent.

Subsequently he teamed with Joseph Alsop to write a widely syndicated Washington column, and Mr. Alsop co-authored several books.

In announcing the election of Mr. Woods to the vice-chairmanship, Mr. Noble said: "Mr. Woods will be enabled to render greater service to our network and to our affiliated stations by being relieved of the burden of administrative duties and given wider scope to function with greater vigour and tempo, sales talent and programming."

"The rapid development of television and the continued growth and expansion of radio broadcasting have made it necessary for me to have more time to devote to the broader problems of radio and television sales and programming."

Mr. Woods, who announced Mr. Kinnter's appointment, said that Mr. Kinnter has established himself as an outstanding executive officer in the radio and television field. He has brought to our network a new vitality and vigour of thought and operation which has made ABC an outstanding factor in radio and television. I am confident that under his administration the network will sustain the progress which has marked its development since organization."

‘50 BASEBALL

LBS Plans Live Pick-Ups

MAJOR league baseball broadcasts will be carried for the third successive season in 1950 by the Liberty Broadcasting System, which covers 28-stations from coast-to-coast, President Gordon B. Mc Leonard announced last week.

Departure for Liberty in the coming baseball season is expected to be more colorful than ever. The broadcast of a number of the games in previous season was created from wire reports. Mr. Mc Leonard will be principal commentator for the network as he has been in the past.

While Liberty, with headquarters in Dallas, is a year-round regional network serving 45 stations in Texas, Oklahoma and Arkansas, Louisiana and Mississippi and Alabama, there will be more than 100 stations in 21 states already have signed option agreements for the baseball broadcasts, Mr. Mc Leonard said.

Edmund F. Kahn

FUNERAL services were conducted Tuesday for Edmund Franklin Kahn, 38, production manager of WGN Chicago, who died Dec. 24 in his Wheaton, Ill., home after an illness of five days. He is survived by his wife, Alice, and three children, Dennis, 9, Judy, 7, and Sandra, a month old.

WWGB—AM Washington—Assign-
WHER WESTERLY SOLD TO SPRINGFIELD GROUP

SALE of WHER Westerly, R. I. (1230 kc, 250 w, fulltime) to two Springfield, Mass., businessmen and associates for $71,000 announced Friday, subject to FCC approval.

Buyer is Radio Westerly Inc., new firm owned by Richard G. Moore, Springfield building contractor; Lee S. Greenwood, business associate of Mr. Moore; Warren M. Greenwood, program director of WHAV-Haverhill, Mass., and Albion W. Warren, Jr., in public relations in Berlin, N. H. Seller is W. Paul Oury, former Navy commander, who plans to move to Southwest.

Warren Greenwood, who will manage WHER, formerly managed WMOU Berlin, N. H. He is son of Stockholder Lee Greenwood and son-in-law of Mr. Moore. Mr. Warren will be assistant manager. Transaction was handled by Blackburn-Hamilton Co., media brokers. Application for FCC approval being prepared by Dempsey & Koplovitz, Washington attorneys.

FCC-BAR GROUPS TO MEET

FCC CHAIRMAN Wayne Coy Friday advised Federal Communications Bar Assn. President Guilford Jameson that Commission was interested in meeting with FCBA group to review ambiguities in Sec. 1.342 of FCC's rules requiring licensees to file data on management and other contracts and bulk time sales (see early story page 28). Another Commission source also indicated review of rule's provi- sions already underway. President Jameson named Leonard H. Marks, head of FCBA Committee on Practice and Procedure, which recommended review, to chairman committee of three to meet possibly this week with FCC staff. Others named were Ralph L. Walker and Percy H. Russell Jr., Washington radio attorneys.

KKW PROTESTS DELETION

KKW Burbank, Calif., petitioned FCC Friday for hearing on Commission order: revoking license [Broadcasting, Dec. 19]. This automatically stays revocation order, which was issued on grounds of alleged misrepresentation prior to time station went into bankruptcy. Station (1400 kc, 250 w) now being operated by trustee in bankruptcy. International Ladies Garment Workers Union (owner of FM stations WDPR New York, WVUN Chattanooga, and KFMY Los Angeles) has pending offer to buy KKKW for $40,000.

IBEW-CBS DEADLOCK

THIRTY-DAY strike notice which expires Jan. 15 has been filed by IBEW Local 45 with Federal Mediation Service in its deadlocked negotiations with CBS-TV Hollywood for nine weeks. Current Union offer is $125 for 40-hour week, network offering $42. If strike is put into effect approximately 100 IBEW members at CBS-TV would join walkout.

ZEH LEAVES AGENCY

ROBERT E. ZEH has announced his resignation as vice president, account executive and copy director of Henri, Hurst & McDonald, Chicago.
That's impact

Small wonder so many new products and advertising campaigns are launched over WLW. For its over-all performance is remarkable.

In four weeks, The Nation's Station reached FOUR-FIFTHS—80.7%—of all the 3,644,800 radio homes within the WLW Merchandise-Able Area between 6 a.m. and midnight.* That's coverage!

Of all listening among all radio homes between 6 a.m. and midnight during an average week, WLW received six times MORE listening than the average of the nine major competitors.* That's penetration!

Of the 258 stations heard in WLW-land, The Nation's Station received ONE-SIXTH—16.6%—of all listening to all stations.* That's dominance!

And when you put coverage, penetration and dominance together...THAT'S IMPACT!

If you are planning to launch a new product or advertising campaign, talk it over first with The Nation's Station. Write or call any of the following WLW Sales Offices:

140 West 9th St., Cincinnati 2, Ohio
360 N. Michigan, Chicago 1, Ill.
630 Fiftth Avenue, New York 20, N. Y.,

*Nelson Radio Index, February-March, 1949

When you want impact you want WLW
the nation's most merchandise-able station

CROSLEY BROADCASTING CORPORATION
And so does Radio Sales research.

Take the case of the food sponsor who wanted to be stronger in Intermountain America. A Radio Sales Account Executive—backed by the most resourceful research department in spot radio—showed him how he could get 3 times as many listeners at less than one-third the cost-per-thousand. By switching to KSL in Salt Lake City. So he did.

You, too, can make your advertising so powerful it'll pick up extra-heavy profits... in 13 of your most important markets. Just call...

**RADIO SALES** Radio and Television Stations Representative... CBS

Representing KSL, KSLA, KSLB, KSLC, KSLN, KSLP, KSLR, KSLT, KSLV, KSLX, KSLY, KSLZ, and the Columbia Pacific Network.
Success story:

A millinery chain operating two ladies' hat stores in Richmond recently started a schedule on WLEE. Six weeks later a friend asked the manager if it was doing him any good. He replied:

"WLEE is doing me so much good that I have cancelled all other forms of advertising."

Local Richmond merchants use WLEE because it brings them quick, profitable results. More and more national advertisers are following their lead. You should hear the whole WLEE story from your Forjoe man. Call him in today.
For that

BRIGHT NEW PICTURE in LOUISVILLE

see your Petry Man

WHAS-TV . . . soon on the air . . . will be represented nationally by Edward Petry and Company. Petry has represented WHAS since 1933.
The shows below—every last one of them—are WFBR home-grown ... conceived and produced in WFBR’s big, modern studios. Their record for longevity, consistent mail pull, high Hoopers—and the fact that they’re darn near always “sold out”—means just one thing: WFBR is the one Baltimore network station you can depend on to do a magnificent local job for you!

**MORNING IN MARYLAND:** (6-9 A. M. Monday through Saturday) On the air 19 years. 1027 pieces of mail in September ’49. Top Hooper.*

**IT’S FUN TO COOK:** (12:45 P. M. Monday through Friday) On the air 6 years for one sponsor. Specialized appeal—but still #2 Hooper* in 9-station market. 2610 pieces of mail in September ‘49.

**CLUB 1300:** (1:00-2:00 P. M. Monday through Saturday) On the air 10 years. Sold out. Top Hooper.* 1835 pieces of mail in September ’49. Has drawn as high as 8000 pieces in 7 days.

**SHOPPIN’ FUN:** (2:00 P. M. Monday through Friday) Top Hooper.* On the air 4 years. Sold out.

**EVERY WOMAN’S HOUR:** (4:30 P. M. Monday through Friday) On the air 11 years. Top rated women’s program in Baltimore. Sold out.

**SPORTS PAGE:** (6:15 P.M. Monday through Saturday) 3 years for same sponsor. #2 Hooper.* Drew 46,000 pieces of mail recently for football contest.

**RETURN ENGAGEMENT:** (7:05 P.M. Monday through Friday) The new baby. On the air 3½ months. No Hooper available yet. Not sold out—but going fast. 125 pieces of mail weekly and growing.

*December ’48—April ’49
Closed Circuit

THEY'RE OFFERING even money that NBC's proposed 2½-hour Saturday night TV series won't go through as planned. FCC's legal experts feel serious question is raised in formal complaint by rival DuMont Network (story page 53), though they're waiting for NBC's answer before deciding. In any event, there's doubt that NBC will get clearances from 15 affiliates, which is minimum network had set.

MYSTERY and serial program formats would figure prominently in Mutual schedules if those conversations of M-G-M with network looking toward operating and programming arrangements materialize. At least that's indicated by some of those identified with preliminary negotiations, which had bogged down but which could be revived at any time. Reports of conversations have covered everything from programming arrangements to full network operation with possible acquisition of some MBS stock and investment of substantial funds toward development by Loew's Inc., M-G-M parent.

PROGRAM PERSONNEL at NBC-WNQB (TV) Chicago talking seriously with Comedian Fred Allen about Chicago originations for his first television show, expected to begin late this year. Mr. Allen, who has been ill and is making only few radio guest appearances, recently landed publicly division's programs, policies and production.

IF AND when FCC approves sale of WWDC Washington (which would become WOL to Peoples Broadcasting Corp., there's prospect that station will become MBS affiliate. WWDC, which takes over occupancy of present WOL 5 kw assignment on 1260 kc, has notified MBS it will not continue affiliation because it would mean complete change in its program format.

IF NEW WOL, operating on 1450 kc, does affiliate with MBS (negotiations probably will be entered with others in Washington area), one problem will be handling of Fulton Lewis jr.'s nightly commentary. Peoples is owned by Farm Bureau Mutual Automobile Insurance Co. and Mr. Lewis has carried on an uncompromising fight against co-ops. It's indicated that if negotiations with MBS are continued, station will carry Mr. Lewis but answer him within half-hour. Situation would be without precedent in radio programming.

1950 BASEBALL broadcast pact for Washington understood settled last week with WWDC last year aired night games only with WPIK Alexandria, Va., carrying (Continued on page 70)

Upcoming

Business Briefly

BISCUIT RENEWAL • National Biscuit Co., New York, renewes effective Feb. 7 two MBS daytime shows, Straight Arrow, Tues. Thurs., 5-5:30 p.m. Agency, McCann-Erickson, New York.

WEED APPOINTED • WNAO Raleigh, N. C., kc 5 kw 850 kc, and WDUK Durham, N. C. 1 kw kc, ABC affiliates, name Weed & Co. as exclusive representative, individually and in combination.

AUTOMOTIVE BUDGETS MAY TOTAL $400 MILLION

TOTAL advertising budget of automotive industry may reach $100 million in 1950, judging by plans of leading manufacturers who see year of intensive competitive selling. Companies using radio and television heavily for 1950 debates [BROADCASTING, Dec. 19, 1949].

Doubleday Division of General Motors tops industry with $27 million, and dealers are expected to spend almost as much more locally. Ford ranks second with $22 million budget for Ford cars. Company's Lincoln-Mercury Division spends another $11 million.

Oldsmobile Division of General Motors scheduling $8 million, with Buick and Pontiac around same figure and Cadillac around $4 million. Chrysler total expected to be well over $10 million. Several manufacturers expect to increase expenditures. Used-car dealers likely to spend at least $200 million.

D-FS AGAIN RANKS FIRST IN NETWORK BILLINGS

FOR 16th successive year, Dancer-Fitzgerald-Sample, New York, heads list of advertising agencies in gross radio time network expenditures during 1949, according to figures released by four networks. Twenty leading agencies in total radio time billing during 1949 as shown by networks were as follows:

Dancer-Fitzgerald-Sample, $18,708,646; BBDO, $11,068,816; Benton & Bowles, $7,938,258; J. Walter Thompson Co., $7,748,030; Young & Rubicam, $7,677,572; Compton Adv., $7,119,301; News, $6,770,014; Young & Rubicam; $6,456,348; McCann-Erickson, $6,356,984; Newell-Emmett Co. (now Cunningham & Walsh), $5,700,540; Foote, Cone & Belding, $3,620,150; Ward Wheelock, $3,564,865; William Eddy & Co., $3,483,994; Leo Burnett $3,419,580, Dianne Jones & Ryan, $3,375,517; John P. Murray, $3,322,225; Routhfrau & Ryan, $3,177,051; Ciesl & Pressey, $2,705,625; Kodner Adv., $2,612,016; Sullivan, Stauffer, Corwell & Bayles, $1,281,260.

Dancer-Fitzgerald-Sample placed spot radio budget for calendar year 1949 totalling $3,056,002 in addition to above billing.

Here is confirmation of reliability

WKOW maintains broadcast of football game during powerline failure, with Collins 12Z remote amplifier

AUTOMATIC changeover to battery power when the a-c line fails is a standard feature of the Collins 12Z remote amplifier. All concern about powerline fluctuation and noise as well as power failure is eliminated. The 12Z is also the ideal remote unit for locations where a-c power is not readily accessible. Here are additional features:

- Four microphone channels
- Two db per step attenuators
- Monitoring of amplifier or line output
- Ninety decibels gain
- Noise 60 decibels below program level

Now is the time to get your 12Z remote amplifier. It will give your station that necessary security for every sports occasion. Delivery is from stock. Write, wire or phone Department R-1, Collins Radio Company, Cedar Rapids, Iowa.
DEALER DOLDRUMS?

It's pretty hard for your man in Wichita, or Bridgeport, to get steamed up over an ad campaign that takes an impersonal sweep over the whole country.

DIFFERENT WITH SPOT!

You can talk the local man's language, use his name and address, tackle his selling problem. In one market, or fifty, or a hundred. And odds are, you'll save money with harder hitting, personalized Spot.

Try Spot ... to get your dealers off the bench and into the game. Try Spot on the Petry-represented stations listed here to cure your dealer doldrums.

BAB'S FUTURE?
By J. FRANK BEATTY

The future of NAB's new sales-getting machine—Broadcast Advertising Bureau—and possibly the management future of NAB itself will be at stake in a series of exploratory operations starting today (Monday).

First phase of the series will be an unprecedented joint meeting of three new NAB advisory committees. They are the Broadcast Advertising, Radio and Television Committee, opening a two-day session this morning at NAB Washington headquarters.

With membership just announced last week, NAB President Justin Miller, the committee is the first to be formed under the board's November reorganization plan which provides for a total of 10 advisory groups (see committee lineup, page 24).

Technically, the tripartite meeting has been called to work out a plan to fit BAB into the new Radio and Television Division setup. These two divisions have been compelled to drift along since their formation last September were the new benefit of specific board directive.

Strikes at Foundation

While the announced purpose is to devise a coordination plan, the subject is so hotly debated at the foundation's NAB reorganization project. Furthermore, it involves the danger of a young revolution among station executives who fear that BAB is about to get a dose of administrative ice water and perhaps a shrunk budget.

BAB is riding high on a wave of popularity that swept all 17 NAB district meetings last autumn. Not in recent history has any single NAB activity been so enthusiastically received. The 17 district directors who led the meetings are acutely aware of BAB's popularity and they recall the convention hall uprising and corridor maneuvering that forced BAB's creation at Chicago last April.

The tossing around that BAB has received in its brief but spectacular existence lays the groundwork for membership resentment that is simmering if not boiling. It is mostly confined to private conversations, letters and memos.

If this week's joint meeting at NAB headquarters produces a coordination plan for BAB, the plan will come before a joint Jan. 23-24 meeting of two key board policy bodies, the Structure Committee and the Finance Committee.

Final stop—and here the actual decision is slanted—will be the board's Feb. 8-10 meeting at Chandler, Ariz., where the reorganization project that started in late 1948 is slated for completion.

Three key figures in this week's tripartite conference will be the chairman of the new committees. They are William B. Ryan, KFI Los Angeles, Broadcast Advertising Committee; Simon R. Goldman, WJTN Jamestown, N. Y., Radio Committee; Eugene S. Thomas, VOIC (TV) Washington, Televisio Committee.

Of the three, Mr. Thomas is a board member, having been elected at the board's November meeting when TV first attained the right to directorships. He was chairman of the old NAB Sales Managers Executive Committee, predecessor to the new Broadcast Advertising Committee. Mr. Goldman was chairman of the former Small Market Stations Executive Committee, later a unit of the sales managers group. Mr. Ryan served two terms on the NAB board in the last decade and knows the association's operations.

In all, seven board members are scheduled to take part in the three-committee meeting. Board members on the Broadcast Advertising Committee are Howard Lane, WJJD Chicago, and Frank U. Fletcher, WARL Arlington, Va. Both served on the board's BAB Policy Committee, which directed BAB's course in its formative months and was abolished last November.

A surprise in the announcement (Continued on page 24)

ALL-RADIO FILM

By EDWIN H. JAMES

The ALL-RADIO promotion film, "Lightning That Talks," which has been in preparation for more than a year, will be given a glittering premiere in New York at the Waldorf-Astoria Hotel March 1.

New York stations, networks and station representatives that have subscribed to the promotional film have guaranteed to contribute a $30,000 budget for the New York showing of the film, it was learned.

The plan for the showing was discussed by the New York committee last Thursday at Broadcast Advertising Bureau headquarters in New York. The committee arranged the New York premiere of the picture is composed of Lewis H. Avery, president of Avery-Knodel, in charge of finance; Charles Ham mond, NBC vice president, in charge of invitations; Maurice Mitchell, director of BAB, in charge of arrangements, and Joseph Creamer, WOR New York promotion manager, in charge of publicity and promotion. Justin Miller, NAB president, will be honorary Chairman of the committee. The active Chairman had not been named as of last Friday morning.

The New York committee is con-

KTOK CHANGE

Bell as General Manager Prologues Expansion

EDGAR T. BELL, former secretary-treasurer and business manager of the Oklahoma Publishing Co. and its radio properties, last Thursday became general manager of KTOK in its native Oklahoma City, succeeding Robert D. Enoch, who had resigned.

Mr. Bell, a well-known figure in both radio and newspaper circles, is understood to have entered into an agreement with O. L. (Tod) Taylor, president and majority owner of the Oklahoma City ABC regional outlet, whereby he acquires an option for a "substantial interest," to be exercised within one year.

Joining Mr. Bell as sales manager of KTOK will be E. L. Colburn, formerly of the sales staff of WKY Oklahoma City NBC outlet, who recently resigned as commercial manager of KABC San Antonio.

Under Taylor-Bell direction, it was learned that KTOK promptly will undertake an expansion program, including new studios and offices.

Mr. Enoch, who had been with the station for nine years under its present and former ownership, has not announced future plans. At 42, he is a 20-year veteran in radio. He is a director of the NAB, representing District 12 (Kan. and Okla.).

Mr. Bell terminated 33 years with the Oklahoma Publishing Co. in mid-1948, disposing of his stock interest in the publishing firm and its then-owned and affiliated stations, KTOK, KZ, WV, and KVOR Colorado Springs. Subsequently KLZ and KVOR were sold.

Last year Mr. Bell was associated with Gene Autry, cowboy artist and station owner, in the proposed acquisition of KTSA, San Antonio CBS outlet. The project, however, was dropped because of the Arco rule and the competitive proposal of the San Antonio Express which

HELBROS SPOTS

Sets Heavy XEO Contract

HELBROS Watch Co., New York, has signed a contract with XEO Juarez, Mexico, for 35,000 spot announcements yearly—approximately 96 transcribed spots per day—effective immediately [CLOSED CIRCUIT, Jan. 2].

The contract was placed direct by the company. Harvey M. Bond, advertising manager of Helbrors, told BROADCASTING: "It is a very special deal." Although a radical departure from the Helbros policy of sponsoring only network shows, the spot schedule does not constitute an abandonment of network programs, Mr. Bond said.

Mr. Bond would not disclose the cost of the special spot schedule, although he did say it is of "substantial length of the contract was for several weeks." Helbrors Watch Co., through Dorland Inc., New York, its advertising agency, sponsors Richard Hamilton, a mystery series on NBC.

DCS APPOINTS

Names Three Vice Presidents

THREE officials of Doherty, Clifford & Shenfield Inc., New York, have been appointed vice presidents.

They are: Samuel L. Frey, who joined the agency in 1946 and is in charge of media; Dr. Philip Reichert, director of the agency's professional division in charge of medical advertising, and Robert E. Shaw, who joined the agency in 1947 and is art director.

HUNT FOODS INC.

Plans AM-TV Campaign

RADIO and television will be used to supplement an advertising, merchandising and sales campaign of unprecedented proportions for Hunt Foods Inc., Los Angeles, during 1956, according to Frank Oxarart, national director of advertising and merchandising.

Mr. Oxarart revealed that programs are being studied. Selection of talent and shows on the basis of audience acceptance and suitability to promote Hunt products will be made on completion of tests in California, he said. Agency is Young & Rubicam Inc., Hollywood.

RONSON BUDGET

'50 Ad Plans Over $2 Million

THE ADVERTISING appropriation for 1956 will be the largest in the history of the Ronson Co., Alexander Harris, president of Ronson Art Metal Works Inc., announced at a sales conference of the company last week. The budget will be in excess of the $2 million spent for advertising in 1949.

One of the features of the five-day sales conference was the special presentation of Ronson's radio and television program. Twenty Questions. Also featured at a dinner was Johnny Desmond and the Tony Mattola Trio, stars of the Johnny Desmond Show on ABC.

Block Buys on ABS

BLOCK Drug Co., Jersey City, through Cecil & Presbrey, New York, has signed a contract with the Alaska Broadcasting System on behalf of Amo-n-dent and Min-a-pee, to sponsor the Burns & Allen program, carried Sunday afternoon on all six ABS stations.

WHAS NOT FOR SALE

WHAS Louisville, 1-A clear-channel station of the Courier-Journal and Louisville Times, is no longer on the market for sale, it has been announced.

Crosley said the station, which had been open to negotiations since FCC vetoed its sale to Crosley Broadcasting Corp. [BROADCASTING, Sept. 26, 1949] "has been taken off the market" and that "no further bids for its purchase will be entertained."

The announcement came Dec. 31 from Mark Ethridge, publisher of the Courier-Journal and Times, and Lisle Baker, vice president and general manager of the radio and newspaper operations.

Bids Received

They said two "serious" bids and several inquiries had been received looking toward acquisition of the station. But, they asserted:

"The circumstances under which we were willing March ago to sell WHAS have changed entirely. Our picture is much brighter and so is television's. Even while negotiations for the sale of the station have been going on, we have been pushing the completion of our television station, as is obvious from the progress on the tower. We expect to be on the air in late February with our own and with the CBS television programs.

Crosley Contract

The reference to their willingness to sell WHAS "16 months ago" related to the date of the sales contract with Crosley. The Arco subsidiary was to pay $1,925,000 for the WHAS-AM-FM-TV properties and lease studios and facilities in the Louisville Times-Courier-Journal building for 10 years at $75,000 a year. FCC rejected the proposal on grounds that the overlap between WHAS and Crosley's 1-A WLW in Cincinnati was too great under the Commission's duopoly ban.

In the FCC hearing WHAS authorities explained the decision to sell was based on expansion of other interests and a desire of the Barry Bingham family, which owns the newspapers and station, for "complete financial self-containment."

One group known to have been negotiating for the Louisville clear-channel station included H. Leslie Atlass, vice president of the CBS Central Division; P. K. Wrigley, chewing gum magnate and part owner of WIND Chicago; and Gene Autry, cowboy actor and broadcaster [BROADCASTING, Oct. 17, 1949]. Negotiations were along the lines of the Crosley-WHAS contract.

Fry & K&E

Takes Executive Duties

GEORGE THOMAS CLARK FRY, who left ABC last fall as national director of network radio sales, has joined Kenyon & Eckhardt, New York, in an executive capacity.

Since his discharge from the U. S. Marine Corps in 1946, Mr. Fry was with ABC, first as a member, then as director of its business development department. Following that he served as eastern sales manager for network radio and television. In July 1948, he was named national director of network radio sales.

FRY & K&E

Mr. Fry

Taken Off Market

FOLLOWING her debut on the Carnegie Hall program's Christmas broadcasts, Margaret Truman is congratulated by Joseph Katz (I), of the Joseph Katz Advertising Agency. The program, sponsored by the American Oil Co., is handled by the Katz agency. With Miss Truman is Charles H. Wagner, American Oil Co. president.

LAURITZ MELCHIOR (center), singer, greets E. F. Kalkhof, advertising director of the American Oil Co., and Mrs. Kalkhof, when they attended the Carnegie Hall Christmas program.

NBC MEETING

SPAC Set for Jan. 11 in N.Y.

NBC's 1950 Stations Planning and Advisory Committee will meet for the first time Jan. 11 in New York.

The two-part meeting will discuss sound broadcasting matters in the morning and devote the afternoon session to television.

Balloting Incomplete

Representing TV non-interconnected stations is John M. Outler Jr., WSB-TV Atlanta. Final balloting for the representative for the television interconnected stations has not yet been completed.

All members of 1949 SPAC who were invited have attended and invited to attend this first meeting in 1950. They are Martin B. Campbell, WFBA Dallas, who was the 1949 chairman; Harry Bannister, WWJ Detroit; Harold C. Burke, WBAL-TV Baltimore; Wiley P. Harris, WJDX Jackson, Miss., and Ed Yocum, KGHL Billings, Mont.

BASEBALL RATES

Examiner Hits WU Policy

WESTERN UNION'S rates and policy for baseball sports service to radio stations last week were declared "unreasonably and unjustly discriminatory, and unlawful" to the extent that the tariff specifies an extra charge for each station in a network in addition to a fee for the subscriber station. Ruling was made in an initial decision by Hearing Examiner Elizabeth C. Smith. Investigation of the tariff was made last spring [BROADCASTING, June 13, 1949].

"Insofar as Western Union purports to classify the users of the service according to the use made or the value to the user of the service furnished, it subjects radio stations to unjust and unreasonable discrimination in favor of newspaper and press associations," the ruling declared, "in that the identical service is offered to radio stations and newspaper and press associations with no restriction against their transmitting the information to all of their customers (other than radio stations) without additional charge."

The examiner ordered Western Union to file, prior to the 1950 baseball season, a revision of the tariff to remove the inequitabilities in a network on additional charge of $2 per game per additional station over the basic fee. Such extra charge for Paragraph 19 service is $1.

Prior to this revision the tariff made no specific provision for network broadcasting of the sports service reports and the examiner found that Western Union violated the Communications Act by allowing station-subscribers to use the service for networking. No further action was considered needed, however, since the revision of the tariff on the matter was declared unlawful.

The report stated that Western Union in 1948 had knowingly permitted WIND Chicago and its Midwest Baseball Network to air baseball re-creations based on Paragraph 1 service, although contrary to the then existing tariff, because sponsorship contracts already had been set and Western Union was planning to revise the tariff.

Prior to 1948, Western Union did not know the network had used the service, it was said. WIND had been one of the chief opponents to the charges contained in the tariff.

(Continued on page 26)
IN 1936 a new shortening made its appearance on the market and one year later the product enlisted network radio as its largest single salesman.

Skeptics insisted that the new item, Spry, product of Lever Bros. Co., would never crack the comparatively entrenched status of the non-vegetable shortenings. They were even less sanguine about Spry’s ability to buck the other big vegetable variant on the market.

Today, 13 years later, Spry is one of the established products in the field with over a million dollars annually devoted to radio, still its largest single salesman.

Moreover, largely as a result of the spur of Spry’s advertising, the sales of all vegetable shortenings have increased far beyond the speculations of its greatest exponents, and the Lever Bros. reports last year listed the sales of Spry as the greatest in its history.

The radio history of Spry is in large measure the history of a single show, Aunt Jenny’s Real-Life Stories, on CBS.

For the first year of its existence Lever Bros. employed a national spot campaign, supplemented by newspapers, to introduce the product. The radio spots plugged the slogan, “Try Spry,” and met with such success that the firm plunged into the medium with the network show the next year. “Aunt Jenny” was born full-grown in 1937, a planned brain-child of Lever Bros. and Ruthrauff & Ryan, the agency which today is still handling the show.

At that time, daytime radio fare was limited—quiz and audience participation shows were not known—and the traditionally successful format was that of a serial show. It was decided, however, to experiment with a different kind of daytime program—short, action-packed stories built around true-to-life situations. These five to ten episode stories were to be built around a central character who not only narrated and motivated the dramatic portion of the show but at the same time sold the product. And thus Aunt Jenny was born.

**Aunt Jenny Well-Known In All Media**

From the start Aunt Jenny never has been exploited as a radio performer but rather as a real person with human understanding. She has become a symbol of her product. Her picture, her cooking methods and her national recipes are featured in national magazines and newspaper ads and in all cook books distributed by the maker of Spry. Aunt Jenny has become the product’s trademark.

When the program first went on the air in 1937 it was carried on 55 CBS stations. Today it is heard on 81 stations over the same network.

Public service groups have been quick to recognize and take advantage of the unique relationship that has been fashioned between character and audience. During the war the American Red Cross called on Aunt Jenny to urge the support of her listeners to the service organization. So effective was her urging that the Red Cross was moved to award a special plaque to her in recognition of her accomplishment.

When the Sprays and the Waves needed help in recruiting, Aunt Jenny was there with the message. Again certifications of commendation from both these agencies attested to the power of Aunt Jenny to influence audience reaction.

Even a difficult subject such as cancer was treated in a story by Aunt Jenny for the American Cancer Society. Recently Aunt Jenny successfully helped the Girl Scouts recruit new leaders.

During the month of October the case history of an alcoholic’s struggle to overcome his weakness was portrayed on the program. The series was rebroadcast for Alcoholics Anonymous, and copies of the scripts were sent to the AA branches throughout the country. Aunt Jenny worked with the cooperation of the Alcoholic Foundation on that series.

In order to achieve the realism that has caused millions of actual...
Lever Bros' Shortening Product Blazes a Sales Success Story With Radio

example, if the scene is to be played with an entrance door about 12 feet away, the door is set 12 feet from the microphone. The actor making his entrance actually starts his speech near this door rather than relying on the traditional mechanical "fade in" from the dead side of the mike to the live side.

Talent With Show Since 1937

Another element that gives the program its sense of integration is the fact that all of the talent principals have been with the show since its inception. These include Aunt Jenny, herself as well as Announcer Dan Seymour and Organist Elsie Thompson.

The relationship between star and announcer is one that is normally achieved only on the expensive night-time comedy shows. Dan Seymour is cast as a visitor in Aunt Jenny's kitchen, and between them they talk rather than "speak" the commercial, so that it is often difficult to determine where the show leaves off and the commercial begins. This association between

great Britain by William Hesketh Lever, the son of a well-to-do wholesale grocer of Bolton, Lancashire, when he joined his brother in manufacturing soap. Until that

was that you were saying?" The result: Mr. Hope revised his routine and went on the air for Pepsi- 
dent on Sept. 27, 1938, to become one of the most successful sales- 
men in the history of the industry.

Entered Network Radio in 1934

The first network night-time program to take to the air specifically for Lever Bros. was the Lux Radio Theatre in 1934, which established itself almost instantly as a radio model in form and success. In common with all Lever Bros. shows now on the air, the show is still in the top 15 in its Hooper cate-
gory and is first among the dramatic programs.

With the beginning of 1939, Lever is sponsoring eight network radio shows, and significantly one, 
Aunt Jenny, is a daytime serial. 

Lever Bros. was first formed in

time soap had been sold only in long factory bars. Mr. Lever cut the bars into tablets, wrapped each one, called his brand Sunlight, em-
arked on an advertising cam-
paign, expanding ultimately to this country where the firm has become one of the two leading soap manu-
facturers in America.

Today, Lever Bros. Co. is really a two-part holding company, one Dutch and the other British. The British firm is known as Lever Bros. and Unilever Ltd., with Geoffrey Heyworth as chairman of the board, while Dutch firm is known as Lever Bros. and Unilever N.V., with Paul Rykens as its chairman. Each man is also vice chairman of the other company. Mr. Luckman is president of Lever Bros. in New York.

Lever Bros. always has been a company aggressive and alert to modern selling methods—a policy typified by its success in radio and television.

EFFECTIVE TV commercial is the shot of three dancing chefs who covet around a large pie.

ANNOUNCER Dan Seymour, with the show since its inception, does a masterful job of integrating the com-
cernials into the rest of the show.

BROADCASTING * Telecasting
McConnell Sees Continued Industry Progress

WHILE television in 1950 will prove to be radio's greatest rival, radio is by no means doomed, in the opinion of Joseph H. McConnell, NBC president, who last week released a year-end statement in which he described NBC's parallel progress in both broadcasting and television.

"Program-wise," Mr. McConnell declared, "radio's contributions to the entertainment of the American people will continue to improve. For the first time since its advent in 1920, broadcasting has a rival in its own domain, and the competition is good for it. Television, which progressed so rapidly in 1949, will in 1950 far exceed its best previous year."

Pointing out that while in its first years of life TV has been nurtured and supported largely by radio, Mr. McConnell asserted: "From now on television at NBC will be 'on its own' as a separate and independent operation. It now has its own studios, showmen, engineers, sales force, newsman, talent scouts and financial set-up. 'Television finds encouragement in the fact that four of its seven lean years are past. Within the next three years more television stations will move out of the red and into the black. Several video broadcasters already report that they are showing a small profit. 'Every year,' he continued, "should find an increase in this upward trend, so that by the end of the next decade television will be established on a highly profitable basis. It will be nationwide in scope." Mr. McConnell went on to outline the history of radio broadcasting which, he said, is not national but world-wide in scope. Sound broadcasting's alliance with science, he said, has made it the backbone of the American radio industry. He credited American advertisers with the success of radio broadcasting.

The new art of television, Mr. McConnell declared, is so fascinating with its double appeal and service of sight and sound that "star-eyed soothsayers again have rushed to their crystal balls to catch a picture of the future. "Enchanted by what they have seen," he added, "they have hastily predicted that the future is all television, that 'sound broadcasting' is doomed."

"But consulting the record of invention in the past reveals evidence that these hasty prognosticators may be looking in the dark. The telegraph was not banished by the telephone, wireless has not eliminated the cables, the phonograph was not killed by radio, the movies did not destroy the theatre, nor did any of these forces do away with books, magazines and newspapers. All these still have their place. "It is well to observe, however," he continued, "that the older inventions that have survived the onslaught of progress have done so because they adapted themselves to new conditions created by science rather than to merely mold and modify the old. The electronized phonograph in combination with radio is an outstanding example of what happens when an older art or instrument keeps pace with progress. It too advances, gains added appeal and extends its scope of service."

He stressed his belief that sound broadcasting will continue to serve and sell while television continues its development as a parallel industry. "By no means is radio doomed," he declared, "it begins a new half century as an ever-widening horizon for sound. Sound accepts the challenges of sight in tandem as well as in competition, as the career of the microphone, with the microphone to advance the art of broadcasting. The microphone will continue to speak the message of its sponsor, while television displays the products and through illustrations adds to the pictorial effectiveness of the spoken word."

ARKANSAS GROUP

New Regional Unit Forms

FORMATION of the Arkansas Group, new regional and national sales representative organization in the state, has been announced by Frank Browne, general manager of KWFC Hot Springs. While the complete list of stations participating has not yet been released, Mr. Browne, who is general manager of the new group, said the new unit would include stations which pinpoint Arkansas coverage state-wide.

The organization, he said, would make "a consolidated effort to seek increased business and negotiate for various other radio services." It is to act as sales representatives for the stations involved, offering agencies the opportunity to buy on a one-time clearance, one affidavit and one billing basis, at a group rate.

A manual is being prepared, Mr. Browne said, to tell the story of the organization and of each individual station. It will contain basic data sheets, market and coverage maps and similar information. Headquarters of the group is P. O. Box 1088, Hot Springs.

FCC Actions

THREE new AM stations proposed to be authorized by FCC last week in initial decisions and four new stations granted in non-hearing cases, two of which were for Hawaii. License of KPAB Laredo, Tex., revoked effective immediately. Details of these and other FCC actions are found in FCC Roundup on page 68 and Actions of the FCC beginning on page 44.

FCC REVAMP

Plans Staff Reorganization

AN ADMINISTRATION plan to reorganize many of the Government's regulatory commissions was revealed last week, but FCC seemed likely to be more affected by one of its own devising. The Administration's plan apparently would set up most of all its bureaus along the lines already in effect at FCC and some others, providing for the chairman to be appointed by the President and to give up Федерative administrative responsibilities.

The Commission's own plan is for a staff reorganization, along functional lines [CLOSED CIRCUIT, Dec. 12, 1949]. Details were first disclosed in connection with job classification papers sent by FCC to the Civil Service Commission. Now it appears virtually certain that FCC intends to proceed as soon as possible, whether the requested job classifications are granted or not. Under the current plan, four staff bureaus would be set up: Broadcast, Common Carrier, Safety-Special Services, and Field Engineering and Monitoring. Each would have its own legal, engineer, and accounting sections, thus in effect reversing the present alignment wherein there are professional bureaus with each containing sections dealing with broadcasting, common carrier, etc.

Bureau Heads

For the head of each of the four proposed new bureaus, FCC is seeking an $11,200 to $12,000 job classification from CSC. These directors, not yet selected, would have complete charge of their respective bureaus, subject only to the Commissioners themselves.

The Chief Engineer, Chief Accountant, General Counsel and Executive Officer would be FCC's top-flight advisors and representatives, each heading a separate staff bureau. For the Executive Officer, FCC is seeking an $11,200 to $12,000 rating; for the others, $12,000 to $13,000.

Authorities said it was unlikely that CSC would act on the classification requests before the end of April. In the meantime, it was understood, reorganization plans are moving ahead, with a probability that the changes will be accomplished piecemeal, not all at once.

ALLAN JACKSON (seated), of the CBS Washington news staff, had a big day on a visit to Macon, Ga., when Mayor Lewis B. Wilson (r) presented with a key to the city, a police chief's badge and a scroll proclaiming him Macon's honorary chief of police for the day "with all privileges, rights and courtesies heretofore attached." Watching the ceremonies are Ben Chatfield, news director of CBS outlet, WMMA Macon, and Joy Smith, secretary to Mayor Wilson. Mayor Wilson, WMMA General Manager Wilton Cobb, Commercial Manager Frank Crowther and Mr. Chatfield met Mr. Jackson at the airport to touch off the round of southern hospitality.
HUBBELL ROBINSON Jr., appointed a fortnight ago to CBS vice president in charge of network programs [Broadcasting, Jan. 2], last week announced the appointment of Robert F. Heller, CBS executive producer in New York since June 1947, as New York director of programs for the radio network.

As CBS-TV program director, Charles Underhill will retain responsibility for all video programs originating in New York. Hollywood-originated shows, both AM and TV, will continue to be supervised by Harry Ackerman, Hollywood vice president and network program director, and Sig Mickelson, as previously announced, remains director of public affairs for both media.

Mr. Heller first joined CBS to work on the Man Behind the Gun series in late 1946, after working with Norman Corwin on the four-network This Is War series. Prior to becoming head of the CBS documentary unit in 1946, Mr. Heller shuttled back and forth between CBS staff work and wartime assignments such as organizational work.

Mr. Heller

**Four Realignments Announced**

**Navy ‘Powerhouse’**

AWARD of a $999,750 contract for construction of a transmitter building to be erected at a new Navy radio station at Jim Creek, Wash., has been approved by the Navy Bureau of Yards and Docks. Station is to be used for communications throughout the Pacific area. Construction of building, expected to be completed within 18 months, will be started by Feb. 1, officials said.

**PROPOSED AMS**

INITIAL DECISIONS were reported by FCC last week on a new AM station at Guthrie, Okla., on 1490 kc with 250 w full-time to the Leader Publishing Co. and to grant a new AM outlet at Lancaster, Pa., with 1,500 w full-time to the Antelope Broadcasting Co.

Denials were proposed for their respective competitors, Enid Broadcasting Co., Enid, Okla., and Antelope Valley Broadcasting Co., Lancaster.

In the ruling proposing to grant the broadcasting license, Hearing Examiner J. D. Darrow found that Guthrie presently has no local station while Enid already has two outlets.

**Smith Preference**

Hearing Examiner Elizabeth C. Smith, in the California case, preferred Antelope Broadcasting over Antelope Valley Broadcasting on grounds of integrated ownership and operation. Antelope Valley, a partnership of two nonresident general partners and nine local resident limited partners, would be operated by the former group only, the decision stated. All ten stockholders in Antelope Broadcasting, eight of whom are local residents, would operate the proposed station, however, it was noted.

Ownership details:

- Publisher Co. Guthrie, Okla.
  - Principals: Raymond H. Fields, active for many years in national affairs of American Legion. He owns less than controlling interest in company which publishes newspapers in four cities in Oklahoma. He also has real estate and oil properties, he is president of WLRP New Albany, Ind. Thomas W. Prentice and M. P. Long, who have business interests in Columbus, Ohio. W. Wentz deceased and joint executors of his estate. This last owner last owned 49% stock in Publisher Co.

Broadcasting Co., Lancaster, Calif.—Principals: James B. French, 3½%. Mr. French is first vice president of significant corporate and individual firm and supervisor of engineering maintenance and construction at Columbia Broadcasting Co., North Hollywood, Calif. W. Carter president and director has 17½% interest, he is publisher, real estate owner and president of Lancaster Radio Inc., electrical appliance, appliance and service business.

FM ISSUE

FM's STATUS, the reasons for it and ways to improve it, continued to get attention last week.

In a letter to the New York Times, President Nathan Straus of WMCA Inc., who had planned to close WMCA-FM on Dec. 30 (see story below), said:

"It seems to me that FM has been stillborn, not because the competition of television has doomed it, but because its performance has fallen far short of its promise. FM is a service which, for the ordinary listener to the ordinary program in the average location, has no advantages over AM. On the other hand, it has definite and substantial drawbacks."

Mr. Straus felt that the principal impediment to FM's acceptance—freedom from static, and higher fidelity—are more theoretical than real. A drawback, he said, is the necessity for pinpoint tuning.

John E. Armstrong of Scarsdale, N. Y., accepted the static-free, higher-fidelity attributes of FM, but felt "numerous" factors have impeded its acceptance, aside from television. In a letter to the Times, he asserted: (1) Most sets aren't engineered to make FM sound any better than AM; (2) Most FM sets have automatic frequency control; (3) Most sets and tuners were not "drift compensated"; (4) Most have built-in antennas, which are "not practical"; (5) FM programming is "for a large part, canned music."

Sol Chain, manager of WGBH-FM New Haven, Conn., suggested that FCC might "begin reducing the FM operating schedules" for FM stations. He said, "I am sure that all FM stations, strictly FM that is, would be happy to add to their present schedules the same number of hours, lopped off AM hours." Writing the Commission in connection with its proposal to boost FM's minimum operating hours (Broadcasting, Nov. 21, Dec. 19, 26, 1949), Mr. Chain said:

...I like many veteran broadcasters, put money, blood, sweat and tears into FM because I believed the Commission was sincere about FM and would do everything possible to foster its growth. The Commission has been kind that FM has not been given the help it needs to make it possible for us to continue sweating, but where is the concrete action to let the American public know that FM was intended to replace AM?

Why cannot AM stations duplicating on FM be required to use some AM time to explain FM to their listeners instead of keeping it as dark as a secret as possible? Are AM stations who do nothing to promote the growth of FM operating in the public interest?

WEW-FM OFF AIR

Cities Lack of FM Acceptance

WEW-FM, owned by the U. of St. Louis, was reported last week to have gone off the air Dec. 30, with Rev. Paul C. Reinert, S.J., president of the university, explaining that the decision stemmed from "the fact that FM has not been accepted by the general public.

It was felt, Father Reinert said, that "it will be in the public interest to concentrate all efforts on the operation of WEW." The FM outlet had been the air since May 1947, operating on Channel 236.

WAAT SUIT

Seeks To Restrain WPAT

BREMER Broadcasting Co., owner and operator of WAAT Newark, last week started suit in New Jersey's Supreme Court Chancery Division to restrain WPAT from using the word "frolic" in the name of one of its new programs.

Dave Miller, who since 1940 had emceed for WAAT a program entitled Hometown Frolic, last Christmas Eve joined WPAT to emcee Dave Miller's Frolic. WAAT claims it has another program aside from the former Hometown Frolic listed as Nighttime Frolic. The suit names WPAT, the North Jersey Broadcasting Co., Dave Miller and Station Manager Herman Bess.

The suit also seeks to restrain Mr. Miller from using the word "frolic." WAAT-FM is remaining on the air pending FCC action on the sale. Papers will be filed, according to Mr. Stapleton, within the next two weeks. Should FCC turn down the sale, the station will leave the air, unless another prospective buyer can be found.
**CONGRESS**

**TWO COMMUNICATION subcommittees were marking time last week—as the 81st Congress returned to its legislative chores—preparatory to exploring communications problems relating to FCC and broadcasting.**

The House Interstate & Foreign Commerce Committee plans to meet this Wednesday to review the legislative agenda of programs which will carry on most of its attention throughout the coming session. On the meeting may hinge whether its FCC-FTC-SEC subcommittee, headed by Rep. George Sadowski (D-Mich.), will delve into the McFarland FCC reorganization bill, and if so, to what extent.

Rep. Sadowski is expected to confer with Chairman Robert Crosser (R-Ohio) of the House Commerce Committee and other members on the advisability of holding hearings on the measure (S 1973) introduced by Sen. Edward McFarland (D-Ariz.) and designed to realign the Commission along procedural lines.

While it passed the Senate with legal-technical experts, expected to encounter stiff opposition on the House side—because of certain technicalities in its provisions and because some authorities feel it is all-alienating [Broadcasting, Dec. 26, 1949]. In the Senate, Sen. McFarland's communications group likewise is hounding its time before launching its contemplated probe of spectrum space dealing with use of radio frequencies by government agencies and commercial radio-television stations through FCC allocation. Sen. McFarland said last week no action would be taken until Sen. Edwin C. Johnson (D-Col.), chairman of the Senate Interstate Commerce Committee and a member of the subcommittee, returns to Capitol Hill from his Panama trip. He is expected back late this week.

**New Channels**

The McFarland group feels that frequencies could be better coordinated, especially among government users, which might in turn open up new channels for FCC allocation to broadcasters. The study has been under deliberation for some time. Also slated for inquiry is the problem of domestic and international records communications.

Meanwhile, Congress turned its attention last week to additional measures designed to eliminate excise taxes on musical instruments and either repeal or cut those on radio, telegraph and telephone facilities.

A measure (HR 5653) by Rep. Daniel A. Reed (R-N.Y.) would exempt musical instruments while the Senate has proposed to retain the tax on radio receivers, phonograph records, etc. His proposal also provides for a tax cut on capital gains. By reducing the rate from 50% to 40%, a maximum tax of only 16% could be imposed compared to 25% at present.

Bill provides that any business enterprise operated by an individual or a partnership consisting of not over 20 members may be treated, for tax purposes, as if it were a corporation. Unincorporated businesses would be taxed like corporate firms.

The Senate Appropriations Committee last week also announced it had studied the proposed "omnibus" or "package" appropriation bill, which the Senate adopted by resolution, looking toward adoption by Congress this year. The new method, to be studied further by a joint Senate-House group, would:

**FCC on Hoover Plan**

REPORTS of the Senate Executive Expenditures Committee on progress of Hoover Commission recommendations to date have been compiled in a 388-page booklet published by the U. S. Government Printing Office. Booklet gives digest of principal recommendations, summarizes comments of FCC, FTC and other agencies relative to reorganization plans, and outlines plans submitted and approved during first session of 81st Congress. Also included is Budget Bureau analysis of various proposals, as well as pending legislation. Book is available from U. S. Government Printing Office, Superintendent of Documents, Washington 25.

Lump all requests for funds for agencies like FCC under one measure.

President Truman is expected to submit his annual budget message to Congress early this week, possibly today. Budget will cover expenditures for FCC, State Dept., and others for fiscal 1951.

**'VOICE' PROBLEMS**

Advisory Group Reports

LACK of funds is hampering the effectiveness of the U. S. international information program, including Voice of America operation. The request was advanced last Wednesday by the U. S. Advisory Commission on Information.

On the other hand, the commission reported, many specific steps have been taken in accordance with its recommendations in broadcasting, film production and other activities.

"Effective among these has been the increased use of local medium-wave radio time, documentary and informational films, and mobile units to carry the American story to the grass roots," the report pointed out. The advisory group said the program "falls short of the effectiveness expected by Congress because it seriously lacks funds" and pointed out that needs amount to $7 million, some $2 million cut 50% by the Budget Bureau and Congress. The bureau already has set a ceiling of 61% below the program's stated needs for fiscal 1951, it added.

The commission also cited continued difficulty in getting professional personnel, but said State Dept. had showed the greatest improvement in integration of policy-making groups and information media heads.

**Second Review**

Report was the second semi-annual review submitted to Congress by the commission and was referred, along with a complete report on international information and educational exchange program, to the Senate Foreign Relations Committee.

Mark Ethridge, publisher of the Courier-Journal and Louisville Times, is chairman of the commission, which also includes Justin Miller, NAB president; Philip D. Reed, chairman of the board, General Electric Co.; Erwin D. Canham, editor Christian Science Monitor, and Mark May, director of Yale U.'s Institute of Human Relations. Commission was established to formulate and recommend policies and programs for carrying out the 1948 Educational Exchange Act.

Meanwhile, State Dept.'s Office of International Information last week named Charles M. Hulten, formerly of the Stanford U. faculty, as general manager of overall information activities, including Voice of America.

---

**DEMOCRATS ON AIR**

**Appear on Radio, TV Shows**

DEMOCRATIC Party leaders appeared before microphones and television cameras in numbers last week as legislators reconvened on Capitol Hill for the second session of the 81st Congress.

Programs in which they participated in the past fortnight included NBC's American Forum of the Air, Jan. 8 (yesterday); ABC's Cross Country Cross Section, Jan. 4; NBC-TV's News Letter, Jan. 2; MBS' discussion program, 10:10-11 p.m., Jan. 2; WMAL-TV Washington's Capitol Closeup, Dec. 30; CBS' Capitol Cloakroom, Dec. 30; NBC's Pro and Con, Dec. 30.

Among legislators who appeared were Sen. Scott Lucas (D-III.), Senate Majority leader; Sen. Tom Connally (D-Tex.); Sen. Paul Douglas (D-Ill.); William M. Boyle Jr., chairman of the Democratic National Committee; Vice President Alben Barkley; Rep. John McCormack (D-Mass.), House Majority leader.

Meanwhile, in a Democratic year-end report, Chairman Boyle revealed unprecedented requests for party assistance in obtaining radio time on legitimate programs during 1949. Over 400 network broadcasts and telecasts were arranged for administration spokesmen with the committee's aid, he noted.

**HOLDING POW WOW**

With fans in celebration of sponsorship of Hopalong Cassidy on MBS eastern network by General Foods is Bill Boyd (center), who plays title role. To right: Lewis Allen Weiss, chairman of board of Don Lee Network and MBS board member; Mr. Boyd; Robert Hussey, head of program development, Young & Rubinac Inc.; Sam Fuller, Young & Rubinac Inc. radio supervisor. Program is sponsored on Don Lee by Lewis Food Co. (Dr. Ross Dog & Cat Food).

---

January 9, 1950 • Page 19
THE U. S. Communist Party has succeeded in infiltrating certain key unions in the radio, communication, motion picture and other fields, and has the means to call extensive strikes as a prelude to revolution.

That belief was voiced by John J. Huber, former-flier for the FBI who himself infiltrated the Communist Party as a member from 1938 to 1947. He appeared before a closed-door session of the Senate Judiciary Immigration subcommittee held last fall. Testimony was released by the group the past fortnight, and will serve as the basis for a report on alien influences sometime before March.

Mr. Huber stated that in 1942 he sat in on a Communist meeting at which plans were laid to capture these vital industries and to say “that the party has succeeded in its ambitious plans would be an understatement.” He hit the entertainment realm as the most vital. Mr. Huber also mentioned that in his capacity as a radio commentator, he was a member of the radio division, UN Dept. of Public Information, and William Schroeder, Washington radio commentator, with whom he cited for assistance with alleged Communist-front organizations.

Testimony on Morgan

Henry Morgan, of NBC’s Henry Morgan Show made a collection of his own radio program as a “counter-discrimination” effort as early as 1946 by a veterans group, labeled a Communist-front. Mr. Morgan said he also would “accept Catholic money,” according to Mr. Huber, who said the rally was largely directed against Catholics for their opposition to Russia.

Further, Mr. Corwin, former CBS writer-producer and once proposed as FCC Commissioner, is now working for UN, “writing radio scripts for American radio stations,” because “he appeared and spoke at many meetings and never deviated from the Communist party line.”

Mr. Huber also mentioned the March 1949 Cultural and Scientific Conference for World Peace, held in New York, which included registrations by Clifford Durr, former FCC Commissioner and now Washington attorney, and Arthur Gaeth, author and radio commentator.

WPAT Power Increase

WPAT PATERNON, N. J., has increased its power from 1 kW to 5 kw at 950 ke, squared, on a four-directional antenna, and is now broadcasting on a 24-hour daily schedule, it was announced last week.

SEC-FTC Report

U. S. MANUFACTURING corporations during the third quarter of 1949 recorded about $300 million in profits over taxes, or a 15% increase over second-quarter figures, according to the quarterly joint report of the Securities & Exchange Commission and Federal Trade Commission. Profits after taxes rose from $2 billion to $2.3 billion.

Barrett Named

EDWARD WARE BARRETT, wartime director of overseas operation for the Office of War Information and for the past four years editorial director of the N ew s w e e k magazine, has been nominated by Pres id e nt Truman for post of assistant secretary for public affairs. Senate confirmation of the nomination is expected momentarily.

Mr. Barrett succeeds George V. Allen, who resigned last fall to become ambassador to Yugoslavia. The State Dept. posts supervision of Voice of America programs and other international activities. He plans to assume his position about mid-February.

A member of CBS’s publicity department in the early ’30s, Mr. Barrett will be responsible for conducting activities of the Office of International Information and Educational Development, relating policies regarding to division of radio frequencies for international broadcasts. His supervising Secretary Dean Acheson on public opinion factors in the development of policies and for U. S. participation in UNESCO, according to the State Dept.

WLIB Staff

Six Added to Sales Force

Six radio time salesmen were appointed last week to the commercial staff of WLIB New York, Helen Novik, general manager, announced.

They are: Arthur Poppenberg, formerly with NBC and ABC, and at one time assistant manager of Taylor - Howe - Snowden R & d o l Sales; Helen Smith, former assistant manager of WCCC Hartford, assistant to the president of WIBX Utica, and head of the station representation for Armstrong Wireless; H. W. Wood & Colton; Milton Lasker, recently in the publishing business; Louis Mitchell and Julius Boyd, both previously with the New York Age.

Charles S. Hallenbeck

CHARLES S. HALLENBECK, 60, office manager since 1934 of the engineering section of the A T & T long lines department, died last Monday at his Mahwah home. Mr. Ditch was caused by a heart attack, and came an hour after his induction as a member of the Mahwah town-ship committee. Mr. Hallenbeck, who had been with The Bell System for 32 years, was a Polytechnic Institute graduate. He is survived by his widow, the former Inez Stevenson.
**On the dotted line**

WILLIAM H. WIECHMANN, president of W. C. Wiechmann Co., sets third consecutive contract for department store's sponsorship of newscasts on WSAK Saginaw, Mich. L to r are: William T. Kessel, Wiegmann Co.; Bob Liggott, WSAK news staff; Mr. Wiechmann, and Ed Campbell, WSAK sales department.

THREE 15-minute periods weekly on the Afternoon Swing Session over WWRL Woodside, N. Y., are sponsored by Quaker Oats Co., as C. E. Adams, mgr., N. Y. sales, Quaker Oats, sets the deal. L to r: Disc Jockey Phil Gordon; Selvin Donnacion, WWRL sales; Mr. Adams; John G. Cole, Ruthrauff & Ryan.

---

**HAWAII GRANTS**

**Two New AMs Approved**

GRANTS for two new AM stations in the Hawaiian Islands last Thursday brought the islands' total to 11.

Royal V. Howard, consulting radio engineer and former director of NAB's Engineering Dept., was authorized to build a fulltime station at Waipahu, Oahu. This will be the island's first radio.

Rural Broadcasting Co., headed by Victor Eckland of KULA Honolulu, was authorized to use 920 kec with 1 kw for a new fulltime station at Waipahu, Oahu. This will also be Oahu's first radio.

Mr. Howard told Broadcasting he expected to have his station on the air March 15 to bring to this million-dollar market and CBS a new public service and "a modern program structure that with the finest of engineering techniques will enable us to serve all of the people of Hawaii." The station, to feature news, sports and music, will be represented by Forjee & Co.

(Other details in FCC Roundup, page 68.)

---

**WGBS TECHNICIANS**

**NLRB Orders Election**

TECHNICAL employees of WGBS-AM-FM Miami, licensed to The Fort Industry Co., have been directed by NLRB to hold an election in order to determine whether they should be represented by IBEW's Electrical Workers' Union Local 349.

The Fort Industry Co. has objected only to IBEW's unit description on the ground that WGBS announcers will occasionally operate control room equipment, and that they will then improperly come within the scope of the unit. NLRB said it did not interpret the unit as including announcers, who are covered by AFRA, and ruled that licensing of technical employees is not the sole criterion to be considered by the employee. NLRB said it found that "all employees engaged in the operation and maintenance of all technical equipment" at WGBS-AM-FM "constitute a unit appropriate for collective bargaining purposes."

---

**BILL RING (center) arranges to present Bill Ring Time Mon.-Fri., over KXYZ Houston and the "Tostee Texas Network" (KFDX Beaumont, WWAP Fort Worth-Dallas, KFDX Wichita Falls). Smiling approval are Fred Nahas (l), KXYZ executive v. p., and Guy Gibbs, of Tostee.

**FIRST Federal of Detroit, fifth place in size among the 1,500 federal savings and loan associations, again will sponsor the Bud Guest Show on WJR Detroit. Renewing contract is Walter Gehre (seated), First Federal pres. Looking on are Bud Guest (l) and Karl G. Behr, Behr Advertising.

---

**DUAL contracts for renewal of Lucas Co., sponsorship of two programs on WWTM-NBC Trenton, N. J., are completed by Carl Mark (l), WTW v. p. and gen. mgr., and Francis J. Lucas (center), pres., Lucas Motor Co., Ford dealer in Burlington, N. J. At right is Fred Bernstein, WWTM sales mgr.
**BASKETTE NAMED**

Heads Radio Journalism Group

FLOYD K. BASKETTE, associate professor of journalism, U. of Colorado, has been elected chairman of the Council on Radio Journalism, according to Mitchell V. Charnley, professor of Journalism, U. of Minnesota and 1949 council chairman, who supervised the election. Arthur C. Stringer, NAB staff director, was elected secretary-treasurer. The council was formed five years ago as an operative enterprise to raise radio news standards by joint action of the American Assn. of Schools and Depts. of Journalism and the NAB.

Elected to three-year terms are Wilton E. Cobb, WMZM Macon, Ga.; Karl Koerper, KMBC Kansas City; Arthur M. Barnes, State U. of Iowa; Mr. Baskette. Other directors are Kenneth G. Bartlett, Syracuse U.; William Brooks, NBC; Eugene Carr, Brush-Moore stations; Mr. Charnley; Basket Moos, Northwestern U., and Mr. Stringer.

**Outdoor Music Urged**

NATIONAL Wildlife Federation is striking a musical note in its requests to stations, both radio and TV, to feature outdoor music during National Wildlife Restoration Week, March 19-25. The Federation has announced it is seeking cooperation from all U. S. stations to use the outdoor format while reminding listeners “to practice and support conservation of our natural resources and fish and wildlife.” New York City's water shortage, it said, points up importance of future conservation.

**IT'S THE BERRIES for these three gentlemen. Gerald Aldridge (l.), of Fort Worth, is presented with a TV set by Dave Naugle (center), KFJZ Fort Worth announcer, and Johnny Johnson, of Johnny Johnson Tire Co., that city, for the price of 259 berries and 50c. Ever since Mr. Aldridge heard about a lady paying 400 “potatoes” for a fur coat, he patiently waited for a local announcer to make such a mishmash. It happened on Johnny Johnson Tire Co.'s commercial over KFJZ. Store salesman refused to accept the incredible story and the 259 berries and 50c referred to in the commercial. Station and sponsor huddled and after a two day search located the berry man and paid off.**

**KBP REVOKE**

FCC Cites Control Transfer

LICENSE of KBP Laredo, Tex., was revoked by FCC last week effective midnight Jan. 31 on grounds the station had been transferred without Commission approval. KBP is assigned 250 watts on 1570.

FCC indicated that if hearing is requested by Jan. 25, the revocation would be suspended until the conclusion of the case. The Commission cited that Mark Perkins "has caused control of KBP to be transferred to Allen K. Tish, William Prescott Allen and others without Commission approval and that KBP is now operated by these persons without a license."

**Mr. Perkins, who acquired KBP in December 1948, told the FCC on Oct. 5 he had contracted to sell the station to Mr. Tish with provision the latter was to take over operation immediately. Commission repeated FCC further, that Mr. Perkins stated he was no longer in control of KBP and had been informed if he entered Laredo he would be imprisoned. FCC also said it had learned that Mr. Tish and others were operating the station and soliciting funds for its continuance.**

**12 Take Menjus' Show**

THE Frederic W. Ziv Co. has announced the sale of its Meet the Menjus show to 12 additional stations. The informal "Mr. and Mrs." program features Hollywood star Adolph Menjou and his wife, Vere Teasdale. Stations contracting for the show include: Arrowhead Network group—WEBU Dubuque, WOJO Wabasha, WHBQ Marion, WBYC Virginia, WAFU Evansville, and KDKD Boise, Idaho; KSO Des Moines; KWKW Abilene, Tex.; WCLT Newark, N.J.; WOIR Rochester, Minn.; KROC Rochester, Minn.; WPFG Atlantic City, N. J.; WAFB Baton Rouge, La.
January 3, 1950

To the PRESS and RADIO:

Subject: RAIL AND HIGHWAY OVERLOADS

It was 120 years ago that a young civil engineer named Horatio Allen drove the first locomotive to run on tracks of a transportation company in the United States. The engine proved too heavy for the light wooden rails, and from that experience, as well as from much experience since, the railroads have learned that they cannot afford to overload their tracks and bridges.

That is why the railroads apply the very best engineering research and skill to determine the loads and the speeds at which they can be carried without damage to tracks or bridges. Once these facts have been determined, the railroads permit no heavier trains and no greater speeds than the roadbed and structures are built to carry. If it becomes necessary to operate heavier cars and locomotives over any stretch of track, then the railroads protect tracks and bridges by issuing, and enforcing, “slow orders.”

Highway engineers also have learned the same lesson. They have found that it is important to protect public highways from the effects of excessive loads and excessive speeds. Failure to protect them means damage and in many cases even destruction. And that, in turn, results in added costs.

Any damage to tracks and bridges caused by trains which are too heavy or too fast is paid for by the railroad itself, and properly so. On the other hand, damage done to the public highways by overloaded trucks is almost never paid for by the vehicles that cause the damage. Instead, the cost of this damage is borne by the taxpayers and the motorists.

Besides being built to provide the nation with its essential mass transportation, the railroads were purposely constructed to carry heavy loads — loads that our public highways never were intended to carry.

Sincerely yours,

William T. Faricy
of the new committee's membership was the naming of Robert Enoch. District 12 director, as an alternate. He was active in pushing through the BAB project last spring and was chairman of the BAB Policy Committee. Mr. Enoch resigned last week as KTOK Oklahoma City general manager (see story page 12).

Alternate members have been invited to the two-day meeting. All but Mr. Enoch are expected to attend.

Board members on the new Radio Committee are Kenyon Brown, KWFT Wichita Falls, Tex.; William B. Quarton, WMT Cedar Rapids, Iowa; Richard Shaw, KLX Oak-land, Calif. Hugh B. Terry, KLZ Denver, is an alternate.

Serving on the Television Committee with Chairman Thomas is Robert D. Swezey, WDSU-TV New Orleans, also elected to the board in November as a television director.

The three committees will meet with President Miller, Radio Division Director Ralph W. Davin and Television Division Director G. Emerson Markham, conforming to a board action last November. Prior to a formal viewpoint, their job of locating BAB in the association's structure looks relatively simple.

Serious Implication

But from the viewpoint of many member stations that look upon BAB's role in producing service in NAB history, the matter has serious implications.

Many station executives fear that BAB will shrink into an impotent mass of red tape if it takes a structural beating at the hands of the board. At the time of its creation last April, following the hotly contested fight, BAB was promised a near-$200,000 budget and a structural post outside the regular NAB operation.

This was based on the theory that the board was faced with a handicap and should be free from normal association pressures and have its own offices. The board policy committee was named to guide BAB.

Last July the board carried out its April promise by giving BAB a structural site directly under the president and entirely outside the new top-level Audio (now Radio) and Video (now Television) Divisions.

That action was warmly received by those who had agitated for BAB at the April convention, especially in view of the fact that had been told it was to be separately incorporated at a later date.

But last November the board reversed that action and relegated BAB to departmental status while according it a pat on the back for a long list of achievements.

The autumn district meetings made it clear to many BAB members, but many of the BAB supporters felt it should remain within NAB itself and have a high degree of autonomy plus at least a $200,000 budget.

Many of those who wanted BAB inside NAB objected to the idea of paying two sets of dues. They wanted a package rate. Others pointed out that the anticipated resentment against BAB from those whose toes were stepped on had not materialized. Still others feared that the central NAB organization would become a weak industry weapon as BAB's spectacular services captured the industry's affections.

That series of developments poses the basic problem: Should BAB operate under or outside the new Radio and Television Divisions? In other words: Are the two division heads to operate as vice presidents and supervise BAB?

If BAB is handed an administrative spot under the two division heads, some of its supporters—and these are legion—may be in a mood for action at the convention next April. They offer a number of arguments against what they feel would be the handi capped of bureaucracy and red tape.

Point in Question

First, of course, is the belief that BAB must be free to let the chips fall where they may if it is to fight on equal terms in the growing fierce battle of advertising media.

Second point is the example of the Bureau of Advertising, operated separately from the parent American Newspaper Publishers Assn.

Third contention is that BAB's director must be vested with adequate powers to direct effort and money where they will do the most good at the right time, unhampered by organizational handicaps.

In support of these claims they point to BAB's current program of sales-getting devices.

Some of BAB's friends argue that the board pulled BAB's teeth last November, putting it right back where it started last spring. Instead of operating as a bureau vested with individuality, it's now just another department, they figure.

What hurts them even more is the fact that the board raised BAB from a $78,000 bureau as a result of the April action but then pulled back $50,000 of the extra $100,000 last July at the Portsmouth, N. H., meeting.

A BAB budget of around $200,000 has been discussed by the board's Finance Committee but the larger appropriation would be based on abandonment of the present 12?-month dues or increased dues in some brackets.

Budget Action Set

Budget action is slated at the Arizona board meeting next month with preliminary study slated at the joint finance-structure session Jan. 25-24. A favorable portent is the upgrading of many member stations under the dues schedule because their income is rising.

NAB goes into a new fiscal year setup April 1, shifting from a calendar year. Thus the board program must be drawn up by the board in February. The two convention meetings of the board have been abandoned, partly due to the pressures placed on directors by convention delegates, but talk has been heard of an indirect convention meeting for new members (CLOSED CIRCUIT, Dec. 26, 1949). Eighteen board posts are to be filled at nominations and elections to be held this month and next.

Should the board vote to place BAB on a department basis, reporting to the Radio and Television Divisions and then to the president, and should it also grant it a limited budget, many BAB protagonists would be ready to kick the traces at Chicago just as they did last spring.

On the other hand, some top-level officers at NAB, along with board members, insist that BAB can serve the membership effectively and efficiently only if it operates as an integral unit in the association's structure. They scoff at the suggestion that BAB's hands would be tied by departmental status. They insist that the new division structure would aid BAB in serving the diversified needs of aural and video stations.

The fact that Broadcast Music Inc. and Broadcast Measurement Bureau could not operate successfully as inhouse parts of the NAB structure is met with the argument that the present proliferation of many technical services within NAB rather than a separate busi-
King of the Quarter Kilowatts!

FROM VERMONT TO ARIZONA...

AS ONE BROADCASTER PUT IT.

"We actually could have started broadcasting within 15 minutes after uncrating. Believe me, in these days of expensive installation costs, that counts."

WHY IS GY-48 LESS EXPENSIVE?

Because GY-48 is a planned 250 watt broadcasting plant where each section dovetails together. And, too, Gates manufactures the complete plant — frequency and modulation monitors included.

AND BEST OF ALL—GY-48 is the only completely new equipment of its kind—not a 1945 model.
Bab's Future?

(Continued from page 24)

ness. As a service, it is argued, BAB should have the benefit of the knowledge and services of other departments, all clearing through the Radio and Television Divisions.

These are the problems that face the three committees at their two-day meeting this week. Interwoven in the whole situation are the inevitable personality clashes and protocol problems that mark any change in an organization's functioning.

In its brief career BAB has operated with the same size staff as the predecessor Broadcast Advertising Department, staffed by one girl. It has moved to New York, heart of the advertising-agency world, with Maurice B. Mitchell in charge. A list of some of its activities includes:

Sharing of 245 copies of slide film, "How To Turn People Into Customers," to 100,000 retailers, practically stopping all showings of the competing newspaper campaign: direct-mail answer; direct-mail followup campaign, with 450,000 pieces mailed to retailers and profit of $3,500 to BAB; promotional piece for national advertisers showing what stations are doing; distribution of "Pitch," sales promotion service; series of retail information studies covering furniture and jewelry thus far, with laundry, dry cleaning, banks and automotive in preparation; file service listing dealer cooperative campaigns, averaging 10 cards a week; sales kits with the first on women's programs to be followed soon by others on news, sports and farm programs; new television research results; personal contacts with leading national advertisers such as Sears, J. C. Penney, Woolworth, Inter-

woven Hosley, Sunshine Biscuit and others, with direct benefits accruing to stations; trade paper reprints; survey of what BAB is doing in the advertising field; bulletins on standard rate cards and standard contracts for television; All-Radio Presentation about complete with distribution to start in a few weeks; second filmstrip about competitive costs, wholesalers, manufacturers, agents, and others who prepare national advertising; pamphlet in planning stage on organization of the station sales staff, with selling aids at the local level.

**License Fees**

Proposed for Government By Kennedy

CHARGING of government fees for "some of the many important and special functions Uncle Sam now renders free"--including the issuance of FCC licenses--was proposed last week by John A. Kennedy, part owner of WSAZ Huntington, W. Va., and former operator of the West Virginia Network.

Writing in the Jan. 7 issue of the San Diego (Calif.) Journal, of which he is editor and publisher, Mr. Kennedy asked:

"Is there any reason why the FCC should not charge for the valuable franchises it dispenses in the form of licenses every three years to the more than 2,000 broadcasting stations on the air? These broadcasters are in business not only as a "public service" but obviously because radio appeals to them as a pleasant way of earning their bread and butter."

Mr. Kennedy suggested the application of Commentators Drew Pearson, Robert Allen and a Baltimore group for the WBAL Baltimore frequency has cost the government over $50,000 and added they "probably would be glad to pay their way."

"I am also in the radio and television business," he continued. "Why shouldn't I pay the government for servicing my various requests which have helped to make my radio business profitable?"

He proposed the telephone company pay hearing costs when it asks for a rate increase or other facility. Some 80,000 "hams" and 60,000 commercial radio operators get free licenses, he reminded, and could pay $2 to $3 to cover paper work.

He wanted to know why the government should not charge for "the valuable export licenses the Dept. of Commerce issues to exporters"; for certificates, charters and inspection services given to interstate motor and freight carriers, and for countless other services "worth hard cash to groups and individuals now receiving them gratuitously."

Mr. Kennedy maintained that his plan for "cafeteria-style" government service is "in the best tradition of American business" and "might help to take some of the red out of our national bookkeeping."

**FCBA Dinner**

ATTORNEY GENERAL J. Howard McGrath and Navy Secretary Francis P. Matthews are among the dignitaries who have accepted invitations to attend the annual dinner of the Federal Communications Bar Assn., to be held Thursday night (Jan. 12) at the Mayflower Hotel, Washington. Mr. Matthews, part owner of WOW Omaha, is a member of FCBA.

Sen. Ed C. Johnson (D-Col.), chairman of the Senate Interstate and Foreign Commerce Committee, will be the principal speaker. New officers, to be elected Thursday afternoon, also will be inductroduced at the dinner. Guests will include FCC Commissioners, key staff members, hearing examiners, and communications experts of Capitol Hill and the State Dept. Guilford Jameson is FCBA's current president, with Neville Miller as first vice-president.

**Baseball Rates**

(Continued from page 13)

revisions on grounds of discriminatation.

In support of her conclusion, Examiner Smith stated, in part:

Nothing but a difference in the service rendered or in the facilities furnished is a definite basis for the charges exacted from similarly situated customers by a common carrier subject to the provisions of the Communications Act . . . which expressly forbid unjust or unreasonable discriminations, classifications, regulations, facilities or services for or in connection with like communication service, directly or indirectly, by any means or device.

Here a particular group of users (newspapers and press associations) is receiving a service at preferential rates, by contrast to the rates charged radio station members of a network for the identical service. This preferential rate cannot be justified on the grounds urged by Western Union.

The greater or less inducement to seek such service is not the service. Such rates, if extraneous to the transmission of the news reports, equally so is the other ground advanced against Western Union, that is, the fact that such sports reports may have a greater value to certain users, even though such alleged increased value is not dependent upon their use beyond the point of delivery by Western Union and over facilities other than the service carrier's public facilities, these practices and charges not only affect broadcast stations and networks but may result in detriment to the public interested in baseball broadcasts.

**Religious Radio**

Workshop Studies Techniques

TECHNIQUES for use in religious broadcasting and telecasting will be studied this week by ministers and religious educators responsible for such activity in 42 cities of 12 eastern dioceses, at a workshop which got under way yesterday.

The sixth annual Eastern Regional Religious Radio Workshop will convene all week at New York's Biblical Seminary and at network studios. Program will include development of major policies for religious broadcasting, broadening of schedules to include many types of programs, and planning for future.

Robert Saudek, ABC vice president in charge of public affairs, will be the principal speaker at a dinner tonight at Beecken Tower. Newsmen and laymen will act as workshop chairman.

The teaching staff includes:

Rev. Everett C. Parker, director, Protestant Radio Commission; Erik Borden, director of Adult Education courses; Rudolf Bretz, television consultant for NCR; Dr. W. H. Davis, director of talks and religious broadcasts; Albert Crowe, counselor; . . . Pauline Rec- tant Radio Commission; George Croth-er, executive secretary of Religious Radio Councils; Dorothy Kember, MBS director of religious and denominational programs, and Frank Popp, NBC producer-director.

CKW Moneton, N. B., made honorary member of Moneton Kiwanis Club in recognition of work done by station on behalf of club.

**Electronic Meet**

Set for Washington May 9-11

CONFERENCE designed to improve the quality of electronic components will be held in Washington May 9-11 by the Institute of Radio Engineers, American Institute of Electrical Engineers and the Electronic Industries Mfrs. Assn. Military and government officials will participate.

"The symposium will pose the problem of achieving the same high degree of dependability and service life in electronic equipment as is now possible in electrical equipment of other types," said J. G. Reid Jr. of the Bureau of Standards, chairman of the conference program committee.

**January 9, 1950**
Up they go... more and more
Truscon Radio Towers... strong,
sturdy steel fingers setting new high
standards of antenna performance...
reaching far out to serve audio and video
broadcasters and their audiences everywhere. The six new towers shown here
vary from 329 feet to a lofty 1220 feet, yet all have one characteristic in common—
each is designed to meet exactly the particular operating and geographical
needs of its specific location. Truscon draws upon a background of world-wide
experience to engineer and erect exactly the tower you need—tall or small... 
guyed or self-supporting... tapered or uniform in cross-section... for AM, FM and TV transmission. Your phone call or letter to any convenient
Truscon district office, or to our home office in Youngstown, will bring
you immediate, capable engineering assistance. Call or write today.
More than 2/3 of all U. S. radio homes are in counties reached by these leading stations*. Does this give you any big ideas, Mr. Spot Advertiser?

*CP*
What Formula?

IF FCC NEEDS further proof of the folly of its proposal to increase FM’s minimum operating hours [BROADCASTING, Nov. 21, 1949], let it take another look at its own files—and the pages of the Dec. 26, Jan. 2, and almost any other issue of BROADCASTING.

Even on its current minimum schedule of six hours a day, FM is running at a terrific loss. Though it doesn’t come as startling information to FM operators, this fact was pointed up in round, blank figures two weeks ago when FCC released its own report on radio’s 1948 finances.

The report showed 77 AM-FM broadcasters spent $2,153,659 operating FM and took in $621,469, for an average loss of almost $250,000 a year. Among FM-only stations, 80 reported $1,126,208 in revenues and $4,182,558 in expenses, for an average loss just short of $35,000.

Admittedly these figures are a year old. But there is no indication that the 1949 picture—or 1950’s—will not again be etched in red ink. Of the FM station managers reporting in BROADCASTING’s year-end survey, 42% look for an increase in FM business this year, but another larger number—49%—expect no change and 9% anticipate a decline.

In the face of such uninspiring signs, FCC proposes to promote FM by requiring stations to reach 12 hours a day after two years on the air. This is one of those without which stations will have to match the AM schedule immediately.

We contend FCC is thus likely to “promote” FM out of existence. Some 80 or more FM broadcasters have taken the same general stand, as a matter of FCC record, compared to about a dozen who think FCC’s plan would be helpful.

It would be ironic, as well as tragic, if some man-made disaster overtook FM now, when there are encouraging signs that the medium is beginning to achieve coverage and acceptance.

Most encouraging sign, perhaps, is an NAB survey released 10 days ago indicating an FM listening potential of 13.2% of the homes in the metropolitan Washington area with actual listening by 10% of the population (7.2% of the population) for an average of 106 minutes a day.

Another welcome sign is that WMCA-FM New York which was scheduled to cease operations Dec. 30 in an economy move, is still on the air pending a possible sale.

More and more, FM is building a name and an audience for itself, with prospects brightest perhaps as a strictly “local” medium. Superior though it is in some respects, however, it must be allowed to grow naturally. Right now it has financial troubles enough, without the extra costs of doubled or tripled hours.

If FCC needs further proof, we recommend another section of these pages, wherein are reported each week the stations authorized by the FCC to operate. The stations which have been deleted. In FM, the number surpassed 200 in 1949—and the minimum schedule then was still six hours a day.

THE BATTLE of the network titans broadens. NBC some months ago took the high road to unification of operation by separating completely its radio and TV functions, andorthogonal policy guidance. CBS now has taken the low road toward full integration, i.e., fusion of its radio and TV operations—all down the tubes! That has nothing to do with work. Good broadcasters make good telecasters. The techniques may differ but it’s all still radio by the American Plan of free competitive enterprise.

Our Respects To

Ralph Nahm Weil

EARLY last fall in an impressive ceremony at the Italian consulate in New York, the Consul General of the Republic of Italy bestowed the Stella Della Solidarieta, highest Italian honor ever bestowed by the Italian government, on Ralph Nahm Weil, president of WOW New York.

In making this presentation, the Italian Government was adding its official appreciation for Mr. Weil’s and his station’s many activities on behalf of Italian war reconstruction to the individual thanks of thousands of Americans of Italian descent living in the New York metropolitan area. WOW, a bilingual station—ten of whose hours daily are devoted to programming in Italian—has, under Mr. Weil’s guidance, devoted much time and effort to improving American-Italian relations.

Typical of WOW’s service-across-the-sea is the “Boys’ Town of Italy” project established near Rome by Mons. John Patrick Carroll-Abbing. The station’s efforts to add this Italian version of the late Father Flanagan’s famed Nebraska community produced thousands of dollars in contributions in the earliest stages of the project and actually launched the radio campaign for it in the USA.

A more recent venture of a somewhat different character reached its climax Christmas Eve, when members of a WOW-sponsored “Pilgrimage to Rome” gathered in St. Peter’s Cathedral to witness the ceremonies inaugurating the 1950 Holy Year. Diana Baldi, WOW women’s commentator, led the group of pilgrims and they were accompanied by a noted New York cleric.

The philosophy underlying such activities was well described by Mr. Weil when he accepted the Star of Italian Solidarity. He said, in part: “We at WOW have always believed that the bonds of friendship which united our two republics are so natural and so deeply rooted that in devoting the better part of our broadcasting to programs in the Italian language we are simultaneously pe forming a service to our own country. . . .

“We firmly believe that it is our duty to render an ever improving radio service to the hundreds of thousand of Americans of Italian descent who can hear us,” he continued, “and we are ready to go to Italy itself in our search for better programs in the immortal idiom of Dante. It is for this reason that WOW established its own studios in the heart of the Eternal City itself.”

From its Rome studio, an American radio first, WOW receives a variety of program material—special events, documentaries, vari-

ety programs and even daily dramatic serials, recorded on tape for shipment to WOW. The service also works the other way, with WOW producing programs in Italian about American events which are then flown to the Italian radio headquarters.

“Our Italian programming pattern is about the same as that of most English language stations,” Mr. Weiss explains. “We have news, commentary, music, drama, comedy and all the usual radio fare. Aside from their preference for the Italian language, Italian speaking New Yorkers enjoy about the same types of programs as the rest of the city’s inhabitants.”

Businesswise, in the seven years of Mr. Weiss’s management WOW has increased its billings by more than 400% and is now practically sold out within the limits of good operation. Mr. Weiss attributes this steady year-by-year increase primarily to two factors: (1) the station’s constant endeavor to win and hold the confidence of its listeners and (2) its intensive market research which enables it to keep advertisers fully informed of the living, buying and listening habits of New York’s Italian-Americans.

How did Ralph Weiss, whose family tree, so far as he can discover, is barren of even a single Italian twig, find himself at the helm of one of radio’s most successful Italian-language projects?

The answer is the typically American situation of one job leading to another.

Born in Milwaukee on June 17, 1919, Ralph worked in WISN and that city’s grammar and high schools, then traveled east to the Wharton School of Finance and Commerce at the U. of Pennsylvania, which awarded him a B.S. degree in 1942. After an 18-month hitch as a flyer in the Navy (“My roommate talked me into it,” he says now, “and I still don’t understand exactly why I have in to do it”). Mr. Weiss returned to Milwaukee and entered the business world as a space salesman for the Wisconsin News.

Not long thereafter he was transferred to the local time sales staff of WISN Milwaukee, the News’ station. That was in 1930 and radio was definitely his dish. Soon his beat had expanded to include national as well as local accounts and in 1934 he was made sales manager of the station, which had itself grown from a 250 w part-time operation to fulltime with first 1 kw and then 5 kw.

In 1936 Ralph Weiss was again advanced, this time to co-manager of WISN, in charge of all the station’s activities except programming and engineering. After two years in that position, he was appointed manager of the Chicago office of Hearst Radio Inc., sales representative for all Hearst stations of which WISN was one.

To New York in 1942

For four years Mr. Weiss worked happily and successfully in Chicago. Then, in August 1942, he was approached by the Bulova interests, owner of WNEW and WWRL, both New York, who wanted a manager for the latter station. The offer was attractive and Mr. Weiss made his second change of scene, moving to New York. What he had turned to be a permanent basis.

After nearly seven years as station manager, last June Ralph Weiss, Richard E. O’Dea, a pioneer broadcast man and part owner of WOW, and Arnold B. Hartley, an active radio man for 20 years, through Victory Broadcasting Co., purchased WOW from Arde Bulova, who was permitted to sell one of his New York stations under the FCC duopoly rule. Mr. Weiss is President of Victory Broadcasting Co. and also continues as operating head of WOW.

In addition to his duties at WOW, Mr. Weiss has been active in foreign language broadcasting matters on a national scale. During the war years he served on a committee with worked closely with the Office of Censorship in connection with broadcasts in languages other than English. He is presently temporary chairman of the Foreign Language Quality Network which is being organized as a national sales representative of these stations, and is a director of the All-Radio Presentation Committee.

Ralph Weiss resides in the Riverdale section of New York with his wife, the former Georgina Lewis, and their son Spencer. He belongs to the Advertising Club of New York and to the Radio Executives Club. His favorite hobby, he says, is taking West Indies cruises and he’s looking forward to the time when he can resume his prewar custom of making them annual events.

JAMES CRAWFORD, appointed sales manager of WPEN Philadelphia.

J. VINCENT O’HARA, station relations director for WTVJ (TV) Miami, Fla., named account executive.

ROBERT L. LEE, chief account executive of CKEY Toronto, appointed associate commercial manager of the station. He has been with CKEY for three years, and previously was with CKWS Kingston.

ADAM J. YOUNG Jr., New York, appointed national representative of KSTL St. Louis.

LYNN MORROW, formerly advertising and sales promotion manager for WBZ-AM-TV Boston, and in radio for past 15 years, joins WTVJ (TV) Miami, Fla., as administrative assistant to J. J. BATECHLDER, station’s sales manager.

JAMES G. GLICK Jr., formerly salesman for KKLW Clayton, Mo., joins sales department of KSTL St. Louis.

LIQUOR ADS
Rankin Presents New Measure; Langer Hearings This Week

ANOTHER PROPOSAL which would prohibit alcoholic beverage advertising on radio, television and in other media was urged by Rep. John Rankin (D-Miss.) last week as the nation’s “dry” forces turned their attention to forthcoming hearings on the Langer liquor bill starting this Thursday.

Rep. Rankin’s measure (HR 6604) differs little from legislation he previously introduced in both the 70th and 80th Congress, and is substantially similar to other bills now pending on Capitol Hill.

A measure (S 1847) by Sen. William Langer (R-N. D.) is the subject of this week’s hearings by the Senate Interstate & Foreign Commerce Committee. Both would outlaw advertising in all media engaged in interstate commerce, though not explicitly singling out television in broadcasting provisions.

Hearings before the committee will be held all day Thursday, Friday and Saturday if necessary, spokesmen said last week. Successive sessions will be devoted to advocates and opponents of the proposed legislation.

Expected Testimony

Officials of the Treasury Dept.’s Internal Revenue Bureau—probably from its Alcohol Tax Unit—will testify in the opening session. Other government agencies or departments are not expected to appear, authorities indicated, inasmuch as they are not directly concerned and the committee already has elicited their comments [Broadcasting, Jan. 2].

Meanwhile, the Seattle Advertising and Sales Club last Tuesday day adopted a resolution “unalterably” opposing the Langer bill as a “serious threat to freedom of the press” and an “unnecessary restriction” on radio and newspaper advertising.

Such legislation would prove a dangerous precedent for other commodities, represent unfair discrimination against advertising media and would establish a “ridiculous principle in holding that an article of commerce which legitimately may be sold may not be advertised for sale,” the Seattle group said.

Some legislators, notably Sen.

Homer Capehart (R-Ind.), also feel that no legislation can be enacted to prohibit liquor advertising through radio or other media as long as the product is legal and conforms to fair trade regulations [Broadcasting, Aug. 29, 1949].

Numerous petitions have been received by the Senate group and also by the House Interstate & Foreign Commerce Committee, which is studying a similar measure (HR 2438), proposed by Rep. Joseph Bryson (D-S. C.) last session. Many of the petitions urge a ban on radio liquor advertising in particular.

Also before the House committee is a proposal (HR 6111), introduced by Rep. Fred Crawford (R-Mich.), which singles out television as well as radio. Congressman Crawford’s bill puts the burden on advertisers, however, by rendering them liable (and not broadcasters) under the Federal Alcohol Administration Act [Broadcasting, Aug. 29, 1949].

SELL OPTIMISM

Tenn. Group Sets Campaign

AIMED at “keeping business booming in Tennessee,” a “Let’s Sell Optimism” campaign has been launched by the Tennessee Assn. of Broadcasters.

Several times a day, the 37 stations affiliated with the association broadcast business announcements of fact and fiction supplied by the organization by the Tennessee State Planning Commission, the U. S. Chamber of Commerce and the National Assn. of Manufacturers.

The announcements are in three categories—national technology, State of Tennessee copy and retail selling copy. The “Let’s Sell Optimism” campaign is sponsored by the following stations:

WLR Athens; WAGC, WAPO, WDEF, WDOD, WDXB Chattanooga; WJZM Clarksville; WKNM Columbia; WHIB Cookeville; WDSQ Dyersburg; WERK Fayetteville; WHIN Gallatin; WHIT Harriman; WDXI, WTJS Jackson; WETB, WHI, Johnson City; WBIR, WIBK Knoxville; WJLW Lewisburg; WDIA, WHBQ, WHHM, WMC, WMP, WREC Memphis; WDKA, WLAC, WMK, WSIX, WSM Nashville; WATO Oak Ridge; WPTR Paris; WKSR Pulaski; WHAL Shelbyville; WENJ Union City; WCĐT Winchester.

WHOM New York, in cooperation with National Safety Council, has begun preparation of series of series of transcripts in Italian, Polish and Spanish stressing home and highway safety. Transcripts are free of charge and will be distributed by council to all stations broadcasting in above languages.

Press breaks down — but $2.88 keeps editions rolling

... with exclusive CBS programming in Eastern Iowa ... with extra ammunition in the form of complete news coverage via AP, UP, INS, and local correspondents throughout the state ... with long range signal strength on Iowa's best frequency, 600 kc.

There are no tremendous cities in WMT-land—just hundreds of small ones like Garrison with a combined population (within our 2.5 mv line) greater than any other station's in Iowa. It's an audience worth laying siege to. Ask the Katz man to shoot over the details.

FRANCIS J. WOODS, executive vice president of Burnet-Kuhn Advertising Co., Chicago, for past 10 years, elected president of the agency succeeding PAUL R. KUHN who becomes chairman of the board.

MYRON A. MAHLER, copy director for Emil Mogul Co., New York, appointed vice president in charge of creative departments for agency. SETH D. TOBIAS named vice president and chairman of plans board, and RINO C. NEGRIS appointed vice president heading agency's foreign language division.

JOHN JAMESON, former vice president in charge of copy for McCann-Erickson, Chicago, joins Tatham-Laird, same city, as copy chief after retiring from advertising two years ago. He was also chairman of McCann-Erickson's planning committee.

DICK LONG, former assistant advertising manager and copy chief at J. L. Hudson Co., joins Zimmer-Keller Inc., Detroit, as assistant account executive.

KENNETH B. ARRINGTON, formerly marketing director of The Caples Co., New York, appointed vice president in charge of new Foods Div. of agency. He will headquarter in Omaha office.

CURTIS BERRIER, formerly with Tatham-Laird Inc., Chicago, joins copy department of Kenyon & Eckhardt, New York, as a copy supervisor. He was previously with copy department of BBDO, New York, Lennen & Mitchell and McCann-Erickson.

JACK BUKER, account executive with Long Adv. Service office in San Jose, transferred to agency's San Francisco office. EVERETT DOTEK, formerly with Gardner Adv., Washington, replaces Mr. Bunker in San Jose office.

K. R. WILLET named service manager at M. Glen Miller Adv., Chicago.

ROSS ROY Inc., Detroit, merges with C. C. Fogarty Co., Chicago, forming Ross Roy-Fogarty Inc. Offices will continue in Bell Bldg., 307 N. Michigan Ave. ROSS ROY is president of new agency and J ACK FOGARTY is vice president in charge of Chicago operations.

ARALD KEMP transferred from New York office of William Esty Co. to Hollywood as agency contact and West Coast television director, with assignment on Ed Wynn Show sponsored by Camel Cigarettes on CBS-TV.

GEORGE SANDLER joins Robert Kahn & Assoc., Chicago, as account executive. He has been with financial and real estate firms.

MAXON INC., on Jan. 1, moved its New York offices to its own building, 12 East 53 St., Building is still in the process of renovations. Agency was located for many years at 570 Lexington Ave.

FRED FADELL
New Ad Firm Names Staff

A STAFF of the newly organized advertising and public relations firm of Fred Fadell & Assoc., Inc., Minneapolis, according to an announcement by Fred Fadell, president. The firm has engaged in the public relations business for the past four months and entered advertising as of Jan. 1. Offices are located at 615 Minnesota Federal Bldg.

The staff includes the following: John Pikala, formerly with BBDO and WOR New York and operator of his own agency, named head of the radio and TV department; Eben M. Grundy, formerly with McCann-Erickson and Knox-Reeves, appointed account executive; George F. Lalla, during recent months engaged as a freelance artist and previously with Griggs, Cooper & Co., head of the art and promotion department; Rolf K. Mills, formerly associated with Minneapolis newspapers, director of the public relations division; Norman J. Harris, lately with Johnny Pikala Advertising, named account executive.

Also, William S. Wheeler, formerly with Johnny Pikala Advertising, named account executive; Alyce Bahneman, Lorraine Friedl, Betty Pearson and Mrs. Helen Schub, office personnel.
SOURCE OF FM TROUBLES

Five ‘Conspirators’ Are Cited by Bivins

By JOHN F. BIVINS
Bivins & Caldwell
Manufacturers Representatives
High Point, N. C.

YOUR editorial in the Dec. 19 issue of Broadcasting, entitled “FM’s Love Life,” is justified in many respects, but your continued reference to FM’s unprofitable state is beginning to become a little irksome.

[EDITOR’S NOTE: We would like to report that FM is making money, but our function, as we see it, is to chronicle the facts and not indulge in wishful fancies.]

Basically, with many AM-FM stations, the reason for the assertion that the FM operation is unprofitable is the fact that broadcasters are unwilling to assign the proper amount of credit to their FM coverage and FM listening audience.

In many a locality, FM is carrying the coverage load of the AM stations whose nighttime directional pattern, foreign interference, static, and what not, precludes holding a decent percentage of the available listening audience. It is easy, for competitive reasons and tax purposes, to deny the fact that FM is anything but a total loss. ...

Certainly, some FM installations are losing money; so are some AM installations. In many cases, poor thought was given to the erection of FM facilities and the initial cost was too high. ...

Just why has FM reached its present state? The answers are generally known, but here are five of the conspirators who have given it a kick, at one time or another:

1. The networks, who have millions invested in AM facilities, TV research and patents, have not been able to see farther than the outskirts of the metropolitan areas, as far as broadcasting is concerned. ...

2. Advertising agencies, being technically uninformed, or willfully blind, are still prone to accept coverage claims of networks and individual stations on AM, even though those claims are at best highly misleading and at worst highly fraudulent. Again more complications in bookkeeping. TV is around the corner—why worry about FM?

3. Broadcasters themselves, who have installed FM and have never done anything about educating its listening audience to FM’s advantages. Many ... installed FM strictly as “insurance.”

4. Set makers, who were looking for a quick killing after the war and, therefore, ignored FM as long as possible, or if they did include an FM band on their receivers, the FM portion was so poor technically, that it discouraged purchasers from trying to listen on that band.

5. Old man economics. There just aren’t enough advertising dollars to support 750 FM and 1,500 AM stations. FM was new and had to take the rap for stations, either AM or FM or both, who probably should never have gone into business in the first place. ...

If ... FM is to be relegated to the junk pile for whatever cause, the radio manufacturing and broadcasting industries will be responsible for a great crime perpetrated against the American listening public. ...

All together now—“The public be damned! Let’s go to Florida for a little fishing!”

KATZ calendar of expiration dates issued for seventh consecutive year by Katz Agency Inc., New York, station representative. Calendar shows at a glance expiration dates for broadcast schedules of 13, 26, 39 and 52 weeks.

Rival to Rival

A GOOD promotion stunt that backfired has been getting attention in radio circles in the nation’s capital. In accordance with custom, the Washington Advertising Club included at its “Flowing Bowl” shindig a grand drawing for 139 door prizes. One of the prizes donated by WTOP General Manager John S. Hayes, was a free spot announcement to be broadcast during WTOP’s Class A time. The winner? Norman Reed, program director of WWDC. Mr. Reed immediately announced to the 329 admen present that WWDC would ask for time at 7:30 p.m. Sunday.

This clothing and a number of unsolicited checks were contributed by Tulsans during a 3 day KTUL drive to aid University of Oklahoma students who lost their belongings in the recent dormitory fire. RESULTS? These same generous Tulsans also BUY! They respond equally to our sales messages. See an Avery-Knodel man ... and get RESULTS over KTUL, Tulsa, Oklahoma.

STAFF DUTIES

NABUG Probes L. A. Stations

FOLLOWING hints of practice by networks and stations in Los Angeles in assigning more duties to staff members than their salaries pay for, Radio Writers Guild, Radio & Television Directors Guild and American Federation of Radio Artists are currently conducting an investigation in that city through the National Assn. of Broadcast Unions and Guilds.

It is suspected, for instance, that announcers are used as actors while receiving remuneration only for announcing chores. If such practices should be found, according to Claud McCue, executive secretary of APRA and president of the Hollywood Council of NABUG, one of whose main functions is exchange of information, the group will attempt to correct the situation jointly.
Feature of the Week

IN Grand Junction, Colo., the name Howell is synonymous with KFXJ. It got that way because, paraphrasing the Caesars, all Howells lead to radio.

This month marks the 20th anniversary of the station's operation in the Colorado city. And KFXJ also is celebrating a unique distinction of being a three generation, family affair.

Most recent Howell to join the ownership tangle at KFXJ is 20-year-old Ruth Howell, daughter of Rex Howell, who started the station in Denver in 1926. The Denver U. junior, who naturally is majoring in radio and television, was made a minority stockholder in a change from partnership to corporation.

Her grandfather, Charles Howell, entered the business in 1920 when the station was moved from Denver to Grand Junction on Colorado's western slope. KFXJ then was operated as a partnership of Rex Howell and his father doing business as the Western Slope Broadcasting Co.

On All Accounts

CLAIMANT to the title "youngest station manager in the country," 22-year-old Generoso (Gene) Pope Jr., executive vice president and general manager of WHOW New York, is recognized as an authority on the foreign language broadcasting field.

Figuratively groomed in the cradle for his present post, young Pope asserted active interest in his future audience while still a student at M. I. T. There he spent his summers and his off-hours learning the needs and interests of the Italian speaking population in New York by working on Il Progresso, the family newspaper. At 21 he was named vice president and editor of the publication.

Since taking over at WHOM, Mr. Pope has widened his knowledge to include a comprehension of all foreign language groups, meanwhile raising his station to the status of one of the most successful multi-lingual outlets in the country.

Mr. Pope, who still maintains an association with Il Progresso, succeeded to his present job last September when his brother, Fortune Pope, left to take over an executive position with the Colonial Sand & Stone Co.

Among the innovations effected by Gene Pope at WHOM are a citizenship class conducted at the station in cooperation with the New York City Board of Education, and a signally successful safety series. He currently is processing a foreign language amateur hour.

In addition to his duties at the station and the newspaper, Mr. Pope still has found time to attend New York Law School where he is taking courses preparatory to a possible political career.

He is a member of the New York City Mayor's Committee on Unity, the Columbus Day Citizen Committee and co-chairman of the special groups Committee of the March of Dimes. In addition he belongs to the New York Athletic Club, Westchester Country Club and the Grand Street Boys Assn.

Mr. Pope is unmarried and makes his home with his parents in Manhattan. The family has acquired WINS New York, subject to FCC approval, in which case Mr. Pope will relinquish the WHOM management for that of WINS. But his knowledge of foreign-language broadcasting would not be wasted, for the family proposes to make WINS a foreign-language outlet under their ownership.

RMA Sales

SALES of radio transmitting apparatus, radar and other communications equipment to the government totaled $35,489,527 in the third quarter of 1949, according to Radio Mfrs. Assn. Of this total $23,914,281 consisted of radar equipment. The total third quarter sales compared to $40,140,586 in the second quarter of 1949, according to RMA.

Maybe you did if you overlooked WHTN and WHTN-FM in the Huntington Market... for WHTN delivers more than one-fifth of this $300,000,000 market (no station has as much as two-fifths)...and at a lower cost - for - coverage, too. Add to this an FM bonus on WHTN-FM, the most powerful FM station in the Central Ohio Valley, and you've got a low-cost, high power medium for tapping the gold in these hills. Take a look at the Huntington Market...then make up your mind to get your share by using WHTN and WHTN-FM.

WALTER N. HILLER Jr. placed in charge of radio for Toni Co., Chicago, in new administrative setup in firm's advertising department. Production department is being expanded under direction of ELDRED G. LUSTMAN. FRED KLEIN will continue to head creme shampoo, creme rinse, and new product advertising division.

FREDERICK W. LUTTMANN, premium promotion manager, Post Cereals Division of General Foods Corp., New York, appointed product merchandising manager for Grape-Nuts, Grape-Nuts Flakes and Wheat Meal. He will be succeeded in his former post by WILLIAM P. DUNHAM, previously assistant.

CLYDE E. RAPP appointed advertising director of Theo. Hamm Brewing Co., St. Paul, Minn. He was formerly with J. Walter Thompson Co., New York. 

HY FREEDMAN, for three years on general sales staff, named assistant merchandising manager and publicity director of Hunt Foods Inc., Los Angeles.
Graham Cracker
EDITORS, BROADCASTING:
My clients, Messrs. Stuart Peabody and Fairfax M. Cone, are responsible for my writing this letter. Their cause of action is apparent at a glance at page 24 of your Jan. 2 issue. They have retained me because I am a member of the Florida Bar, and we expect all negotiations pertaining to our suit to be conducted in that state, with expenses pre-paid by BROADCASTING. When my clients have found the date for negotiations that mutually suit their calendars, I shall inform you of our transportation and hotel accommodations.

Philip L. Graham
Publisher
The Washington Post

[EDITOR'S NOTE: Our Picture Editor, who apparently was engaged in pre-New Year's revelry, now is eating butter. That page 24 lineup of officers of Commerce Secretary Sawyer's Advertising Advisory Committee should have read (1 to 2):]

Mr. Peabody
Mr. Cone
Mr. Graham

EDITOR'S P.S.: On advice of counsel, we take recourse to that Chinese proverb about one picture being worth a thousand words. So, by mathematicals, projection, the equation is the equivalent of 5,000 words versus a mere three names, correctly spelled but slightly misplaced.

Post-lude
Mr. Philip L. Graham
The Washington Post
Dear Phil:
I thought I saw a familiar face on page 24 of the current issue of BROADCASTING magazine, but the caption under the picture read "Mr. Peabody." Have you got a double or could it be that my good friend, Sol Taishoff, made such a glaring error.

Note to Editor, BROADCASTING: I hope you don't mind the rib, Sol.

I got quite a kick out of it, and at least it shows I read your magazine.

Incidentally, I wish you would have your mailing list changed to show my correct home address which is:

South Finley Ave.
Basking Ridge, N. J.
R. C. Robertson
Director of Media
Colgate-Palmolive-PEET Co.
Jersey City, N. J.

[EDITOR'S NOTE: Don't mind the rib at all, as aforesaid. Home address changed. Thanks.]

Production

EDITOR, BROADCASTING:
Three hours ago the doctor informed my wife that on or about Jan. 20 she will give birth to not one, but two children. Twins.

As anyone can see from our ads in BROADCASTING, WTOP's campaign this year is built around the fact that "Business Is Always Better In Washington." This is now doubly proven.

Cody Pfanstiel

"Talk, think and act like radio-men! That's what we've been telling students for four years.

And to accomplish this purpose we not only use BROADCASTING-TELECASTING as required reading, we give tests covering pertinent material in each issue.

Does it pay off? Well, after four years' operation we've placed 450 graduates in radio-TV, or allied jobs. Eleven students who cut their electronic teeth on BROADCASTING are now managing stations!

Elbert (Bert) Haling
Institute of Radio Broad-
casting
Dallas

[EDITOR'S NOTE: Delighted to learn embryo managers as well as active managers find BROADCASTING helpful.]

Frowns at Smile

EDITOR, BROADCASTING:
I do not understand your editorial entitled "Smile When You Say That!." Judge Conger's ruling in the Bentley case does not "broaden the body of law which has placed the sound broadcaster in what was once described the 'di-

lemma of self-destruction.'" It was favorable to broadcasters because it held defamation by televi-

sion to be slander and not libel. Slander is actionable only if "spe-

cial damages" are shown; this showing is not necessary in libel.

(Continued on page 16)

FACTS
ABOUT BEER

• One of England's old and envied professions — that of official ale-conner (taster) has virtu-

ally disappeared from the scene, a victim of the march of science and mechanization.

Great Britain's ale and beer tasters date their calling from William the Conqueror, who created the office as a means of controlling the quality of the nation's favorite beverage. Tasters were invested with authority to set prices based on their palate's judgment and even to exact penalties if the beverage fell below the minimum standard.

In recent years, however, the profession was reduced to being an honorary one, bound up chiefly with ceremonial occasions.

The ancient profession has about disappeared because there no longer is any need for it, as one of the few surviving ale-conners recently explained. Today all beer is good beer.

Brewing is subject to laboratory control from the time the malt is ground until the finished product is packaged in keg, bottle or can. Nothing is left to chance. Temperatures for boiling or chilling are kept under perfect control. Air is sterilized in the fermenting cellar. Yeast kept in pure culture apparatus sup-

plies the fermenting agent. And the entire process is under the watchful eyes of master brewers schooled in all sciences relating to brewing. They are the official tasters of today, insuring the uniform quality of America's beverage of moderate.

WLB orders

WTAO, WXHR(FM) Election

BROADCAST technicians and engineers at WTAO and WXHR (FM) Cambridge, Mass., licensed to Middlesex Broadcasting Corp., were directed last Wednesday by the National Labor Relations Board to hold an election. The board found that they constitute a unit sufficient for collective bargaining sought by IBEW (AFL) Local 1228.

The order includes the assistant chief engineer but excludes announcers, chief engineer, and clerical, maintenance and administrative employees. NLRB also ruled that "minor technical functions" performed by five announcers are "incidental" and should be excluded from the unit, contrary to request of Middlesex Broadcasting Corp. NLRB also ruled out inclusion of an assistant chief engineer as supervisor, contending he has no such supervisory authority.

Gifford Retires

Was AT&T Board Chairman

WALTER S. GIFFORD, for the past two years AT&T board chairman, retired from that office at year's end. Mr. Gifford, who will be the company's compulsory retirement age of 65 on Jan. 10, was elevated to board chairmanship after 23 years as president. Leroy A. Wilson, who succeeded him in the latter post, is expected to preside as president hereafter at board meetings.

Mr. Gifford, simultaneous with his resignation from the chairmanship, also resigned his membership of the board. He will continue, however, as honorary chairman and will be available for consultation, the company said. He has taken a New York office not far from his old headquarters, "just to have a place to receive my mail and my friends," he said.

SPOT announcements by movie personalities on 54-second commercial transmissions over local stations will be used by RCA Victor this month promoting Screen Directors' Playhouse on NBC.

RCA Power Tubes, such as the famous 833-A, are noted for their Long Service Life in AM Transmitters

- RCA tubes for all types of broadcast service are available from your local RCA Tube Distributor or directly from RCA.

The Fountainhead of Modern Tube Development is RCA
**GRAND CENTRAL**

**Ceases Terminal Programs**

PUBLIC ADDRESS system broadcasts in Grand Central Terminal, New York, were discontinued by the terminal management Jan. 2 after New York’s Public Service Commission had heard protests that the system violated citizens’ rights.

In an announcement of the discontinuance, E. B. Moorhouse, terminal manager for the New York Central and New Haven railroads, in an announcement of the terminal, said that although a “substantial majority” of our passengers favored the programs, there were enough who sincerely opposed them that they have decided to discontinue the experiment.”

A spokesman for Terminal Broadcasting Co., which operated the system of broadcasts—music, duplicate announcements, weather reports and commercial announcements—pointed out that the broadcasts had been stopped despite the fact that “no verdict had been rendered by the Public Service Commission.”

**CIVIL DEFENSE**

C. of C. Preparing Booklet

SPECIFIC recommendations on civil defense planning will be offered in a forthcoming booklet being compiled by the U. S. Chamber of Commerce. Pamphlets will follow up two others issued last year—“Where We Stand on National Defense” and “A Blueprint for Industrial Preparedness.”

The chamber had urged that the executive and legislative branches review the program continuously and take necessary steps to provide for minimum stockpile requirements including electronics and communications equipment under functions of the Munitions Board. Only 40% of minimum needs had been met as of June 43, the chamber noted, adding that the program would require seven or more years to complete if the rate were not accelerated. It also expressed concern over failure to provide adequate funds for stocks of essential materials.

**WAYVE Wins Award**

WAYVE Wytheville, Va., has been awarded first prize in the National Research Bureau Inc.'s sixth bi-

**In Cold Alaska**

That radio can sell cold tablets successfully in cold Alaska has been proved by KFQD Anchorage. The station aired two spot announcements on Antihistamine pills for the local Retail Drug Store, resulting in sales of 48 dozen packages within two hours after broadcast time. William Abel, store's general manager, advised the station that he "was mighty pleased" with such fast results.

**WMCA BUSINESS**

$100,000 Signed for 1950

NEW contracts and renewals for 1950 amounting to more than $100,000 have been signed by WMCA New York, Norman Boggs, general manager, has announced.

K. Arakelian Inc. (Mission Bell Wine), through Young & Rubicam, has renewed its 22-week spot announcement campaign for the sixth consecutive year on WMCA starting last Monday.

Other WMCA renewals effective Jan. 2 include American Home Products (G. Washington Coffee) through Ted Bates Inc. with a 26-week spot schedule; Fairmont Foods through Doyle, Dane & Bernbach Inc. with a 52-week spot program; Chase National Bank through Albert Frank-Guenter Law Inc. for announcements; Piel's Beer through William Esty & Co. Inc. for 52-weeks of spots; two contracts with R. J. Reynolds Tobacco Co. for Camel cigarettes and Cavalier cigarettes for full-year spot campaigns through William Esty & Co.
SHOW which heats up like a hissing tea kettle with the appropriate letting-off-steam is claimed by威哥 Nuta. A copyrighted giveaway, ‘The Silver Dollar Man’ Program, gives interview, phone-number format into a compact selling feature, according to the handling agency, Snowden & Steward, Atlanta.

Program’s start came as a tryout of R.A. (Bob) Perrott’s (manager, Dr. Pepper Bottling Co of Brunswick, Ga.), brain child based in 18 years of experience in beverage merchandising. Test city was Brunswick where the program was placed on WYG for a period of eight weeks, six days per week. Result was overwhelming success, with Dr. Pepper realizing a 267% increase in sales in the first 2 weeks and a 300% average increase over its entire period.

No Direct Commercials

The style of the program and its unique full 15 minutes of continuous commercial script, which clinks without any interruption for a direct commercial announcement, are highlights underlined by W.E. Snowdon Jr., of Snowden & Steward.

Program series are preceded by easy spot promotion over radio, and in newspapers, coupled with cotting company and retail display. Program itself gets off to a fast start and is carried along on its own momentum.

Against a background of sound effects including sirens, “calling all patrol cars” relay, the staccato delivery of a sports announcer is used in the program. A number of “patrol cars” with auto radios tuned to the station are contacted over the air by the announcer, who at the same time places a telephone call. He tells the person called that the dollar man is on the way to shell out the dollars. When the dollar man arrives, he counts the number of Dr. Peppers in the refrigerator and duplicates the number in silver dollars.

Following the initial Brunswick campaign, Mr. Perrott discontinued the program for 60 days and now is returning to the air on the basis of three nights per week, average three calls a night, with the cost, according to Mr. Snowden, showing a probable return of three to four times.

In Savannah, where the program was placed for the Dr. Pepper bottler in that city, the plant had been operating at a loss. At the end of the first week, a profit of $100 was shown, by the second week it had increased to $900 and the third week turned up over $1,800. There, the show was on three nights a week with an average of one to two giveaways per night. Similar success has been met in Harrisburg and Reading, Pa.

Allen Burke, WYG manager, found the program “one of the most astounding and forceful programs” in the history of the station, according to the agency. Requests of bottlers delayed Mr. Perrott, who packaged the program and copyrighted it to insure the investment of bottlers who tie in on the merchandising plan.

ADIMIRAL CORP.

Buys General Mills Plant

‘ADMIRAL’ Corp., radio, television and appliance manufacturer, has purchased the 64,000-square-foot General Mills plant in Blooming ton, Ill., according to an announcement by John B. Hurisera, executive vice president of Admiral.

Of brick construction and situated on an 11-acre plot, the factory originally was the property of Colonial Radio Corp. and was taken over by General Mills in January 1948. Admiral plans call for eventual employment of 1,200 people in the plant. Mr. Hurisera said, to be used first in the manufacture of radios and later television sets.

From an original capital of $3,400 in 1934, Admiral’s gross sales volume has grown to $110 million in 1949, Mr. Hurisera stated.

WIBG-FM TESTS

Muzak by FM Cited Success

USE of FM radio as a substitute for leased telephone wires in the distribution of music programs has been found satisfactory after exhaustive tests of several months conducted over facilities of WIBG-FM Philadelphia.

John B. Kelly Sr., chairman of the board of WIBG-FM and president of Muzak Corp., licensed distributor in Philadelphia for Muzak wired music service, said his company believes in FM, with certain important modifications, is able to replace the wired music firm’s leased lines. No final decision will be made until tests and comparisons are complete. Mr. Kelly said that FM radio waves would be given additional tests to prove that FM broadcasts could provide satisfactory service.

GORDON W. OLIVE, formerly chief engineer of Canadian Broadcasting Corp., with headquarters at Montreal, named director of engineering services. ALBERT C. OUMET, has been named chief engineer of CBC. Mr. Olive has been with CBC and its predecessor since 1933, starting in radio in 1912 as assistant. Mr. Oumet has been with CBC since 1934, and has in past few years been specializing in television development prior to CBC setting up its first stations.

WILLIAM SLOAT, assistant chief engineer at WPIX (TV) New York, resigns to become chief engineer of KEYL (TV) San Antonio. He joined WPIX in February 1948, moving from WEEW-AM-FM St. Louis. Previously he was chief engineer of CBS-TV in New York for five years.

TED C. KENNEY, chief engineer of KDKA Radio, honored by Duquesne U., that city, for his contribution to the value of radio to the university’s new station, WDQJ (FM).

JOSEPH KLINE, technician at WTUJ (TV) Miami, Fla., named supervisor of new lightweight receivers for station under supervision of JACK SHAY, WTUJ’s technical director.

RCA Victor, Camden, N. J., announces production of new lightweight stand for police microphone positioning in broadcast and television studios. Stand, Type K-12F, is designed particularly for programs where best microphone placement cannot be achieved with conventional floor stand and where larger box is impractical. Stand is collapsible.

PEERLESS ELECTRICAL PRODUCTS Div. of Aleec Lansing Corp., Hollywood, distributing new transformer catalogue containing new models and complete line of transformers for broadcast, RCA.

RCA Engineering Products Dept., Camden, N. J., announces battery container and cover for portable RCA Type BN-2A remote amplifier which carries standard “A” and “B” batteries in one case and serves as conversion kit to facilitate switching from a-c to battery operation.
All Radio Film
(Continued from page 37)

sidering a request that NAB lend it the services of C. E. Arney Jr., NAB executive secretary, for a month to assist in the organization of the firm.

Tentative plans for the first showing are on a grand scale. It is proposed that it be held in the Waldorf-Astoria's Grand Ballroom. The showing will be preceded by a cocktail party, a lavish dinner, and entertainment by top night stars. A thousand guests—top advertisers and agency men predominating—will be invited.

As preparations were proceeding for the New York premiere, the All-Radio Presentation Committee reported that 545 subscriptions to the promotion project had been received.

Three of the subscribers are ABC, CBS and NBC which have contributed a total of $50,000, five are national station representatives—Avery-Knodel, The Katz Agency, Edward Petry & Co. Inc., Weed & Co. and The Brabanon Co.—and the rest are individual stations. Total subscriptions to date amount to $135,000, Mr. Mitchell said Thursday.

Subscription fees are based on station income and range from $25 to $1,000. The final cost of the promotion film, made by the Independent Motion Picture Producers Society, cannot be exactly calculated. The contract price for the finished picture with one 35mm print is $85,000, but additional 35mm and 16mm prints will cost extra.

Subscribers may obtain the film in either 35mm or 16mm size. The film, when finally edited, is expected to run 45 minutes showing time. Shorter versions will also be made for special local purposes.

Mr. Mitchell pointed out that the All-Radio committee will make arrangements for the projection of the picture at subscribers’ requests.

Two Films Retained

Two film companies, The Jam Handy Co. and Modern Talking Pictures Inc., have been retained. They will provide projection equipment and operators anywhere the pictures are shown, Mr. Mitchell said. No subscriber needs projection equipment of his own to display the film.

The 45-minute film is described as a documentary, with all members of the cast acting themselves, except for a professional actor who appears in one sequence.

Four radio sales successes are the backbone of the film, it was said. They pertain to local radio campaigns of a department store in Columbus, Ga., a chain of super markets in Cedar Rapids, Iowa, a dairy in San Jose, Calif., and a network show.

No call letters are used in the film, it was reported. The adver-

g\textit{Getting the bird is Mrs. C. L. Thomas, general manager of KKOK St. Louis. The traditional Christmas goose, awarded by Ed Hunsinger of the St. Louis restaurant, was one of more than $8,000 in gifts presented to members and guests during the organization’s 47th annual Christmas party held in the Jefferson Hotel. More than 1,000 persons attended.}

disers involved, however, are identified.

The Columbus case was a campaign on a local who has been a jeweler concession in the Davidson’s Department Store. After a history of unsuccessful advertising in newspapers, the jeweler turned to radio with such prodigious success that the entire store undertook a campaign on radio. What’s more the case encouraged R. H. Macy Co., owner of Davidson’s and other stores in the South, to use radio.

The film documents the original placement of the radio campaign, shows actual customers, prompted by the commercials, buying diamonds at the store—all scenes reenacted by the actual people.

In Cedar Rapids, the Me-Too super markets cooperated with the film producer by running a special radio campaign to sell a carload of peaches—a duplication of a success story that had occurred earlier. The film shows customers flocking to buy the peaches.

San Jose Case

In the San Jose segment the film shows how the Marin Dell Dairy, with headquarters in nearby San Francisco, achieved distribution in local stores through its use of radio.

The network program covered in the film is the Jack Beck Show, sponsored by Prudential Life Insurance [Broadcasting, Oct. 31, 1949]. The film illustrates how a Prudential salesman is welcomed by a housewife who has been made Prudential-minded by the program.

Another sequence in the picture shows a bull session of agency men and Mr. Mitchell at the Poor Richard Club of Philadelphia. In the course of the discussion, Mr. Mitchell manages to get across his now famous “Mitch’s Pitch.”

Mr. Mitchell said that some newspaper-owned stations, prospective subscribers, had inquired whether the promotion film was too competitive as regards other media for them to show locally to the embarrassment of their newspaper associations. He said he believes this is not so.

The All-Radio Presentation Committee is preparing full instructions on the mechanics of showing the film as well as complete publicity and promotion kits which will be distributed to all subscribers.

Officers of the committee are Gordon Gray, WIP Philadelphia, chairman; Mr. Mitchell, secretary; Herbert L. Krueger, WTAG Wor cester, treasurer; Eugene S. Thomas, WOIC (TV) Washington, assistant treasurer.

Victor Ratner, former vice president of CBS and now a vice president of R. H. Macy Inc., New York, was producer of the film.

FORCED LISTENING

Fly Cites Need for Policy

By JAMES LAWRENCE FLY

The Grand Central Terminal has announced its broadcasts in the interest of good will. The problem, however, will arise again and again, and the radio industry must be prepared for a decision on policy. The action of the Grand Central is based upon considerations of institutional good will is worthy of note.

On the legal and philosophical side I have argued against forced listening. In a speech before the Advertising Club of Boston on Sept. 28, 1943, I urged an international principle of "Freedom to listen," laying heavy emphasis on the forced feeding laws of the dictator countries. This principle was preserved in the draft peace treaties. Freedom to listen necessarily includes the right of selectivity and the right not to listen.

Every other form of broadcasting or advertising leaves an avenue of escape, the newspaper, the magazine, the outdoor, the radio. Even the loud speaker is a sometime thing, and formally affords some escape at the moment. The whole idea of forced listening to one particular station has seemed to me without precedent in a free country and to lack too much of arbitrary power. A man's right to be let alone stems from the deep well of legal lore. But let us take a selfish approach. Warren Moscov in the New York Times says: "When the tolls came to balance the mount they spent on institutional advertising for the cultivation of institutional good will against the revenue from the project [$90,000 per annum] that was apparently losing ill-will there was nothing left to do but give it." The resentment was more and more consistent than can easily be imagined. My recent contacts, largely social, have included (believe it or not) numbers of the Westchester and Park Avenue groups, business and professional men, bankers, advertising men and radio officials and lawyers. Comment was spontaneous, forceful and, with rare consistency, critical. One could not avoid the conclusion that the quick easy dollar wrung from captive audiences is, in the long run, too dear a cost.

But there are further implications. We may be at the threshold of an extensive development. Only a small portion of the actual and potential broadcasts come from radio. My industry friends agree that conceivably these captive operations may move into every salient point where masses of people must gather or pass. Routinized, the job can be done simply and at small expense. Once so developed, what is going to happen to the local advertising of the radio stations? It may well be shortsighted when broadcast stations contribute to a service which, changed and expanded, may turn to devour.

I submit for mature reflection the proposition that in its own intellectual self-interest the industry should stick to the free and competitive system which has nurtured its growth. This better becomes the mightiest of the free services to the greatest of all free peoples.

RMA CONFERENCE
Committee Meets Jan. 18-19

INDUSTRIAL relations problems in the radio and television industry will be discussed at a conference to be held Jan. 18-19 at the Statler Hotel, New York, by the Industrial Relations Committee of Radio Mfrs. Assn.

Titled "The Search for Security," the conference is being arranged by a subcommittee headed by Harvey T. Stephens, International Resistance Co. Informal discussions and talks will be taken up on a workshop basis, covering such topics as pensions and social security programs for the industry.

Speakers will include Richard A. Lester, Princeton U.; Dr. Paul R. Beall, Penn State; Gurry E. Morse, Sylvanica Electric Products; John D. Washburn, Sprague Electric Co.; A. F. Watters, RCA Victor Division; Godfrey P. Schmidt, New York attorney. Mr. Watters will discuss personnel problems as they relate to the economic future of the radio and television industry.

Baking Story
Continental Officials on CBS

Two radio advertisers portrayed themselves in The Rising Wonder a full hour special broadcast marking the 25th anniversary of the Continental Baking Co., presented on CBS Dec. 30. The two executives were Lee Marshall, chairman of the board of Continental and Ray Stitzinger, president of the firm.

In addition to the executives, the program starred Mark Stevens as narrator of the Continental story. The script was prepared by Robert Lewis Shayan.

The Baking Co. regularly sponsors Grand Slam Monday through Friday, 11:30-12 noon on CBS. Ted Bates Inc., New York, is the agency.

ACTIVE in radio for more than a decade, James Lawrence Fly is a partner in the New York law firm of Fly, Fitts & Sheebruk. He became FCC Chairman Sept. 1, 1939, serving five years. Prior to that time he had been general counsel of the Tennessee Valley Authority. The "captive audience" problem has been subject to public hearings in Washington, where transit radio was given official approval. In New York, Grand Central Terminal stopped its service after a trial period.

Canada Marine Meet

FCC COMRS. E. M. Webster and George E. Sterling, accompanied by two top staff executives, will attend the annual meeting of the Canadian Dominion Marine Assn. Jan. 17-19 at the Seigniory Club, Quebec. Staff executives who will attend are William N. Krebs, assistant chief engineer in charge of the Marine Radio & Safety Division, and A. L. McIntosh, chief of the Frequency Allocation & Treaty Division. Discussions will center on common problems and objectives of the U. S. and Canada in the Great Lakes regions.

(Continued from page 38)

In the particular case, Judge Cooper did hold the defamation to be slander per se, and hence within the exception to the rule requiring proof of special damage, but that charge and had nothing to do with was because of the nature of the its having been televised.

Of course, the case had nothing to do with political broadcasts either.

The courts have not held that radio is exempt from state law insofar as liability for defamation is concerned. A dozen states have passed legislation in this field. Whether Congress could constitutionally legislate on the matter of defamation by radio or television is not clear.

John W. Willis
Fischer, Willis & Panzer
Deposit Circle Bldg.
Washington

[EDITOR'S NOTE: Our attorneys tell us that Barrister Willis is probably right. Our purpose was not to argue the laws of slander and libel, but rather to point up the need for national legislation which would safeguard the broadcaster and telecaster. Whether Congress could constitutionally legislate in this field ultimately must be determined by Congress and the Supreme Court.]

Doodle Contest

EDITOR, BROADCASTING:

... . The idea occurred to us that there are many exceptional doddle- lers in this vast radio field, So,

why not give these frustrated "Dollas" a chance to compete in what could be a very enjoyable contest. . . .

Elliot Warren
Promotion Director
WEOA Evansville, Ind.

The winning "doodle" in a contest conducted by WEOA.

Editorial Gets Hay

EDITOR, BROADCASTING:

... . Editorializing has its hazards. One morning recently I sat on my observations on the news that to my knowledge our paid County Fire Department had not saved so much as a bale of hay in its costly three years of existence.

The county department provides a dozen political jobs for patron-

age, and has been embroiled with volunteer fire departments of Jefferson County since it was established. The volunteers have proven efficient enough, as a matter of fact, to win fire insurance rate reductions. Pretty sizable ones.

So, the next day at noon there was delivered to my office a bale of hay with this note attached:

"This is the bale of hay you said the County Fire Department didn't save. And there is still more for you. You can use this hay to feed that bull you put on the radio every morning."

It was signed, "Mr. Tax Payer's (sic.)"

After discussing the care and feeding of other wave bulls with Farm Coordinator Frank Cooley the following morning, the hay was put out to pasture.

TV's 'Hurting' Power

EDITOR, BROADCASTING:

Television hurts AM.

Television hurts FM.

Television hurts movies.

Television hurts legitimate theatres.

Television hurts baseball.

Television hurts football.

Television hurts basketball.

Television hurts wrestling.

Television hurts boxing.

Television hurts the family dinner.

Television hurts the pocket-book.

Television hurts the eyes (and sometimes the ears).

And now television hurts the trolley car business! (local trans-

port company cites television as reason for decreased patronage and losses in seeking to increase rates). . . .

Why in blazes do you and Arthur Godfrey persist in promoting television? You're driving to the country to the dogs faster than the Commies.

WAUX Waukesha, Wis.

GDYNIA LINES

Justice Replies to O'Connor

REQUEST of a Congressional sub-

committee that the Justice Dept.

investigate radio propaganda ac-

tivities of the Gdynia America

Shipping Lines drew a mildly re-

sponsive reply from a high depart-

ment official Dec. 29.

Peyton Ford, assistant to the

Attorney General, wrote Sen. Herbert

R. O'Connor (D-Md.), chair-

man of a Senate Judiciary Immi-

gration subcommittee, that the

shipping line and Dr. Zenon Kos-

dowski, who prepared and edited

radio scripts for Polish programs,

are registered under the Foreign

Agents Registration Act. Dr.

Kosdowski is an agent of the

Polish research and information

service.

Sen. O'Connor’s group charged that the line has used facilities of American stations “for the pur-

pose of engaging in Communist propaganda ... far beyond the

scope of legitimate business enter-

prise” and called on Justice Dept.

and FCC to probe its activities.

Programs were aired on WHBI

Newark, N. J., and WEDC Chi-

cago [BROADCASTING, Dec. 26,

1949]. No reply has been received from FCC, spokesmen said. Mean-

while WHBI has dropped the

broadcasts.

The Justice Dept. made no men-

tion of initiating a probe, and

pointed out that registration state-

ments and exhibits are recorded in

the public file. Included is a de-

tailed statement on the shipline’s

activities and descriptions of the

broadcasts, it added.

programs like these—and newspaper promotion like this—are some of the things that are making WOR-tv... one of America's great television stations on channel 9, in New York
You've probably heard of the Handy Man show on WPTZ. Sponsored by Gimbel Brothers, it's the oldest commercial television program on the air anywhere.

In any case, a few Friday nights ago the Handy Man demonstrated among other things a new electric corn popper. That is, he tried to, but instead of exploding into a fluffy white mass, the kernels neither snapped nor popped as they did in rehearsal... they just lay there and sneered.

It was a nightmarish situation even for as seasoned a performer as the Handy Man. Finally he called a halt to the demonstration and bluntly told the television audience not to buy the popper until he could show them that it worked and worked right.

As a result, two things happened—first, quite a few people disregarded the Handy Man's advice and bought the popper anyway. Second, the makers of Seazo Popcorn Oil called up after the show and suggested their product as the solution to the Handy Man's troubles.

The following show the Handy Man tried the demonstration again and it worked like a charm. The next day, Gimbel Brothers sold over 300 of the poppers at $8.35 each! Moreover, 75% of the shoppers demanded the Seazo Popcorn Oil!

Everybody was very happy, particularly the Seazo Popcorn Oil people. Here is what Adrian Bauer, advertising agency for Seazo, had to say about it: "What makes this remarkable is... the fact that an adjunct to the main article being sold was so carefully watched by the viewing audience that they demanded the popcorn oil right along with the popper."

That gets us down to the point of this story: Philadelphians, who make up the second largest television audience in the country (over 300,000 sets), watch WPTZ programs with an eagle eye. If you would like them to give equal attention to your product or service, call us or get in touch with your nearest NBC Spot Sales representative.

LARSON SUCCEEDS COE

G. BENNETT LARSON, vice president in charge of television at WCAU-TV, Philadelphia, has been appointed manager of WPIX (TV) New York, station of the New York Daily News, effective Jan. 16 [CLOSED CIRCUIT, Jan. 2]. He succeeds Robert L. Coe, who resigned as vice president and station manager of WPIX last Wednesday, but who will remain with the station until Mr. Larson takes over.

A radio veteran who first entered broadcasting 23 years ago at KDKY Salt Lake City, Mr. Larson joined NBC in New York in 1929 as a producer and director, handling such outstanding programs as Texaco Theatre with Ed Wynn, Fleischmann Hour with Rudy Vallee and Chase and Sanborn Hour with Eddie Cantor.

With Agendas

From 1934 to 1942 Mr. Larson served with the radio departments of Joseph Katz Co., Ruthrauff & Eyan and Young & Rubicam as director and producer. At Y & R he supervised daytime programs. With the advent of television, he experimented in this new medium by putting some of his radio shows before the camera.

In 1942 Mr. Larson became general manager and part owner of WWDC Washington, staying there until 1948 when he was appointed general manager of WPEN Philadelphia, when it was acquired by the Bulletin. Two years later, he became vice president of WCAU-TV, which the Bulletin had purchased.

Mr. Coe joined WPIX on Jan. 2, 1948, directing the design and construction of the new station, which went on the air June 15 that year. He developed the present organization of WPIX and had supervised its operation since its inception. Before coming to WPIX, Mr. Coe had been for 23 years with the broadcasting stations of the St. Louis Post-Dispatch, except for the war period when he served with the Army Air Forces. At the time of his resignation to join WPIX, he was director of technical operations of KSD-AM-FM-TV.

In announcing Mr. Coe's resignation, F. M. Flynn, president of WPIX and of the New York Daily News, said:

"Bob Coe performed near miracles in getting WPIX on the air on schedule. He and his staff have done amazing things in guiding the station through its early days, handicapped in many ways and confronted with the toughest competition in the country.

"Coe's decision to leave WPIX is a matter of personal regret to me," Mr. Flynn added. "All of us here are confident he will make further records in television. We wish him the very best."

Mr. Coe said:

"As a local non-network television..."

(Continued on Telecasting 12)

KTLA CONTROL

Transfer Bid Tendered

TRANSFER of control of KTLA (TV) Hollywood from Paramount Pictures Inc. to New Pictures Corp., Paramount Pictures successor under court-ordered reorganization, is sought in an application tendered for filing at FCC last week. Earlier requests had been filed for disposal of other Paramount station interests, WBBB (TV) and WBMF (FM) Chicago and WSMB-AM-FM New Orleans [BROADCASTING, Jan. 2].

Under the Paramount reorganization plan, required by the antitrust decree of the U. S. District Court for the Southern District of New York, the theatre-operating activities of Paramount Pictures are to be placed under a new firm called United Paramount Theatres Inc., with the picture-production and distribution activities going to New Pictures Corp.

WBBB and WBMF-AM-FM are proposed to be transferred to United Paramount Theatres, while KTLA, under permit to Paramount Television Productions Inc., a subsidiary of Paramount Pictures, would be transferred to New Pictures Corp. Paramount's 29% interest in Allen B. DuMont Labs, likewise would follow KTLA into New Pictures Corp.

Principal officers of New Pictures Corp. were reported to FCC as: Barney Balaban, president; V. Frank Freeman, vice president and secretary; Fred Mohrhardt, treasurer; Paul Reimont, vice president; Adolph Zukor, chairman of board; Harry Gunberg, vice president.
CUSTOM-TAILORED programming has livened Chicago's NBC affiliate WNBQ in 1948.

Programs like "We're in Chicago," "Chicago is Talent," "Chicago Peers," and "A Chicago Story" were introduced during that year. The station also celebrated its first birthday on January 7.

In addition, WNBQ's "Garvey Show," a weekly program hosted by Jim Garvey, was a hit with local viewers. The show featured a variety of talent, including musicians and comedians, and was broadcast from the Garvey House in South Chicago.

WNBQ's "Morning Show," hosted by Bill Ray, was also a popular program, featuring news, weather, and sports updates. The station's "Quiz Show," hosted by Jules E. Gene, was another popular program, featuring local contestants.

WNBQ's "The Big Story," a weekly program hosted by Jim Garvey, was also a hit with local viewers. The show featured a variety of talent, including musicians and comedians, and was broadcast from the Garvey House in South Chicago.

WNBQ's "Morning Show," hosted by Bill Ray, was also a popular program, featuring news, weather, and sports updates. The station's "Quiz Show," hosted by Jules E. Gene, was another popular program, featuring local contestants.

telecast from the zoo on the Near North Side each Sunday. "Phenomenal" response, in the opinion of Promotion Director Harold A. Smith, was tabbed last month after a one-time mention on the Dec. 4 show. Viewers were asked to identify correctly five of 15 animals telecast. In exchange, they would get an autographed picture of Bushman, 550-pound gorilla who daily consumes 22 pounds of fresh vegetables and vitamin pills before

(Continued on Telecasting 14)
WILL TELEVISION follow radio’s pattern of delivering programs—and their sponsors’ commercials—to the home audience on a regular basis of same time, same station, every week or more often?

Some say yes, noting that much of radio’s success as an advertising medium stems from this regular delivery of the sponsor’s message to the listening public and believing that the same will be true of TV.

Others say no, pointing to the much higher costs of video programs as a deterrent to any general slavish following of the radio pattern. These individuals also cite the many statements of TV proponents as to the unequaled impact of this new medium and comment that if monthly ads in magazines have been profitable an every-week-week TV schedule should also pay off for its sponsor.

Donald W. Stewart, advertising manager of the Texas Co., whose Tuesday night TV series starring Milton Berle has for more than a year been television’s most popular show, told last fall’s AAAA convention that one-hour shows do not need to be seen more than twice a month.

“If your show is good, there will be no audience loss because there is a one-week lapse between shows,” he declared. He noted that with such a schedule there would be more time to rehearse each program and less chance of a star, such as Berle, “burning out too soon” and that it would permit year-round broadcasting without the customary summer lay-offs.

“It will be pretty hard to justify spending as much as $75,000 every week for 39 weeks when you can accomplish the same results in 26 weeks at a saving of about $1 million,” he averred.

THE additional time provided for production is one of the major reasons for the present every other-week schedule of the Ford TV Theatre, seen alternate Fridays, 9-10 p.m., on the CBS-TV Network. William A. Chalmers, vice president and radio-TV director of Kenyon & Eckhardt, New York, agency in charge of this program, told Telecasting:

“The Ford TV Theatre proves that guessing, ad libbing and risk can be eliminated from commercial television. With the success of the Ford Theatre, there is no longer any excuse for slapshod production, especially in dramatic shows. For our series has shown that long range planning, careful production, fastidious attention to detail, and allotment of time to each effort, pays off in the kind of pro-gramming which makes TV an adult medium.

“Let’s take a look at what’s happened, in case my adjectives seem too overwhelming to prove.

“Three years ago, Ford Theatre was launched on a long range plan. The basis of the plan was simply to provide the best possible radio dramatic fare. Last year, after two successful seasons, it was decided that television offered the most rewarding long range possibilities in terms of impact and audience. The plan was switched to television with the same objectives in mind as originally outlined two years prior to the decision.

“That plan called for the most careful selection of properties, cast—and most importantly, production staff. Especially in television, it is our feeling that the producer and his staff must be a harmonious, skilled unit, which has the freedom to act with unimpaired authority.

“The chain of our TV command is not kinked with all types of supervision. The show goes on as the production staff feels it should, without interference by outside elements.

“We felt that once a week operation would be impossible under the circumstances. It would tend to violate our ideas about the most careful preparation in presenting our shows. Here we began with a monthly presentation and now are on an every other week basis. This schedule, under our current setup, enables a potent commercial punch to be felt, as well as providing program impact upon TV viewers.

“If we were to go on a weekly program schedule, our plan would be to set up dual production units, each responsible for two shows per month. In that manner, our production values would never be hurried or strained. At this stage of TV, we believe it is impractical for one production staff to handle the manifold difficulties of a weekly hour dramatic series.

“There is no secret about our objective. We want to have the number one dramatic show on television. If planning, preparation and allowing creative talent a chance to create will do the trick, we should achieve our goal.

“Certainly, the client has shown himself to be sympathetic towards the aims which we have in common. Critics, too, have expressed themselves in each term as to the production and staging of the Ford series.

“We’re pretty happy about the fact that actors on the Ford show have time before they go on to get a bite to eat, have a cigarette and relax! Not many other shows can boast of that atmosphere at rehearsal time!”

The every-other-week formula has also been adopted by another automobile manufacturer, Chevrolet Division of General Motors, for its Inside U.S.A. With Chevrolet, CBS-TV, alternate Thursdays, 8:30-9 p.m. Three major motives prompted the decision to adopt and maintain this schedule, according to Winslow H. Case, senior vice president of Campbell-Ewald Co., Chevrolet agency, who continued:

“If television’s impact is as powerful as we believe it to be, and sponsor identification surveys on top programs have shown some amazing results, it may be wasteful to rigidly follow radio’s weekly formula. Each advertising medium must develop a frequency pattern of its own.

“Production-wise, too, a musical revue as complicated as Inside U.S.A., with its split-second timing and many transitions, demands two weeks of concentrated rehearsal.

“Budget, in relation to the total possible audience, is the third factor.

“One effective way to maintain audience for a particular time segment would be to alternate two top ranking shows on an every-other-week schedule. It is yet to be tried but I think this system may prove to be one of the most workable and satisfactory solutions to the frequency problem.

“Obviously, there can be no certain answer to the question of which yields a better return: every week, every other week, or even one month. Television’s philosophy is still in the formative stage. If our own research and industry studies reveal a definite and significant trend, we will move to, take advantage of it.”
DuMONT RAPs NBC

CALLING for an investigation and FCC, Allen B. DuMont Labs charged last week that NBC-TV's proposed 2 1/2-hour Saturday night series [TELECASTING, Jan. 2] "is a manifest attempt to freeze out" competitors.

DuMont, operator of the DuMont TV Network and three owned stations, accused NBC-TV of "monopolistic and unfair trade practices." It asked FCC to take "immediate interim action" to "disclude and restrain these practices pending ultimate formal action by the Commission.

FCC officials said they would ask NBC to answer the complaint, which is customary procedure in such cases, and that the Commission would then decide what action should be taken. Filing would be required to issue a formal decision, since a formal complaint is involved.

DuMont's complaint was directed primarily against NBC-TV's request to affiliates to clear 2 1/2 hours on Saturday nights for 13 weeks starting Feb. 4, for a show to be sponsored by several advertisers.

The complaint alleged "the offer specifies no particular programs and contains "no provision for the right of DuMont, or of any other broadcaster accepting the offer, to reject or refuse any programs believed to be unsatisfactory or contrary to the public interest."

DuMont Assultion

Further, DuMont asserted, "the offer requires that any accepting television broadcasting licensee must clear the 2 1/2-hour period for the 13 weeks completely to the NBC show, regardless of established programs or existing commitments, and without regard to whether or not any portion of the time is sold by NBC."

NBC-TV was paid its affiliates at their regular half-hour network rates for five half-hourly weekly (10:30-11:30 p.m.), the complaint said. The show would be sold to several advertisers, whose commercials would be telecast on a rotating basis. Each half-hour would contain three one-minute slots, one for the commercial.

At least 15 affiliates must accept the program, NBC stipulated.

DuMont, which "immediately rejected the offer, cited the "high cost and "inadequacy of existing network facilities and their effects upon network operations. The complaint continued:

It follows that a contract by a single network for its use at rates above normal scale, of 1/2 hours of solid, preferred time on the critical Saturday night programming period.

If completed with 15 or more stations, to the exclusion of any other program during the important winter season, would disrupt and destroy comprehensive programming efforts by independent broadcasters, and unreasonably bar advertisers utilizing the service of such broadcasters.

This is "especially true," the complaint said, since the freeze has limited many cities to a single station "the broadcasting any competitive opportunity to advertisers and networks for the viewer market in such intermediate metropolitan areas."

Further, DuMont claimed, NBC's "exclusive and larger allocation of desirable time" on the intercity cable and relay facilities.

DuMont said it has developed programs that "will have attracted great public interest," and that some of them are in the 2 1/2-hour period that NBC wishes to clear.

The complaint mentioned Cascades and Cafe de Paris, pointing out the present series ends Feb. 4 "and would be renewed as of that date."

The complaint charged that in the past DuMont has "been affected by restrictions upon potential affiliating through the block booking of programs and combination offers for standard broadcasts, frequency modulation and television network time."

Cancellations Claimed

DuMont said it has evidenced in cancellation of desirable and important programs, and the rejection by broadcasters of programs produced and distributed by DuMont Network, which were subsequently accepted by other stations.

It said "DuMont is unable to produce written evidence of the agreements involved in the present bulk purchases of time by NBC, or the underlying agreements for restraint of free competition for the use of the facilities of licensed broadcasters."

On the basis that "the rules of the Commission require the filing with the Commission of any such agreements," however, DuMont asked FCC to "institute an inquiry on its own motion," with the following procedures included:

1. The immediate issuance of an announcement expressing the Commission's disapproval of monopolistic and unfair practices in violation of the provisions of the Federal Communications Act, the Report on Chain Broadcasting, and the rules of the Commission.

2. To investigate all agreements, written, oral or implied, limiting freedom in contracting television licenses, whether implemented by written agreements, financial inducements, threat of loss of television or other broadcast opportunities, or otherwise. The findings are to be expressed in a hearing, any objections are to be heard, and a determination made of the matter.

3. To inquire as to restrictive agreements for the supply of or use of television broadcasting equipment conditioned upon the availability of television broadcasting programs, talent or literary rights.

4. To determine whether extraordinary control of facilities, advertising outlets, long-term contracts for talent, or other devices are being employed to deny the present temporary circumstances restricting the number of television stations.

5. To determine the participation of NBC and its parent company, RCA, including its licensed television or standard broadcast stations, in practices in violation of, or designed to procure or compel violations by others of the Commission's rules and regulations, or contrary to the public interest and the spirit and intent of the Commission's network regulations and its Report on Chain Broadcasting.

The complaint carried a copy of a telegram from Sylvester L. (Pat) Weaver Jr., NBC vice president in charge of television, outlining plans for the Saturday night show and asking for acceptance. Specific programming, the telegram said, will be disclosed in mid-January.

"We are convinced that this is the best immediate solution to gaining new income for you and ourselves by attracting advertisers who cannot afford program advertising," the telegram said. "The value of this advertising (Continued on Telecasting 13)"

Scores Sat. Night Plan

the time in favor of an every-other-week program.

Furthermore, NBC network executives said, when a sponsored program is on only every other week, the network is faced with providing a suitable sustainer in the alternate weeks, good enough to satisfy the stations and the advertiser, both wanting the audience and the highest rating.

Thus, the network was faced with a heavier, not a lighter burden on the network's production facilities and personnel, they pointed out.

Perhaps in the future when TV
ARTHUR GODFREY’S Lipton Tea commercial topped all others, with a 23 point spread over viewers and non-viewers of the commercial, according to an analysis of the Starch TV reports released last week.

Other leaders, according to the analysis by Daniel Starch & Staff, New York, include Molly Goldberg’s Sanka commercial with 16 points, Ivory Soap and International Silver with 15 points.

The point spread is the number of percentage points difference between viewers and non-viewers of a commercial who originally selected the brand advertised when offered a choice from among several products.

On the “liking” score, Mr. Godfrey’s Lipton commercial moved into first place ahead of Texaco Star Theatre’s Sid Stone Hawker commercial. The latter, the report revealed, while very high, has been dropped steadily in listener popularity each month.

In a report by the television section of Advertest Research, Bulova was revealed to have achieved the highest impact rating of any TV spot in the New York area for November. The Bulova rating was 182.5.

Following it were Lucky Strike, 375.50; Hi-V, 307; Chevrolet, 302.75, and Philip Morris, 294.25, according to Advertest.

Ratings are based on a perfect score of 2,250 points as maximum impact for the week and are a weighted compilation of the number of persons who view and can describe a spot. The sample included 1,200 persons interviewed during the week of Nov. 5-11.

In the Los Angeles area Tele-Que has released another type survey in TV commercials. The research firm reported that during December the five top commercials “liked in order of their preference were Los Angeles Cabin Boys, Texaco, Lucky Strike, Old Gold and Sun-sweet Prunes.”

** Video News Programs Covered in Survey **

NEWS PROGRAMS are viewed regularly by 73.5% of TV set owners, with three of the top four news shows cited aired between 7 and 8 p.m., according to Advertest Reports.

When respondents to the Advertest survey were asked whether they would rather watch a news-caster read the news from a newscast or hear the program on the radio, almost six times as many people said they would rather watch the television newscaster. Although a preference was shown for the greater number of stories carried on radio newscasts, respondents said they preferred the types of stories covered on television.

Radio news programs still are listened to regularly in 63.6% of the television homes in the New York area, however, Advertest found. Of the top 10 radio news programs listened to, only one is presented after 7 p.m. and this one is at 11 p.m., according to the survey. Over 17% listen to this late program after turning off the television.

Daily newspapers were named by over 50% of those interviewed as their principal source of news, Advertest reports. Television was named second and radio third.

For those who feel television is having a detrimental effect on education, Advertest points out that children take a major interest in video news, and it leaves the report states that in almost 20% of the TV homes contacted, children, under 14, were regular viewers of news telecasts.

The report covered 525 homes in the New York television reception area and was made in December.

** Set Failure Causes Studied by Lance **

NINETY-FIVE percent of the television sets that fail do so within the first three months of installation, according to Lance Televised Laboratories, Bronx, N. Y. Lance has released preliminary studies of a survey it is making on service calls, their causes and cures.

The service outfit handles some 1,200 calls weekly. Of its first 50 cases, however, Dec. 31, 1948, 12 sets had been installed in December; 10 in November; nine in October; one in September; two in August; three in July; and four sets in June had been installed in late 1948.

Eight of the complaints on poor reception were due to ignorance of operation by new owners, and four of the 50 were due to small tubes. Replacement of a picture tube is necessary in only 20 out of every 1,000 complaints, the firm disclosed, and cause of most troubles is dampsness caused by moisture penetrating circuit insulation, necessitating replacement of the circuit. On one call, fingerprints were the cause of blurriness reception.

Next most numerous troubles are in channel selectors, the survey revealed, or among small rectifying or oscillator tubes. Loss of value in such tubes throws reception off completely, although faulty tubes may be transferred from a video set to a radio set and perform quite well “perhaps for years,” the company said.

Most calls are received just prior to a major sports event. Overheating and a sizzling sound, Lance pointed out, are trouble signals.

Survey completion is expected in March. Special reports of the survey, and reports at quarterly intervals thereafter containing brand-name information, will be available to TV set manufacturers in regard to their own products only.

** KNBH (TV) Rates To Increase **

WITH SOME 302,635 TV set owners in the Los Angeles area, KNBH (TV), Hollywood hourly rates for Class A time will be increased from $500 to $700, effective Feb. 1. Station breaks and announcements in that same area will be increased to $125 from $100.

Increases were announced by Harold J. Bock, television manager of NBC Western Network, who said the rate increase for Class B stations will be adjusted accordingly.

He advised that orders accepted (Continued on Telecasting 10)

SPONSORS of the three principal systems competing in FCC’s color television hearings accelerated their test operations last week, while the proponent of a fourth system sought admittance to the proceedings.

RCA, developer of one of the rival systems, disclosed simultaneously that its work on single-tube color has reached a point where it may be demonstrated to FCC within 90 days.

“We are encouraged by our progress and we believe that the demonstration will provide helpful information to the Commission,” E. W. Engstrom, vice president in charge of research and development, said in a progress report to the FCC.

He said the demonstration “will indicate the status of the advances we have made on the single-tube work” since RCA’s color system, employing three tubes, was demonstrated last October [TELECASTING, Oct. 17, 1949].

In the meantime, CBS commenced “public” demonstrations of its own color system, which are slated to extend throughout this month in Washington and New York and subsequently in Philadelphia. RCA began transmissions in Washington last Tuesday for observations on automatic color phasing; established a receiver laboratory for test and development work in Silver Spring, Md., just outside of Washington, and planned regular color transmissions for a month starting Jan. 16. Color Television in the receiver was made by the third color system, said it was starting regular transmissions last week in San Francisco, its “home.”

Bid for recognition of a fourth color method came from Theodore A. Wetzel, of Milwaukee, who said his system was completely compatible with existing black-and-white standards and that setting aside experiments on color could be converted at “very low cost.”

Mr. Wetzel said that, in his color system, “standard tubes used for black-and-white television systems are employed”; “use of mirrors or reflecting surfaces need not be employed”; “no motion of the color filters is required, yet complete color coverage is achieved”; “only slight modification of existing camera equipment is required, and that at very low cost”; “no change whatsoever is required of the television transmitter station equipment.”

System Possibilities

He told FCC that “the invention may be applied to effect a field color sequence television, line color sequence television, or dot color sequence television, depending on initial choice.” Further, he said, “receivers may be constructed to selectively receive from any one of different transmitters, each employing different styles of color sequence television transmission.”

CBS, opening a month of intensive testing in Washington and New York, planned to demonstrate “every phase of television programming.” In Washington, CBS color sets were installed in the homes of six of the seven FCC Commissioners, Comr. Frieda B. Henneck declining the offer. By this week the network hoped to have the sets set up in one or more public places in Washington, to get public reaction. In all, CBS told the Commission, the network would have some 35 receivers set up in a test circuit.

Among last week’s CBS color shows was a pickup of Golden Gloves Boxing matches at Turner’s Arena in Washington last Thursday night.

Meanwhile, CBS is using the WOIC-TV transmitter and the studio facilities of WTOF. In New York, the colorcasters are on WCBN-TV and WOR-TV, while in Philadelphia the facilities of WYSP are used.

RCA’s test plans were outlined in a voluminous report which included a series of technical studies and papers and co- and adjacent-channel interference of monochrome and color signals in UHF television, and color operations.

Mr. Engstrom reported on work at RCA’s experimental UHF television station at Bridgeport, Conn. (see stories TELECASTING 12).

From Sept. 18 until Dec. 30, 1949, Dr. Engstrom reported, the RCA color system had a total of 409 hours of test operation on the air in Washington—305 hours on RCA-NBC’s WJZ (TV), and 104 hours on the experimental KG2XCL, operating on 523-529 mc.

RCA is constructing a group of 20 direct-view 10-inch color receivers, the first to be ready during February, 16 for delivery to FCC’s Laurel laboratories. A second is to be available the following week for delivery to the Condon Committee, which is investigating color technology problems. The Senate Interstate and Foreign Commerce Committee. Beginning the week of Jan. 30, Dr. Engstrom said additional sets should become available at the rate of two a week. Others will be built later.

Color Television Inc.’s report, submitted by President Arthur S. Matthews, said regular transmissions employing tri-color television would be started during last week and continue until “such time as it becomes necessary” to move the equipment to Washington, where an official demonstration is slated Feb. 20.

He said CTI now has a 20-man staff, in addition to consultants, and that its transmitter equipment was “substantially complete” and several color receivers were “in the process of completion.”

He pointed out that CTI is experiencing difficulty in getting sufficient tri-color tubes. DuMont Labs, he said, has furnished a few, but not enough; he reported, but difficulties are encountered due to large spot size, which affects definition and resolution.

New Rate Protection Policy for WICU (TV)

A new policy of rate protection for advertisers has been announced by WICU, Erie, Pa. Effective Jan. 1, the station now is giving six months’ protection from the date an increase goes into effect. According to Roger S. Underhill, station manager, the station formerly gave protection for six months from the date of the first telecast.

Mr. Hagedorn was the agency or any other agency for that matter deserves a credit when it has taken an active hand in production and overall activity on the show.

Cities Christmas Show

As for the recent Christmas show for Abraham & Straus, he said that the agency conceived the show for the department store at a cost of $20,000. He explained that the agency’s recommended policy for the department store was to use television for holiday shows instead of parades. For example, he pointed out that the annual Macy parade on Thanksgiving Day cost approximately $150,000 with a potential audience of two and a half million while a two-hour long television show done with real warmth costing one tenth of that amount within a two or three year period would also attract a potential audience of two and a half million.

“We plan to produce the two-hour long television show for Abraham & Straus as a traditional event every year,” Mr. Hagedorn said. “We also plan to ask for agency credit,” he concluded.

Hagedorn Claims Agency Right in Xmas Show

SCREEN credit on television shows should be given to the agency when it deserves it, Horace Hagedorn, vice president of Kieswetter, Wetterau & Baker Inc., New York, told BROADCASTING last week.

He revealed that the agency at the suggestion of its client, Abraham & Straus, had approached a department store, asked for credit on its two-hour long Christmas show but was turned down by WNET (TV) in New York, carrying the program. However, Mr. Hagedorn stated that the agency plans to ask for screen credit next year on the same program and on any other TV shows for other clients during the year, “whenever it deserves it.”

A WNBT spokesman told BROADCASTING that one of the reasons for rejecting the idea of a screen credit for the agency was that the show was produced by WNBT.

Mr. Hagedorn emphasized that

Mr. Hagedorn was the agency or any other agency for that matter deserves a credit when it has taken an active hand in production and overall activity on the show.
HARRY WAYNE McMahan

It takes a lot of courage and fortitude to succeed in the fast-moving television industry and these traits are the heritage of Harry Wayne McMahan. As a country doctor, his father had the courage to accept the post of local medic in a Texas border town where his predecessor had been killed.

Today, the hardy McMahan offspring heads Five Star Productions in Hollywood, producer of theatrical and television films.

The firm's clients include Columbia, Dr. Pepper, Ford, Halliburton, Luggage, Log Cabin Bread, Fay Co., Powerhouse Candy, Philip Dealers, Sunkist, Whitman's Chocolates (candy), among others. All told, it is estimated that Five Star currently possesses about 40% of the local film spot clients paying time on Los Angeles stations.

Reporter, editor, agency man, radio producer-writer, publicist and film writer-producer, Harry as led a full life since April 25, 1909, when he was born in Earl Park, Ind. At the age of four he moved to Chicago with his family and a year later the McMahans settled for South Texas, where the then 5-year-old McMahan hunted up big game in Mineral, Tex. In 1924 he moved again - this time to Beeville, also in the big state.

Formal schooling and work were stymied through most of Harry's career with the result that at 16 he already had progressed from the backshop through reporting to city editor of the Beeville News. At 17 he left newspaper work to head publicity and advertising for a nine-theatre circuit. By 29 he was called to Dallas to serve as publicity-advertising manager of one of the Pabst Circuit theatres there.

Forsaking publicity and advertising in 1930, Harry next undertook a split shift between the Dallas News and Journal and more formal study at Southern Methodist U. On the papers he served variously as amusement editor of the now defunct Journal, assistant amusement editor of the News, Journal sports desk, features and news.

At school, Harry not only responded to his teachers but one of them, Edwin Clark, responded to him. They were married June 24, 1933.

Meanwhile, Harry forsook "Big D" (known to non-Texans as Dallas) in 1931 to resume advertising and publicity for the Texas Theatre in San Antonio. Returning to "Big D" in the spring of 1933, he became radio director of Roy Cowan Inc., a local agency. In 1934 he joined Tracy-Locke-Dawson, Dallas, as radio director. While with the agency, he evolved a radio format for Dr. Pepper known as the Pepper Uppers and the half-hour variety show had a special Dixie network extending through 24 states.

In 1935 Harry took to freelance writing and began to sell some material to the movies. A year later he moved to Hollywood and started producing theatre film spots beginning with Dr. Pepper as a client. His first film was known as U. S. Motion Pictures which evolved into Five Star Productions in 1946. All told Harry has turned out more than 1,250 theatre and television film spots.

Essentially a writer, Harry has nevertheless learned production, editing, cutting and the other facets of film production during his 10 years in the field. He has built seven TV film shows on an experimental basis but does not feel the economic time for production has yet arrived. Meanwhile, the production of film spots keeps his firm rolling.

DuMont Meet

The first convention of DuMont television receiver distributors will meet this Wednesday (Jan. 11) at Chicago's Drake Hotel. Ernest A. Marx, general manager, Receiver Sales Division, Allen B. DuMont Labs, Inc., DuMont's national sales manager, Walter L. Stickel, and Advertising Manager Henry R. Geyelin will discuss with the group, in a one-day, two-session program, DuMont's 1950 sales service, promotion, advertising and merchandising policies. The program was worked out by Joseph H. Moss, Midwestern regional sales manager.

Five Star Business

PROSPECTS for '50 augured well for Five Star Productions, Hollywood TV firm, according to its president, Harry W. MacMahan, who announced that the closing two weeks of '49 resulted in the signing of almost $50,000 in new business. During this same two week period, almost 90 spots were made for regional and local Los Angeles clients were shown one or more times over Los Angeles TV stations. This, he noted, represented 45% of the total film spots of local and regional advertisers, shown by the seven L. A. stations.

BARS BASKETBALL TV

U. of Wash. Vetoes Telecasts

ALTHOUGH the opening basketball games of the U. of Washington were telecast on KING-TV Seattle, the university has decided against permitting Conference games to go on video this season, it was announced Tuesday (Jan. 3) by Harvey Cassill, U. of W. director of athletics.

Burt Rose, manager of the University's athletic news service, claimed that the decision had been reached because "television has an adverse effect on the crowd at the games."
November 1950

**UHF VIDEO**

NBC LAST WEDNESDAY began experimental operation of its new ultra-high frequency television station near Bridgeport, Conn., designed to test the effectiveness of UHF video operation and the practicability of “satellite” TV station service.

With the experimental call, KC2XAK, the station will retransmit, in the 539-555 MCW band, programs of WNBT (TV) New York, key NBC TV station, far greater range and by regular sets equipped with converters, located in the area within 35 miles of the station.

KC2XAK is housed in a Cape Cod trailer at Stratford, Conn., on Success Hill, one of the five hills overlooking Bridgeport. Station was licensed by the FCC May 4, 1949. The building was completed Nov. 15. The tower, a 460-foot mast, nerved, self-supporting structure 210 feet high, was built the next week and the antenna, projecting 40 feet above the tower, was installed Jan. 1. As a gain of 20 to 1, the transmitting antenna is expected to increase the transmitter’s 1 kw output to 15 to 20 kw of effective radiated power.

The experimental transmission equipment was built by the Engineering Products Dept. of RCA-Victor Div. of RCA, under the direction of V. E. Trounser. After a testing period until Jan. 15, while TV engineers are adjusting the transmitter and antenna, NBC will install the special UHF receiving set by the Home Instrument Dept. of RCA-Victor under the direction of D. D. Cole.

In announcing the project, Joseph H. McConnell, NBC president, said it is being conducted under the supervision of O. B. Hanson, NBC vice president and chief engineer, with Raymond F. Guy, NBC radio and allocations engineer, in charge of the detailed work.

The tests will continue for between six and twelve months, including observations at homes throughout the Bridgeport area at distances and under conditions which will determine the extent of such a station’s service. Various measures of receiving antennas will be tested, along with path problems investigated, field intensity measurements made and tropospheric transmission observed, using mobile as well as the fixed receivers.

Terminating the proposed experiment a major step toward the solution of the broadcasting and receiving problems of UHF retransmitting, Mr. McConnell said: “We are confident that the operation of this UHF station will demonstrate the feasibility of broadcasting in the upper reaches of the spectrum. The experiments are being conducted by NBC to unravel the complex problems confronting the industry in the present space log-jam for television channels. If the experiment is successful it will show the way to opening up vast new areas for hundreds of additional television outlets in this country.”

**Open Ike**

Johns Hopkins’ Policy

**EDITOR, TELECASTING:** I have just read with interest your editorial “The Gate or Gate Receipts,” in which you stated that many colleges regard television as a threat.

We at Johns Hopkins are among those who regard TV as a tremendous potential for the advancement of general education in the United States—both scholastically and “athletically.” Johns Hopkins has a unique athletic policy—no gate receipts, no student athletes. Our athletics are supported totally by the annual budget of the university. When we play games at other colleges we take no part of their gate receipts. When they play on our campus there are no receipts because anyone who wishes can attend, free of charge, any game of the 12 intercollegiate sports sponsored by Johns Hopkins.

Both radio and television stations broadcast our home games. We lost our last home-game but it was broadcast on two radio stations and WMAR-TV. Radio and television stations were set up in our stadium, with the help of our grounds men, at no cost to them—nor do they pay us anything for the privilege.

We feel that this helps in spreading interest in sports safely.

Furthermore, we consider television as an added medium through which we can carry on our general education program—a duty which we accept as an endowed institution owe to the public.

Also, last year, we offered a national contest for the selection of an original television play—in the hope of stimulating young writers to think and write for this new medium in a creative manner.

After entries from all over the country were carefully considered, the prize was awarded to Guy de Vry for his play “The Man Who Ordered Apple Pie.” Negotiations at this point indicate that the play will be given network production this winter.

This is our attitude toward television—we welcome it as an important adjunct to our amateur athletic program and I don’t use the term generically.

I read TELECASTING each week and find it stimulating and worthwhile. My compliments to you on your excellent work.

Lynn Poole

Director of Public Relations

Johns Hopkins U.

Baltimore

**DR. DuMONT**

DuMONT’S forward march can be expected to maintain its momentum through 1950 in both the telecasting and manufacturing fields. Dr. Allen B. DuMont, president of Allen B. DuMont Labs, said Wednesday.

In a year end statement, Dr. DuMont paid particular attention to the marked increases in the dollar volume of sales in the DuMont organization and predicted these gains would continue. “The final figures are still to be tallied,” he said, “but we anticipate that sales will reach the 45 million mark, almost double the 1948 figure. During 1950 we expect to reach the 70 million mark for the entire company,” he said.

Looking back to the “extensive” progress made by DuMont Television Network in 1949, Dr. DuMont cited the affiliation of 51 stations in the network at the year’s end. These stations, he said, carry programs “live” or by the firm’s Teletranscription service.

“Television’s march of progress during 1949 leaves no doubt that the medium has taken its place among the leading industries in the country. Figures prove it to be one of the fastest growing, he concluded.

The new year, Dr. DuMont foretold, will see a decided increase in industrial applications of television. “It will also mark a trend to two television homes, with extra sets being used in children’s, maid’s rooms and rumpus rooms. The year should also see a vast improvement in programming, as budgets increase in line with the added circulation. The trend to large direct view screens should also continue,” he added.

Dr. DuMont voiced the same opinion given recently by Commmr. Mortimer W. Loewi, director of the

GOOD OR BAD?

Cousins, Capp Debate TV

AL CAPP, comic-strip artist creator of “Habner” and in the past, outspoken critic of radio, took up the defense of television last Tuesday night on the ABC Town Hall Meeting of the Air program.

Mr. Capp, in a discussion on “Television 1950—is it Good? or Bad!” took to task Norman Cousins, editor of The Saturday Review of Literature, for his “vague generalities, his overall damping of the medium.”

Mr. Cousins, who referred to television as the potential victim of “a case of impending murder,” derided video’s practice of “talking down” to its viewers.

“You know the theory,” Mr. Cousins said. “It’s the idea that the average American has the mentality of a 12-year-old child, and you’ve got to spoon-feed him with what makes no demands on his supposedly limited intellectual equipment.”

Decrees Theory

Labelling the theory as “idiot’s fable” and a “million-dollar blunder,” he charged that it had always come close to putting the skids under Hollywood, had devitalized and disfigured much of radio, and wrecked some of the largest pulp magazines in America.

He warned that television was repeating the blunder and that he feared the same results.

Mr. Cousins charged video with compounding a mobilized attack on intelligence and a massed invasion against good taste. “There are millions of dollars, fomenting, defacing television mechanically,” he declaimed, “but only pennies, comparatively, for programs. Expensive research and equipment onogl color on material possible within a year or two, but a Grade C program in technicolor is still a Grade C program,” he went on. “What television needs right now is better programming, more respect for the intelligence of the average American, more imagination, more originality, more of the pioneering spirit that was behind much of TV coming years ago,” Mr. Cousins emphasized.

Pointing out that TV doesn’t lack for people qualified to make television an “art of its own and not the visual extension of radio,” he warned that TV was peculiarly suited to the presentation of all material available to the Commission in connection with the current television proceedings.

The Commission’s position is dictated by its desire to avoid any implication that a national television systems committee, such as you propose, is to be regarded as an advisory committee named by the Commission.

In the event that such a committee should be formed, and it is prepared to present testimony at the forthcoming television hearing on behalf of the interests it represents, the Commission will welcome its participation in that hearing.

Under RMA’s proposal, the committee would not be limited to RMA members, but would include representatives of the Institute of Radio Engineers, networks, engineering schools, and others. The committee not only would work on color standards but also would collect and present data with respect to UHF allocations and the lifting of the VHF freeze.

Proposal that such a group be formed was advanced by RMA witnesses early in FCC’s color proceedings last fall. The hearing currently is in recess but resumes Feb. 20.

DuMont Raps

(Continued from Telecasting?)

DuMont Network Director Mortimer W. Loewi replied that, with an unlimited number of cable facilities “inadequate,” the NBC offer to pay full half-hour rate for five straight half-hours, “regardless of whether or not any segment has been sold, constitutes in our opinion, an attempt to monopolize the existing facilities for television broadcasting and is a manifest attempt to freeze out any competitor having legitimate business.”

DuMont Policy

He said it has not been and is not now DuMont’s policy to “permit any competitor to take unfair and unlawful advantage of its financial position. It is our intention to take full advantage of all facilities at our command, governmental and otherwise, to see to it that this attempt on the part of the NBC to secure a monopolistic position in the television broadcasting field on Saturday nights is thwarted before it starts.”

DuMont’s complaint was filed by W. A. Roberts of the Washington law firm of Roberts & McInnis.
an SRO throng. Entries totaled 6,544. Another one-time offer brought 8,417 requests for a trio of pamphlets given by the National Live-
stock and Meat Board in a 15-minute meat eating and cutting demonstration in a 90-minute tele-
cast of the International Livestock Show Nov. 29. Booklets on meat car-
tavies, pork and veal recipes were given to anyone writing in. The demonstration, which had no advance promotion, was planned by Paul Visser of NBC Chicago's agricultural staff. Allis-Chalmers Manufacturing Co. was the spon-
sor.

Clinton Youle, The Weatherman, gives daily repos on current and projected weather conditions in an informal manner. Although he'd had no previous air work, he was drafted from Bill Ray's news staff when he was found he had meteorol-
ogy training in service. His weekly feature, weather briefs, a professional gives down-to-kitchen commercials for Ceresota Flour, the sponsor, Standard Milling, from Oct. 17 through Nov. 30. Starfish scatter pin viewers sending in 50 cents and a proof-of-
purchase label. Twelve days after the offer, 2,181 persons had mailed their money to a specific post office box number. * * *

SIMILAR response was recorded after another one-timer on the first sponsored telecast of WLS Wash. Wash. Oct. 21. Edward Hines Lumber Co. offered free to anyone writing in a set of simple plans on a bird feeder, an item with a very limited appeal. In five days the station received 651 mail orders. The cost per inquiry was 84 cents. Promotion Director Smith said.

Because of advance planning and teamwork, WNBQ shows are put on the air more effortlessly than would be normally expected. The Garway show, for example, con-
sidered by the trade a complicated production, is the result of one three-hour gay on this set. Pro-
duced by Mr. Mills and written by Charles Andrews of Needham, Louis & Broby, Chicago, the show was custom-made for Dave Garway-
no, radio and network star now, he returned to his staff announcing job at the division after the war and couldn't get a sponsor: "He couldn't be sole seller, the show doesn't have a phony sell. It's as simple as that," says Mr. Mills.

A batch of new video stars have come into their own as a result of their first TV efforts on the show. Among them are Singers Jack Haskell, Connie Russell and Bette Chapell, Comedian Clif Nor-
ton and Dancers Margaret Gibson and Charla Tate. Meticulous production plans re-
quire that everyone be a quarter-
back—from producers to cam-era-
men and electricians. With this stress on behind-the-camera tech-
niques and personnel, camera operators are called in on confer-
ces with set designers, chore-
ographers and directors. Each director is hired specifically for the category in which he had the most experience—music, drama, special events, variety. A specialist-
director can therefore cue dancers from a ballet.

Ted Mills, working directly un-
der Jules Herbeuvaux and yet on his own, coordinates operations, production and facilities. George Heinemann, operations manager, is responsible for film produc-
tion breaks and everything that gets a show on or off the air. Nor-
man Felton heads production, han-
dling all shows. He works with Producers Don Meier, Bill Tobin and Reinald Werrenrath Jr., who also heads the field crew. Tom Horan, facilities manager, is in charge of art design, construction, stage hands, programming and staff.

Complete authority for hiring rests on the program manager. Of about 100 applicants per week, 20 are selected to come in for per-
sonal interviews. The interviews 

WNBQ expects to build additional national networks in the near future, but will also concentrate heavily on local programs. "We have many plans for daytime television, none of which has been set definitely. We do feel, though, that daytime TV must be just as interesting and absorbing as radio's daytime serials. Any new programming that is put on the air will be very much a step forward rather than late at night. Some of this will be along the public service line, in which we plan to remain strong." One idea for the daytime programming is a shopping show for women which would eminate from a Loop depart-
ment store.

"Programming, as always, is the thing in television," Mr. Show-
erman said. "You may realize that the main rule is simple: Give TV pro-
gram men their heads and let them know their budget limitations."}

MR. SHOWERMAN looks for a rate increase soon, because Chicagans have kept subscription from 52,000 sets a year ago to an estimated 25,000 sets as of Jan. 1. An NBC study shows this to be the greatest increase—52%—in any other network's coverage area. Chicago rates at an O & O station. New York coverage went up 190% in a year, Hollywood, 238%. Rates will not be increased proportionately, but a fair increase from the station view-
point is 50%.

The Jan. 8, 1949, Rate Card No. 1 calls for $500 per hour for Class 3 RCA field camera chains, lighting equipment and microwave relay gear. Field crew includes seven engineers in addition to the supervisor. The picture from Mart studio is transmitted over wide-
band 7 mg coax circuits to the 42d floor of the Civic Opera Bldg, and sent out with a radiated power of 22.8 kw on Channel 7.

The Mart TV plant consists of five studio systems in all—a live show, a film studio and a three-
motion, recently cited a widespread audience response to Clifton Utley, who for four days asked viewers to give their opinions on whether they wanted more or less in straight news, analysis, photographs, maps and chart interviews. “No prizes, premiums or praises” were to be given away, yet replies totaled 669—420 from Chicago. Public Broadcasting has an economic breakdown of letters, based on 1946 rentals for each district, to determine Mr. Utley’s appeal to all levels. They found:

Mr. Smith sends bi-monthly reports to all TV clients and their agencies with detailed information on promotional and advertising mentions, publicity releases, newspaper and magazine clippings and picture reprints. He also has simplified the matter of agency program presentations by submitting a folder outlining briefly the availability, talent biography, production format, adjacencies, competition, audience response, current and past sponsors, success stories and sponsor testimonials, cost, type of commercials accepted and type of audience to whom the show appeals.

His department, and all others, attempt to work together as a single team to justify and extend the primary theme of the operation—delegation of authority along with responsibility all down the line.

Film Report

Holcombe Parkes, vice president in charge of public relations of National Assn. of Manufacturers, New York, will resign from that position and take over as executive vice president of Apex Film Corp., Los Angeles. Mr. Parkes will have offices in both Los Angeles and New York. He will be primarily responsible for promotion and production of industrial and public relations films for Apex.

Paul Alley, formerly film editor for NBC-TV news film operations, has been named editorial director of Paramount newsreel and MGM “News of the Day.” During last year he edited “The United Newsreel,” film version of “Voice of America.”

Capitol Records, Hollywood, preparing series of 13 15-minute TV films based on firm’s Bozo the clown character. According to firm, series will cost approximately $100,000 and will be ready for release in two months through its distribution outlets. Elmo Williams, head of TV division for Capitol, is producing series.

Embro-Madison TV Productions, Hollywood, has secured exclusive rights to approximately 200 British Government films. Deal was signed last week in Hollywood by Sir Thomas Hodges, head of British Film Service; Noel Madison of Herold Productions and William (Scotty) Brown, film director, who formed TV firm. TV stations are being contacted throughout country for leasing films which include features and short subjects. Tom Corradine heads firm which is located at 1535 Crossroads of the World.

CBC Meet Feb. 9-10

FEBRUARY meeting of the board of governors of Canadian Broad- casting Corp. is to be held at Ottawa Feb. 9-10, and it is expected that TV station applications for Toronto and Montreal stations, will be discussed. CBC recently was granted a $4,500,000 loan by the government for TV stations and studios at Toronto and Montreal. Four applications are in for two other Toronto TV channels, by CFBR and CKEY Toronto; Famous Players Corp., Toronto; and Al Leary, Toronto. Two applications are on file for three TV channels at Montreal, by CPCC and CKAC Montreal.

Funeral Telecast

THE funeral of a prominent person was telecast directly last Wednesday when KSDK-TV St. Louis aired the services for Louis Wolfe, former St. Louis comptroller and nationally known municipal fiscal expert. Arranged by George M. Rinehart, general manager, the telecast was timely as a heavy ice storm which paralyzed transportation struck St. Louis and prevented hundreds of persons from attending the services. According to KSDK-TV officials, the direct telecast of the funeral was the first in TV history.

Now! Magnetic Sprayers

No! 1/4” tape in sync for Television and Motion Pictures

MOVIES & TV

Engineers Join in SMPTE

SOCIETY of Motion Picture Engineers has changed its name to Society of Motion Picture and Television Engineers, President Earl I. Sponable announced last week. The change was effective Jan 1.

In an overwhelming majority of balloting members, the change was effected because of the increasing mutual interests of technical people in both motion pictures and television, as well as the Society’s active participation in the development of new video techniques. In addition, SMPTE has filed an FCC brief proposing specifications for a nationwide television system.

Speaking of the decision, Mr. Sponable said: “I cordially extend an invitation to all television engineers to join with us so that we may share with them, and together continue to expand, the technical knowledge we have gained concerning motion pictures over a period of 33 years. I am confident that the art of motion pictures and the art of television can reap benefits from one another and jointly contribute to the perpetuation and improvement of existing standards in the pictorial rendition of action.”

Video Medical Aid

ANOTHER video development as an aid for training in the medical profession has been announced by Remington Rand Inc., manufacturer of Vericon, system of closed circuit TV. Visual images of various internal organs of the human body now can be telecast for group study without resort to surgery as a result of a new technique worked out by William L. Norvel, manager of the television department. A special optical link is interposed between eyepiece of a standard gastroscopic and the pick-up tube of the camera. Telecast demonstrated Dec. 6 during the third annual clinical session of the AMA in Washington, D. C., permits large groups simultaneously to study conditions inside the body.

OME new faces have been introduced in WRC Washington's Saturday afternoon lineup. Covering four-hour period, performers in this category include Connie B. Gay with new hillbilly record program, The Connie B. Gay show; Stewart Finley, emcee of TV-AmeriTel's program, featuring transcribed music, comments by Mr. Finley on Washington lore and news sports; also, Teen's Y, half hour program on teen age problems planned and presented by student members of Washington T-Teen Clubs at nine local high schools with cooperation of WCA.

Documentary By WCSI

PROGRAM, Then and Now, documentary broadcast, aired Jan. 1 by WCSI Columbus, Ind. One and one-half hour program featured excerpt from The Great Depression, covering historical developments between 1929 and 1946. Program also featured excerpts from the classic documentary by member of British Intelligencer Service. Station sent promotion materials in program to all schools in Southern Indiana. Show was sponsored by Arvin Radio Co.

"Forgotten Man" Remembered

COMMUNITY druggist, sometimes called medicine's forgotten man, had his inning Dec. 17, from 8:30-9 p.m. when WINAC-TV Boston presented special program in his honor. Show was in form of special druggists' roundtable built around eduction of the Druggist to the Community, and featured as speakers distinguished representatives of drug and radio fields including Linus Travers, executive vice president and general manager of Yankee Network, who originally conceived idea. Added highlight was showing of drug store's prescription book, pharmacist's scale, graduates, mortars, pestles and other appurtenances of druggist's vocation.

Mr. Prime Minister

OPEN LETTERS to the Canadian Prime Minister being aired weekly on CBL, Toronto and Trans-Canada network. Program, entitled Mr. Prime Minister, was suggested by Canadian Premier Louis St. Laurent when he asked women voters interested in welfare of the country to send him letters. Show's quarter-hour afternoon feature, with prominent Canadian women making recommendations on various subjects. Several weeks were devoted to old age pensions, immigration, education, employment, health, finance, consumer and minority topics.

The News of 1949

STORIES that made headlines during past year filmed by Telenews, made up A Year's Review of the News of 1949 over WMAL-TV Washington last week. One-hour show were selected, edited and narrated by Bryson Rash, special features director of WMAL and WMAL-TW. Important news stories seen on special programs included crash of the DC-4 at National Airport that killed 55 people and complete sports review including World Series.

Legislative Coverage

OLDEST legislative body in the nation—General Assembly of Commonwealth of Virginia—will get thorough coverage by WMBG Richmond and its FM affiliate WCOO from Jan. 18 when new governor, John S. Battle, takes office. Stations have arranged to present daily 15-minute programs direct from House of Delegates in State Capitol. Day's business will be reviewed and guest interviews will be conducted with legislators from all sections of state. This marks third session stations have covered.

WNBW's Junior Review

WNBW (TV) Washington starts New Year with new hour-long variety show, Your Junior Review, sponsored by Home Appliance Co. Featuring talented Washington choral group conducted by Miss Devey each week with younger from one Washington high school being guest. Program is handled by sponsor by Robert J. Andrews.

WORLD LIBRARY

9 New Clients, 13 Renewals

WORLD Broadcasting System, New York, has announced renewals and extensions of contracts by 13 stations for continued use of the firm's transcribed library service, and addition of nine stations to its subscribers.

Stations adding service are: WPAC Pima, Ohio; WROW Albany, N.Y.; WMFN Milton, Mich.; KTTV Springfield, Mo.; KOH Reno, Nev.; WNDB Daytona Beach, Fla.; WREC Memphis; KGHL Portland, Ore.; KLFP Minden, N.D.

Stations renewing are: WBZ Boston; WJZ Baltimore; KDKA Pittsburgh; KVOO Tulsa; KSLQ Pueblo, La.; KBIZ Ottumwa, Ia.; KFRE Tulsa; KXAN Austin; WKIP Peoria, Ill.; KXAR Benton, Ind.; KVOO Geden, Utah; WKAL Demopolis, Ala.; KVAN Vancouver, Wash.; KTOA Stilwell Springs, Ark., and WJLB Detroit.

Associated Adds 18

ASSOCIATED Program Service has announced 18 additional radio and television stations have contracted for its transcribed library and program service. The new outlets taking the service are: CKCL Turon, S.; WMUU Greenville, S. C.; WPTW Pocatello, Idaho; WFBF East St. Louis; WJZ Baltimore; KDKA Pittsburgh; WJZ Baltimore; WCHS Chambersburg, Pa.; KXOC Chico, Calif.; WRGB (TV) Schenectady, N. Y.; WXEL (TV) Cleveland, Ohio.

WOL-FM Sells FM

EVERY radio dealer in Ames, Iowa (population 30,000), sold out of FM radio in a short time when WOL-FM, Iowa State College station, announced that for the first time all college basketball games would be broadcast by the new FM outlet, this year. In addition, WOL-FM is carrying high school games, cooperating with KASI Ames, daylight AM outlet.

DISC JOCKEY Ken Ash of WHAV Haverhill, Mass., finds he must keep both ears to the grindstone to make a success of his job as conductor of the station's Saturday night All Request Dancing Party. As proof of his success, the local phone company complained that WHAV was tying up phone lines every Saturday night, and an automatic counter was put on the station's two trunk lines to check on uncompleted calls. During one two-and-a-half-hour show, Mr. Ash managed, along with other duties, to answer 117 calls, but the automatic check showed that 1,765 uncompleted calls came to the station during the show. WHAV salesmen now refer prospective clients to phone company records for proof of the station's audience.

All of U. of Pittsburgh's home basketball games will be aired by WCAE Pittsburgh this season.

AFRA vs. WSTV
Murdoch Files Dissent

A DISSenting opinion, contending that Valley Broadcasting Co. (WSTV Steubenville, Ohio) did not refuse to bargain with the Pittsburgh local of AFRA has been issued by Abe Murdoch, member of National Labor Relations Board.

The board had upheld a recommendation of a trial examiner that WSTV "cease and desist" certain alleged unfair labor practices in bargaining relations with the AFRA local [BROADCASTING, Jan. 2]. Mr. Murdoch said he disagreed with that part of the majority's finding because the licensee was never presented with a "clear and unequivocal" bargaining demand and therefore was under no obligation to recognize and deal with the union.

WKMH RINGS BELL
One Spot Ties Up Phone Lines

ACTION speaks louder than words in Detroit. WKMH Disc Jockey Bob "(Robin)" Seymour announced on a 5:16 p.m. broadcast that the first 50 people who called a certain number would receive five gallons of gasoline absolutely free, with no strings attached. No sooner did he speak the words than the Michigan Bell Telephone System added grey hairs. Four Detroit exchanges were drowned, blocking incoming and outgoing calls and tying up every inter-exchange trunking system in the city. The condition spurred Mr. Seymour to appear for listeners to stop calling. Next day, Michigan Bell requested it not happen again. Detroit's telephone nightmare happened when a WKMH salesman asked the station for help in convincing a prospective advertiser, who was buying time on a competing station, that WKMH could produce results. Prospect agreed to the trial-one-announcement over WKMH. Seymour's program incidentally, the prospect, WKMH says, bought a quarter-hour across the board on the Bobbin' with Robin program.

Carolinas
Fulltime network facility. Well established, profitable and in an important growing market.

Promotion

ORANGE and grey folder sent to dealers by KSTP St. Paul explains hard-hitting promotion given by station to one of its sponsors. A questionnaire designed to elicit reader response is told on cover, "There's Money in It!"

Over this announcement is taped a news story. Next to it is picture of cake. Inside of folder tells grocers that housewives are prepared to buy these cakes thanks to spots on KSTP.

Hammer Makes Hit

METAL hammer, only five inches in length, is a six-second instrument sent to trade by WWSW Pittsburgh. Head acts as tap, ball peen hammer and bottle opener, and handle unscrews into large and small screwdrivers and puncher. Piece mailed to national agency timewatchers accompanied by letter describing various uses to which hammer may be put, for example, "It will keep papers in place in wind up to 30 miles per hour. The hammer handle are call letters, location and power of WWSW."

Mail Irrigation

WORKING good neighbor policy into studio promotion was project of WTTW andWTWV (TV) Bloomington, Ind., City, which has undergone heavy rains this fall and winter, eyed its overflowing sewer system and New York's bathless and swallowed Fridays. Accordingly, five gallon jug was filled from city's water works and sent air express to Mayor O'Dwyer of New York City. Letter which accompanied water concluded, "Still water runs deep. Maybe this will help it rolling again into New York."

Station's Goodwill

GOODWILL of WCSC Charleston, S. C., was exhibited by ceremony in its studios in which Frances Meyer was presented railroad and show tickets for finals of Horace Heidt Youth Opportunity Program in Washington. Miss Meyer is aunt of Ralph Silverdale, who won the contest. Presentation was made by WCSC's owner, John M. Rivers.

Seasonal Promotion

ATTRACTIVELY printed pages of 13 Christmas Carol cards distributed by KYW Philadelphia to local business and social groups throughout city. Top and bottom of sheets called carry letters and dial position of KYW. Sheets piece 10.5 in printing, offers returned to KYW in amount received. KYW adds this promotion to the company's "satisfaction guaranteed" effort.

Hot Notice

REVIEW of The Last Malloy show on KGO-TV San Francisco by San Francisco Examiner's John Newton, reprinted for station by direct mail promotion piece advising prospective sponsors of low cost participation. Piece suggests, "Better get in now. Check KGO-TV's sales manager Vince right away on this one—it's HOT!"

WNAX Sponsorship

BACKING by WNAX Yankton, S. D., of Five State Bowling Tournament has been subject of two promotion sheets by station. Copies of first piece, explaining elimination of competition; second piece, which was for sale to stations of all sizes, were sent to newspapers in Iowa, Nebraska, North Dakota, South Dakota and Minnesota. Stakes have been divided into 11 districts and $1,000 bowling enthusiasts are expected to compete during February, March and April. Approximately 900 copies of second piece were sent to American Bowling Congress with posters giving pertinent information and entry blanks. WNAX will give tournament on Today in the World of Sports show, conducted by WNAX sports director, Les Davis.

Miniature TV Sets

CERAMIC ash trays modeled after miniature television sets sent to trade by KDYL-TV Salt Lake City. Set holds pack of cigarettes and carries wording, "KDYL-TV, Channel 4, Salt Lake City," across screen.

Special Announcements

SMALL white cards sent to listeners and trade by KFRO Longview, Tex., drawing attention to station's special New Year's program. Card read in part, "The Longview National Bank—Longview, Texas presents for your listening pleasure "Listening—East Texas 1949."

Time of broadcast and KFRO's dial position were added.

Personnel
WEAV Plattsburg and WENT Gloversville, N. Y., appoint Henner Advertising Agency, Albany, to handle their advertising.

KSTT Davenport, Iowa.—Granted 4

JR BUSINESS

1949 Biggest Year—Wismer

TGT sales of approximately $2,501,000 in 1949, WGR Detroit completed its busiest year in the station's history, according General Manager Harry Wismer. Pointing out that 1949 was a leaner year in sales, audience and profits than 1948, Mr. Wismer said the gross sales figure for 1949 surpassed the previous station record of $1,156,000 in 1948. Precluding an even greater year for the station in 1950, Mr. Wismer said with recent sales brighter than ever before, WGR's audience leadership in the area firmly established, it is a fine public record, WGR is better able than ever before to serve its community and its owners.

ward Dinner Postponed

RST Radio and Television Ward Dinner, originally scheduled to be held in New York Jan. 15, has been postponed to March 5, according to sponsors announcement last week. (Broadcasting, Jan. 2).

RCA INSTITUTES, INC.

Robert L. Fidlar, commercial manager for WIOD Miami, Fla., is completing 20 years in the radio industry. He started with WBOW in Haute, Ind., as announce- rizer in 1929, moving to WKZO in Amazoo, Mich., two years later. He served WHIO Dayton Ohio as announcer and continuity writer until 1943 when he assumed program management duties at WIOD, which was named commercial manager of WIOD in 1946.

WTVS (TV) Cleveland celebrated its second birthday Dec. 17. The station began telecasting to about 60 sets, most of them in dealers' showrooms, and now reaches an audience of more than 125,000 viewers. Staff of more than 70 people is headed by James C. Hanahan, vice president of Scripps-Howard Radio Inc., owner of WTVS.

► First birthday of WNNI (FM) Wabash, Ind., was celebrated Dec. 20.
► A special anniversary program Dec. 24 marked the completion of ten years of broadcasting by KFDS Ft. Dodge, Iowa.
► Ralph J. Mathewson, transmitter engineer for WEEI Boston, is the first member of the station's staff to be awarded a berth symbolizing 25 years service with WEEI.
► Silver anniversary was celebrated by KTHS Hot Springs, Ark. Dec. 20.

WKYW'S HOLIDAY
Records Xmas Day Schedule

WKYW Louisville became a one-man station for six continuous hours on Christmas Day. Thanks to a new wide tape recorder, the entire station staff from executive to salesman, enjoyed the holiday at home with the exception of Chief Engineer Nolan Pontrich who stayed at the controls.

All that Mr. Pontrich had to do, according to WKYY, was simply patch in the recorder and let the machine play six hours of continuous programming for only one reel change. Entire Christmas Day schedule was recorded in advance by using the machine developed by Louis Anderson, vice president, Point-Of-Sale Inc., Louisville, who designed it primarily for continuous music in airplanes and trains. It permits up to six hours of programming on one reel of tape.

While the machine allows three program channels to be recorded simultaneously, WKYY used two channels to produce a day's programming, complete with time signals, call letter announcements and commercials. According to the station, Mr. Anderson, tape recorder specialist, is working with the program department on modifying the machine to meet radio broadcast needs. WKYN says Mr. Anderson estimates the machine could be put into commercial production, priced at under $1,000.

Variation of "local boy makes good" theme was recounted in Fremont, Neb., Dec. 23 when Bill Baldwin, KFQT station manager, received a birthday cake on occasion of station's tenth anniversary. Mr. Baldwin recently held an engineer-announcer in 1939 when the station began broadcast- ing as KORN. In 1946, after returning from service with Armed Forces Radio networks in South Pacific (he was chief engineer at WVTB Tokyo), he assumed management. Call letters were changed from KORN to KFQT last March when Walker Newspapers Inc. bought the station from Inland Broadcasting Co. Mr. Baldwin accepts cake, adorned with replica of station tower, from Pat Jensen, script-writer.

Ra-TEL for WPTR
RA-TEL Representatives Inc., New York, has been appointed national representative for the 50 kw WPTR Albany, N. Y. The appointment became effective Jan. 1, according to Fred R. Ripley, general manager of the station.

BASKET FULL
Two Games Aired Together

A NEW idea in broadcasting basketball—a sort of "two for the price of one" arrangement—has been originated in Philadelphia by Sports Broadcast Network. Starting last Saturday (Jan. 7), Sports Broadcast arranged to have announcer-engineer teams airing two games at the same time.

Covering Temple, Villanova, Penn., St. Joseph's and La Salle games for the current season, the network inaugurated the service by covering the Temple-Syracuse and La Salle-Bowling Green games from Convention Hall and the Penn-Lafayette and Villanova-Valparaiso contests from the Palestra. Programs from both spots were fed into WPEN Philadelphia.

At a master control panel in WPEN, a sports announcer monitored the games, shifting back and forth from one game to the other as the play waxed and waned. Broadcasts of this type also are scheduled for Jan. 14 and 28 and Feb. 15. Jack Rensel, network general manager, helped develop the idea.

January 9, 1950 * Page 69
FCC ORDERS HEARING ON LIMA CHARGES

HEARING on year-old charges that Northwestern Ohio Broadcasting Corp. was trying to sell its WIMA-AM-FM Lima, Ohio, three weeks after it got AM grant [Broadcasting, Nov. 22, 1948] was ordered by FCC last Friday. Hearing was set for Feb. 28 at Lima.

Sky Way Broadcasting Corp. of Columbus, Northwestern's rival in AM case, had claimed property broker's representative approached Sky Way President W.R. Hittin, but Hittin said Northwestern had authorized sale of AM and FM properties, with asking price $385,000.

FCC, which investigated, said it "appeared" neither Northwestern nor Sky Way had been "entirely candid and truthful," and set matter down for hearing. Involved are WIMA license application; petition of Sky Way for revocation proceeding against WIMA (1150 kc, 1 kw) and for reinstatement of its own application (1150 kc, 5 kw day, 1 kw night), and replies by Northwestern.

ORAL ARGUMENTS HELD IN THREE CASES

ORAL ARGUMENTS held Friday before FCC en banc on proposals to deny extension of completion date to WRTV (TV) New Orleans, to grant WILK, Waukegan, II., improved assignment, and to set aside earlier revocation order for WIBS Santurce, P. R.

FCC took under advisement WRTV motion to dismiss or withdraw application without prejudice to refiling when TV rules are settled. WRTV counsel said FCC's $100,000 estimate of TV signal in fact store is largest local TV sponsor. WILK supported FCC proposal to grant switch from 250 w on 1450 kc to New day, 1 kw night on 680 kc, for station, citing some $6,000 people who would get first service. WRTV Trent, N. Y., opposed change because of interference. In WIBS case, owner Jose E. del Valle said cleared of charges of misrepresentations to FCC. Proposed actions ordered by FCC last summer [Broadcasting, Aug. 1, 29, Sept. 12, 1949].

WOULD DENY WFEC SWITCH

DENIAL of request by WFEC Miami, Fla., to switch from 250 w day on 1220 kc to 250 w fulltime on 1230 kc was recommended yesterday in initial decision by FCC Hearing Examiner J. Fred Johnson Jr. Decision cited delays in presenting evidence and that record presents a disturbing indication of a disposition to trifl with the processes of the Commission. Bid was filed in 1947.

ZENITH HEARING DEFERRED

HEARING scheduled Jan. 16 on Zenith Radio Corp.'s proposal for "Phonevision" tests was postponed indefinitely by FCC Friday, pending action on Zenith's petition for authority to proceed without hearing. Zenith contends questions which FCC raised for consideration in hearing can be better answered after tests are conducted, not before [Telecasting, Jan. 2]. Company seeks three-month Chicago-area test of its subscription television system, with authority to charge "subscribers" $1 for each Phonevision program viewed.

PROCTOR TO CHIRURG

JOSEPH A. PROCTOR, with Lever Bros, 30 years and Speyr advertising manager since 1925, has resigned in charge of merchandising of James Thomas Chirurg Co., Boston and New York agency. He has been active in the introduction and advertising of nearly all Lever products.

PREFERENCE FOR LARGER TV PICTURES MOUNTING

PUBLIC demand for large-size TV pictures continues to rise, according to November figures of Radio Mfrs. Assn. Of 465,959 picture tubes sold to set-manufacturing firms, 58% were for tubes 12-13.9 inches; 19% for tubes 14 inches and up; 17.9% for tubes 9-11.9 inches; 3.9% for tubes 6.8 inches.

Total sales of picture tubes in November, including manufacturers, was about 2,064,000, and sales of tubes rated 485,512 units valued at $12,516,077. This compares to 456,375 tubes values at $11,719,674 for October.

Sales of radio receiving tubes in November dropped below October but surpassed November 1948 figure, according to RMA. November sales amounted to 23,911,820 tubes compared to 24,353,631 in October and 21,118,874 in November 1948.

Receiving tube sales totaled 174,946,014 tubes for first 11 months of year compared to 185,450,214 in same 1948 period. Of November sales, 18,602,851 tubes were for new equipment, 4,485,737 for replacements, 697,285 for export and 155,947 for government agencies.

SWEZEY TO SPEAK AT NATIONAL TV MEET

ROBERT D. SWEZEY, general manager of WDSU-TV New Orleans, will follow keynote speaker at opening of second annual National TV Conference sponsored by Chicago Television Council in Palmer House, March 6-8. He will discuss "Buying, Selling and Paying for TV."

Members of creating, writing and direction panel include Beulah Zachary, producer of Kukla, Fran & Ollie, and Ted MILL, producer of Garwayne at Large and program director at WNBQ-NBC Chicago. Chicago production panelists will be Monte Fassnacht of ABC-TV; Fred Freeland, Ruthrauff & Ryan; Norman Lower, Malcom-Howard Agency; Joseph Betzer, Sarra Inc., and Jerry Campbell, Campbell-Cahill Studio.

Eugene Thomas, general manager, WOIC (TV) Washington, is slated to discuss station management. Robert H. O'Brien, secretory-treasurer of United Independent Theaters, will outline theatre TV.

TRANSIT SALES SESSION

TWO-DAY convention of Transit Radio Inc. sales managers will be held today and tomorrow (Jan. 9-10) at Roosevelt Hotel, New York. Twenty-five stations will be represented, including 19 now affiliated with Transit Radio system and six others about to join. Company's board of directors meets Jan. 12 in New York.

SETH GETS POST

WILLIAM R. SETH, formerly with Music Corp., as advertising and promotion manager, has joined O'Brien & Dorrance, New York, as radio and television director. Mr. Seth is 10-year veteran in radio and record industry. He was formerly promotion manager of two divisions of NBC, account executive of W. B. Donor Agency and held management posts at stations.

NBC ANTENNA PROJECT

NBC and Empire State Bldg., New York expected to announce plan to construct new TV antenna atop building early this week. NBC relinquishing exclusive use of location, held since 1931, to share with ABC.

PRESSURE being built up to get FCC to issue clear-channel decision prior to further NABRA negotiations, on theory that U. S. manufacturers’ position is superior since, as their own domestic position is uncertain. Broadcasters being told it’s better to have clear-channel decision, even if they don’t like it, than to have none at all. NABRA negotiations were slated to resume Feb. 1 with U. S.-Cuban conferences.

APPARENTLY mindful of Pilbuck Mills successful big cooking promotion that culminated at New York’s Waldorf-Astoria last month, General Mills, through its agency, Dancer-Fitzgerald-Sample, New York, reportedly planning nationwide promotion which will include radio.

WNEW NEW YORK is resuming from NAB as of Feb. 28, according to authoritative quarters. This move throws monkey wrench into NBC B. C. Carl Cott, service vice president, had been slated to continue as chairman of the NAB Unaffiliated Stations Committee.

WHILE high cost of TV operations is accepted throughout advertising, it is significantly underlined in CBS-TV's cost on scenery, production and maintenance of sets and background. Item reached $2 million in 1949 with additional $300,000 for trucking and movement of scenery to various theatre locations.

ALSO proving big headache for TV network operators is slow expansion of facilities and new markets occasioned by FCC's television freeze. Networks need more affiliates and more circulation which could absorb programming and production costs, and it's feared that undue delays might bring some stagnation in network TV sales.

McCORMICK & CO., Baltimore (teo), through Sullivan, Stauffer, Colwell & Bayles, New York, its agency, preparing limited test spot announcement campaign to start Jan. 30.

IMPORTANT State Dept. post earmarked in upcoming State Dept. reorganization for Forney A. Rankin, NAB's government relations director and former department career man. Assistant Secretary of Commerce Willard L. Thorp, for Economic Affairs, has taken over jurisdiction of Telecommunications Division, and it's presumed assignment will be in that office.

PRICE involved in proposed sale of WMCA FM New York to syndicate of unidentified buyers reported slightly more than $20,000 (story page 18).  

FITCH SHAMPOO, through its agency, Harry R. Cohen, New York, preparing spring spot announcement radio campaign to start about mid-March.

INDIANA NEWS CLINIC

NAB Radio News Clinic for state of Indiana will be held Sunday, Feb. 19, at Indianapolis, according to University of Indiana; 19 VGEM Indianapolis, NAB District 8 director. Bill Warrick, WJOB Hammond, Ind., is general clinic chairman. Arthur C. Stringer, staff director, will preside. Applications for NAB. Site of clinic has not been picked.

ZITZ JOINS CHICAGO AGENCY

MARTIN ZITZ, advertising manager of Elgin American, Elgin, Ill., resigns and will join Henri, Hurst & McDonald, Chicago, Feb. 1.

BROADCASTING • Telecasting (Continued from page 4)
The KMBC-KFRM Team fulfills a vital daily need in thousands of rural homes in Missouri, Kansas and surrounding states.

The Team maintains a full-time Farm Service department, under the direction of Phil Evans, nationally known expert. Innumerable experiments and developmental projects conducted on the thousand-acre KMBC-KFRM Service Farms, are passed on to rural listeners.

Evans is ably assisted by Ken Parsons, well known agronomist. Together, these two experts, with their up-to-the-minute daily reports, keep rural listeners informed on latest developments in this important business of farming and agriculture.

Third member of this trio is Bob Riley, full-time marketcaster, who spends his entire working day at the Stockyards. He presents the market news several times each day direct from the Kansas City Livestock Exchange.

Other program features are presented by The Team specifically for the farm audience. As a result, The KMBC-KFRM Team is a welcome guest in the homes of those who live in the great Kansas City Trade territory.

The Team has the largest and finest group of artists ever developed by any Midwestern radio station. Pictured here is Hiram Higby, master of ceremonies and entertainment star, heard on the nationally famous Brush Creek Follies, Dinnerbell and Western Roundup...just a few of the top-notch entertainment programs that are a daily feature of The KMBC-KFRM Team.

The KMBC-KFRM Team Serves 3,659,828* People

New RCA electron tube gives today's amazing computing machines an indispensable memory.

So complex are present scientific studies—such as in atomic research—that just working out the "arithmetic" could take all of our scientists' time.

A short cut is found in huge electronic computers, capable of adding or multiplying numbers as large as one thousand billions in millionths of a second. But such speed is valueless unless—with comparable speed—the results of countless computations can be kept "on file" and taken out again.

Such a "file" now exists in a "memory" tube, developed at RCA Laboratories. Electronically it retains figures fed into calculating machines, stores them, memorizes new ones—speeds intelligent solutions through mazes of mathematics.

Uses of RCA's "memory" tube are many. It will help atomic scientists acquire new and needed knowledge...provide new information on supersonic flight...even help make rapid weather predictions! It is an invaluable instrument in the scientist's campaign to penetrate the unknown.

For your benefit:
Development of the "memory" tube is just one example of the many basic advances pioneered at RCA Laboratories. Continue leadership in science and engineering add value beyond price to any product or service of RCA and RCA Victor.
Examples of the newest advances in radio, television, and electronics—in action—may be seen at RCA Exhibition Hall, 36 West 49th Street, N. Y. Admission is free. Radio Corporation America, Radio City, N. Y. 20.
WOR is not an Albany station

HE WAS RATHER impatient. He was a manufacturer. The product was a tape for mending clothes, shades, soft goods...

(Please be patient and read on — there is some very important meat in this.)

WOR was the only station this man could afford; we mean, big station. And he had — what some people would think — peculiar ideas.

"Sell my product," he said. "Sell it in Albany, N.Y., and Boston, which is in Massachusetts, and Philadelphia — as well as (hold tight) Maryland."

We could try.

WOR jumped this man's Albany sales 190%. In Boston and such surrounding territory as Connecticut, Rhode Island, WOR sold 75% more of this man's product than ever before. Maryland? Up, too. About 100%.

And so the story went — in practically all the 18 great states WOR platters its power down on.

WOR even persuaded 43 department stores which had never handled the product to handle it.

Would you, perhaps, like to have WOR do maybe this kind of job for you? In cities like Paterson, Newark, Trenton, Bridgeport, New Haven, and even — well, maybe Albany, N.Y., or Boston?

our address is WOR — that power-full station, at 1440 Broadway, in New York

NOTE: WOR does not argue the point that each of the cities mentioned is served in a very special way by one or more local stations. Their job is an important and unique one. So, too, we feel is WOR's collective 18-state impact.
Will our rockets have reached the moon?
Will the uses of atomic energy be a boon to mankind?
And what about broadcasting? Will radio be a satellite of television? Perhaps a new miracle of air transmission will be exciting the world.
In 1960, as today, you can bank on this: Havens and Martin Stations will be experimenting, pioneering, and programming for the listeners of Virginia.
Half the joy of broadcasting is vision.
Much of the rest is serving.
Watch the First Stations of Virginia in 1950...

Network Calibre Programming to Fit Local Sponsors’ Pocketbooks

Box 13—Successfully used on some 400 U.S. and Canadian stations, with ratings high as 19.2. Being rerun in some 20 markets including New York, Los Angeles, San Francisco, Denver, etc.

Damon Runyon—Features John Brown ("Digger O'Dell") of "Life of Riley" and "Al" of "My Friend Irma". Already being used in some 100 markets in less than one year after its release. After only the 6th program and with no promotion, received a 12.1 rating in Los Angeles (44.2% of the audience).

The Unexpected—Each program a complete episode. Features such stars as Marsha Hunt, Lyle Talbot, Jack Holt, Jackie Cooper, Binnie Barnes, Barry Sullivan, etc.

Behind the Scenes—Featuring the voice of Knox Manning, one of radio’s greatest personalities. Manning narrated the best documentary film made in 1945. It won an Oscar. It was his voice you heard in the Academy Award Winner, "A Boy and His Dog," and "Facing Your Danger." Aside from such outstanding radio series as "Sherlock Holmes," and "Hollywood Preview," Knox Manning has had more than 500 movie credits.

Mayfair Transcription Co.
8511 Sunset Boulevard
Los Angeles 46, California

Closed Circuit

TRANSMIT RADIO getting close scrutiny at FCC. There’s staff-level thinking that it’s not “broadcasting” in strictest sense because it’s beamed primarily to transmit patrons, and that therefore it’s not entitled to broadcasting frequencies. Subject has not come before full Commission.

MORE THAN cursory interest being evinced by Mutual affiliates, including certain stockholder stations, in pending plan of M-G-M to originate minimum of 30 hours per week of new programs to be fed to network. Programs — mainly live — would be produced with M-G-M talent and talent of other studios working with M-G-M, and would employ extensive literary properties of M-G-M and cooperating studios. Programs would be available for national or local sponsorship with M-G-M presumably holding certain rights of network recapture.

E. I. duPont de NEMOURS & Co., Wilmington, through BBDO, New York, preparing radio spot announcement campaign to educate public on difference in denier in stockings. Approximately 60 stations will be used in 40 markets starting Jan. 23 for 13 weeks.

DREW PEARSON on a CBS station and partially owned by network at that! That’s deal being negotiated by John S. Hayes, general manager of WTOP Washington, with Mr. Pearson, William H. Weintraub Agency, Adams Lutig, president of Adam Hat Co., and ABC network. WTOP (55% owned by Washington Post, which carries Mr. Pearson’s syndicated column, and 45% CBS-owned) would carry Pearson show at 10:30 p.m. Sunday. He is carried live by WMAQ, Star-owned ABC outlet in Washington, at 6 p.m. Deal would be first of kind evolved on repeat basis for Mr. Pearson, it’s understood.

INTERNAL problems at NAB, touched only lightly at board and committee meetings, may explode before upcoming structure-finance and board meetings are ended. Tipoff came in informal comments among members of three committees that met last week (story page 15). Next portent could appear in form of resignations.

NAB IS NOT only association in radio having member-resignation troubles. WDSU-TV New Orleans has resigned from Television Broadcasters Assn. No reason assigned.

EDWIN R. BORROFF, former ABC Central Division vice president, has resigned as president of Taylor-Boroff station representative firm, Chicago, and has sold his interest to his partner, Ted Taylor. Mr. Borroff will devote his time to activities of KPHO-TV Phoenix, of which he is part owner, retaining representative firm for national business.

NETWORK RADIO program being considered in addition to already sponsored Stop the Music by Cecil & Presbrey, New York, for

Other Upcomings on page 43

Bulletins

THOMAS S. LEE, 45, owner of Don Lee Broadcasting System, either jumped or fell from the twelfth story of a Los Angeles office building late Friday. He had been under observation for several years and the affairs of Don Lee were conducted by trustees.

PROCTOR & GAMBLE, Cincinnati, through its WBBM station has pulled the strings for a test announcement campaign this week in Ohio for its Joy, liquid dishwahser.

JUSTIN MILLER, NAB president, reappointed Friday by President Truman to serve on U.S. Advisory Commission on Information. This will be Judge Miller’s second term; first appointed to commission by President last year. Purpose of group is to study State Dept. activities in field of information.

FORNEY RANKIN QUITS NAB; RETURNS TO STATE DEPT.

FORNEY A. RANKIN, NAB director of government relations, resigns Feb. 1 to become director of public affairs in office of Assistant Secretary of State in charge of Inter-American Affairs, Edward G. Miller Jr. He will be in charge of information and cultural affairs in Latin America.

Mr. Rankin joined NAB Oct. 1, 1948, as international advisor and later was named executive assistant to President Justin Miller. He devoted most of his attention to international matters and attended high-frequency broadcast conference at Mexico City and recent NARBA meetings in Montreal. He is author of Who Gets the Air? published last summer by NAB.

Before joining NAB Mr. Rankin was associate chief of State Dept. International Broadcasting Division. He had been with Office of Inter-American Affairs. During his period of government service he attended many international conferences. Last summer he was named NAB government relations director when that post was created by the board.

Business Briefly

BAKERY SPOTS • Cross-country campaign in works for California Fruit Bread, Los Angeles, which already has booked spot radio in four Pacific Coast markets. Budget not released. Agency, J. B. Keifer Inc., Los Angeles.

COOKIE PROMOTION • Zion Industries, Zion, Ill., preparing to start campaign of singing commercials to promote its line of cookies. Agency, Goodkind, Joice & Morgan, Chicago.

AGENCY NAMED • Duane Inc., Chicago (deep fat fryer), names Ruthrauff & Ryan, Chicago, to handle advertising. TV to be used.

GINGER PLAN • K. W. Ginger Product Co., names Smith, Smalley & Tester, New York, to handle advertising of its ginger products. Radio will be used.

NAB ASKS ACHESON TO CONFER ON MIXUP

NAB Friday asked Secretary of State Dear Acheson for top-level conference on broadcast rights following brush-off given networks at Secretary’s luncheon speech Thursday at National Press Club, Washington.

Previous protest sent to Secretary Acheson Wednesday by NAB President Justin Miller when State Dept. withdrew permission for radio pickup on ground speech would be ex tempore. Actually, Secretary Acheson spoke from prepared material.

State Dept. finally gave permission for recording of speech at 12:25 p.m. Thursday scarcely half-hour before he started talking. Department managed to get Voice of America staff to handle recording job. Then diplomatic agency got tied up in red tape as Far Eastern officials demanded right to edit recording.

Networks fractionally booked news spots for portions of speech Friday afternoon but recording wasn’t ready until 6:40 p.m. though promised at 4 p.m. Voice of America got its copy at same time. Eric Sevareid, CBS commentator, termed incident “most remarkable effort to protect a public official from himself that Washington has seen in years.”

DON LEE EXTENSION

FCC Friday granted Don Lee Broadcasting System extension of time to Feb. 1 to file exceptions to Commission’s proposed decision on Don Lee station renewals [Broadcasting Jan. 2]. FCC proposed to renew licenses (KHJ AM-FM Los Angeles, KFRC San Francisco KGB San Diego, KDB Santa Barbara), but held Don Lee had violated network regulations. Network still undecided whether to file exceptions.

LANGER BILL OPPOSED

RADIO and television have become “very important” media to beer advertisers and Lang-er Bill would impose “intolerable” restrictions of their interstate advertising, Edward L. Flan- gan, Globe Brewing Co., told Senate Interstate Commerce Committee Friday (early stor-page 60).

Page 4 • January 16, 1950
The offer was made on WKMH's 5:10 P.M. broadcast. Five gallons of free gasoline would go to the first 50 persons calling. The offer was a frank test of WKMH's listenership and ability to draw response. The result...

Thousands of calls completely drowned Detroit telephone exchanges, inter-exchanges were inundated, calls could not be made between exchanges. With entire Detroit phone service threatened, WKMH called it off. And Michigan Bell pleaded: "please...never again."

Conlan surveys prove WKMH the lowest cost-per-thousand in Detroit: 33c. Just ask WEED.

That program included an invitation to listeners to call LOGAN 2-4000 for 5 gallons of gasoline. The resulting flood of calls from all over the Detroit telephone exchange area...disrupted service...affected inter-central office trunk lines, and hence adversely affected our service over the entire Detroit area. Unfortunately we are unable to even estimate the total calls placed, but the amount would undoubtedly number in the thousands.

WKMH gives you more listeners per dollar in metropolitan Detroit than any other station.
IT'S ALWAYS HARVEST TIME
in Flint!

...if you're on
WFDF, that is!

Advertisers who sow their selling messages via Flint's first station, WFDF, reap a rich harvest. They're "in" for a big share of the $288,000,000 spent annually in Flint's retail stores!

Purchasing power is fabulous in this industrious town, because the average effective buying income per family is a startling $5,764. (Compare that with the median American family income reported at $3,120!)

Remember! Hooper surveys show that WFDF has a larger audience than any of the other four local stations in every time period. And during the day WFDF garners two to five times as many listeners as any other local station.

Today—every day is harvest time in Flint when you use the WFDF-Flint Market Combine. Ask a Katz man for availabilities, now!

PLAY BALL with LIBERTY!

Millions of baseball fans in 27 states throughout America will listen to major league baseball this spring and summer over the Liberty Broadcasting System. They'll hear the best play-by-play reporting on the air — the Yankees, Red Sox, Cubs, Dodgers, Giants — all the big league teams — as only Gordon McLendon, the Old Scotchman, can give it. They'll hear baseball every day in the week and a double-header on Sundays!

Yes, beginning March 11, and ending October 1, Liberty Broadcasting System will broadcast some 36 exhibition games and 173 regular season games — an average of 7 games per week during the exhibition season and 8 games per week during regular season.

Liberty will broadcast baseball — and millions of fans will listen! It's the biggest sporting event on radio. It's creating thousands of baseball fans . . . boosting game attendance . . . expanding the sports listening audience! It's the greatest advertising buy in America.

The Old Scotchman — GORDON McLENDON

Radio's Favorite Sportscaster

Radio's favorite Sportscaster, heading a staff of the most outstanding Sportsmen in the country. This year Liberty will feature both line from the field and re-creative games. Direct from the field, or re-created, Liberty gives the best in baseball reporting, its re-created games are completely unlike any others — more realistic, if possible, than games direct from the field.

"McLendon's work is, in simple words, flat genius. There is just no other way to describe it." — Amos Melton, writing in the Ft. Worth Press.

"He does a job that is both thrilling and flawless — a masterpiece of radio reporting." — Calvin Clyde, writing in the Tyler Courier-Times.

Liberty's special re-creation methods are the particular property of the network and cannot be duplicated. For the most part, they are within a few seconds of actual play on the field.

LIBERTY BROADCASTING SYSTEM, INC.
DALLAS, TEXAS
When you're making out that schedule for the Southwest don't overlook this sales-winning pair of CBS stations. For availabilities and rates, write, phone or wire our representatives.

Mr. SHANKS  Miss PINKNEY
TWO GIRLS and two boys were selected out of more than a million high school students as winners in the third annual Voice of Democracy contest staged during 1949's annual National Radio & Television Week. They are Richard L. Chapman, 17, Brookings (S. D.) High School; Gloria Chomiak, 17, Wilmington (Del.) High School; Anne Pinkney, 17, Trinidad (Colo.) High School; Robert Shanks, 17, Lebanon (Ind.) High School.
Contests were staged in 28,000 high schools in 51 states and territory under joint sponsorship of NAB, Radio Mfrs. Assn. and U. S. Junior Chamber of Commerce, with endorsement of the U. S. Office of Education. Chairman of the committee in charge is Robert K. Richards, NAB public affairs director.
A board of nationally-known judges selected the four winners by means of blind transcriptions identified only by numbers. They scored all contestants and the scores were added and averaged to
(Continued on page 28)

On All Accounts

WHILE studying in the early 1920's for a chemical engineering degree at Union College, Schenectady, N. Y., Maurice Odquist, now account executive with Kenyon & Eckhardt, New York, became aware of a curious disproportion. Whereas there were scores of chemistry majors at school and thousands throughout the country, there were less than a handful of college radio trainees to supply an industry that was booming as one of the most promising in the industrial economy.
Mr. Odquist did what few before him had done, and what thousands after him were to undertake—he helped build a college station, WRL, and there served in every capacity available to a young man of persuasive manner, a good voice and literary skill.
Capitalizing on the latter endowment, his first job upon leaving school in 1926 was editor of a house newspaper for Best Foods Inc. Within two years he had risen to the post of advertising manager for the firm. In 1929 he moved to the Giddingon Paint Co. and his first post-school encounter with radio as the organization's sales promotion manager handling, among his other duties, the company's spot radio business.
In 1930 he resigned from Giddingon to join the Atlantic & Pacific Co. as its radio director. During his tenure with A&P Mr. Odquist supervised more than 26 shows per week for more than four years.
In 1934 when A&P's radio activities were cut considerably, Mr. Odquist resigned and joined the American Can Co., first as assistant head of the marketing division and later as director of that department. Three years later he joined Newell-Emmett as account executive in charge of merchandising and promotion of Pepsi-Cola. During his ten-year stay there he also served as account executive on Sylvania Electric Products.
Last June, he was offered and accepted a position with Kenyon & Eckhardt as account executive on the television set division of Sylvania and on White Rock, a spot radio advertiser.

The Odquists—she is the former Viola Seelman—were married Oct. 26, 1929. They have two children, Constance, 16, and Victor, 12. The family lives in Dobbs Ferry, N. Y. Mr. Odquist is active in civic enterprises and is a member of the board and president of Dobbs Ferry Hospital and the board of governors of Dobbs Ferry Country Club.

Rural Radio Network

Rural Radio  •  prescription to sell the $971,000,000 agricultural market in New York state.

Rural Radio  •  Ten major farm organizations (Orange, etc.) representing 140,000 New York state families own Rural Radio Network. Since they listen first to their network, make Rural Radio first aid for sales in rural New York.

Rural Radio  •  85%

... of prosperous rural New York is served by 8 RR stations: WRCU-FM, Ithaca; WBNF, Weatherfield; WCTI, Bristol Center; WVEC, Deposit; WYCN, Troy; WYQN, Turin; WSIB-FM, Ogdensburg; WFLY, Troy.

Rural Radio  •  $6,500

... is the "Cadillac" overage farm income per family in New York state. Farm families in New York buy 45% of the nation's meat; 51% of the hardware; 36% of the electrical appliances; 28% of the drugs; 36% of food-meat; 33% of the clothing.

Rural Radio  •  356,640

... is the total rural families in the upstate area. This includes 138,235 farm families ... a rich, responsive market worthy of your consideration.
EVERYTHING in LENSES for TV CAMERAS
—at new reduced prices

After careful study and extensive tests of all types of TV lenses—in the laboratory, studio, and field—RCA engineers recommend this versatile line of lenses for producing the clearest possible pictures.

Designed specifically for quick interchange in the 4-position turrets of RCA cameras, these lenses give the cameraman a wide choice of sizes, speeds, and focal lengths for wide-angle, telephoto, and ultra-speed pick-ups. The complete line includes: (1) special, long "telephoto" types using a high-quality doublet lens (achromat) with removable, lightweight fixed-stops; (2) standard Ektar, or studio-type lenses, complete with diaphragm and depth-of-field scales—and with threaded stainless-steel barrels for accommodating sunshades and standard filters (available extra). All lens mounts contain light baffles to cut glare. All lens surfaces are chemically treated to insure clearer, higher contrast picture reproduction.

RCA can ship any lens in the line—immediately, from stock. Ask your RCA Broadcast Sales Engineer for the new low prices. Order from him, or direct from Dept. 19AC, RCA Engineering Products, Camden, New Jersey.

NAB REVAMPING UPSET

By J. FRANK BEATTY

NAB’s Broadcast Advertising Bureau last week survived one more threat to its freedom to operate as a separate unit but the operation may upset the two-year streamlining of the industry’s trade association.

As a result, NAB’s functions will enter the charting stage once more when two board committees—Structure and Finance—meet next week (Feb. 17-24). The board committees will take up the recommendations of three membership committees that met last Monday and Tuesday in Washington.

The three membership groups—Radio, Television and Broadcast Advertising Committees—met under a board directive asking for their ideas on what place BAB should take in the association’s management setup. The committee met separately and jointly as well as formally and informally, finally coming up with three resolutions that tossed the whole streamlining job back into the board’s lap.

Though the committees decided not to make public their joint findings, it was obvious they felt that BAB has wide membership support and that the new NAB division—department chair hasn’t worked out as originally conceived.

Considerable hair was let down during the two-day conference, and frank criticism of many association operations was expressed.

In essence, the tri-committee recommendation:

- Reduces the Radio and Television Divisions to the same status as the six basic departments.
- Breaks up the secretary-treasurer office and proposes a secretary-field director as well as a treasurer-general manager.
- Puts the delegation of duties in the president’s hands, where it has rested all along minus a BAB-division policy.
- Makes it very plain that BAB is to be left free to do its

NAB Intact

GRAND AWARDS in recognition of “good, resultant radio advertising by retailers,” in the annual radio program contest sponsored by the National Retail Dry Goods Assn., were made last Wednesday to three department stores—Zion’s Co-operative Mercantile Institution, Salt Lake City; Schumenein’s Inc., St. Paul; and Lit Brothers, Philadelphia.

The first of these also won two first and second prizes. Awards to 33 stores in 16 categories were presented by Maurice B. Mitchell, BAB director, and Robert J. Powderly, sales promotion director of Krefte-Newark, at a sales promotion and visual merchandising session of the annual NRDGA convention (see separate story). Mr. Powderly was chairman of the session.

Judging this year, according to Mr. Mitchell, was based primarily on the results of radio advertising, a departure from former years when programming itself was of foremost importance. Therefore, in each case, stores gave definite proof of results in contest series.

Grand and first prize for “Groups of Beamed Programs” went to ZCMI for five of its programs, each tailored for a different audience. The programs, honored as a group, also took first or second prizes, each in its specific category.

Winning ZCMI programs in the group classification, and their specific prizes were: ZCMI-Utah Symphony (Continued on page 41)

NABG Convenes In New York

NRDGA Awards for Best Programs of 1949

OVER $20 MILLION VOLUME GROUP STORES

First Prize—Goldblatt’s Dept. Store, Chicago—The Let’s Have Fun Show, WGN
Second Prize—Marshall Field & Co., Chicago—Let’s Have Fun Show, WGN
Honorable Mention—Joske’s of Texas, San Antonio, Eight O’Clock News, WOAI

$5 MILLION TO $15 MILLION

First Prize—Schumenein’s Inc., St. Paul—Red Rooster Hour, WDCY
Second Prize—Zion Co-op. Mercantile Inst., Salt Lake City/ZCMI—ZCMI Shows, KSL/Salt Lake Symphony Hour, KSL
Third Prize—Mass Brothers, St. Petersburg and Tampa—Piano Melodies, WUSF
Honorable Mention—McCurdy & McCreary, Rochester—McCurdy Little Symphony, WHAM
Honorable Mention—Forbes & Wallace Inc., Springfield, Ill.—Upon Reflection, WSPR
Honorable Mention—The John Geiger Co., Memphis—Memphis—Mid South Today and Tomorrow, WMC

UP TO $5 MILLION VOLUME

First Prize—Sears, Roebuck & Co., Inc., Burlington, Vt.—Sears Man on the Street, WCAN
Second Prize—The John Bressmer Co., Springfield, Ill.—America’s Favorite, WINC
Third Prize—Pomeroy’s Inc., Portland, Ore.—Pomey’s Portrait, WPAM
Honorable Mention—The John Bressmer Co., Springfield, Ill.—Repeat Performances, WTEX

(Continued on page 10)

JUDGING was based primarily on results. Emphasis was also placed on the manner in which programs and advertising reflected the character of the store, on the accuracy with which the program was beamed to a specific market and on the consistency with which radio advertising was used.

Stores Winning Awards for Groups of Beamed Programs

Grand award and first prize to Zion Co-op. Mercantile Inst., Salt Lake City, for the following 5 beamed programs:

- ZCMI Utah Symphony Hour, KSL
- ZCMI Home Maker Program, KSL
- ZCMI School Program, KSL
- ZCMI Senior Citizen Program, KSL
- ZCMI Beamed Breakfast Edition of the Salt Lake Tribune, KSL

Second prize to Pomeroy’s, Reading, for the following 4 beamed programs:

- Highlights in Harmony, WHUM
- Pomeroy’s—Reading, WHUM
- Be-Teen Jamboree, WHUM
- Pomeroy’s—Newcast, WRAW

Third prize to Golden Rule, St. Paul, for the following 8 beamed programs:

- Morning Serenade, WMNN
- Pomeroy’s—Midwest, WLeniel
- Tune Time, WLOL
- Guests and Requests, WLOL
- Twilight Serenade, WMIN
- Family Favorites, WMIN
- Curtain Time, WMIN

Programs Beamed to a General Family Audience

By JOHN OSBON
A SIZABLE portion of the radio-television industry's multi-million dollar revenue in network and spot beer-ale-wine advertising stood in jeopardy last week as "dry" and "wet" groups marshaled their forces for hearings before the Senate Interstate & Foreign Commerce Committee on the explosive Langer liquor bill.

The committee, headed by Sen. ED C. JOHNSON (D-Col.), had heard pretty much the same tempest cry before—in 1947 and 1948—on legislation precisely identical to the measure (S 1847) authored last April by Sen. William Langer (R-N.D.) and designed to outlaw liquor advertising in all media engaged in interstate commerce. It would not outlaw local or state advertising, however.

With an advance registration of nearly 100, the committee dutifully heard "dry" testimony all Thursday and part of Friday, with opponents then speaking out against proposed legislation which most industry authorities feel is discriminatory to all media.

Observers and authorities—among them, legislators—feel the bill (or its companion piece in the House, HR 2428) has little chance for passage in its present form. And after hearings last Thursday and Friday—and slated for Saturday if necessary—many felt they had seen another "dry run" on Capitol Hill.

Opposition Views
Carrying the fight against the measure, which would ban beer, ale and wine as well as liquor advertising, were spokesmen of Assn. of National Advertisers, Advertising Federation of America, the American Assn. of Advertising Agencies, and various distillers, breweries, etc. No representatives of the radio industry registered in advance to testify.

But FCC, which has been prodded by Sen. Johnson to take action, noted again in a fresh statement for the record that while S 1847 would not amend the Communications Act, "adherence by station licensees to the provisions . . . would be a factor to be considered in determining their qualifications to be licensees of radio broadcast stations."

FCC Chairman Wayne Coy's letter to Sen. Johnson, dated last Monday, reiterated that the bill presents "a question of national policy" and the Commission did not care to comment on its merit. Comr. Paul Walker, however, desired to go on record as favoring enactment of the legislation, Mr. Coy added.

The AAAA's, through Vice President Richard L. Schedler, called the bill "discriminatory" and asserted that "a dangerous and unforeseeable precedent would be established, equal in possible effect to the abolition of such . . . .

advertising altogether."

Officials of the Distilled Spirts Institute warned that the Langer bill threatens "free competition in American business" and branded it as "an opening wedge for the return of prohibition."

Heard Testimony
Sitting in one or another of the hearings were Sens. Charles Tobey (R-N.H.), Ernest McFarland (D-Ariz.), John Bricker (R-Ohio), Warren Magnuson (D-Wash.), Brien McMahon (D-Conn.), Owen Brewster (R-Me.), and other committee members.

At the opening session Sen. Johnson inserted into the record letters from various government departments and agencies, most of whom declined to comment on the merits of the bill [Broadcasting, Jan. 2]. Petitions received by Sen. Irving M. Ives (R-N.Y.) and Sen. Hugh Butler (R-Neb.), who testified personally Thursday, also were inserted.

Sen. Langer, the initial witness, said that "he contacted overwhelmingly favored his bill and were strongly opposed to telecasts of liquor advertising. Over 1,000 telegrams and petitions have been received by senators, he added.

Sen. Langer drew support in a statement from former Kansas Sen. Arthur Capper, who spearheaded similar movements in the 79th and 80th Congress and is owner of WIBW Topexa and KCUN Kansas City, Kans. Mr. Capper said stations and other media should be prohibited from carrying such ads "in the interest of decency, morals and health," and expressed hope for passage of the bill and "vigorous" enforcement by the proper federal agencies.

Official spokesman for the "drys" was Bishop Wilbur Hammaker of the Methodist Church, who also testified during the 1947 and 1948 hearings. After denying the constitutionality of the Langer bill and favoring a ban on liquor advertising (not on liquor itself, he said), he paraded a host of witnesses, including Sam Morris, San Antonio minister, temperance league official and conductor of the Y.M.C.A. Rev. Morris told the committee it is "unfair, even Un-American," for networks and stations to sell "choice" time to beer and wine advertisers in dry areas, then refuse temperature groups equally choice time. He said appeals to NAB and FCC brought no results, and that the Langer bill would not ban interstate ads.

But FCC previously had ruled, in a similar complaint by Mr. Morris involving KRLD Dallas, in 1946, that the Commission could refuse KRLD's license renewal. FCC denied the request in 1946, ruling that such advertising can raise "substantial issues of public importance," presumably those covering programming balance.

Temperance League of America, of which Mr. says: "I do not also sought to have WHAS Louisville's renewal refused last year on similar grounds [Broadcasting, Oct. 17, 1946]."

Rev. Johnson originated the idea that area stations following a policy of refusing time to temperance groups, he said, include WLW and WCKY Cincinnati, WSB Atlanta, WWL New Orleans, WAFB New Orleans, WLW Cincinnati, WLS Chicago, WOAI San Antonio and WGN Chicago—most of which he cited in previous testimony of 1947 and 1948.

JOHN L. JOHNSTON
SEN. ED C. JOHNSON (D-Col.), FCC's chief spur on Capitol Hill, laid out his recommendations for Commission policy action Thursday night at the annual dinner of the Federal Communications Bar Assn.

With all seven Commissioners in the audience of some 325 FCBA members and guests, including a dozen of members of the Senate Interstate and Foreign Commerce Committee which he heads, Sen. Johnson recommended that FCC:

- Break down the clear channels; leave the question of power above 50 kw to Congress.
- Review the network regulations "in the light of changing conditions."
- "Quickly" promulgate "broad and sufficiently general standards for color television."
- Simultaneously, approve commercial standards for TV in the UHF and then—but not before—lift the current VHF licensing freeze.
- Speed its own action on broadcast applications, "overhaul" rules, revising them in a manner with "some antiquated and unnecessary functions" and do more in the "purely scientific and technical fields."

Sen. Johnson also recommended that the U. S. "ought to give serious consideration to the sensible proposal to assist Cuba and the whole Caribbean area in converting their local station from FM to AM" [CLOSED CIRCUIT, Nov. 7].

Without calling names, he attacked Cuba's channel demands on the U. S. in the recent NABBA negotiations, saying that his phrase doesn't condone for one moment any attempt by any nation to hold a pistol to our heads, and least of all by one whose entire economy depends on our friendly cooperation.

Color Decision
He anticipated an FCC decision favoring standardization of color television: "I am confident that if we [the Condom Committee's] report will fortify and bolster the Commission's decision that we are ready for color television now." He referred to a Bureau of Standards committee, under Director Edward U. Conlon, which is studying color for a report to his Senate commerce committee.

The dinner at which Sen. Johnson spoke, held at the Mayflower Hotel in Washington, followed an (Continued on page 73)
NBC'S NEW LINE-UP

NBC LAST WEEK picked a top odd merchant and one-time agency man to fill a new staff-level post as vice president for administration. Victor Norton, president of American Home Foods Inc. since 1947 and former executive of Kenyon & Eckhardt, was appointed to the newly created NBC job. Placed over his direction were several administrative functions, all headed by veteran NBC executives.

Reporting to Mr. Norton will be John H. MacDonald, vice president in charge of finance; O. B. Hanson, sales manager; a vice president; William S. Hedges, who has been officially announced as vice president in charge of integrated services; Ernest de la Ossa, director of personnel and newly named head of labor relations, and Hugh D. Beville, director of plans and research.

Yet to be named to the top hierarchy of the NBC organization as involved in the celebrated Booz Allen & Hamilton plan are a chief of the radio network and a staff-level chief of public relations. These are believed to be the only professional jobs left unfilled in the new design.

At the time he announced the appointment of Mr. Norton to be vice president in charge of administration, Joseph H. McConnell, NBC president, also announced a staff memorandum relating in detail the new personnel assignments as made to date in the network's reorganization.

Gaines Named

Most of the reassignments have already been reported by Broadcasting. One that had been subject to speculation, however, was settled by Mr. McConnell's report. James M. Gaines got the job of director of owned-and-operated stations—his third of three principal operating divisions into which the company is being split.

Mr. Gaines held the same title under the former organization of the network, but his appointment to head the newly separated stations division was regarded as a promotion. Reporting to him will be the managements of all NBC owned-and-operated stations save one, Sidney N. Strotz, NBC president in charge of the Western Division and head of KNBH (TV) Los Angeles, an NBC owned station, will report directly to Charles L. Evans, executive vice president.

Mr. Norton, the new vice president for administration, began his business career in 1927 as a salesman for the Jewel Tea Co., at Baltimore, Md., and rose in that company to assistant to the president. In 1938 he joined the Cudahy Packing Co., Chicago. With that company he was successively general sales manager, vice president in charge of sales and merchandising, and then in charge of the manufature and distribution of the packing house, dairy and poultry products as well as in charge of advertising, public relations and research.

He joined Kenyon & Eckhardt in 1945 as merchandising consultant in New York. Later he became vice president in charge of the agency's Chicago office and afterward returned to New York as a member of the planning board.

He joined American Home Foods Inc. in 1947 as executive vice president and before the end of the year became president.

McConnell's Memo

The full text of Mr. McConnell's memorandum to the staff, which serves as a full outline of personnel assignments under the reorganization follows:

"In the recent past I have had the opportunity of discussing with most of you our plans for realigning the NBC organization so that we can conduct our expanding business with maximum efficiency and give you increased opportunities to put your talents and capacities to the best use. To do this, we have surveyed the principal activities of our company and have grouped the operations which naturally belong together into functional units."

A number of new positions have been created, making possible many promotions from within the company and enabling us to strengthen the organization by bringing into it new executives and personnel. We have made substantial progress, and in this report I would like to summarize what we have done to date.

"The new structure of our organization includes three principal operating divisions: One for the radio network, one for the television network, and one for the owned-and-operated stations. Insofar as possible, each of these activities is to be administered as a separate business and each of the three divisions will have under it all of the elements essential to its efficient operation. To do this, operating activities in the accounting, engineering and research departments are being decentralized and associated directly with the operating divisions they serve."

"Pending the appointment of an executive in overall charge of the radio network organization, Charles R. Denny, executive vice president, is directly heading this division. In addition to his other duties, Sylvester L. (Pat) Weaver is vice president in charge of the television network organization, and James M. Gaines is director of O & O stations. William S. Hedges, vice president, is in charge of integrated services, which include various operating activities serving the company as a whole.

In addition to these principal operating activities, there are a number of staff units which assist the company's management in planning the overall conduct of our business. These include company-wide financial planning under John H. MacDonald, vice president in charge of finance; legal activities under Gustav B. Margraf, vice president and general counsel; engineering planning and development under O. B. Hanson, vice president and chief engineer; and personnel and labor relations under Ernest de la Ossa, director of personnel; a staff research unit under Hugh M. Beville, director of plans and research; and press under Sydney H. Eiges, vice president in charge of press and publicity, to whom the information department has also been assigned.

"A new top executive position has been created in the company—that of vice president for administration—under which a number of staff and operating functions will be grouped. I am very pleased to announce the appointment to this position of Victor T. Norton, who is joining NBC after serving for the past several years as president of American Home Foods Inc."

"Reporting to Mr. Norton are (Continued on page 42)"

GAG RULE SNIPPED

THE generally accepted American standard of free speech in reporting crime news now is established in the state of Maryland as a result of a decision last Monday by the U. S. Supreme Court in the "Baltimore Gag" case.

Invalidating of the Baltimore court principle that broadcasters and newspapers are in contempt for broadcasting and publishing news about an indicted criminal received the highest court's blessing when it refused to review a June 1949 decision by the Maryland Court of Appeals.

The state court had reversed a decision by the Criminal Court of Baltimore, which had held three Baltimore stations and a commentator guilty of contempt [Broadcasting, June 13, 1949]. Stations affected were WCBM, WFBK and WITH Baltimore along with James P. Connolly, former news editor of WITH.

Two days after the decision, the Maryland Court of Appeals cleared WBAL Baltimore of similar contempt charges. WBAL had followed a separate course in its appeal. Chief Judge Ogle Marbury, of the state court, issued a brief order freeing WBAL. The WBAL case had never been argued before the state tribunal. Judge Marbury's order merely said that the case was reversed for reasons outlined in the earlier decision reversing the lower court.

Miller Hails Action

Judge Justin Miller, NAB president, hailed the U. S. Supreme Court's action as "one step more in establishing firmly the American concept of free speech, and recognition by one more state of the limitations properly imposed upon the use of the judicial power to interfere with the reporting of news.

"The militant broadcasters and their attorneys who carried this case successfully through the courts merit the warm appreciation not only of all broadcasters, but of all people of our country for the protection of rights guaranteed to them under the First Amendment."

Judge Miller explained that the Baltimore case was based on the English philosophy of government abridgement of speech and press, which was repudiated by the U. S. Constitution.

The U. S. Supreme Court issued no opinion in refusing to pass on the merits of the Maryland rules (Continued on page 45)
THE FORD MOTOR Co., which has been out of AM network radio all this season, has returned with a new idea in media purchasing that implies a possible revolution in time purchasing.

Through its agency, the Detroit office of J. Walter Thompson Co., Ford bought eight CBS sustaining shows and 12 of Mutual's sustainers, for the month of January only.

Thus, for the first time, with the exception of special events, the auto firm bought proven package shows without having to tie itself up to a long term contract. The entertainment is of every type, ranging from news broadcasts to variety shows, and advertising both the agency and the sponsor expect they will be able to bracket all segments of the population with their sales message.

These placements on AM plus sponsorship on TV, cost the Ford Co., an estimated half million dollars.

Origination of the plan stems from the Detroit office of the Thompson agency, where Norman H. Strouse is vice president in charge. Working originally with CBS, the agency was aided in its negotiations by Joseph R. Spadea, manager of the CBS Detroit office. In charge of Ford approval was Gordon C. Eldredge, advertising manager of the Ford Div. of the Ford Motor Co.

Debunks Rumor
On Ford Network Radio

A spokesman for the agency scotched the rumor prevalent last fall that Ford had given up on network radio as a selling aid, saying:

"There is no feeling that we don’t want network radio, and we don’t think that it is either dead or dying. We are only trying to get away from the long term commitment that network radio obligated us to in the past. It was not flexible enough for us, compared to other media, in view of the unique selling job that lies ahead of us, and the variation in selling effort we have to put forth at different times. If we could look to the networks for circulation, just as we do other media, and pick and choose our time and place for our effort, we would be glad to buy the commercial content of those shows."

All of the officials involved in the arrangement expressed confidence in Ford’s new approach.

Underlining the desire of automotive people for “productive circulation and something new to give impact and balance to their sales and advertising campaigns over short periods,” Mr. Spadea said:

“Aside from my conviction that the use of these sustaining programs would afford the automotive industry greater coverage at lower cost, I believed that their sponsorship, as well as the financial return to CBS, would aid in their promotion for future long term sale.”

Mr. Spadea added that the programs “are delivering net circulation of 3,500,000 and 4 million radio homes...much larger than (the delivery) of the more costly publications.”

Nelson Sees Idea
As Stimulating

Linnea Nelson, chief timebuyer of J. Walter Thompson, said:

“I have participated in many new things over the years, but this is a single ‘first’ that has been the most exciting and stimulating thing to date. This campaign seems advantageous to both parties—the networks who’ve been putting on good sustaining shows and the Ford Motor Co. which can use them on this basis.

“With all of us working on the one time purchase of many network shows following immediately on the heels of the Ford new car spot announcements—and now television network and spot purchases as well as more radio spots—we can only say with deepest appreciation a great big ‘thank you’ to the stations and the networks. The use of radio and television broadcasting in such a big way is bound to produce results.”

Cites Flexibility
Advantage to Advertiser

Noting that the Ford company cannot predict to what degree the innovation will change the buying and selling pattern of network radio, Mr. Eldredge said: “We do know that it presents a greater flexibility for the advertiser. It’s roughly equivalent to buying pages in publications for specified dates and therefore it permits closer timing with an overall advertising campaign. It would seem to be an advantage to networks, too, as it brings some measure of return on their investment in the development and maintenance of fine sustaining programs.”

It seemed especially important to Ford this year to make a major effort in January, for the 1950 Ford had been out only a month when the holidays began, making necessary a shakedown of promotional and sales activities. The firm wanted to come back heavily to make up for this inactivity, and also to compensate for the new

Company Buys Sustainers Wholesale in Concentrated Drive

ar announcements of many of the competing manufacturers. Ford tented a 30-day promotion, and through the cooperation of CBS and J. Walter Thompson, the new plan was evolved.

A budget was set up for full availabilities, but previous commitments and local shows made that an impossibility. However, it was pointed out that with 173 CBS stations involved, and 470 from Mutual, the Ford programs ad realized 78% of the CBS possibilities and 77% of Mutual's. Another statistic bearing out the success of the buy was that 90% of all stations involved carry five or more of the shows, and that every single station carries at least one.

Prompt Action Marked Ford Decision

In answer to a query as to how quickly a program like this could be organized and put into action, the agency said: "We were in our first program just one week after the idea was cleared."

Three commercial breaks are used in the shows which are of half-hour duration, with the listener urged to "listen to a message from your local Ford dealer."

Reaction from the far-flung Ford dealer organization was instantaneous and enthusiastic. A Thompson field man in Des Moines, after a quick survey of dealer opinion, said: "I can honestly say that there has never been an advertising campaign that has created as much enthusiasm as our present radio network campaign on CBS and MBS."

Success on AM Patterns Video

The success of the AM buy came so quickly that Ford was able to apply the same idea to TV, where the firm already was sponsoring the Kay Kyser show on a long-term basis. Ford has bought the commercial rights to 10 sustaining TV shows on the four major networks between Jan. 20 and Feb. 2.

Ford emphasized that this does not imply any lack of confidence in the Kay Kyser show, characterizing it as "our main effort" and pointing out that the first show had hit a 40.8 rating, placing it in the top 10 TV programs for that week. Ford has no fears that the long-term purchase of any of these sustaining shows by other sponsors will put a crimp in its plans, for the firm says if it does the same thing in February, as now seems likely, the company will put together a package from the best availabilities that prevail at the time. In addition to CBS and MBS, Ford now has availabilities from NBC, and the purchase of NBC-TV time presupposes the possibility that the network would be interested in this program on AM. Both the agency and the network emphasized that there was no cut rate involved, with full time and talent charges being paid at the rate offered to all sponsors, the only difference being in the term of the contract. It was felt to be a mutually advantageous arrangement, with the Ford company getting the extra promotion for the exact time it needed, and the networks getting revenue from programs that up to now had been conceived and broadcast at terrific costs.

That there was a danger this practice might spread to many other advertisers was conceded. Also admitted was possibility that some shows now sold for long terms might be demanded on a shorter basis. However, the principals were quick to point out that Ford had a sales problem that was not faced by many advertisers who could profitably use every week of the year to plug their product.

Versatility Factor Is Significant

The new plan was thought even more significant in view of the recent increase in network ownership of top ranking shows. The possibility of such shows being sold to several sponsors over a year's time was seen, rather than on a longer term contract for the same account. Then it would be the networks' problem to build up the shows' circulation, with sales departments selling them on a best available basis, just as in the case of spots today.

TOP FLIGHT programs utilized by the Ford Motor Co. in its current drive include:

LEFT PHOTO—ABC-TV Super Circus, whose stars include Cliff Soubier, the clown, and Band leader Mary Hartline;

LOWER LEFT: CBS-TV's The Front Page, which cast includes John Daly (standing), Mark Roberts and Peggy Shaw in the top roles.

LOWER RIGHT: NBC-TV's Leave It to the Girls, moderated by Maggi McNellis (standing). She is shown with Kitty Carlisle (l) and Binnie Barnes.

TOP RIGHT: Mutual's The Saint, which casts Vincent Price in the title role supported by Betty Lou Gerson.
TRAFFICKING FCC Would Tighten Forfeiture Rules

IN A MOVE against "trafficking in frequencies," FCC last Thursday proposed new rules which would automatically forfeit their construction permits for any station which is sold before program tests commence.

Only exceptions would be (1) so-called "pro forma" transfers and assignments where no new control, and (2) transfer of an AM (or FM) grant along with an FM (or AM) license by the same owner. However, an authorized but uncompelled transfer which would not be sold in a package with a licensed AM or FM station.

FCC's proposal would extend to construction permits for changes in facilities of a licensed station. If the authorized but unfinished changes were "minor," FCC said, transfers would be approved; if "major," it would not.

The "facts of every case" would determine whether major or minor, FCC reported. It added that a change in transmitter location would be considered "minor," while a change from daytime local to fulltime national would be "major." A change from Class A to Class B rating for an FM station, or from community to metropolitan classification in the case of TV, would be considered a "major" modification.

FCC also proposed to keep a close watch for signs of trafficking in transfers occurring just after a station has gone on program tests. The proposed rules were issued on a 4-2 vote, Comrs. Rosel H. Hyde and Robert F. Jones dissenting and Comrs. Frieda B. Hennekno not participating.

Hyde. Jones Dissent

Comrs. Hyde and Jones, in a dissenting opinion by Mr. Hyde, contended the Communications Act's requirement that transfers be approved by FCC assures the Commission of opportunity to deal with any question of trafficking when it arises upon particular applications.

They charged the proposed rules are "inconsistent with the policy of the Communications Act and the procedures contemplated by the provisions of the Act," particularly the section dealing with construction permits. Further, they observed:

Under the proposed rule, a permittee would stand to lose substantially his entire investment if for any reason it becomes impossible or undesirable for him to complete construction under a permit. Good faith, unforeseen conditions and happenings, no matter how onceroad, would be basic for relief. This is not, in our opinion, a regulation which would operate to encourage the larger and more effective growth of radio through private enterprise.

FCC authorities estimated unofficially that in the last six months there had been four or five applications for transfer of stations not then on the air.

It was felt that the rules were probably reasonable in view of the entire industry, rather than calling for hearings on specific, and perhaps isolated, cases. FCC invited comments for or against the proposal until Feb. 17 and said oral argument would then be scheduled if the comments warrant it.

The order proposed to extend to sales agreements but not to leases. The order would provide for new permittees to be served any "dealings" on an "as filed" basis.

Proposed Basis

FCC said it based its proposal on "the policy of the Communications Act that frequencies for the operation of a broadcast station are to be issued to persons who will operate such stations in the public interest and not for the purpose of permitting such persons to transfer the license to another person."

The order said that completion deadlines specified on a construction permit are designed "to insure that the frequency shall be utilized with dispatch and that the permittee be not allowed excessive time as he deems proper."

The notice continued:

Similarly the Commission is of the opinion that a construction permit should be forfeited if the permittee signifies definitely that he does not intend to complete construction and should also classifiy, in the case where the permittee enters into a contract to assign or transfer that permit, as the time the station enters on program tests.

The proposed new rules are identical for AM, FM, and TV with two exceptions: (1) the rule applies in the AM and FM rules to permit transfer of an AM or FM permit in a package with its FM or AM affiliate is omitted in the television rules; (2) different classes of "major modifications" are given for AM, FM, and TV.

Following is the text of the AM and FM rule (Section 1.314) with editor's notes indicating points of departure in the FM (Sec. 3.215) and TV (Sec. 3.615) versions:

A construction permit shall be assigned for the assignment of the permit or transfer of control of the permittee corporation shall have been entered into by the permittee or if an option shall have been given by the permittee for such assignment or transfer prior to the time the station has actually commenced program tests in accordance with the applicable Commission Rules concerning such tests; provided, however, that this paragraph shall not apply to contracts or options relative to the pro forma assignments or transfers outlined in 1.323(b) of the Commission's Rules.

The Commission will carefully scrutinize contracts or options, entered into prior to the time the station has actually commenced program tests, in order to determine whether the permittee has been given the option to transfer or assign the permit or transfer of control of the permittee.

'49 BILLINGS

TOTAL billings for the four major radio networks in 1949 were $187,830,799, a decrease of 5.6% below the total for 1948, according to computations released last week. By networks, total gross billings were:

FCC Actions

NEW AM station at Springfield, Ill., was granted by FCC last week and improved facilities were authorized for four existing stations, including approval to KNEW Spokane, Wash., for switch from 1430 kc to 790 kc, using 5 kw directivity. Authorization for one AM outlet and two FM stations were deleted, for first in 1950. Three station transfers were approved. Details and other FCC actions may be found in FCC ROUNDUP on page 72 and ACTIONS OF THE FCC beginning on page 66.
MOTHER LOVE

This cat not only takes care of her own kittens, but she’s adopted a baby squirrel as well. She goes all out to see that the little ones get all the care and attention they need.

In Baltimore, there’s a radio station that goes all out for its advertisers. It’s W-I-T-H, the BIG independent with the BIG audience.

W-I-T-H regularly provides its advertisers with more home listeners-per-dollar than any other station in town. And, in addition, a survey made under the supervision of the Johns Hopkins University showed that of all radios playing in barber shops, 49.3% were tuned to W-I-T-H.

That means low-cost results. That means that small appropriations accomplish big results on W-I-T-H. Call in your Headley-Reed man and get the full W-I-T-H story today.

**FCC BUDGET**

FCC is slated to receive a slight increase in appropriations for fiscal 1951—primarily for additional television research and equipment— if Congress approves budget recommendations submitted by President Truman last week.

In the new proposed budget report to the 81st Congress Monday, the Commission was tabulated for $6,914,600—a 2.7% increase over 1950’s total appropriation of $6,737,000.

The budget proposal seeks no specific appropriation for a general newscast and implies the Commission has already expressed interest. Nor did FCC ask for such a fund, it was learned. It was not known whether the overall budget proposal prepared by Congress, would permit a broad-scale probe in event FCC should choose to launch one.

The Budget Bureau described FCC’s recommended appropriation as an increase of $177,600 over 1950. FCC officials, however, placed the actual boost more in the neighborhood of $75,000 or $80,000, allowing for recent pay increases and certain obligations carrying over.

State Dept’s international information program, including Voice of America programs, also is slated for a slight increase, covering expenses for intensified Voice programming. Voice is slated to receive over $11,500,000.

**Voice’ Budget**

President Truman urged $36,645,000 for fiscal 1951 compared to $37,300,000 actually allocated at present for international information and educational exchange activities. Latter sum, however, included a deficiency payment of $4,000,000 and a supplemental amount of $11,500,000, mostly for construction of new broadcasting facilities and equipment.

“Dedicated assignment of frequencies, increased by development of new uses of radio, requires the Commission to engage in technical research to make sure the public receives the best possible utilization of the available radio spectrum,” the President pointed out, citing the need for additional television research and equipment.

“The Commission has had to impose a ‘freeze’ on television applications until certain technical problems are resolved and important basic work is performed,” the President asserted. The existing backlog of AM applications on hand should be reduced normal by the close of 1951. The requested increase in this category is due to additional television activities.”

The proposed budget would provide for a maximum of 13,75 permanent positions compared to 1949’s 1,423 and entail a salary expenditures of $5,854,841—or less than 1949’s $5,867,918.

In urging $36,645,000 for the State Dept’s information program, President Truman reminded that a substantial portion of the improved domestic and overseas radio transmission facilities authorized by the 1950 supplemental will be in operation in 1951. Scheduled are an average of 35 hours of Voice programming per day in approximately 52 languages to a potential audience of 282 million persons.

Under President Truman’s breakdown, $11,065,548 would be used for program expenses and $695,384 for establishment of still newer radio facilities. President Truman called for additional funds to enable Federal Trade Commission to “expand its anti-monopoly legal case work to take care of the increased number of complaints of monopolistic practices received from the public.”

FCC would be given $4,225,000 in fiscal 1951 compared to its initial 1950 appropriation of $3,650,000.

Toward the 17th decennial census the President proposed a 1951 appropriation of $29,750,000. It was pointed out the census will cost approximately $82,000,000, of which $52,761,000 has already been appropriated. Included in the census will be tabulations of AM and TV receivers.

**SPAC MEET**

A RESOLUTION expressing heartfelt appreciation to Niles Trammell, NBC board chairman, was passed last Thursday at a one-day combined meeting of NBC’s 1949 and 1950 Stations Planning and Advisory Committees.

The meeting, headed by Clair McCollough of the Mason-Dixon Group, and newly-elected chairman of SPAC, unanimously passed the following resolution:

“We are convinced, beyond doubt, that such a job could only have been possible under exceptional leadership.

“Now therefore be it resolved that the combined Stations Planning and Advisory Committee of 1949-1950, in behalf of the stations of the network, which it represents, does go on record as expressing to Niles Trammell, ‘Mr. Radio’ himself, heartfelt appreciation for this enviable achievement;

“And further does extend to Mr. Trammell our congratulations on his well-earned promotion to chairman of the board of NBC;

“And does pledge to him and his capable staff our continuing wholehearted support.”

Mr. Trammell welcomed the group at the morning session, which was told of the company’s reorganization by President Joseph E. Clevenger and Denny, executive vice president, president.

Also discussed were sales prospects, with Walter Scott, eastern sales manager, speaking in the absence because of illness of Harry C. Kopf, vice president in charge of radio sales; program plans, discussed by Thomas McCrory, national radio program director, and promotion activities, with Charles P. Hammond, vice president in charge of advertising and promotion, speaking.

A sub-committee was appointed to select a date and site for the 1950 affiliates convention.

The afternoon session was devoted to television, with Sylvester L. Weaver, vice president in charge of the TV network, presiding. George H. Frey, director of TV sales, discussed sales prospects.

A dinner at New York’s Hamp-shire House concluded the meeting.

Members of the 1950 SPAC attending the meeting were: Mr. McCollough, Harold Essex, WJSJ-AM Winston-Salem, N. C.; Milton Greenebaum, WSSM-AM Spartanburg, Mich.; Howard Pulf, WSPA Montgomery, Ala.; newly elected SPAC secretary; Walter Damm, WTMJ Milwaukee; Jack Harris, KPRC Houston; Walter Zasgoda, WDOD Boise, Ida.; Ewing Kelly, KCRW Sacramento; John M. Outler, WSB-TV Atlanta, and John Murphy, WLWT (TV) Cincinnati.

Also attending the meeting were these members of the 1949 SPAC who were not re-elected:

- Martin Campbell, WFAA Dallas; Harry Bannister, WWJ Detroit; Harold Burke, WBAL-TV Baltimore; Jerry Harris, WSTD Jackson, Miss., and Ed Youem, KGBH Billings, Mont.

**NBC Group Honors Trammell**

These broadcasters were among those attending the first meeting of NBC’s 1950 Stations Planning and Advisory Committee in New York, Jan. 11. L to r: Sitting—Jack Harris, KPRC Houston; Clair McCollough, WGAL Lancaster, Pa., and Mason-Dixon Group; Howard Pill, WSPA Montgomery, Ala.; John M. Outler, WSBC-TV Atlanta; Standing—Ewing C. Kelly, KCRW Sacramento; Calvin, John Murphy, Crosley Broadcasting Inc.; Harold Essex, WSJS Winston-Salem, N. C.; Walter J. Damm, WTMJ Milwaukee; Milton Greenebaum, WSSM Spartanburg, N. C., and Walter Wagstaff, KIDO Boise.

**Coy To Testify**

FCC CHAIRMAN Wayne Coy and other top-ranking members of the Commission are scheduled to appear before a House Appropriations subcommittee early this week to testify on the Commission’s fiscal 1951 budget.

NARBA SNAG Clear-Channel Decision Now Urged by Cullum

FOR THE GOOD of U. S. broadcasting the FCC should decide the clear-channel case—now almost five years old—before undertaking any further NARBA negotiations.

This view was voiced last week A. Earl Cullum Jr., Dallas and Washington consulting radio engineer [CLOSED CIRCUIT, Jan. 9]. Mr. Cullum at one time reportedly was offered and rejected the post of chief engineer of the FCC.

"Regardless of individual views," he wrote, "we feel that the broadcasting industry in the U. S. would be much better off to have a clear-channel decision, even if it is not satisfactory to each and every broadcaster, than to have the clear-channel case drag on indefinitely."

He pointed out that the NARBA conference in Montreal, which recessed when the U. S. refused to accede to Cuban channel demands [BROADCASTING, Dec. 5, 12, 1949], in letters being sent to clients by

is slated to resume in the U. S. April 1 after U.S.-Cuban conferences starting Feb. 1.

If FCC cannot issue a clear-channel decision by Feb. 1, he maintained, then the U.S.-Cuban meeting should be put off.

Mr. Cullum said the U. S. delegation at Montreal was "seriously handicapped by not having a definite decision in the clear-channel case, and it is not fair either to that delegation or to the broadcasting industry for the principles involved to remain unsettled." He asserted:

In giving consideration to the matter, you may wish to endeavor to get the clear-channel issues settled in a way that would be most favorable to your present and future broadcast activities, but we feel that your main effort might well be directed toward obtaining a general settlement for the welfare of the broadcasting industry as a whole, in order to help guard against the danger from foreign encroachment on broadcast channels used by the U. S.

Mr. Cullum pointed out that, aside from the demands of Cuba, the U. S. and other nations are yet to meet the requests of Mexico, which did not participate actively in the Montreal sessions.

"The inference to be drawn," he said, "is that Mexico may plan to come in later with demands much like the Cuban demands so that between these two countries all U. S. channels would be dominated."

Mr. Cullum continued:

It appears that there is a definite danger involved for the U. S. delegations to participate in further conferences without getting the clear-channel issues decided. It is our feeling that it is in the best interest of broadcasters, for their common good, should act through whatever channels are available to them to bring pressure to bear on Congress, on the FCC, and on the State Dept., for the issuance of a clear-channel decision. . . .

BAB ANALYSES

Laundry-Dry Cleaning Report

ANALYSES of the laundry and dry cleaning business, prepared as ammunition for the radio advertising salesman, have been released by BAB as the third in a monthly series of retail information folders.

The reports point to ways radio advertising should fit into budgets of both laundry and dry cleaning plants.

The dry cleaning analysis shows that industry is spending less than 2.8% of gross sales on advertising, although its own association, National Institute of Cleaning & Dyeing, suggests 5% as a normal advertising expenditure.

Previous issues in BAB's series of retail releases have dealt with furniture dealers and jewelers. The February folder will be devoted to banks. The automotive industry will be scrutinized for the March release.

GEORGIA GROUP

Winter Meet Opens Tomorrow

EXECUTIVES representing more than 40 stations are slated to attend the winter meeting of the Georgia Assn. of Broadcasters Tuesday and Wednesday (Jan. 17-18) at the Hotel Dempsey, Macon.

Registration begins Tuesday at 3 p.m., after which a cocktail party will be given by Macon stations WML, WIBB WMAG WNEK. The banquet at 7 p.m. will be addressed by McKibben Lane, general counsel of the Bibb Mfg. Co.

Business session will get underway Wednesday at 10 a.m. Ardel Nation, from Boys Estate, will tell of the work which radio did in the 1949 fund-raising drive. Scheduled business also includes a report on the 1950 Radio Institute, discussion of a libel law to protect radio newsmen and consideration of special forms for use in giving free time so that those benefited will know what is being given in dollars.

Philip D. Macarow

PHILIP DANIEL MACAROW, 53, vice president and director of McKim Adv. Ltd., Montreal, died at his home on Jan. 7. Joining McKim in 1936, he became a vice president of the agency in 1946.

**SET PRODUCTION**

By R. C. COSGROVE

THE radio-television industry in 1949 fully justified the label of America's "fastest growing industry" by establishing new records in production and sales. Only during wartime did its rate of production, as measured in dollars, surpass that of 1949. And the outlook for 1950 is even more promising.

RMA statistics, projected for the entire industry, indicate that about 2,750,000 television receivers and more than 10 million radios were manufactured in 1949 and that total manufacturers' set sales exceeded $800 million. Television set sales at the retail level in 1949 probably will total between $825 million and $850 million alone, not counting installation and servicing charges, and radio sales will bring the figure to approximately a billion and a quarter dollars—a new peak in earnings for the industry.

**'50 Outlook Promising**

Towards the close of 1949 television receiver sales were accounting for almost 70% of the dollar volume done by set manufacturers with radio sales making up little more than 30%. In 1948 the situation was reversed at about the same ratio in favor of radio.

However, in spite of the sensational success of television, radio can by no means be written off as a has-been. In fact, most set manufacturers found out too late in 1949 that there is still a healthy demand for radios, not only in non-television areas but even in cities well served by the newer form of entertainment.

Actually, the radio audience has been expanding almost as rapidly as the television audience due to the high rate of sales of portables and auto sets for outdoor listening.

Some of the more popular radio programs and radio stars haven't yet switched to television. Consequently, most families want a modern radio as well as a television set, and many prefer to keep them separate so that they can tune in television and radio programs simultaneously in different parts of the house.

The past year, in addition to establishing new production and sales records, also developed some marked trends in public taste or buying habits.

One of the most interesting of these trends was the rise in popularity of the console or small TV console without either radio or phonograph. This type of console, in the radio field, had virtually disappeared since World War II. Table model television receivers, while still a popular item in the lowest price field, were about equalled in number by consoles and consoles combined, including the large models with both radios and phonographs.

---

**Let WIBW fill your sales silo!**

SALES Managers! Here's a tip from Kansas farmers. These far-sighted operators depend on ensilage (the stuff that's stored in silos) to keep livestock growing when there's a shortage of green stuff.

Incidentally, there's no shortage of green stuff—money, that is—in WIBW's five-state farm audience. You can count on immediate sales when you used WIBW.

At the same time, you'll be filling your sales silo with name preference and build-up demand for your product. You'll find this mighty valuable in keeping your sales growing—especially during seasons that are normally "off".

Let WIBW Fill Your Sales Silo

---

**Mr. COSGROVE**

Another marked trend in 1949 was toward larger picture screens and direct viewing tubes. During 1949 television receivers using the 12½-inch picture tube took the lead over sets with the 10-inch tube, and sales of receivers with the 16-inch tube gained rapidly during the last quarter. The 12½-inch tube and the 16-inch tube are expected to be the most popular types in 1950.

Television receivers in 1949 improved considerably in appearance as cabinet styling, both in table models and consoles, reflected the growing interest of women in television. For it is usually the woman, rather than the man, who wants the set in her home to blend well with her other furniture.

**Production Forecast**

Production estimates for 1950 are still in the speculative stage, but present indications are that the industry will manufacture and sell between 3,500,000 and 4,000,000 television receivers and that retail sales will approach the $1 billion mark on television alone. And radio set sales will add substantially to retailers' income.

Television's continued growth and high rate of set production in 1950, however, are contingent upon the outcome of the broad inquiry being conducted by the FCC. The judgment of the members of this government agency will vitally affect both the industry and the rapidly expanding television audience for years to come.

Of major importance in the development of a nation-wide television system is the question of whether the FCC will lift its "freeze" on new television station authorizations and will open a new band for television's expansion into ultra-high frequencies.

Equally important is the complex question as to whether color television experiments have progressed far enough to assure a public service that will compare favorably with the highly satisfactory black-and-white television broadcasting of today. The indus

RICH BONANZA DUE LANG-WORTH MEMBER STATIONS IN 1950

Nation-wide survey* just completed proves record-breaking commercial use of Lang-Worth Transcribed Programs by advertisers and agencies.

12 months of 1949 showed 60% increase over 1948 . . . 160% increase over 1947!

Survey indicates that agencies and advertisers will spend well over 5 million dollars sponsoring Lang-Worth Planned Programs over Lang-Worth Member Stations during 1950.

Read full details of this increasing commercial trend — initiated and developed by Lang-Worth — in next week’s "Broadcasting" (January 23, 1950).

LANG-WORTH FEATURE PROGRAMS, Inc.

determine winners. Similar pro-
cedure was followed in the ear-
lier selection of state and regional
winners.
Students voiced their own scripts in
the local live competitions as well
as in the televised competitions.
The junior chamber arranged local
contests through its chapters, work-
ing in cooperation with NAB mem-
er stations and radio dealers. It
also arranged state judging panels,
with broadcasters participating in
the transcriptions. Twelve regional
winners were selected from the
state winners.
The four national winners will
receive $500 scholarships and other
prizes in Washington ceremonies
during the week of Feb. 19-25. In
addition to the awards luncheon,
they will be guests of President
Truman, members of Congress
and cabinet members as well as
participate in broadcasts and tele-
casts. At historic Williamsburg, V.
Va., they will repeat their winning
scripts in the House of Burgesses
as guests of Colonial Williamsburg
Inc.
Members of the board of judges are
Morgan Beatty, NBC commentator;
Associate Justice Tom C.
Clark, of the U. S. Supreme Court;
Mrs. Raymond Clapper: Douglas
Southall Freeman, editor and au-
thor; Andrew D. Holt, president;
National Educational Assn.; J.
Edgar Hoover, director, FBI; Ed-
ward R. Murrow, CBS commen-
tator; James Stewart, actor.

Management

LEO HOWARD, formerly com-
mercial manager of WKY Oklahoma
City, joins KDMS, new 1 kw out-
let on 1290 kc in El Dorado, Ark., as
manager. KDMS will be completed
in late February. Meantime, Mr.
Howard is headquarters in Tex-
arkana, Tex.
Wilton Gumannor resigns
as general manager of KROW Oak-
land, Calif. Before going to KROW,
he was manager of KSPO San Fran-
cisco, manager of KSRQ Santa Rosa
for six years and before that with
Don Lee Network for seven years.
His future plans have not been an-
nounced.

JOHN PATTISON
WILLIAMS, exec-
utive vice president of WING Dayton
and WIZE Springfield, Ohio, is the
father of a girl, Susan Davenport.
DAVID W. ADAMS, formerly com-
mercial manager of KCBS San Bernar-
dino, Calif., promoted to general
manager of station. Station also has announced expansion of its offices at 770 Mh St.

FRED SHAW, formerly commercial
manager of CFAC Calgary, Alta., ap-
pointed manager of CFGJ Calgary.

succeeding DONALD H. MCKAY, who
was recently elected mayor of Calgary
for 1950.

HARRY WHITE succeeds LARRY
SCHREER as general manager of
KWCT Barstow, Calif.

ARTHUR E. HALEY, general man-
ger of WBMS Boston, resigns. His
future plans have not been announced.

ROBERT McLELLAN, formerly in
sales at KTXL San Angelo, Tex., ap-
pointed manager of station. He has
been with KTXL since its inception
in 1947.

ALBERT E. FOSTER, former director
of media for Lever Bros., appointed
station manager of WLAW Lawrence,
Mass., in charge of operations and
personnel at Boston, Lowell and Lawrence
offices and studio and transmitter.
He had been with Lever organization for 25 years, principally
in advertising.

MIKE HOPKINS, formerly of CHUM
Toronto, appointed manager of CKLB (formerly CKDO) Oshawa, Ont.

TOM KRITZER, formerly with KTSF
San Antonio and later manager of
KDID-Duman. Tex., appointed
manager of KGNC Amarillo. He be-
gan his career 10 years ago with
KGNC, and most recently was sales
manager of that station.

BENEDICT GIM-
BEL, Jr., president
and general man-
ger of WIP-AM,
Philadelphia, named to sponsoring committee of
Radio & Television Award Dinner
slated for New York in March.

CHARLES H. GARLAND, general
manager of KQOL Phoenix, Ariz., and
Avis Dear have announced their
marriage.

HOMER GRIFFITH of KAFY Bakers-
field, Calif., executive vice presi-
dent and general manager of KFAB,
was named head of his own radio repre-
sentative firm, and Myrtle May Morgan
have announced their marriage.

CAB Board Meeting

INCREDIBLE commissions for Ca-
nadian advertising agencies, copy-
right fees for radio and NARBA
will be topics featured at the first
1956 meeting of the board of di-
rectors of Canadian Assn. of
Broadcasters, held at the King
Edward Hotel, Toronto, Feb. 6-9.
The new schedule of depreciation
allowances announced by Canada's
Dept. of National Revenue at the
year-end, and future hearings of the
Royal Commission on Arts,
Letters and Sciences, also will be
discussed at the meeting. Final
plans for the CAB annual conven-
tion, March 26-30, at Niagara
Falls, Ont., are also on the agenda.

FEATURE

(Continued from page 26)
try has testified to the contrary and
believes more time is needed to
develop color television. The
industry also hopes that no color
system will be authorized which
will make obsolete the more than
3,500,000 television sets in use to-
day.

RMA hopes these complex prob-
lems may be resolved through the
establishment of the proposed all-
industry National Television Sys-

tem Committee which would rec-
ommend standards for the future
operation of color television sta-
tions just as a similar committee
did for black-and-white television
in 1941.

About 40% of the population of
the United States is still outside the
range of the nearly 100 television
stations on the air, but the
50-odd areas that have television
service today are far from satu-
rated. Unlike the radio field, the
television industry is not in the
replacement business. Almost
every TV receiver sold today goes
into a home that hasn't had tele-
vision service in that area. And there are plenty of homes not yet equipped
with their first TV set—at about 88%
of them—in TV reception areas.

Present prices on television re-
cievers are within the range of
average family budgets, and a rising
percentage of any TV area will show about as
many aerials on modest row houses
as in well-to-do suburban areas.

Today's vast radio audience, made possible by the low-priced
radio, and the day is not far off
when large volume production will
make the television receiver almost as
accessible.

CLARK NAMED

Is Pearson Chicago Chief

GEORGE W. CLARK, who has
been associated with the John E.
Pearson Co., station representative,
since May, 1949, has been named
manager of the Chicago office, ef-
fective immediately. John P.
Rohrs, formerly with Belknapp &
Thompson, Chi-
gaco, will join the firm's Chi-
gaco sales staff.

Mr. Clark

The Chicago office of WLBW
Cincinnati. Later he was assistant
manager of WLW'S New York of-
Fice. He resigned from that post
to join MBS and from there moved
to the Grant Advertising Agency
for more than a year before join-
ing the firm.

Mr. Rohrs has been associated with the B & T firm as promotion
director, selling advertising and
servicing both large and small
promotions for such companies as
John F. Jelke, Hotpoint, Thor and
Peter Fox Brewing.

Mr. Rohrs

Page 28 • January 16, 1950
It is with a great deal of pride and satisfaction that KTKO announces the election of Edgar T. Bell as vice president and general manager, and the appointment of E. L. Colbourn as sales manager.

Mr. Bell comes to KTKO with many years of experience in the management field having previously been associated with the Oklahoma Publishing Company of Oklahoma City as business manager where he had active supervision over Radio Stations WKY, Oklahoma City; KLZ, Denver, and KVOR, Colorado Springs.

Mr. Colbourn was associated with Mr. Bell for many years in charge of sales at WKY, Oklahoma City. In 1945, Colbourn resigned from WKY to become an account executive with the Frederic W. Ziv Company, with headquarters in Houston, later moving to KABC, San Antonio, where he has just resigned as commercial manager.

Maryland: Free Again

ALTHOUGH YOU probably wouldn't detect it from the Washington dispatches, radio won a thumping victory last week in the U. S. Supreme Court. The court killed Baltimore's gag rule on reporting of crime news by rejecting the appeal of the State of Maryland, and thereby struck another blow for the freedom of news.

The fight was waged and won by radio. Three Baltimore stations—WCBM, WTH and WFBF, as well as a former WTH newsmen, were cited for contempt for broadcasts of a confession given by a murderer. Baltimore newspapers for a decade had found it painfully expedient to consult judges on what was permissible to print without being in contempt of court.

On appeal, the State Supreme Court reversed the lower court, holding that the Rule was "in the nature of censorship." It placed radio on equal footing with the press.

So effective was the Court action was to sustain the Maryland tribunal's finding, despite the unusual opinion of Justice Frankfurter presumably leaving the door open for future adjudication of related issues.

Three Baltimore radio stations, one of them not only for itself but for the press, the archives, we hope, will duly record this fact.

Radio Anonymous?

LAST WEEK hearings were held before the Senate Interstate & Foreign Commerce Committee on the Langer Bill (S-1847) to outlaw interstate advertising of alcoholic beverages.

In 1947 there were hearings on virtually identical legislation. The Committee refused to report any one of several bills. The following year there were further hearings. The committee then voted against them by the narrowest of margins—6 to 5.

In the intervening periods the dry groups—from pulpit and in their periodical prints—have been hammering away. The move to prohibit advertising is an obvious first step toward prohibition to return to prohibition.

This year of 1950 is an election year. Politicians have been besieged by constituent drys to vote for the Langer Bill. Since the convening of the new session on Jan. 3, every issue of the Congressional Record has sagged under the weight of resolutions and petitions adopted by societies and associations supporting the Langer Bill.

Politicians are sensitive to such pressures when standing for reelection.

Passage of the Langer Bill could deal a crippling blow to radio. The drys are not aiming merely at hard liquor advertising: they are shooting at beer and wines too. While the latter represent just one or two percent of radio's national revenue, they are important income sources both for radio and TV.

The Langer Bill strikes at advertising "in interstate commerce." All radio is interstate. So even the 250-watter in Dead Center, Tex., would be affected.

As long as alcoholic beverages are legal, it is hard to fathom how the advertising of them can be legislated out of existence. Yet, indiscrret legislation can run the legislative gauntlet if the opposition sits on its hands.

There was strong opposition to the Langer measure. The Advertising Federation of America was there. So was the Assn. of National Advertisers and the American Assn. of Advertising Agencies, and the various representatives of the printed media.

They realized that if this discriminatory legislation is passed, it would set an extremely dangerous precedent. Why about cigarette and proprietary advertising?

In scanning the list of appearances prior to the opening of the hearings Thursday, we failed to find radio represented. Once before the Senate, radio had failed to file an appearance. Could it be that radio does not regard the measure as of sufficient importance to justify an appearance? Or does radio leave its case in the hands of the associations representing other media?

Matter of State

LAST THURSDAY Secretary of State Acheson addressed the National Press Club in Washington "on the record". Radio, however, was precluded from a direct pickup. On the ground that the official would talk extemporaneously, the NAB neglected to file an appearance. Could it be that radio does not regard the measure as of sufficient importance to justify an appearance? Or does radio leave its case in the hands of the associations representing other media?

WOMAN'S PLACE is in the home—and Gene Burke Brophy finds her way into almost every home in the Salt River Valley area, through KRUX Phoenix. Some 25 of America's fairer sex are owners and operators of radio stations, and Mrs. Brophy belongs to this exclusive group. Her 21-year record of accomplishment in the broadcasting business rivals that of most men in the field.

Gene Brophy was born in Norseland, Minn., March 11, 1910, to George and Kathryn Burke. The "Gene" is a contraction of Imogene, long since discarded by the KRUX executive. She received her early schooling in Norseland and Minneapolis.

In 1928 Mrs. Brophy embarked on her radio career. Following a series of special courses at Los Angeles City College she got a job as a secretary at Warner Brothers' KFWB Hollywood. But she was not long destined for dictation and typing. When a continuity writer failed to put in an appearance one day, she hurriedly pulled out a needed commercial program. The sponsor liked it and the then-Miss Burke became one of the station's first feminine writers.

In eight years with KFWB, she progressed through each stage of the station's growing operation, efficiently handling various phases of the work in traffic, programming, creating and voicing commercial and sustaining shows.

When in 1936 Mrs. Brophy left KFWB to join Columbia Concerts Corp., a subsidiary of CBS, her unusual organizational ability came to the fore. She assisted in the creation of the Hollywood Artists' Bureau for Columbia and for four and a half years headed up the selection and supervision of CBS talent for programs originating in Hollywood.

While with Columbia Concerts she directed promotion and publicity for several concert tours. Her job included a good many talent hunts throughout the nation, searching for both radio and motion picture material. She interviewed many artists—upcoming and famous. In addition to these tasks she was responsible for the office management of the Columbia Artists Bureau.

In October of 1941 Mrs. Brophy accepted a civil service appointment as Chief of the Radio Division for the Office of Central Intelligence in San Francisco and shortly thereafter began a radio broadside of psychological warfare against the Japanese.

Before the establishment of complete offices for OCI, came Pearl Harbor and war. When, a few days later, the West Coast had its first wartime blackout, President Roosevelt called GENE BURKE BROPHY

YOU MIGHT GET A 175-POUND WOLF*—

BUT...

YOU NEED WKZO-WJEF TO GET BUSINESS IN WESTERN MICHIGAN!

WKZO, Kalamazoo, and WJEF, Grand Rapids, are far and away the best radio buy in Western Michigan.

This strong CBS combination has a rural superiority that's proved by BMB figures and farm-program mail pull from every corner of the area.

WKZO-WJEF have equally impressive urban records in Kalamazoo and Grand Rapids. For Total Rated Periods (Oct.-Nov. '49) both WKZO and WJEF got top Hooperatings in their important home cities.

By projection you can figure that WKZO-WJEF deliver about 56.5% more listeners than the next-best two-station selection in the area. Yet they cost 20% less!

Get all the facts about WKZO-WJEF! Write to us direct or ask Avery-Knodel, Inc.

*A wolf weighing just over 175 pounds was killed on Seventy Mile River in Alaska.
SALE-ER SUIT...

DULUTH, MINN.—"I’m well suited to go sale-ing for you in the big Duluth-Superior Market," says Otto Mattick as he breezes along on his rearpedal motoskates. "I’ve got 5,000 watts on 610... my own and CBS personalities and programs... and a continuing, all-out listener-winning campaign."

That’s the KDAL story, in brief. But there’s nothing brief about KDAL’s success story for advertisers. Let us add a chapter about you and your products. It’s a cinch. Try us and see!

HOW TO GET RICH

"THERE must be a Republican in the woodpile," suggested Robert T. Mason, WMRN Marion, Ohio, after scanning U. S. Treasury Dept. second announcement for savings bonds. This sentence aroused his curiosity. "Remember, savings bonds are a safe investment—guaranteed by your government to return three dollars for every four you invest!"

CBS HOLLYWOOD

IEBW, RWG Plan Joint Action

RECOMMENDATION for joint action against CBS Hollywood by IEBW and Radio Writers’ Guild, both of whom have failed to reach agreement in negotiations with the network, was made Jan. 6 at a board meeting of the Hollywood council of National Assn. of Broadcast Writers.

Making up NABUG are Radio and Television Directors Guild, RWG, AFRA, NABET, IEBW, Screen Publicists Guild and Office Employees International Union, all of whom were represented at the meeting. Claude McCue, executive secretary of AFRA, is president.

Both IEBW and RWG have filed strike notices against the network; former seeks a salary increase to $52.50 for a 40-hour week for nine stage set-up men [BROADCASTING, Jan. 2]; latter is asking for "over $100" for 10 continuity off writers.

At the same meeting, NABUG approved action for joint investigation of malpractice against union members in Los Angeles stations and joint action against stations, if necessary. Union suspets, for example, use of announcers as actors with rerun permission for announcing chores only.

Recordings Bill

TRANSPORTATION and accept ance of "obscene" phonograph records or electrical transcriptions interstate commerce would be expressly prohibited under provision of bill introduced Jan. 6 by Rep. Emanuel Celler (D-N. Y.). The measure (HR 6622), which would amend Sec. 1462 Title 18 of the U. S. Code, would cover any article "capable of producing sound" — certain books, pamphlets, motion picture film, advertisements, drugs. Referred to the House Judicary Committee, the measure would alter the Code to include a above-mentioned items rather than just literature.

WJR Newark, N. J., will air annual All-Sports Dinner, sponsored by New York Athletic Club, Jan. 19, from 9-9:30 p.m.
On four special Saturday night broadcasts starting at 11:15, KDKA listeners were asked to telephone contributions to a special campaign for Children's Hospital. Thousands of calls poured in, from 335 communities in 23 states! Surprising coverage? Not for KDKA, the 50,000-watt station with a vast audience, by day and by night, in almost 200 MBM counties.

MARCH OF DIMES
Radio-TV Promotion Shows

RADIO stations throughout the country are receiving a series of electrically transcribed shows and spot announcements, and video stations are receiving 10mm sound films to promote the 1950 March of Dimes campaign. The programs are for use locally Jan. 16-31, this year's March of Dimes drive dates. Recordings and films feature some of the top talent in the country, and, with the "discs for dimes" and spot announcements, are expected to account for a good per centage of the goal set this year by the National Foundation for Infantile Paralysis.

Potts Adv. Incorporates

R. J. POTTS-Calkins & Holden Advertising Inc., with headquar ters at 215 Pershing Road, Kansas City, Mo., announces that, effective Jan. 1, the organization started operating as a corporation instead of a partnership. All partners remain as officers of the corporation and their assets will be transferred to the corporation in their entirety, it was stated. The management and personnel of the organization will remain very much the same as it was in the partnership, the announcement stated. The firm also maintains offices at 247 Park Ave., New York, and 333 N. Michigan Blvd., Chicago.

BOB MILLER, farm service director of WRFD Worthington, Ohio, named program director of station, effective immediately. He formerly was associate farm director of WLW Cincinnati.

WINSLOW BETTINSON, formerly program director of WIBB Portsmouth, N. H., appointed director of station operations for WLYN Lynn, Mass.

EMORY BROWN joins announcing staff of KTTL San Angelo, Tex.

ANNE STEGOS, former associate editor of Suffolk County, N. Y., Watchman, Huntington, L. I., joins script and continuity department of WHLI Hempstead, L. I. She replaces Muriel Abrams, who resigned to be married.

 STEWART McPHerson, formerly with BBC, joins WCCO Minneapolis Jan. 18 as m.c. of new quiz show.

BOB ROTI appointed to announcing staff of WMBG Richmond, Va.

DAN KEELER, of KSL Salt Lake City announcing staff 1945-47, rejoins station, dividing his activities between AM and TV.

SY MERNs, former production man with WINS New York and play-by-play announcer for WDKY Cincinnati, Md., appointed program director for WMON Montgomery, W. Va. He replaces Jim Holmes, resigned to do graduate work in dramatic arts.

RICHARD F. LOW, former continuity director for KRON Omaha, Neb., named program director of KBON-AM-FM.

CHARLES TESSER, recent graduate of Television Workshop, New York, joins staff of WSYR-TV Syracuse, N. Y., as photographer.

CARL VICTOR LITTLE. newspaper columnist of Houston Press, joins KXYZ Houston as commentator.

CHARLES SHOWS signed to seven-year exclusive contract as writer of KTIA (TV) Los Angeles Time for Beeny children's show.

CHARLIE ACKERSON, ballad singer formerly with KWK St. Louis, rejoins station as m.c. of Charlie Ackerson Show.

COLLINGSWORTH (Buddy) HOL-MAN, former staff announcer for WTAL Tallahassee, Fla., becomes staff announcer for WMBR-TV Jacksonville, Fla.

LaVERNE WHITAKER named stage assistant to Jack McElroy, e. o. of ABC Breakfast in Hollywood. She succeeds Monica Whalen, resigned.

RAY DAVIS, formerly with WNAV Annapolis, Md., WDVB Dover, Del., and WSM Nashville, joins announcing staff of WASA Havre de Grace, Md.

JULES PEWOWAR, program director at WMOR (FM) Chicago, joins Herbert Leavens Assoc., Chicago television production firm, as production manager. He will continue with his station work.

TOMMY THOMPSON, for past two years in ABC Hollywood mail depart ment, transferred to KECA-TV Hollywood as program assistant. Prior to joining ABC he was with Armed Forces Radio Service in Tokyo.

ROD HENDRICKSON joins WTOP Washington as m.c. of new Tues.-Thurs. show sponsored by Wise Potato Chip Co., Berwick, Pa.

WILLIAM R. KLEIN, formerly guest relations manager for Don Lee Broadcasting System, named coordinator of operations. He replaces Jean LANG, resigned to complete studies at U. of Southern California.

JERRY FRANKS, KECA-TV Los Angeles stage manager, leaves Feb. 20 for six-weeks leave of absence during which time he will serve as stage and technical director of traveling show sponsored by Union Oil Co. Tommy Thompson replaces him during his absence.

DONNA KLINE joins KTIA (TV) Hollywood as chief costume designer on five weekly Time For Beeny children's program.

LES MITCHEL, producer-director of Skippy Hollywood Theatre, elected president of Sunset-Luna, Calif., Chamber of Commerce.

MILTON Q. FORD, morning man for WWDC Washington, is the father of a boy, Michael Eric.

RUSSELL LONG, program manager of WCSC Charleston, S. C., and ELIZABETH ROEBUCK, on staff of WCSC as Carolyn Coy, have announced their marriage.

GEORGE SNELL, of KEEN San Jose, Calif., appointed radio chairman of Santa Clara County Committee for Hoover Report.

DON STEVENS, announcer at WSB Atlanta, Ga., is the father of a girl, Marilyn Donna, born Jan. 5.

BERTHA KURTMAN, A B C-TV broad casting supervisor, and David Williams of Time and Life, have announced their marriage.

HOLIDAY GUIDE
Offers Aid to Advertiser

THE COMMERCE Dept. announced last week the compilation of a booklet which contains a calendar of specially designated days, weeks and months to be observed during 1950. It also said pointedly that retail sales and profits could be boosted by a better coordination of advertising with national holidays and special observances.

Commerce guide to the businessman lists days, weeks and months of special promotion and celebration of interest to the business field. In addition, legal, religious and other holidays are included. Information contained in this issue, third since the war's end, was furnished by trade associations, secretaries of state governments and other such organizations, the Department said. Also included is the purpose of each event as stated by its sponsor.

A total of 154 days, 124 weeks and 36 other celebrations are included in the booklet, called "Special Days, Weeks and Months in 1950," which may be obtained from Superintendent of Documents, Washington 25, D. C., or from the Dept. of Commerce field offices for 15¢ per copy.

BOSTON & Maine Railroad discovered during the holiday season that radio has both power and flexibility as an advertising medium, Jan Gilbert, timebuyer, Harold Cabot & Co., Boston, reports.

A few days before Christmas, mail piled up at Boston's North Station to an uncontrollable degree necessitating additional help to handle it. The railroad called the Cabot agency and placed a schedule of announcements on four Boston stations.

First spot went on the air at 10:50 a.m. and others were scheduled through 2:50 p.m. At 11:50 p.m., the railroad advised the agency that it had more men than it could hire. Balance of the schedule then was cancelled. A total of 2,950 applicants reporting to North Station, Miss Gilbert notes.
LISTENERS’ CHOICE
In SAN ANTONIO only KTSA broadcasts all the Big CBS programs on AM and FM

DOUBLE-TALK
That Means Something

NOW, on KTSA AM/FM, San Antonio listeners get simultaneous AM and FM broadcasts of complete program schedules, including the BIG Columbia Broadcasting System network shows, with favorite CBS stars and personalities.

ALL THIS, in addition to new, local programming and special events broadcasts, new public service features, and an amazingly COMPLETE coverage of the NEWS, adding the tremendous news-gathering resources of both the SAN ANTONIO EXPRESS and the SAN ANTONIO EVENING NEWS to KTSA’s already recognized facilities.

to watch progress in construction of new
WKAS-TV television tower. Lo-
cated on a central downtown corner, four
blocks from tower's site, telescope is
free to public. Attendant is on hand
to keep instruments in focus and an-
swer questions. Limit time is imposed
on gazers only when necessitated by
tower crowding. Waits-high bearing station's
call letters and information about tower surrounds telescope
on three sides. Tower will be completed
by Feb. 18.

Bowl Promotion

WOODEN BOWLS containing two
orange and package of Gillette razor
blades were sent to Bay Area radio,
sport and advertising editors by KCBS San
Francisco to promote its January
broadcasting of Rose Bowl and Orange
Bowl football games. Bowls were
wrapped in Christmas paper, sent to
Colgate-Palmolive colleges. Idea was originated by Wal-
ter Conway of KCBS promotion de-
partment.

Sports Promotion

PROMOTION for KROC Rochester, Minn., recently, involved choosing of
most outstanding athlete in Roches-
ter area for 1949 and sending him,
exclusive seeing by Cotton Club and Elec-
tivities in Dallas, Tex. Darrell Coch-
ran, U. of Minnesota athlete, won con-
test, was flown to Dallas and en-
tered in the ball game before leaving
his campus. He was met in Dallas by
city's Chamber of Commerce and
was included in visits with North
Carolina team, sat on the bench with
them and took part in numerous other
celebrations in conjunction with game.

PROMOTION

pictures taken in Dallas are now dis-
played in prominent downtown win-
dow. Both KROC KROS sales and pro-
motion department was in charge of
total operation.

KBON-FM's Thanks

THREE-fold bullish bulletin issued to public
by KBON-FM, Transcar Radio station in
Omaha, Neb. Folder contains results
of balloting on approval of bus
radio and data concerning completion
of installation in all Omaha bases.
Picture of business leaders present
when ballots were counted is included,
as well as list of votes, pro and con,
tabulated by bus routes.

Coverage Data Folder

400 two-color illustrated folder sent
to trade by KSD-TV St. Louis
promoting its coverage of outstanding
local events and containing coverage
inside. Folder is made up of
coverage map with primary and sec-
ondary areas outlined, and circles
around sections outside coverage areas
where satisfactory reception has been
reported. Details of St. Louis market
also are included.

Postcard Distribution

TWO postcard mailings recently sent
to 500 grocers in coverage area by
WHBC-AM-FM Canton, Ohio. First
concerns Buckeye Potato Chips. Two
pictures of bags of potato chips are
featured on card under heading, "You're In the Chips Bag!"
Second promotes Nucoa Mar-
garine on bright yellow card.
Mess-
agers, in box, featured Nucoca Yodeler's Catchy--Compelling De-
sign--For-Selling Radio Spots Dally
on WHBC & WHBC-FM." Both cards
bear standard, "Stock up--Display--
Say! Radio advertised products
move!"

Sponsor's Letter

LETTER from pleased sponsor sent to
WTJ (TV) Miami, Fla., has been
reprinted and mailed to potential
sponsors and trade by station. Let-
ter, from Senor Don Casa, proprietor
of gift store in Hollywood, Fla., tells
story of his successful use of WTJ.
He says, in part: "... the prestige
of being a television advertiser at this
pioneer period is in itself worth the
cost of advertising regardless of im-
mediate results." Return of $320 on
the program was not commercial on
WTVJ is recorded.

Large Following

IN conjunction with his sixth annu-
ality with WNOY York, Pa., "Doc"
Hayenburg's "Ladies' Lunch Club,
two-hour noonday platter show,
decided to form a club. Free member-
ship cards were offered to all listen-
ers, and 1,000 cards were printed.
By the time all interested listeners had
enrolled, additional 5,000 cards had to
be printed. Party in honor of new
club was held for members, and 4,000
persons who appeared broke 10 year
attendance record for dance hall where
party was held.

Constructive Promotion

OVERSIZE card aimed at construc-
tion material firms sent to trade by
KNX-WCAU Philadelphia newspaper and
carpenter nailing down boards.
Narration reads: "Over 5 million people
in Philadelphia area read every
edition KNX-WCAU inside, including
... Los Angeles County where total
retail sales and total net effective buy-
ing income are the second highest in
the nation.

Full Promotion

ANNOUNCEMENTS of the 48-hour delayed telecast of entire Cotton Bowl
activities and game between Rice and
U. of North Carolina carried by
WFMY-TV Greensboro, N. C., were
distributed by the station not only in
Greensboro area, but in points as far
distant as Dallas, where game was
played. Releases were sent to sports
editors of all advertising news
stations and in WFMY-TV's coverage
area. Copies also were mailed to editors
in Dallas and to coach and to football
coaches of U. of North Carolina.
More than 250 copies were distributed
by Gaines Kelley, general manager of
WFAA-FM Dallas. Numerous
newspaper ads were carried
in local papers, with front page
inserts on day of telecast. Post-cards
telling of game went to 6,000 dealers
and TV set owners. Telecast was
sponsored by four local General
Electric dealers.

Teamed for Service!

OCCASIONED by Kansas City, Mo.'s
celebration of its centennial, blue promo-
tion piece has been sent to trade by
KFRM and KMBC that city. Cover
announces that stations are "Teamed
for Progress in 1960... Inside carry
names and titles of executive
personnel of stations, and detached
map bearing stations' call letters and
message that they jointly offer com-
plete Coverage of Kansas City's Trade
Area!" KFRM is programmed by
KMBC.

Men of WORZ

NEW expansion of flying suarers
provided by WORZ Orlando, Fla. Over
New Year's weekend, members of sta-
tion's staff who are licensed pilots at-
ached a call letter of WORZ to four
planes, and station's slogan, "The Bet-
ter Shows in Town," to fifth plane. Let-
ters and slogan were on long streamer
that glinted in the sun. Planes the made extended flight over Central
Florida and Orlando metropolitan area, attracting wide attention.

Hempstead, L. I. New York.

KEN SODERBERG, formerly with
WMUS Muskegon, Mich., joins KAAS
Austine, Minn., with duties in sales
promotion and program production.

TRADE LAWS

Chamber Asks Reappraisal

THE U. S. Chamber of Commerce
last week called for a "construc-
tive reappraisal" of trade laws and
challenged President Truman's
proposal that the 81st Congress take
complete action on pending legis-
lation to tighten anti-trust laws.

The Chamber maintained that the
"recommended amendment of the Clayton Act would vest broad
new powers to the FTC. Although
labeled a boon to small business,
these concerns are the ones which
would be most hurt if this proposal
became law." It asked for the
"scrapping of "in the light of inter-
pretations of the past decade ...".
... these laws are often applied in an unrealistic, arbitrary manner
inimical to the interests of small, independent business.

The Chamber's views were given
at a news conference held in Wash-
ington's Carlton Hotel during
which Herman W. Steinkraus,
press division, S. C. of C., reviewed the President's message to Congress.
The new patented method for storing • protecting • classifying
Your Phonograph Records...for INSTANT Use!

Read the full story in the Special Edition of "BMI Music Memo" (Feb. 25, 1946), how CLASSOPHONE Pockets save time, work and records in one of the large radio studio libraries, WOR, New York.

Classophone Pockets form snug individual compartments, each holding one record in perfectly upright position, forever preventing warping. Each record occupies its own numbered Classophone Pocket, never in contact with other records, eliminating scratching and chipping.

Classophone Pockets are hinged at the base, firmly anchored in the cabinet into which they are built, suitable for 10" or 12" records. You flip the numbered Pocket forward to withdraw a record; you flip it back in position when you replace record.

Build Any Type Cabinet For Classophone Pockets...From our FREE Plans
Any handy man or carpenter can build the kind of cabinet most suitable for your purpose from the simple plans furnished to purchasers of Classophone Pocket units.

RADIO STATIONS Now Solve Record Problems with CLASSOPHONE

HELEN McDERMOTT, chief accountant of KLAC-AM Hollywood and George Arvantes, local business executive, have announced their marriage.

ROBERT GARLAND, of sales staff at KQO Phoenix, Ariz., is the father of a boy.

DAVE MERLIN, KSOP (AM) - KPIX (TV) San Francisco salesman, is the father of a girl, Amy Eliaztloa.

Respects
(Continued from page 30)

for an immediate report as to morale and general reaction. Colonel Joseph J. Donavan, General Donovan, located Gene Brophy by telephone and she in turn gave the report which a half-hour later was on the President's desk.

From an officeless beginning Mrs. Brophy built and West Coast OCI into a potent propaganda weapon that later became the Office of War Information in St. Francisco. It grew from one employee—herself—to a staff of 500 workers: director of radio, news, administration and interpretation of policy, and pushed as many as 523 programs a week into Pacific fronts, often using five to six shortwave stations simultaneously.

When the Japanese tried to jam these broadcasts she pressed two obsolete RCA circuits into service. The Japs were able to jam two of the signals but a third broadcast consistently and refugees returning later on the mercy ship Grips-holm reported many lives had been saved by OCI programs in the Philippines.

Mrs. Brophy resigned from OWI in 1943, because of her husband's ill health, and went to Phoenix, Ariz. During his three-year period of convalescence, she became aware of the need for an independent station to serve the rich Salt River Valley area's more than 300,000 people. She applied for and was granted a CP for KRXU.

Located in October 1945, KRUX went to the air the following March.

Drawing from her experience Mrs. Brophy programmed KRXU to an impressive record of "never before" radio broadcasting. Doing away with radio's traditional commercial, the station aired three initial days of non-sponsored programs, requesting frank opinions and suggestions from the listening audience as to how to improve the station's fare.

KRXU brought Arizona listeners the first 24-hour program service, play-by-play baseball, boxing, news..."}

Silver leaves are pinned on shoulders of Barney Oldfield (r.), former newspaperman, radio commentator, and 400,000-watt ETO radio chief, by Brig. Gen. R. V. Ignico, commanding general, Warner Robins Air Material Area, on whose staff Lt. Col. Oldfield is assigned. This was the second surprise for the ex-commentator following the Christmas holiday which he spent at his home in Nebraska. While returning to the Georgia air base, the colonel, hitch-hiking by airplane, found himself included in President Truman's party making the flight to Washington from Independence, Mo.

‘Better Way’
First Series Offer
By Hage Firm

WITH some 40 stations already signed for his sales and program service, A. Maxwell Hage last week announced that he had established his own firm with headquarters in Suite 1412 at 366 Madison Ave., New York. The new firm will specialize in material designed specifically for expanded station revenue, largely through daytime programs and nighttime series. A Maxwell Hage, has been night editor of NBC, with United Press' in New York and assistant manager of the former WJAY Cleveland.

Subscribers to The Better Way Include:

on the hour, a local commentator an Easter High Mass, a regularly scheduled symphony program and a unique Armistice program in na tive Indian tongues to Hopi and Navajo veterans. KRXU ranks with the top stations in listener service, and a record number of satisfied advertisers who have been with the station since its inception. Re sults—the station's available time is always sold out.

The diminutive, energetic owner- operator of KRXU aims to please his audience. "If the audience wants it we'll get it on the air," she says. Her staff has been well-conditioned to cancelling whole blocks of programs for a police or public service job—in advance or on a moment's notice.

In addition to what would appear to be a fulltime job, Mrs. Brophy is an active member of the Phoenix Advertising Club, Chamber of Commerce, Phoenix Soroptimist, County Club, Saddle and Sirloin and Kiva Club. Nationally she participates in the NAB and Radio Club. Ten years ago she married Murry Brophy. Today they live in a modest home near Phoenix. They make their work their hobby—"to get the greatest pleasure out of both," they explain.

SYNTHETIC MICA
NBS Claims Superior Type

MICA now can be synthetized. National Bureau of Standards scientists have succeeded in producing the substance which is a critical material in the manufacture of electrical and electronic equipment, the Commerce Dept. announced last week.

This synthetic mica essentially has the same properties as the natural, the department pointed out that it is superior in its ability to withstand high temperatures. The substance, widely used in radio and electronic equipment, owes its value to its remarkable properties and is used for capacitors for aircraft.

This country, the department said, is the world's largest mica consumer although it produces only enough of the substance to meet a small portion of the country's needs. Commerce Secretary Charles Sawyer predicted that "synthetic mica production may make it possible for the United States to meet its own demands for this critical material."

Work on synthetic mica was part of a broad program of research on fluorine-type artificial minerals sponsored by the AEC under a program that is designed to further the cooperation of the Office of Naval Research. The mica phase was developed in cooperation with the U. S. Bureau of Mines and the Colorado School of Mines, the Commerce Dept. said.

WKTY LaCrosse, Wis., signs exclusive agreement with Wisconsin Div., American Automobile Assn., for airing of highway information for balance of hazardous driving period.

Prospect?

Prospect! for sales? Montano's got 'em. Wealth from copper, dairy cows, lumbering, forestry, hydroelectric plants, sugar beets, meat packing. Seven major industries in oil add up to better than $100 million in retail sales (1948). Pan for wealth if you like. But for solos in a hurry, use the Mosby stations.
annual awards (continued from page 15)

phony hour, KSL, second prize for programs beamed to general family audience; ZCMI Homemaker Program, KALL, second prize for women’s programs; Toasted Solids, KUTA, first prize for teen-age classification; The Land of Make Believe, KSL, first prize for children’s programs; ZCMI Breakfast Edition of the News, KDFY, first prize for men’s programs. The specific prizes were in the $5-$15 million volume store category.

Schumman’s Inc., for its Red Rooster Hour on WDGY St. Paul, beamed to a general family audience, captured the grand award for the audience classification and first prize in its volume category—$5-$15 million.

The grand award in the children’s program classification, only other audience group to offer such an award, went to Lit Brothers for its Lit Brothers’ Magic Lady Supper Club on WFIL Philadelphia. The program also won first prize in the sub-classification for stores doing more than $15 million.

Pomeroy’s, Reading, Pa., and Golden Rule, St. Paul, took second and third prizes respectively for the Groups of Beamed Programs categories. Pomeroy’s was honored for four shows, Golden Rule for eight beamed programs.

Other First Prizes
Other first prize winners included Goldblatt’s Dept. Store, Chicago, for The Let’s Have Fun Show on WGN, which captured first honors in the general family, over $15 million classification. Sears Roebuck & Co., Burlington, Vt., for its Sears’ Man on the Street program on WCAX, was rated first in the volume group up to $5 million, general family category. Second prize in the general family, over $15 million group, went to Marshall Field & Co., Chicago, for Masterpieces of Music, aired on WNNP Evanston.

Brief radio case-histories of Goldblatt’s, Sears Roebuck and Marshall Field were presented at the awards session by Mr. Mitchell and Lee Hart, BAB radio coordinator, to illustrate “a simple formula for buying and using radio.”

The potential advertiser, Mr. Mitchell said, should ask himself two questions before buying time: “What kind of results do I want?” and “What’s the best program and time to produce such results?”

When using time, Mr. Mitchell pointed out, he should use it to sell and measure it for results.

Goldblatt’s, Mr. Mitchell said, wanted to bring traffic to the store, more volume orders and more business. It chose its prize-winning Let’s Have Fun Show broadcast on WGN from its 8th floor auditorium, Monday-through-Friday, 12 noon-12:30 p.m.

purposes outlined

The time was used to (a) Advertise specific merchandise values such as men’s sport shirts, home movie outfits, pop-up umbrellas, bonds and any item representing a good value buy. (b) Present merchandise—ways to plug specific item values and promote departments where they can be purchased. (c) Advertise special “phone” values for listeners only. (d) Emphasize store hours.

Results showed, Mr. Mitchell and Miss Hart outlined, that an average of 5,000 people per week entered the store to see the program; that the phone service department was flooded with orders on special phone values with as many as 90 orders received within 10 minutes after a program left the air; that 75,000 letters were received in connection with the program’s Christmas contest and that Goldblatt’s has noted a steady increase in business over the three years that the program has been aired, justifying its opening of new out-lying stores.

Sears Roebuck in Burlington, which wanted to sell merchandise, promote Sears’ slogans, services and special values, was decided on Sears’ Man on the Street to be aired on WCAX Monday-through-Friday 12:15-12:30 p.m. The show, staged at the store’s entrance, gave Sears credit coupons and gift souvenirs key rings to contestents and listeners who submitted questions. It was to promote in its goals, Sears used the program for individual commercials on specific items. It also utilized one question in the quiz to highlight a Sears brand.

Female shoppers were made to reveal what they were shopping for, and were told about the Sears brand merchandise they were purchasing, too, were invited into the store to hear themselves on Sears’ Silver-tone wire recorder. The store’s slogans were used regularly.

Radio judges in honoring the program, were available only in special instances where radio alone was used, and was not part of a coordinated promotion. They showed: (A) Radio promotion of new Sears’ catalogues brought immediate response, with all catalogues ordered, for the Saturday of the broad cast. Store had had little action before from a newspaper ad. (B) Complete stock of 187 pinking shears sold as result of three commercials. (C) Complete stock of 500 dozen roses sold in one day after radio promotion. (D) Two radio programs devoted to Sears’ promotion sold 27 units and department had 28.7% increase over previous year’s promotion in the same period. (E) Slogan tied in to the common knowledge; Sears’ major brands are regularly identified by people interviewed. (F) Crowds in front of store attracted by broadcasts; traffic outside of store was attracted by program; traffic into store also, with at least 10 people a day entering store to hear their voices.

suburban stores

Marshall Field needed radio to promote its suburban stores, specifically suburban advance, and the record departments of its Evans- ton and Chicago stores.

It chose Masterpieces of Music program, aired on WNNP Evanston Monday-through-Saturday, 2:30 p.m. and Sunday 12:30-1:30 p.m.

Gelles, director of M. N. B. of New York; and Nat Frommer, director, Macy’s.
Retailer Radio

(Continued from page 15)

sent about $180 million as against 70.9 billion spent by national advertisers. He stressed the importance of television, with which some stores have developed interesting results.

Presentations by four department stores were made at the Tuesday session of co-coordinated sales promotion campaigns in four different categories—specific items, departmental, storewide and national products. While results could not be directly traceable to one medium, it was noted that three out of the four promotions, did figure prominently.

That television can do an effective job for retailers was stressed Wednesday's session on visual merchandising by Arthur M. See, sales promotion manager, Saks Fifth Street, New York, sponsor of "Your Television Shopper on WABD TV." New York.

Mr. See emphasized the outstanding selling job accomplished by Matt Norris, the program's "shopper," and urged that retailers get in the TV bandwagon.

Finding a method to reduce the cost of television so that merchants across the country can use it with appropriations at hand is a challenge that must be met, Commander Mortimer W. Locwi, director of the DuMont TV Network, told the visual merchandising group.

"Briefly," Commander Locwi observed, "We at DuMont think this can be done by producing programs at low cost and moving them to inland cities in such a way as to permit their use by local advertisers.

NEW commentators for the Kaiser-Frazer series are Joseph C. Harsch (left) and Marquis Childs. Five-time weekly program starts today (Jan. 16) on a special labor network that includes KWIK and WFMV (FM) Los Angeles; WDET (FM) Detroit; WCUC (FM) Cleveland; WYUN (FM) Chattanooga; WCFM (FM) Washington and WDFR (FM) New York. Mr. Childs has the Monday, Wednesday and Friday programs. Mr. Harsch appears Tuesday and Thursday. Agency is William Weintraub Co.

Mr. Mason

Mason Candidate

ROBERT T. MASON, owner and general manager of WMRN Marion, Ohio, last week announced his candidacy for the Republican nomination for Congress from the Eighth Ohio District, Petitions are being circulated in the district. He previously had sought the Republican nomination in 1948.

MBS Continuity

MARION LENNOX, for four and half years in the MBS continuity department, last week was named assistant director. At the same time, Isabel Biasini, who joined MBS continuity acceptance in March of last year, was appointed assistant director of religious programs and Betty Leeavitt, formerly with Coronet magazine, joined the continuity acceptance department.

WINS SALE

Pope Purchase Falls Through; ILGWU Bidding

INTERNATIONAL Ladies Garment Workers Union was reported last week to have made overtures to Crosley Broadcasting Corp.'s WINS New York, after the publisher Generoso Pope fell through.

The union, which operates WINS (FM) New York, previously applied to FCC for the WINS facilities of 1010 ke with 50 kw day and 10 kw night [BROADCASTING, Dec. 19, 1949]. The application contained an offer to buy the WINS equipment for the $512,500 sales price involved in the Pope-Crosley contract.

James Lawrence Fly of the New York law firm of Fly, Fitts & Shuebruk, representing the union, said ILGWU still hopes to obtain the WINS facility and that if Crosley agrees to the $512,500 price the union is prepared to close the deal at once. At present, however, for intra-company reasons Crosley reportedly was not in a position to carry on negotiations for sale of the station.

Announcement that the WINS sale to the Pope interests had fallen through was made by the parties early last week. The deal evaporated when Mr. Pope was unable to divert himself of his present New York area facility, WHOM Jersey City, to in time to fulfill the terms of his contract with Crosley.

An announcement by James D. Shouse, chairman of the board of the crosley Broadcasting Corp., said that the WINS sale agreement was extended from Dec. 30, the original expiration date, to Jan. 5. A WHOM announcement explained that its negotiations with a buyer could not be completed before the Jan. 5 expiration of the WINS contract.

One of the principals in the proposed WHOM sale, the station management said, has been seriously ill and unable to execute final sale papers.

According to the WHOM announcement, preliminary negotiations covering practically all details including price' had been concluded for the sale of the station when the principal fell ill. WHOM refused to identify the proposed buyers.

Reached by broadcasting at his Cincinnati headquarters, Mr. Shouse said there were no plans at present for the disposition of WINS. The subject, he said, would doubtless come up at the regular meeting of the board of directors of Avco Mfg. Corp., parent company of Crosley, to be held in New York Jan. 26.

We Cut Our First AIR WAVE

34 Years Ago This Month!

And, during these past two-dozen years, we've served the Greater Miami area well. Man by man, mile by mile...we've grown right along in proportion with Greater Miami, now one of the Key Markets, with a population today of over 500,000 compared to approximately 100,000 in 1926! WIOD covers this market as completely as Florida's sun...and make no mistake about it!

John H. McDonald, vice president in charge of finance; O. B. Hanson, vice president and chief engineer; William S. Hedges, vice president in charge of integrated services; Hugh M. Beville, director of plans and research; and Ernest de la Ossa, director of personnel. The remaining staff executives continue to report directly to Mr. Denny.

The details of the organization of the three principal operating divisions are summarized below:

THE RADIO NETWORK

"Harry Kopf, vice president in charge of radio sales, continues to head up all of our network radio sales activity, together with the functions associated with it. Reporting to Mr. Kopf are his principal sales assistants—Walter Scott, who has been promoted to the position of eastern sales manager; Paul McCluer, in charge of the Chicago office of radio sales, and Frank A. Berend, in charge of its West Coast office.

"Mr. Kopf has announced the appointment of two new account executives, whom we are pleased to welcome to our company—Gordon Mills and Jack Donohue. Other members of the radio sales staff are Walter Myers, Charles Phelps, Philip Portis, Wallace Tingle, John Van Amburgh, and Charles E. Denney Jr.

"In order to consolidate our radio network sales activities, the related functions of promotion, sales planning and research, and station relations have been brought under radio sales to form a close-knit working team with it. Charles P. Hammond, vice president in charge of advertising and promotion, continues to head all promotion and advertising activities for the radio network, and the details of the organization under him will be announced shortly.

"George W. Wallace has been promoted to the position of manager of radio sales planning and research, and is now setting up the organization of that unit. Easton C. Woolley continues as director of radio station relations, heading up a staff consisting of Burton M. Adams, Norman E. Cash, Paul M. Hancock, William M. Kelley and Paul Rittenhouse in New York, with A. W. Kaney in Chicago and Jennings Pierce in Hollywood.

"Messrs. Hammond, Wallace and Woolley report directly to Mr. Kopf.

"Program activities for the radio network are under Thomas McCrory, national radio program director. Reporting to Mr. McCrory, as previously announced, are Leslie T. Harris, assistant national radio program director; Mitchell Benson, manager of package program sales, and Joel Hammill, manager of literary rights. The other principal subdivisions in the radio network organization are headed respectively by William F. Brooks, vice president in charge of news and special events for radio, and George McElrath, director of technical operations. Mr. Brooks' principal assistants in New York are Joseph O. Meyers, manager of operations, Francis Littlejohn, news desk supervisor; William Weinstein, night news supervisor, and Allen Leonard, night editor.

"In order to provide the radio network organization with its own unit for financial control and budgeting, a new position has been established in the company—that of controller for the radio network. I am pleased to announce the appointment to this position of Henry T. Sjogren, a new member of our organization.

"Messrs. Kopf, McCrory, Brooks, McElrath and Sjogren are reporting directly to Mr. Denny, pending his appointment to the position of an executive in charge of the radio network organization.

THE TELEVISION NETWORK

"The new television network organization, announced on Nov. 8, is functioning under Sylvester L. (Pat) Weaver, vice president in charge of television operations. As outlined in that announcement, television network operations have been organized under four principal executives: Carleton D. Smith, director of television operations; Fredric W. Wile Jr., director of television productions; George H. Frey, who has been promoted to the position of director of television sales; Norman Blackburn, in charge of the Hollywood office for the television network. Messrs. Smith, Wile, Frey and Blackburn report directly to Mr. Kopf.

"Reporting to Mr. Smith are J. Robert Myers, controller for the television network; Robert E. Shelby, director of technical operations; John Brody, manager of packaging; and B. C. Cleveland, director of production services; N. Ray Kelly, acting director of syndicated films, and Sheldon B. Hickox Jr., who has been promoted to the position of director of television station relations. Other members of the television station relations department are Elmore B. Lyford, Thomas Knude, Stephen Flynn and Bolt G. Dean.

"Assisting Mr. Frey in television sales are Edward R. Hitz, who has been promoted to the position of eastern television sales manager, and Robert E. McCray, manager of the Chicago office of television sales. The remaining television sales staff includes Herbert W. Hobler, a new member of our organization; Robert H. White, Roy Porteous, Frank Chizzini, Harry T. Floyd, Herbert Anderson, Dean Banker and John Dough. Also reporting to Mr. Frey is Robert McCray, who will handle television program sales with the position of program sales manager.

"As in the case of the radio network organization, an advertising and promotion unit which includes the television planning and research unit has been established to work directly with television sales. James H. Nelson has been promoted to the position of advertising and promotion. And program sales and promotion and Robert W. McFayden has been promoted to the position of manager of television sales planning and research. Rod McNeil in charge of the details of the organization under him will be announced shortly.

"Reporting to Mr. Wile as director of television production are Ernst Walling and Thomas J. Tingle, both announced to the position of television program manager; Carl Stanton, in charge of talent and program procurement, and Francis C. McColl, director of television news and special events, who is assisted by Adolph J. Schneider, manager of operations for television news and special events.

"Grouping under Mr. Wile are the NBC television producers and the directorial staff; Fred Coe, in charge of new program development; Leonard Holmes, formerly an operations executive, and Walter S. DuMont, who has joined NBC as television production manager, and Wm. E. Miller, night program manager. Barry Bernhard, William Corrigan, Malcolm Mann, and John Neuman, formerly assistant directors, have been promoted to the position of directors.

THE OWNED AND OPERATED STATIONS

"The third principal operating unit for administering the business of the NBC owned radio and television stations is headed by James M. Gaines, director of O&O stations, who reports directly to Mr. Denny. The following managers of the NBC stations report directly to Mr. Gaines: Thomas B. McFadden, manager of WNBC, WNBC-TV (TV) New York; William McAndrew, manager of WRC, WRC-FM and WNBW (TV) Washington; John McCormick, manager of WTAM, WTAM-FM and WINK (TV) Cleveland; Irving E. Showerman, vice president and manager of WMAQ, WMAQ-FM and WNBQ (TV) Chicago; Lloyd E. Yoder, manager of KOA, KOA-FM Denver; John W. Elwood, manager of KNBC and KNBC-FM San Francisco.

"The operation of KNBH (TV) Hollywood and NBC's other activities in Hollywood remain under the supervision of Mr. Stretz, who reports directly to Mr. Denny.

"As in the case of the radio and television network organizations, the O&O organization has its own controller who reports to Mr. Gaines. Mr. Kopf has announced that Hamilton Shea has joined NBC as controller for the O&O stations.

"In order further to consolidate related operations, the network stations, National Spot Sales has been brought within the O&O station organization, with James V. McConnell, director of National Spot Sales, reporting to Mr. Gaines.

"The integrated services under Mr. Hedges include various operating activities which cannot be assigned exclusively to the radio network or the television network, or the O&O Stations. Among these are: Special Programming, controlled by Mr. Hedges are Arch Robb, who has been promoted to the position of manager of program services; Harry A. Woodman, manager of the traffic department; Edward M. Lowell, director of building and general services, and Peter M. Tinkle, manager of guest relations.

"The units under Messrs. Lowell and Tinkle remain as before, but program services under Arch Robb represents a consolidation of a number of related activities headed by the following, all of whom report directly to Mr. Robb: Thomas H. Belviso, in charge of music rights and the music li...
In addition to the four principal programs being prepared, Mr. Hedge, the following also will report to him: Albert E. Walker, executive assistant in charge of special services; Marie F. Dolan, manager of transportation; Frank P. Barlow, chief librarian; and Charles G. Hicks Jr., manager of radio recording.

With the foregoing, we have completed a very substantial part of the organizational changes which have been under study for the past several months. You will be advised of additional appointments and further details of our operating organization as these remaining steps are accomplished.

I am very much gratified that the realignment of functions and the reorganization of our radio network planning, television programming operations into separate units have provided so many opportunities for promotion from within our ranks. On behalf of the company, I am very pleased to welcome the new members of our organization who have been engaged to help us contact our expanding business.

Former associations of those mentioned by Mr. McConnell as new members of the company are:

In radio network sales—Mr. Mills formerly was business manager of the radio department of the Kudner Agency, New York, and Mr. Donohue was eastern sales manager of ABC.

The new controller of the radio operations—Mr. Sloper, formerly was controller of Deering-Milliken Co. and assistant controller of Johns-Manville Co.

In television sales, Mr. Hobler formerly was a salesmen with MBS.

In the owned-and-operated stations division, the new controller, Mr. Shea, is a former finance executive of the Statler Assn. and Emerson Chemical Corp.

The new program manager of the television network, Mr. Walling, has been an NBC television producer since last August. Before that he had been program manager for three years with WPTZ (TV) in Burlington, Vermont.

Mr. Hole, who is NBC television's new production manager, was manager of CBS television operations for three years before joining the Navy in 1942. After service he returned to CBS, later became general manager of WABD (TV) New York and subsequently operations director of the DuMont TV Network.

WRC-WNBW (TV)

Radio and television functions have been separated at WRC (AM-FM) and WNBW (TV) Washington to conform with the general NBC reorganization, William R. McAndrew, general manager of the stations, announced last week.

Effective immediately, the sales and program staffs for radio and TV are to be separated. Mahlon Glascott is manager of the newly-created sound radio sales department, which is responsible for all sales, press, promotion and advertising functions for WRC. Jay Royen, formerly WRC-WNBW press manager, becomes supervisor of this department, reporting to Mr. Glascott.

Charles de Lozier has been named manager of a new television sales department, which is to be responsible for WNBW's press, promotion and advertising. Former WRC-WNBW Promotion Manager Thomas D. Geoghegan will act as supervisor.

Another unit newly-established is the controller's dept., with supervision of all financial, accounting, office service and personnel functions for WRC-WNBW. George Sandefer is station controller.

A department of public affairs and integrated services, Mr. McAndrew said, will be responsible for functions serving both radio and TV in the fields of public affairs, news, sports, music, traffic, building services, continuity acceptance and night operations. Manager is Eugene Juster, former WRC-WNBW program director.

Mr. McAndrew had announced previously the appointment of Kenneth French as manager of the sound radio department, in charge of all radio functions which do not overlap video. Ralph Burghin is manager of the television program department.

† Second broadcast on some day provides more than one opportunity to hear program.

MARY PICKFORD

MARY PICKFORD last week signed an exclusive contract for a daytime and nighttime series of programs over NBC. The network is to have not only exclusive rights to her radio performances but also to her television appearances. The veteran motion picture actress may star in a video series next fall.

Her two radio programs will be transmitted before Feb. 15. The daytime show, 15 minutes, will feature her as a commentator. The evening show, billed Miss Pickford's Theatre of Valor, will be a 30-minute presentation weekly in cooperation with official government agencies and will relate stories of heroism principally centered about American servicemen in World War II.

At the contract signing, she was represented by her manager Mal Boyd. Both programs will be packaged by P. R. B. Inc., the firm jointly owned by Miss Pickford, Buddy Rogers and Mr. Boyd.

Zorbaugh Named

GERALDINE B. ZORBAUGH, ABC assistant secretary and member of the network's legal department since 1943, has been appointed assistant general attorney of the company. Joseph A. McDonald, ABC vice president and general attorney, announced her appointment last Tuesday. She is a graduate of New York U. and NYU School of Law.

(Continued from page 15)

sales job without political or minority pressures.

While BAB was getting a vote of confidence, it also suffered a side-swipe for its aggressive selling against newspapers. This took the form of a statement by A. H. Chapman, president of WGBA-AM-FM Columbus, Ga., and of the Columbus Ledger, Columbus Enquirer, and Sunday Ledger-Enquirer.

Mr. Chapman announced that his station was resigning from NAB because of BAB's "anti-newspaper campaign." resignations occurred in mid-1949 for similar reasons but quickly subsided. Last week WQXR New York, owned by the New York Times, resigned from NAB on the ground that the service it received did not justify the "substantial membership fees involved." WNEW New York has resigned because it felt it could spend its $7,000 dues more constructively on new programming [CLOSED CIRCUIT, Jan. 9].

Charging that BAB has adopted the "tearing down of the newspaper advertising medium" as radio's chief selling point, Mr. Chapman said he had written NAB President Justin Miller more than six months ago after a less than favorable NAB director, had made a talk in Columbus. Judge Miller acknowledged the letter and the seriousness of the problem, promising to reply in length, but that last NAB board meeting which was then imminent, Mr. Chapman said.

"Two NAB board meetings have transpired since that time," Mr. Chapman added and he is still waiting for a reply from Judge Miller.

He termed the BAB tactics "embarrassing" to NAB members with newspaper affiliation making "completely unusable these expensive tools to sell NAB, the funds for which are provided through the NAB dues which are paid by all station members, whether newspaper-affiliated or not."

Suggests Clinic

Walter M. Windsor, manager of WGBA, observed that NAB and BAB had "enthusiastically received" his suggestion that BAB sponsor sales training clinics but that nearly a year had passed without any action in that direction.

The WGBA resignation called attention to one of BAB's most serious problems—a problem involving high board policy. The fact that newspaper stations would resent the aggressive radio selling demanded by large segments of NAB's membership was mitigated when BAB was created by the board at its Chicago meeting last April. To meet the problem the board decreed a spot outside BAB itself for the sales-promotion job, leaving BAB free to enter the media battle with its fists flying.

Last July the board decided BAB, while operating within the sphere of the president's office, should be separately incorporated and not be subject to the two new Radio and TV Divisions. Then it reversed this action last November by ruling that BAB remain within the association structure with a status similar to other NAB departments.

When the board failed to define the duties of the Radio and TV Division directors at its November meeting, it decreed that the tri-committee meeting be held to recommend the relationship of BAB and the divisions.

The three committees brought together the presence of a half dozen board members of diversified broadcast and television interests plus the viewpoints of a score of committee members representing all types of stations.

They talked and drew charts for two days. The talking was unhampered by any keeper of the minutes. Various phases of the NAB administrative setup were criticized at times, with frequent references to individual members of the headquarters organization.

Favors Separation

The Broadcast Advertising Committee, headed by William E. Ryan, KFI Los Angeles, took a strong position in favor of separate membership for BAB, holding that it should report directly to the president and not through any subordinate division or individual.

The Radio Committee, with Simon B. Goldman, WJTN Jamestown, N.Y., as chairman, covered in great detail the operation of the Radio Division and other association functions. Considerable feeling was expressed that the division should not rate structurally above BAB.

The Television Committee, headed by Eugene S. Thomas, WOIC (TV) Washington, is understood to have favored retention of the divisions whereas many members of the other two committees questioned the need of a Radio Division though conceding a Television Division might serve a useful purpose in view of the visual industry's relative youth.

Eventually the three committees reached agreement and adjourned late Tuesday afternoon.

The Television Committee held a special meeting after adjournment to discuss special NAB projects for TV members.

In some of the informal discussion, committee members observed that C. E. Arney Jr., present secretary-treasurer, was operating with sharply curtailed powers as compared to past years when the sec-

Page 44 • January 16, 1950
EIGHTEEN NAB directors will be voted on by the membership after the nomination process, started last week, is completed Jan. 25. Exactly two-thirds of the 27 board members are affected.

The ballots for the eight directors-in-even-numbered districts and 10 directors-at-large will be mailed Feb. 4 to member stations in the respective districts and at large classifications. Results of the voting will be announced Feb. 8, with those elected taking office for two-year terms starting at the annual convention April 17-18.

Persons receiving five or more valid nominations are eligible to places on the final ballots.

Seven of the 18 board members whose terms expire next April are eligible to run for election under interpretation of a new by-law limiting service to two consecutive terms. Directors-at-large will serve two-year terms instead of one year, starting in April.

NAB last week had not issued an interpretation of the status of Robert Enoch, District 12 director, who was appointed by the state as general manager of KTOK Oklahoma City [Broadcasting, Jan. 9].

NAB's executive vice president, a post that was abolished by the board last July.

Many of the committee members felt the two-day meeting had clarified the thinking about NAB's reorganization. Their ideas, representing substantial changes, will be up by the board Structure and Finance Committees next week.

These committees, in turn, will report to the board at its Feb. 8-10 meeting at Chandler, Ariz. Final decision is up to the board.

After the three-plex meeting, Judge Miller commented that he thought the plan might work but this was construed as a dubious endorsement.

Members Present

All members of the three committees were present (see photos) except Glenn Shaw, KIXL Oakland, Calif., and Hugh B. Terry, KZL Denver (alternate) of the Radio Committee, both NAB directors; Robert E. Paul, former of KTOK Oklahoma City, a director and alternate member of the Broadcast Advertising Committee, and Donn Tatum, KTSI (TV) Los Angeles, of the Television Committee.

Scheduled to meet Monday and Tuesday of next week, the board's Structure Committee consists of Clark R. McCollough, WGAL Lancaster, Pa., chairman; Campbell McCoid, WTAM Cleveland; Everett L. Dillard, WASH (FM) Washington; Paul W. Morency, WTC Hartfort, Conn.; Henry W. Slavick, WMC Memphis.

On the Finance Committee are John F. Meagher, KYSM Mankato, Minn., chairman; Harold E. Pollows, WEEI Boston; Clyde W. Rembert, KRLD Dallas; William B. Quarant, WMT Cedar Rapids, Iowa; Harold H. Speney, KXXO Aberdeen, Wash.

Gag Rule

(Continued from page 17)

On reporting of crime news, but Justice Felix Frankfurter issued an opinion in which he said it was impractical for the court to explain why it had denied a hearing.

The court's denial, he said, "simply means that fewer than four members of the court deemed it desirable to review a decision of the lower court as a matter of sound judicial discretion."

Justice Frankfurter said the court is too busy to give reasons for refusal to review cases, adding that the Baltimore refusal carries with it "no implication whatsoever regarding the court's views on the merits of a case which it has declined to review." He declared the action "does not remotely imply approval or disapproval of what was said by the Court of Appeals of Maryland. The issues canvassed in the opinions of the court, and which the State of Maryland has a right to review, are of a nature which very readily lend themselves to misconstruction of the denial of this petition. The present instance is peculiarly one where the redundant becomes the necessary."

He went on to say that the action does not affect interpretation of previous Supreme Court decisions on contempt.

"The issues considered by the Court of Appeals bear on some of the basic problems of a democratic society," Justice Frankfurter wrote. "Freedom of the press, properly conceived, is basic to our constitutional system. Safeguards for the fair administration of criminal justice are enshrined in our Bill of Rights."

"Respect for both of these indispensable elements of our constitutional system presents some of the most difficult and delicate problems for adjudication when they are before the court for adjudication. It has taken centuries of struggle to evolve our system for bringing the guilty to book, protecting the innocent, and maintaining the interests of society consistent with our democratic professions."

"One of the demands of a democratic society is that the public should know what goes on in courts by which there is trial. What happens there, to the end that the public may judge whether our system of criminal justice is fair and right."

Basis of Evidence

"On the other hand our society has set apart court and jury as the tribunal for determining guilt or innocence on the basis of evidence adduced in court, so far as is humanly possible. It would be the grossest perversity of all that Mr. Justice Holmes represents to suggest that it is also true of the thought behind a criminal charge... that the best test of truth is the power of the thought to get itself accepted in the competition of the market (Abrams v. United States, 250 U. S. 616, 630).

"Proceedings for the determination of guilt or innocence in open court before a jury are not in competition with any other means for establishing the charge."

Explaning that he had set forth a list of English decisions dealing with the reporting of criminal proceedings, he said: "Reference is made to this body of experience merely for the purpose of illustrating the kind of questions that would have to be faced were we called upon to pass on the limits that the Fourteenth Amendment places upon the power of States to safeguard the fair administration of criminal justice by jury trial from mutilation or distortion by extraneous influences. These are issues that this court has not yet adjudicated. It is not to be supposed that by implication it means to adjudicate them by refusing to adjudicate."

Justice Frankfurter's statement was headed, "Opinion of Mr. Justice Frankfurter respecting the denial of the petition for writ of certiorari." This is an unusual heading, creating the idea that it merely was his own personal opinion.

The original proceeding that led to the chain of legal events grew out of the broadcast of news covering the confession and prior criminal record of Eugene H. James, who subsequently was hanged for the July 6, 1948, murder of an 11-year-old girl. The Baltimore city court held the three stations and Mr. Connolly in contempt for broadcasting this news after the arrest, though the news came from police officials.

The local court acted under its Rule 904, which had imposed a gag on crime reporting. A special appellate court upheld the convictions for contempt but the Maryland Court of Appeals held Rule 904 void and it is no longer in operation.

WGAD TO ABC

Replaces Defunct WGNH

IN A MOVE to improve its radio facilities, ABC has affiliated NAB Gadsden, Ala., a 1 kw station, replacing the 250 w WGNH, which has ceased operation.

WGAD, formerly an MBS affiliate, is owned by General Newspapers Inc., with Joel Robertson as manager. Mutual has replaced the station with the signing of WJBY Gadsden, a 250 w station owned by Gadsden Broadcasting Co., with contract effective Jan. 29.
"STANDARD RATE's Radio Section is always with me," says the R. D. of one large agency. "I use it for quick reference talks with clients I put it in my briefcase. It gives me all—and I mean all—the basic quantitative information I need on any station, except coverage. And I welcome ads in it that tell me something that the station listings don't tell, such as coverage information. Such ads are useful."

You, too, have probably noticed that many stations are supplementing their SRDS listings with Service-Ads that give additional buying information, like WCFL’s Service-Ad shown here.

Note to Station Managers: The SPOT RATE for PROMOTIONS HANDBOOK reports the sort of station information time buyers say they want. It’s full of promotion ideas. Copies are available from us at a dollar each.

For your convenience WCFL runs such Service-Ads* as this near their listing in SRDS Radio Section.

*SERVICE-ADS are ads that supplement and expand SRDS listings with useful information that helps buyers buy.

**FCC WORKLOAD** '49 Applications Drop 19%

FCC’S ROUTINE workload in the broadcasting field is falling off. In its 15th annual report to Congress, submitted Wednesday, the Commission noted a 19% drop in the number of broadcast applications filed during fiscal 1948 as compared to the year before (6,268 in fiscal 1949; 7,710 in fiscal 1948).

The report showed 2,156 applications pending in July 1948, as against 2,555 when the fiscal year opened. Those requesting new stations had dropped from 1,170 to 932. The number of hearing cases of all broadcast types had fallen from 718 to 599.

Where the number of new applications seems to be declining, however, the Commission’s “policy” problems are holding their own if not gaining. The following are among those listed in the report as policy questions yet to be decided: Network representation of affiliates by the big stations; the “jingle” of advertising; the clear-channel proceeding; new multiple ownership rules, and proposed changes in main-studio rules.

The report sketched this history of broadcasting developments between July 1, 1948 and June 30, 1949, the Commission’s 15th year:

In broadcasting matters the year was marked by such a rush for television facilities that action on applications for new TV stations was deferred pending proceedings looking toward extending TV operations into the UHF, adopting a nationwide channel assignment plan covering commercial video broadcasting in both bands, and, at the same time, inquiring into the possibility of color television.

Even so, the year closed with 71 television stations broadcasting 42 cities and metropolitan districts. In addition, more than 200 television stations were in experimental operation.

Though 150 additional FM stations went on the air during the year, the total number of FM authorizations decreased by 15%. However, FM service was available over almost all of the eastern half of the U. S., over a number of cities and adjacent rural areas in the West. Thus, more than 100 million people were within range of one or more FM stations. Also, this was the first year of facsimile operation on a commercial basis over FM stations.

Standard (AM) broadcast authorizations climbed to nearly 3,200. However, fewer stations were authorized than in 1948. Greater difficulty was experienced in wedging into this now very saturated band.

The 58 non-commercial educational stations represented a gain of 12. International broadcast stations continued at 87. The 19 categories of broadcast services together had more than 4,000 stations.

Aggregate AM broadcast income for the calendar year 1948 decreased over 10% from the previous year, while that of the four major networks dropped more than 5%. Of 683 AM licensees operating FM stations, 77 reported separate revenues from their FM operation with only four of the latter showing income. Of 107 FM stations with no AM connection, all but three of the 89 reporting stations showed a loss. The four TV networks and 50 TV stations on the air during the year all reported an operating loss.

A tabulation of AM, FM, and TV authorizations showed that Texas had more such grants collectively than any other state, closely followed by California, then Pennsylvania, New York, and North Carolina, in that order. However, Pennsylvania had the most FM authorizations, while New York led the TV list. Chicago, New York, and San Francisco had more broadcast grants than any other city. New York and Los Angeles headed the FM and TV lists, respectively.

In June the Commission affirmed the right of broadcast licensees to editorialize as part of their presentation of public issues, but reiterated that such views may not be used to achieve a partisan or one-sided objective.

The report pointed out that other “policy” questions decided during the year included adoption of anti-giveaway rules (they were subsequently suspended pending court tests); repeal of the Aveo Rule on station transfers; and adoption of special rules relating to station sales in which broadcast rights are reserved by the seller.

**Urges Research Standards**

IN A hard-hitting speech that many of his listeners construed as the opening gun in a new broadcast ratings war, C. E. HOOPER, head of C. H. Hooper & Co., the Radio & Television Research Council of New York to set new and higher standards for audience research measurements and to educate newcomers to the field in the basic principles of sound research techniques.

As he castigated the unknown acceptance of some of the techniques now being used, veteran researchers recalled similar speeches in the early '40's when the use of portable CBS (Cooperative Analysis of Broadcasting) struggle ragged most fiercely and wondered if the world for a single standard rating must be fought all over again less than 10 years later.

Addressing a luncheon meeting of the council at the Hotel Lexington, New York, Mr. Hooper deplored the ignorance of post war entrants into the field concerning "the three foundation stones of audience research—adequacy of sample, representativeness of sample and validity of data." Before the war, he said, the "clinical data in this new field—audience research" were examined with a critical eye. "Primarily, we were ready to emerge. Industry decisions were beginning to be made about samples and methods, some with an air of finality."

But since the war's end, he noted, many of the pre-war experts have moved into other fields, with newcomers taking their places. The newcomers, he added, "have been so busy getting caught up that... they have had neither time nor opportunity to acquire the knowledge gained during the five years of clarification which preceded the war. Everything that happens now looks new to them."

Mr. Hooper concluded by declaring that "standards of audience measurement are set and reset each day by what this and kindred groups consider to be acceptable practice. You have responsibility," he told the research council members, "you should examine current practices. You should insist on corrective measures. You should set new, higher performance standards for the second half of the century."

Questioned by Broadcasting after the meeting, Mr. Hooper admitted that the speech was the beginning of a campaign to be conducted at the station level designed to free the industry of invalid research methods. Rosters and unadjusted diaries will be his particular targets, he stated.

**Gates Sales Meet**

OVER a dozen new products for the broadcasting communications industry were introduced to sales personnel of Gates Radio Co., attending the equipment firm’s annual sales meeting at Quincy, Ill., Jan. 5-6. Two-day national conference included a tour of the Gates factory and demonstrations of machinery additions made the past several weeks.

**Service-Ads go to client meetings with Radio Director**

"WAGU's Radio Section is always with me," says the R. D. of one large agency. "I use it for quick reference talks with clients I put it in my briefcase. It gives me all—and I mean all—the basic quantitative information I need on any station, except coverage. And I welcome ads in it that tell me something that the station listings don't tell, such as coverage information. Such ads are useful."

You, too, have probably noticed that many stations are supplementing their SRDS listings with Service-Ads that give additional buying information, like WCFL’s Service-Ad shown here.

Note to Station Managers: The SPOT RATE for PROMOTIONS HANDBOOK reports the sort of station information time buyers say they want. It’s full of promotion ideas. Copies are available from us at a dollar each.

Want a lot for your money?

TRY DUMONT DAYTIME TELEVISION

If you have a message for the Homemaker, you'll find Du Mont Daytime Television is a mighty economical way to show her while you tell her. Remember, Du Mont pioneered Daytime Television and Du Mont has the pick of the Daytime shows—both for Network and local sponsorship. Buy what you want—one market or many. For anything in Television, call:

Dumont's Newest Shoppers' Matinee
An afternoon in an imaginary department store with delightful segments on food, fashions, glamour, homemaking, photography, song and entertainment.
ADVERTISERS: Now, you can buy Hollywood-produced, audience-tested, high-Hooperated TV shows on a spot basis at prices you can afford!

One of Paramount's TRANSCRIBED SHOWS: 15 minutes, five-times-weekly, open-ended for commercials. Film-recorded as broadcast over KTLA, Los Angeles, since January 1949. Syndicated throughout U.S....with some good markets still open.

RATINGS: Oct.-Nov. Hooper for Los Angeles—27.4 average weekly Telerating, with 60.2% average share-of-TV-audience. Rated far above all other shows as TV Program liked most by Los Angeles children in Woodbury College's November 1949 TV Survey. Voted "Top Children's Show"—both Hollywood and Coast-to-Coast—in 1949 Tele-Views Program Popularity Poll.

FORMAT: The whimsical adventures of a high-spirited youngster called Beany, usually aboard the "Leakin' Lena." The cast (all unusual plastic hand puppets) includes those pictured above: Hopalong Wong, a cheerful Chinese cook; Beany; Uncle-Captain Horatio Huffanpuff; Honey, a friendly bear cub; Cecil, a versatile but frequently seasick sea serpent and Mr. Nobody, a chatterbox invisible to everyone. Also, Dishonest John, sly trouble-maker, and Clownie, a circus stray.

Paramount transcribed programs offer a wide range of tested top-rated popular entertainment: An unusual mystery thriller, charade quiz for movie stars, several big name bands, wrestling, children's variety and others...at a fraction of initial production costs. Programs are available to advertisers in one or all TV markets on a spot basis. Also available to TV stations with privilege of resale to local advertisers.

A SERVICE OF THE PARAMOUNT TELEVISION NETWORK
COLOR'S PUBLIC DEBUT

By DAVID W. BERLYN

CBS COLOR was shown to the general public for the first time Thursday. Reaction to its public debut in Washington was as varied as the number of opinions heard at FCC's color hearings.

The half-hour showings, twice-daily, 11 a.m. and 1 p.m., Mon.-Sat., continue through the end of this month. Using studio facilities of WTOP Washington, CBS AM affiliates, the telecasts are transmitted over WOIC-AM. Tickets for the showings, held in the Walter E. Jackson's lobby in downtown Washington, are complimentary.

According to CBS, a total of 10,000 people are expected to have witnessed the telecasts by the demonstrations' close. Some 300 people jammed the building lobby Thursday where eight 12½-inch receivers were installed.

Among the viewers interviewed by TELECASTING was Mitchell Wolson, president of WTVJ (TV) Miami. He said the demonstration was impressive and the picture quality good. Floridians, he commented, would be interested in getting color quickly but urged that any accepted system be compatible because “we can't afford to waste TV sets now in use; we must be able to do the job.” He said color TV would be “acceptable now to 999 out of 1,000 people.”

Viewers' Opinions

Others interviewed at random expressed delight at seeing color for the first time. Most of them owned black-and-white sets. Every one interviewed, who was familiar with adapters, said such modifications would not be acceptable.

Miriam Dickey, secretary-treasurer of the Midwest Sun Broadcasting Co., owner and operator of KFAR Fairbanks and KEN Anchorage, visited the demonstration while in Washington on official business. She said she was surprised that color TV's development “is as good as it is.” She compared it to movie technicolor as "this fashion type" of programming would prove successful for the woman viewing TV in the daytime but he reserved judgment on its effectiveness for nighttime programming.

A Dept, of Agriculture employee said the program was enjoyable and that he would be inclined to purchase a set which would receive both color and monochrome transmissions. A churchman said "the difference between black-and-white and color is like between day and night," and concluded he would not buy a set until color could be received. An attorney thought from the national advertiser and retailer's point of view that "color will be the black-and-white will never have—reality.” One woman viewer said "color is better on the eyes" but another housewife said she thought some of the colors were "too bright and needed to be toned down.”

CBS late Thursday released preliminary survey results from questionnaires distributed at the day's showings. According to the checks 89.9% found color much more enjoyable than black-and-white; 85.5% said overall quality of color TV programs was excellent; and 57.6% thought brightness "just about right" while 39.4% felt pictures

(Continued on Telecasting 14)

THEATRE SERVICE

AN INITIAL hearing was ordered by FCC last week upon petitions of motion picture interests which propose establishment of a nationwide theatre television service using intermediate radio links.

Chief issue is whether existing and proposed common carrier facilities could supply such a service, and if not, as the movie firms indicate, to determine what manner of radio service might be established to fill the need. No dates has been set for the preliminary hearing, but FCC requested comments and appearances to be filed by Feb. 27.

More than dozen petitions resulted from the Commission's request of last summer for information from the movie industry on its needs for such a national theatre TV service and for data on developments to date which would be involved in such operations [TELECASTING, July 4, 1949]. A proposal by the Society of Motion Picture Engineers suggested 50 megahertz channels in the 6,000 megacycle area for

FCC Orders Hearings

relay stations used in testing theatre TV in the New York area.

FCC indicated the petitions asserted that theatre television has been designed and constructed making possible the exhibition of TV programs in theatres on large screens and that many of the petitioners, and others, wish to institute theatre TV service in their theatres. The petitions, FCC continued, claim that such a service will encourage the development and use of television and will create a new medium for providing entertainment, news, information and public service to a large proportion of the public.

Petitions were filed by: SMPTE; American Theatres Corp.; Neighborhood Theatres Inc.; Thirteen Owners of America; Motion Picture

(Continued on Telecasting 15)
SHORTLY after the World War II shooting had stopped, Bamberger Broadcasting Corp. went to work on its plans to develop television properties in New York and Washington.

Familiar with the rigors of electronic enterprises through more than a decade-and-a-half experience with its WOR New York, Bamberger didn't know what real shooting was like until it picked out a nice tower site on a high Washington hill.

At that point forces were set in motion—forces that utilized all the devices of official Washington—as residents of the adjacent area objected to the encroachment of a television tower.

Final result was a victory for the residents, forcing Bamberger to hunt another high spot. As often happens, defeat was turned into victory when a still higher site was found nearby. When another

HIGHEST point in District of Columbia is TV antenna atop this tower at WOIC's $800,000 plant.

violent series of residential maneuvers had been duly disposed of in Bamberger's favor, the applicant was the delighted owner of what is called absolutely the highest non-government owned spot in the District of Columbia—410 feet above sea level.

The final result was WOIC (TV), a hustling and vital segment of the Washington economy that promises to break into the black before 1950 becomes history.

Bamberger has just changed its radio name to General Teleradio Inc. because the original title was of Newark department store derivation. General Teleradio is owned by Macy's Department Store, New York.

The Washington television segment of Macy's radio-TV operation is proud of its appropriate WOIC call letters, a video symbol whose promotional value has been thoroughly exploited in the highly competitive four-station market. This week the station is celebrating its first anniversary on the air.

Last of the four Washington TV outlets to take the air, WOIC started off with a cornerstone laying Oct. 15, 1948. FCC Commissioner Wayne Covit took part in the ceremonies as official Washington gathered at the 40th & Brandywine St. site in Northwest Washington. Just three months later—Jan. 16, 1949—WOIC officially began telecasting.

THE modern WOIC building, representing an $800,000 investment, is located a few feet from a fast-growing uptown business area and almost adjacent to a large Sears Roebuck store. The 300-foot tower looks down on the sewer-like downtown area and out over the rolling residential sections with their million-plus population and near-100,000 television sets.

Washington is a good television city, and its four-station competition offers a challenge to station management. WOIC is aggressively serving the market under the general management of Eugene S. Thomas, a broadcaster and television executive with nationwide fame. One of that rare species, a native Washingtonian, Mr. Thomas is quite at ease in the highly competitive market as a result of a decade at WOR.

Mr. Thomas was sales manager at WOR, a post certain to equip its occupant with a full fund of information and contacts around the national and local advertising marts as well as with the niceties of time selling.

President of General Teleradio is Theodore Streibert, Mr. Thomas' boss at WOR and chairman of the board. Vice president is Jack R. Poppele, 25-year radio veteran, a nationally known engineer and president of Television Broadcasters Assn.

This board of strategy has a No. 1 policy specifying that WOIC be an "able" station—a station transmitting pictures that can be well received by all sets within the coverage area.

WOIC strives to be a "helpful" station by providing coverage of events especially interesting to youth, and also supplementing the welter of games and high spots throughout the District of Columbia and surrounding counties. It desires to be a "friendly" station, pledged to support community drives and to represent and further the public service organizations operating in Washington.

Finally, WOIC endeavors to be an "entertainment" station, carrying CBS network programs, local sports events and remote programs from theatres and other public places.

When the MBS Television Network gets into operation as such, WOIC will carry its programs. Occasionally the station has taken a program from DuMont's TV network.

By means of careful and aggressive management in the well-televised Washington air, WOIC has steadily increased its income. Actually, the cash-register curve has moved upward on a line parallel to the fast-rising trend line for set ownership. In the past 12 months the number of TV sets in the market has tripled, and WOIC's income has more than tripled in the same period.

The number of operating hours also has gone up, and the expansion to a 40-hour weekly schedule brings out an example of sound management. In its one-year career every additional hour of programming placed on the schedule has been covered from a cost standpoint, excepting, of course, public service features.

Local business has exceeded the fondest hopes of WOIC's executives. In charge of WOIC sales is William D. Murdock, for many years at WTOP and WOR Washington. He has been sales manager from the beginning. Robin D. Compton, an engineer of national reputation, is technical manager.

WOIC was the fourth TV station he had put on the air, WCAU-TV Philadelphia having been the project immediately preceding. And when WOR-TV emerged from the drafting boards last year, Robin Compton's experience in delivering infant TV stations again came in handy.

JAMES S. McMurray, program manager, has been production manager of WBAL-TV Baltimore. WOIC's special events, publicity and promotion director, John F. Hardesty, was acquired from WOL Washington and had previously been at WTOP. Lawrence Richardson, auditor, serves with the above group on the WOIC executive committee. William K. Treynor, director of sales service, is another WOL graduate.

Of the executives Messrs. Murdock, Treynor, Richardson and Hardesty join Mr. Thomas in the sales category of native Washingtonians.

In its year-long career WOIC has built up a long list of program achievements. Among commercial successes is Sketch-A-Quiz, participation strip show in which the artist draws a progressive sketch, carrying over from program to pro-

BROADCASTING  •  Page 50
gram, until three members of the TV home audience have identified the picture. Response is said to run into thousands weekly. Among Sketch-A-Quiz sponsors have been such national advertisers as Pall Mall, Schick razor and Admiral (through local outlet).

The Quality Playhouse, weekly 90-minute film feature, is sponsored by Pledged Quality Laundries of Washington. The laundry group describes audience response as "excellent."

Inter-high school football games telecasts were sponsored last fall by Norge and local dealers, including the championship playoff. The local Budweiser distributor sponsored the annual New York-Washington football game. Bulova sponsors a schedule of time signals.

O NE of Washington's interesting TV experiments was conducted by The Hecht Co., largest of the city's department stores. Everything from portable barbecues to bathing suits was demonstrated and sold on a five-weekly quarter-hour series and Hecht officials expressed themselves as pleased with results.

The live programming lineup of WOIC includes such offerings as A Current Affair, weekly half-hour discussion covering civic life and welfare; nightly sports round-up; The Hobby Corner, weekly quarter-hour devoted to hobby research and avocational endeavors; Capitol Cloakroom, weekly half-hour CBS originations of questions put to national personalities by Washington newsmen; 1 C With Elsor Lee, weekly half-hour for the housewife.

A mobile unit is used for a weekly amateur program, sports events, school programs and numerous CBS originations. Effort is made to accommodate legitimate public service organizations furnishing the station with motion picture films.

The list of achievements in WOIC's one-year career includes some events that will occupy prominent niches in world history. Some of the events: Signing of the Atlantic Pact, with pickup fed to all four TV networks; participation in television coverage of 1949 Presidential Inauguration only four days after going on the air; telecasting of 1948 Christmas Tree lighting ceremony from White House 23 days before station went into operation, with program fed to CBS and NBC TV networks; active role in CBS color television experiments, starting last September; telecasting of District of Columbia high school competitive drill for first time; Easter sunrise service from Arlington Amphitheatre for first time, fed to CBS TV network.

The WOIC plant, housing studios and transmitter, is RCA equipped. Studio facilities include a three-camera setup with combination lighting of cold cathode (Slim-Line) and Kleig and incandescent spots and broads. Mobile unit has three camera chains along with two-way mobile telephones and two complete microwave units.

Film facilities include two 16mm projectors and one 35mm automatic film projector for transparency and a 3x4 inch Balopticon for transparent or opaque program material. There are four turntables and facilities for tape recording and playback. A complete machine shop and facilities for making slides and 16mm film strips are included.

WOIC can feed the network and at the same time originate studio, field or film programs for local consumption. Complete auxiliary equipment is available. On the drawing board are plans for an audience participation auditorium studio and smaller dramatic studio. With completion of these facilities a number of new local programs will be added.

The total WOIC staff comprises 36, with 17 in engineering, 10 in programming, six in general and three in sales. The station believes this efficient group is the smallest staff of any station doing a comparable job and not affiliated with an aural station in the same town.

WOIC's Rate Card No. 3, effective Jan. 1, includes the following charges for Class A time: 1 minute, $70; 5 minutes, $390; 10 minutes, $140; 15 minutes, $190; 30 minutes, $325; 60 minutes, $550; 1 hour, $900. These scale down to Class C charges of $35 for 1 minute and $225 for 1 hour.

The station operates on Channel 9 with 27,300 w video and 14,400 w aural power.

National representative is WOR Sales, with Frank Shakespeare of that organization as national sales service representative assigned to WOIC.

WGN-TV BASEBALL
Cubs Home Games Set

CHICAGO CUBS home games will be telecast for the third consecutive year by WGN-TV Chicago, it was announced last week by General Manager Frank P. Schreiber and Cubs Manager James T. Gallagher. Rights to 77 home games are reported to have been sold to the station for $30,000.

Game schedule begins April 21, with the Cubs playing the St. Louis Cardinals, but the station will telesport exhibition contests from Wrigley Field in Chicago on April 14 and 16. The National League Cubs will compete with the Chicago White Sox, the American League squad.

Jack Brickhouse, sports service manager of WGN-TV, will handle the commentary, assisted by Harry Creighton and Vince Lloyd. Don Cook, sports and special events director, and Dick Liesendahl, his assistant, will direct the remotes. Three cameras will be used.

GATE BATTLE
Pro-TV Sportsmen Rally

A ST. PAUL sports promoter, Ed- die Williams of St. Paul Sports Attractions Inc., labels television as a gate-builder for wrestling bouts, according to KSTP-TV St. Paul-Minneapolis, which telesports St. Paul Armory bouts every Friday.

Mr. Williams' statement directly contradicts anti-TV stands deliver ed a fortnight ago (TELECASTING, Jan. 9) by Heinie Miller, executive secretary of the National Boxing Assn., and the U. of Washington on Coast Conference basketball.

"I wouldn't have attempted weekly wrestling bouts in St. Paul without television ..." Mr. Wil- liams said. The promoter, who has staged sports events for many years in the Twin Cities, cited KSTP pick-ups as having increased gate receipts some 210% since the first wrestling bout was staged last November. The Jan. 6 card played to standing room only.

KSTP follows up the statement by Mr. Williams pointing out that the Minneapolis Millers baseball team is "exceedingly happy about KSTP telecasting its third straight season of games," and "Max Win- ter of the Minneapolis Lakers [basketball] definitely attributed his big gates, at least in part, to TV."
GILBERT Test

GILBERT Youth Research Organization, New York market research firm which has heretofore specialized in studying the preferences, use and buying habits of young people, has organized Gilbert Television Research.

The new firm will measure the impact of three national radio commercials by a “Gilbertest” rating process developed by the company, utilizing the “radioimeter,” portable sound film projector also developed by the research firm.

Although the “Gilbertest” is still in the pretesting stage, seven advertising agencies have already become subscribers, George Goldberg, in charge of television research and sales, told Broadcasting last week.

The three commercials that are included in the Gilbertest survey include Bisou Co., using the service for five products advertised on television, and Footo, Cone & Belding, using it for two video-advertised products.

Development of the “Gilbertest” began about nine months ago, Eugene Gilbert, president of the research firm, explained. A request by Pepsi-Cola Co. for a check of reactions to its television commercials, he said, led him to investigate checking methods then in use and to the discovery that there were none which he considered adequate.

He decided that the only practical way to measure the impact of video commercials required a means of reproducing them as broadcast, through use of a sight and sound projector. As he prefers to work with individuals, interviewed at home, he needed a projector that included both projector and screen, as well as its own power supply. Again he found nothing suitable on the market.

“The smallest projector I found was about the size of a three-quarter suitcase and weighed about 50 pounds,” he said. “So we went ahead and developed our own, which we named the ‘Radioimeter.’"

This is a compact unit, contained in a leather case 0 by 8 by 17 inches and weighing 14 pounds. The unit, which is battery-powered and may be used anywhere, contains its own screen on which the pictures are rear-projected and its own speaker. Sound and pictures can be reproduced singly as well as in unison and the films can be shown in sequence and then replayed without rewinding.

Following tests with a hand-built model “Radioimeter,” the company is now having 20 improved models made for use in the planned continuing study of TV commercial ratings. "In this machine,” Mr. Gilbert stated, “we think we have the keystone of all video research.”

The “Gilbertest,” begins, he explained, with questions as to brand used and a preference of the person interviewed for products in the field of the one whose commercials are to be checked. Then the interviewer asks, what the respondent thinks about the product and whether he remembers any of its TV advertising. If he says he does remember TV ads of the product, he is further questioned as to the salient points he remembers of each commercial. Then he is shown the picture without sound and asked to recall what he can of the talk that accompanied the picture, when it was telecast.

Finally, the commercials are shown again, this time with the sound also reproduced.

Gilbert TV has just completed a project of three commercials for a leading brand of cigarettes (names not released for publication), conducting tests among 100 family units in the New York metropolitan area. The unaided recall ratings were as follows:

- Commercial A: 10%
- Commercial B: 15%
- Commercial C: 7%
- Commercial A & B: 1%
- Commercial A & C: 2%
- Commercial B & C: 1%
- Commercial A, B, & C: 4%

Seven and eight-tenths percent could not identify any specific commercial. (This is 24% of those who said that they remembered brand name and preference.)

When the commercials were shown with sound shut off, the ratings were:

- Commercial A: 36%
- Commercial B: 29%
- Commercial C: 32%

The final showing, with both sound and pictures shown, showed an additional 5% increase in recall rates.

To Measure TV Impact

Evans Urges Advisory Group for FCC

POINTING out that the importance of the FCC cannot be underestimated, Mr. Evans felt that the Department of Commerce should have a role in planning for what the public needs in the future. As the training for the educated segment of the public has been neglected, he called for a group of advisory members representing the different aspects of the media.

The board, Mr. Evans explained, would present impartially to the FCC the experience of outstanding and qualified people in research, engineering, law, education, business and public relations. Such an advisory board to be of greatest help to the FCC, he stated, “should be comprised of the high type of individuals with a proper diversity of ability and background so they would be competent to help on any of the major questions confronting the Commission.”

Speaking before a special meeting of the Pittsburgh Radio and Television Club, Mr. Evans said it was vital to the public, the industry and the Commission itself that “the most complete and accurate information be made available from the leading authorities in their respective fields” if the current difficulties in television are to be solved now and similar situations avoided in the future.

Mr. Evans said that the series of television standards and allocations decisions made by the FCC in 1941 and 1945, which eventually led to the “framing” and postponing of action on new applications for television stations, were made, necessarily at times, without complete information. The proposed board would not only provide information, he stated, but would do it conveniently and economically.

“Three men would be in a position to draw upon the vast reservoirs of knowledge and research and present the results of law, of business and education not presently conveniently available to the Commission,” Mr. Evans said.

TV STALEMATE

Mr. Duffy Discuses TV's Future

ADVERTISERS to come into television will be those who have used radio and others who haven't fully taken advantage of radio, Ben Duffy, president of BBDO, New York, predicted to members of the New York Radio Executives Club at a luncheon last Thursday.

He explained that automobile firms never fully appreciated the impact of radio, but felt that they who are sensitive to color and style would take full advantage of television. Other advertisers, such as cosmetic manufacturers, would also be likely to use television much more than radio.

Potency Surveyed

As for the potency of TV, Mr. Duffy revealed that his agency made a recent survey for a client in two cities, where newspapers, magazines and radio were used and in two other cities where the above three media were not used. In the television cities product identification was 58.6% of 43% of respondents who saw the advertisers’ message on television. In the cities where only the three media were used, 47.1% identified the product.

In both groups of cities, 40% knew of the magazine campaign but the automobile used magazines since the inception of its business. Television, Mr. Duffy said, in a short period obviously showed a high percentage of identification.

Te-Ve

“Will TV kill radio and other media?” Mr. Duffy is answering the question. He says, “It is not a question of this media or that but this media and the other.”

As for talent in TV programs, Mr. Duffy believes in the opinion that programs should be “live.” He feels it is “a mistake to go on kinescope. When the cable across the country is installed, he said, Hollywood will increase the level of TV shows, but until that time the Bennys and the Hopes “will kill themselves on kinescope” and are wise to wait.
By EDWARD LAMB

WHILE other television station operators have felt that they must engage in considerable network operation to be successful, WICU (TV) Erie, Pa., and WTVN (TV) Columbus, Ohio, have taken a different tack. These two stations have engaged in local programming to the extent that it has paved the way to profitable operation... and made many loyal friends for the station.

Our contention is that public service programming is the best possible promotion. On my television station, after it began, several weeks before going on the air, an intensive campaign to bring the local community to a realization that the television project belonged to every resident of the area. At Erie we conducted more than 30,000 people through the new Television Center and attempted to familiarize each guest with as much of the facilities of the station as possible. In Columbus, we took more than 4,000 folks through WTVN in one day of an open house, and of course these programs are conducted continuously.

Local Interest

It is elementary that in newspaper publishing, broadcasting operations, or in any other activities that local people have the most interest in the enterprises, and the station has a staunch friend and booster. This feeling of friendship is greatly increased, if, instead of a mere visit, the guest actually appears before the television camera.

I would like to point out the extent to which we carry on local programming. We have days at Erie’s WICU when we actually put more than 500 people before the television camera! For instance, Dec. 16 we had a mop-up show called Tots ‘N Teens where more than 200 youngsters were guests of the station at a Christmas party. We then presented the Erie Dispatch Quiz Down between various parochial and public schools, and this program was attended by 10% of the students and teachers before the camera. We had local interview programs, local choruses, variety shows, sports commentaries (including a remarkable blowout by a high school who had just brought in two deer as to the method of skinning and packing the venison meat) and numerous other local shows. At 11:15 p.m. we brought in the Erie Dispatch Good Cheer Food Show, which brought together ten professionals and amateur night club acts. This latter program was for a charitable fund drive. We also have programs of this type for other stations, and the people of Erie were still calling in their donations when the show finally wound up at approximately 3 a.m.

Friends Important

Although we have the four networks at Erie, and we are affiliated with DuMont and ABC at Columbus, we find always that people are most interested in their friends and neighbors. Just as we are anxious to have local people take pride in this local project, we have discovered that certain economic factors emphasize the importance of local programming.

The networks pay the station only one-third of their rate cards at best. At least one network seeks to have the local stations “donate” approximately 50 hours of commercial broadcast time to the networks. All networks charge for sustaining programs and we have found that we can generally produce a local sustaining show at a much less rate than we are charged by a network for such service.

Of greater importance is the fact that the local merchant can tell immediately whether television has the terrific selling impact which is claimed for it. If he advertises merchandise, be it appliances or foodstuffs, he can tell the following day the results of his TV venture... Because of our local element, a product in use, we have had success stories at both WTVN and WICU which are nothing short of fantastic.

Vievers’ Interest

I have said that in my opinion any television station in the United States can be put into the black by a proper combination of public service and local programming. I don’t know in what way television people are watching programs are particularly interested in hearing of the terrific losses suffered by some telecasters. They are only interested in what appears on the screen.

Nor should successful operation of a television station be solely dependent upon the competition, or lack of it, in the market. We are in competition in Columbus with two other television stations. I have no affiliated property in Columbus in newspapers, radio, or any other business—which is available to support television losses. However, because of our constant emphasis on local programming, I am hopeful of breaking even to which I think we were engaged in the black in Columbus from almost the very first day we opened.

LOCAL PROGRAMMING

Lamb’s Formula

TMAN ADDRESSES

Democrats’ Film on ABC-TV

DOCUMENTARY film interpretation of President Truman’s State of the Union address was prepared by the Democratic National Committee and televised on ABC-TV from New York Jan. 4, 8:30-9 p.m.

The program—titled Our Common Destiny, the State of the Union at Mid-Century—utilized background film scenes, charts and graphs, a commentary, and recordings of the President’s voice as he addressed Congress earlier that day. George Putnam took part in the program.

Before airing the program, which raked old and new GOP personalities over dying political embers, ABC notified the Republican National Committee it would air the show for only half the normal prime-time fee for a similar program—if it wanted it, 'GOP accepted and the committee’s Washington officials presently are working on a comparable “50-minute commercial” with format, time, and participants still undetermined.

TV IN SCHOOLS

Cincinnati To Study Effect

FOURTEEN Metropolitan Cincinnati high schools plan to conduct a study to determine whether the television set can become as familiar in schoolrooms as the book and the blackboard.

Designed to reveal the interest and attitudes of the educators in television, study will be conducted under a fellowship established at the U. of Cincinnati early last year and made possible through financial support of WLW Cincinnati and Crosley Broadcasting Corp.

Administrators and teachers of all 14 schools are cooperating in the study, according to Russell Helmick, Northern Kentucky educator and winner of the fellowship. If results of a preliminary questionnaire establish video as an educational aid, TV sets will be installed in some of the schools and specially-designed programs for in-school viewing will be scheduled to further test TV’s effectiveness.

TBA CLINIC

To Study TV Programming

TELEVISION’S program problems at both the national and the local level can be discussed from a variety of viewpoints in eight sessions scheduled for the annual video clinic of the Telecasters Associates, to be held Feb. 8 at the Waldorf-Astoria Hotel, New York City.

Charles Barry, ABC vice president and chairman of the TBA clinic, announced the following topics sessions for the one-day clinic, running from 11 a.m. through the afternoon.

(1) Programming, network production problems—By Albert Shuman, station production problems; (2) Buying and selling, station and agency viewpoints—By T. J. O’Hara, vice president, Mutual Television; (3) Interconnected versus non-interconnected stations—By W. John M. Steinbeck, owner, WJCL (Canton, Ohio); (4) Local TV programs—By L. E. Hedges, vice president, WXYZ (Detroit); (5) Law, jurisdictional problems in television—By R. L. Talbert, attorney for WABC (New York); (6) The future of spots in TV—By A. C. Comstock, SPAR; (7) A round table discussion—Midwest-West.

The annual meeting of TBA, open only to official representatives, will convene at 10 a.m., and a combination meeting of the TBA board will be held in the afternoon. J. R. Poppele, vice president of General Teleradio Corp. (WOR-AM-FM-TV New York, WBN-AM (WBC) Washington) and TBA president, will preside at the luncheon session.

Page 53 • BROADCASTING

January 16, 1950

TELECASTING • Page 7
TELEVISION'S power as a selling medium is indicated in response to a survey conducted last year by the University of New York, Mr. Hocker presented both auditory (by recordings) and visual-auditory (by synchronized films and recordings) commercials for a series of dandruff shampoos and a cigarette. All products were given fictitious names. Each commercial contained 10 facts about the product, spoken on the record and present on the television screen. In the recall test, covering these facts, were given either immediately following the presentation or one week later.

"The answer to the question, whether or not the recall of advertising material presented auditorially or by the addition of a visual stimulus, is definitely in the affirmative as far as this experiment is concerned," Mr. Hocker said. "In no case was the number of features significantly superior to the corresponding visual-auditory presentation in every case where there was a significant difference in the scores for the two methods of presentation. "Since the films used in the study were somewhat restricted in sets and special effects by production cost, the differences found might have been increased with the use of better visual commercials."

The extent to which the results of this experiment can be directly compared with radio and television advertising could be accurately determined by a real life presentation of the commercials. Every attempt was made to make the presentations as much like the life situation as possible, and the author believes that the presentations made close to the life situation as the presentations in any previous experiment of this nature."

Mr. Hocker warns that in drawing conclusions regarding radio and television advertising from the results of this study, two phrases must be prefixed to every statement, namely: "In so far as this experiment is concerned," and "in so far as the presentations in this experiment are similar to the life situation."

He goes on to say: "The results would seem to indicate that television advertising is superior to radio advertising as far as the recall effectiveness of brand names and features of the products is concerned."

"If the results of the rating scales can be considered valid, television commercials can be made more appealing than radio commercials. It was evident during the presentations that the visual-auditory commercials received better attention than the auditory commercials."

The results would seem to indicate that mentioning the brand name of a product only three times is insufficient to effect retention of the name for any length of time."

"The fact that several subjects drew a picture of the bar of soap (although none was requested) indicates the vivid kind of imagery that can be conveyed by television commercials. This factor would doubtless have had a strong effect on the results had recognition testing taken place."

Audio vs. Visual Commercials

A CONCLUSION that "television advertising is superior to radio advertising as far as the recall effectiveness of brand names and features of the product is concerned" is indicated by results of a Study of the Effects on the Recall of Advertising Material when the Medium of Sight is Added to a Given Sound Commercial. The study was conducted last year as part of a senior thesis at Princeton U. by William D. Hocker, now with United Videogram, New York.

Using as subjects 109 men enrolled in a course in industrial psychology at Princeton and 29 girls taking advertising courses at American School of New York, Mr. Hocker presented both auditory (by recordings) and visual-auditory (by synchronized films and recordings) commercials for a series of dandruff shampoos and a cigarette. All products were given fictitious names. Each commercial contained 10 facts about the product, spoken on the record and present on the television screen. In the recall test, covering these facts, were given either immediately following the presentation or one week later.

"The answer to the question, whether or not the recall of advertising material presented auditorially or by the addition of a visual stimulus, is definitely in the affirmative as far as this experiment is concerned," Mr. Hocker said. "In no case was the number of features significantly superior to the corresponding visual-auditory presentation in every case where there was a significant difference in the scores for the two methods of presentation. "Since the films used in the study were somewhat restricted in sets and special effects by production cost, the differences found might have been increased with the use of better visual commercials."

The extent to which the results of this experiment can be directly compared with radio and television advertising could be accurately determined by real life presentation of the commercials. Every attempt was made to make the presentations as much like the life situation as possible, and the author believes that the presentations made close to the life situation as the presentations in any previous experiment of this nature."

Mr. Hocker warns that in drawing conclusions regarding radio and television advertising from the results of this study, two phrases must be prefixed to every statement, namely: "In so far as this experiment is concerned," and "in so far as the presentations in this experiment are similar to the life situation."

He goes on to say: "The results would seem to indicate that television advertising is superior to radio advertising as far as the recall effectiveness of brand names and features of the products is concerned."

"If the results of the rating scales can be considered valid, television commercials can be made more appealing than radio commercials. It was evident during the presentations that the visual-auditory commercials received better attention than the auditory commercials."

The results would seem to indicate that mentioning the brand name of a product only three times is insufficient to effect retention of the name for any length of time."

"The fact that several subjects drew a picture of the bar of soap (although none was requested) indicates the vivid kind of imagery that can be conveyed by television commercials. This factor would doubtless have had a strong effect on the results had recognition testing taken place."

'DEPTH OF PENETRATION' IS SURVEYED

PHILADELPHIA leads all other television cities in the country in the number of TV sets per 1,000 families, according to the latest "Depth of Penetration" tabulation just released by WTMJ-TV Milwaukee.

On Dec. 1, 1949, Philadelphia had 266 TV receivers per 1,000 families, according to WTJM-TV, New York, which had been first in place on Nov. 1, 1949, in second place with 264. Lancaster, Pa., Los Angeles and Chicago retained third, fourth and fifth place, respectively. Milwaukee had been in seventh place in the previous survey. (Continued on Telecasting 11)

TO EXPAND TV
United Paramount Plans

PLANS for increased television activity were announced last week by United Paramount Theatres Inc., New York, new theatre-operating company formed under the reorganization of Paramount Pictures Inc. ordered by court anti-trust decree [BROADCASTING, Jan. 2].

Leonard H. Goldenson, president of United Paramount, revealed that in addition to its current theatre-television operations in New York and Chicago, the firm plans to install large-screen TV facilities in its theatres in Detroit, Boston, San Francisco and Minneapolis. The firm is applicant for new commercial video outlets at Detroit and Boston.

Mr. Goldenson also announced that Robert H. O'Brien, secretary-treasurer, will head all television activities for the firm.

Separation of Paramount Pictures' theatre-operating functions from its movie-producing and distributing activities were involved in the ruling of the U. S. District Court for the Southern District of New York. Under the reorganization the new Paramount also assumes theatre operation while New Pictures Corp. takes over production and distribution.

Applications Pending
Applications are pending at FCC for consent to transfer control of Paramount's television and broadcast station interests to the two new firms, WBKB (TV) Chicago and a 50% holding in WSMB-AM-FM New Orleans is to be switched to United Paramount Theatres while KTLA (TV) Hollywood is to be transferred to New Pictures Corp. [BROADCASTING, Jan. 9]. New Pictures Corp. also is expected to acquire Paramount's 28% holding in Allen B. DuMont Labs., operator of WBKB (TV) New York, WTG (TV) Washington, and WDTV (TV) Pittsburgh and TV applicant in Cincinnati.

Mr. O'Brien was secretary of Paramount Pictures before the reorganization, which was to have been consummated in early January. Prior to joining Paramount he had been commissioner with the Securities and Exchange Commission.

With Mr. O'Brien
Associated with Mr. O'Brien will be Robert Weitman, managing director of Paramount Theatres in New York and Brooklyn, and consultant on theatre matters of United Paramount Theatres, who will act as talent and programming consultant. Jason Rabinovitz, formerly with the Chase National Bank, will be Mr. O'Brien's special assistant on television matters.

The company's policy of decentralized theatre operations will be continued in the television field, with each operation under local management and Mr. O'Brien's office handling policy matters and coordinating operations.

Pointing out his belief that theatre-television will contribute to a balanced and wholesome national system of television, Mr. O'Brien declared that motion picture industry members, through Motion Picture Assn., Theatre Operators Assn., and other specialized groups, have filled requests with FCC for hearings on whether the commission should allocate special channels for television theatre (see TELECASTING 3). The theatre groups will attempt to show that the allocations would be in the public interest.

'Shot in the Arm'
Mr. O'Brien felt that theatre television would offer the same "shot in the arm" to the motion picture industry that the introduction of sound afforded in the '20s.

Assuming FCC granted special channels, he could foresee a network of theatre-television operators, with selective programming for theatre presentation and not available to home viewers, but requiring the "disciplined audiences" of the theatre.

TV-Air-Check Service

A NEW checking service to provide still photos or sound-on-film motion pictures of TV shows and commercials exactly as the public sees them has been announced by the Joseph W. Hicks Organization, Chicago public relations firm. Called TV-Air-Check, the new service supplies either black-and-white still pictures or sound-on-film movies photographed directly from video receivers. Films or stills can be delivered within 24 hours after telecast and are accompanied by certified statement of time, station, and conditions of telecast and reception.

USING pictures from Acme Telephoto's national and international correspondents, KMTV (TV) Omaha gave its first Telephoto telecast Dec. 28. Discussing the presentation are (l to r) Owen Saddler, KMTV general manager; Jim Herman of Acme Telephoto; Hugger Bader, KMTV newscaster.

U. S. TV SHOW
Set For Foreign Experts

A DEMONSTRATION of U. S. television for experts of other countries is slated March 27 to April 7 and may include a showing of television under the standards of other nations.

A part of the program of the cornellus G. Mayer, with RCA in London; William Q. Chichlow, Bureau of Standards; Donald Fink, editor of Electronics; and Charles J. Villavazo of RCA International Division.

TO bring spot pictures of each day's news events to their audience, two more TV stations—WBCN-Davenport and KMTV (TV) Omaha—add telecasting wire Acme Telephoto service. Both stations have installed Acme's Direct Positive Reducing Camera to reduce local pictures and sponsor's messages to 3"x4" for multiscope projection.

It takes about an hour to send a complete 24-picture show and news script from Acme's Chicago broadcasting, sales, and technical offices to Omaha and New York, and this was reported. Other stations taking Acme's Telephoto news programs include WNBK (TV) Cleveland, WBKB (TV) Chicago, WNBK-LN (TV) Toronto, WPIX (TV) New York, KPI-TV and KTLA (TV) Los Angeles, KRLD-TV Dallas, WCPO-TV Cincinnati and WJAR-TV Providence.

OPERACASTS

NBC-TV Schedules Four

FOUR OPERAS to be presented at four-week intervals started Saturday, Jan. 14 on NBC-TV. Samuel Chotzinoff, general music director of the network, has announced. Dr. Peter Herman Adler is music and artistic director of the series. Charles Polacheck is staging the operas.

Designed especially for television and sung in English, the opera will be "Down in the Valley," by Kurt Weill, American composer; "Madame Butterfly" "Tales of Hoffman" and "The Bat." Final opera will be telecast 10:10 p.m. Others will be done in one hour. Effort is being made to accomplish realism not possible on the operatic stage.

WCAU-TV Signs

N. SNELENBURG & Co., Philadelphia, Jan. 30 begins daily Monday through Friday, full-hour "Sneleburg's TV Jamboree on WCAU-TV there. To be aired the 25 from audio output of the Sneleburg institute, program will feature audience-participation, variety format with prizes for all contestants. It is largest locally sponsored contract in Philadelphia TV history according to Arthur Block, Sneleburg president, and Philadelphia office of Robert J. Enders Advertising, agency which handled contract.

Sports Programs Lead
New York Fare

SPORTS programs accounted for more TV time in New York during the last half of 1949 than any other form of video fare, according to an analysis just released by The Pulse Inc.

The report shows 18.9% of all New York telecasting time was devoted to sportscasts in the July-December period. This compares with 15.2% given over to sports in the January-June half of 1949 and to 23.4% of the July-December 1948 period.

Westerns, quiz and audience participation shows, dramas and mysteries also got larger shares of New York's total TV time in the final half of 1949. Less time proportionately was given to juvenile entertainment, feature films, news, comedy-variety and interview programs.

Comedy-variety shows continued as the most popular type of video fare, with drama and mystery ranking second. This is true of all three-month periods.

Hobby Store

Uses TV To Build Sales

ITS advertising ear to the ground, the Burgess Battery Co., owner of the Burgess Handicraft Store, Chicago, now places all faith—and business—in one media, television, according to C. C. Fogarty Co., Chicago, Burgess agency. Reason for the enthusiasm is the sudden surge upward from a slumping 1949 sales curve.

The curve began its dip mid-year in 1949 reaching a low last September, a month of general decline in downtown Chicago stores, the Fogarty Co. reports. Last day of that month, Burgess began an experimental half-hour show, The Burgess Hobby Parade, over WKBK (TV) Chicago featuring local celebrities and other well-known personalities who have unusual hobbies. Tied-in with the program (8-8:30 p.m.) was the natural merchandising plug for Burgess' hobbyland.

Chart, tracing week-to-week store sales, showed George Bell, Burgess Battery Co. vice president, that the sales curve was keeping pace with the listening power of his new TV show. The program also drew letters and postcards by the thousands, reports Fogarty, some 1,080 in a single week. The decision to concentrate Burgess' budget in television followed the experimental line set down by Mr. Bell—newspaper concentration in 1947, in radio in 1948, and now video. While the store sales in October dropped below the year before by 15% the first two weeks, 19% the third week and 3% the last week, they moved up 47% over the previous month.

Brazil Plans TV

TELEVISION station will be constructed in Sao Paulo, Brazil, by Emissoras Associadas, Brazilian radio network, it has been announced. Meade Brunet, vice president of RCA and managing director of RCA International Division, said RCA would supply all equipment for the new station, which is expected to go on the air next summer.

hallen's NEW professional

Synchronous Magnetic Recorder

- Low Flutter in the tropics or the Arctic with Hallen Dynamic Tension. No clutches, belts, pads, or springs to give trouble.
- Fully professional.
- Conforms to Academy Standards.
- Two channel mixer and dialogue equalizer.
- Simultaneous playback permitting monitoring 1/12 of a second from the recorded track.

* Amplifier is contained in a removable unit, permitting space between the amplifiers and the power supply with monitor speaker. This eliminates microphonic feedbacks usually present when a loud speaker and high gain stages are placed in close proximity.

WALTER LOWENDAHL

IN Hollywood where preciosity often is so
pandemic as to go unnoticed, Walter
Lowendahl nevertheless was considered
something of a boy wonder back in 1940.
At the time, he was 20 and had produced
not just an artistic picture—which any boy
of genius could do—but one with box office.
For eight weeks his "Adventures in Music,"
featuring Jose Iturbi and other concert stars,
rang in one New York theatre.
That mixture of the artistic and the commercial is perhaps the dis-
tinguishing characteristic of Transfilm Inc., of which Mr. Low-
endahl at the age of 20 is now ex-
ecutive vice president. Transfilm has produced about 200 television
commercials in the past year, a volume which, when all the figures are
in, may be a record.
They are commercials which in some instances have overshadowed adjacent programs in entertain-
ment value. The Camel commer-
cials for R. J. Reynolds and the Piel’s animations are notable examples.
Transfilm itself has a roster of television clients which reads like an industrial "400" book. Ford, Poul-
iac, Gulf Oil, Bromo Seltzer, Fort Pitt Beer, Colgate, Consol-
edation Edison, Duff-Mott, Life, Hotel New Yorker, Disney Hats, Swirl dresses, Look magazine, Benrus, Wildroot Hair Tonic—
these are but some of Transfilm’s video clients.
It is no accident that Transfilm commercials have won plaudits for high quality. Its production is based on a Lowendahl philosophy that corner-cutting doesn’t pay.
"Good films can not be turned out on non-existent budgets," he says, "nor can quality be obtained cheaply.”
That, he believes, is the stern lesson an advertiser must learn.
And any advertiser who hopes to build a TV commercial on the budgetary scale used for radio spots is less than realistic, he says.
Prices for one-minute, live-ac-
tion commercials are leveling off
at about $1,500 to $2,500, he believes. Many commercials, with elaborate scenic or casting problems, may cost more. Savings, however, are available to the
client who gang his work, order-
ing several spots done on one
shooting day with the same set.
Mr. Lowendahl’s film background is a solid one. It began at the age of 16—only two years after he
came to this country from Berlin. He went to work in Hollywood as an assistant to Lewis Lewyn Pro-
ductions, which did "Peter Smith Specialties" and other shorts for MGM. There he lost his German accent completely and, gained a through grasp of an almost every phase of film production.
In 1940 he helped form Artists
Films, an independent outfit which produced, among others, "Adven-
tures in Music." From there, in
1941, he went to New York to
join Functional Films, predecessor of Transfilm Inc. Six months later he became vice president of Trans-
film.
In 1942, Mr. Lowendahl was tall
(6’2"), dark and 1—there was an
olive-drab suit awaiting to
match his olive skin. He joined a select group of soldiers who pro-
duced training films for the Army Ordnance Department at Aber-
deen, Md., Proving Ground. He
served as writer and project super-
visor.
When he was mustered out in
1945, he resumed his vice presi-
dency at Transfilm, an organiza-
tion which rapidly mushroomed,
winning prizes for quality of its work as it expanded.
Transfilm now owns its own 15-
story building, the former Pathe
Building—55 W. 48th St., New
York. Its 70-odd employees occupy four floors and it has facilities to
do almost any film production task. It also is the neighbor of other dis-
tinguishing commercials, films for
among its tenants are Louis de Rochemont; Famous Pictures, the
Paramount subsidiary producing the}
the NBC television film exchange.
In such a substantial setting, it is
not surprising to find that Mr.
Lowendahl believes New York is
the preferable headquarters for
industrial and commercial film-mak-
ing. In that city, he points out, are
the advertising agencies and clients who must be consulted dur-
ing progress of many productions.
Such consultations are only part
of the many details involved in the
making of video commercials, edu-
cational films and documentaries.
It is not inexusable, therefore, if
Mr. Lowendahl sometimes feels the need for a retreat to his bachelor
apartment in Manhattan for a
change of pace. And what is his
hobby there? Photography.

BUYS ‘CRUSADE’
Bank Sponsors on WJZ-TV

FILM SERIES, Crusade in Eu-
rope, based on Gen. Dwight D.
Eisenhower’s book, will be spon-
sored on WJZ-TV New York by
the Bowery Savings Bank, New
York, starting Sunday, Jan. 22,
7:30-7:55 p.m. Edwin Bird Wilson,
New York, is the bank’s
agency.
The series, sponsored originally on ABC-TV by Time and Life
magazines, has been re-edited for
sponsorship by General Foods. It
will be shown once a week on the
WJZ-TV station on a syndication basis.
The documentary series is being sponsored by Robert Edson Co.,
WXXY-TV Detroit; Stromberg-Carlson is presenting the program on WHAM-
Atchison, KS; Central Pennsylvania Co.
is presenting the series on WBTY (TV; Charlotte); WJRT (TV; Ann Arbor); WFTY
Greensboro; N. C. and WFMY-TV
Winston-Salem, NC.

PHILCO CORP.
Big 1950 TV Output Planned

PLANS for wide expansion of Philco Corp.’s television receiver
production and sales in 1950 have been announced by William W. Bald-
erson, Philco president. Philco expects to manufacture and sell
from 750,000 to 800,000 receivers this year, Mr. Balderston said.
The excitement and the growth of television have exceeded even the most optimistic forecasts and
predictions," Mr. Balderston stat-
ed. "The industry’s production has
increased from 200,000 receivers in 1947 to names in 1948 to
about 2,700,000 in 1949. All signs
point to a further substantial in-
crease during 1950 with a poten-
tial sales demand for more than
4 million television receivers this
year."

TV ACADEMY
Van Werden Is Sec.-Treas.

BETTY VAN WERDEN, consultant
on radio education for Los
Angeles City Schools, has been
elected secretary-treasurer of the
Academy of Television Arts
& Sciences. Vote was obtained from ballots mailed to the membership,
after previous vote for the post at a recent meeting resulted in a tie.
A ballot on the same ballot as di-
rectors at large were Harold Bock,
director of television for NBC
Western Division, and manager,
KNBH (TV) Hollywood; Don Mc-
Namara, television director, Tele-
film Inc.; Russell Furse, Cascade
Pictures.
Coincident with these announce-
ments came the appointment of
Benton Paschall, owner of Western
Radio Service (radio and television representation) as chairman of
Awards Dinner Committee, replac-
ing Dick Lane who resigned the position because of motion picture commitments.

Other recent academy appointments include: to Steering Committee, Syd
Canvy and H. L. Hofman; to Dinner Arrangements Committee, Rita
Lehman, Mrs. Gerald Janis, Tom Armistead, Glad Hall Jones, Ernestine Johnson, Isabelle Pantone C. S. Ver
Halen, William Petrello, Leo For-
ney, Russell Furse, Ted Badger, Max
Finley, Lemoine Kingston, Clare
Hughes.

‘CAP’ TO CANDY
Johnson Buys DuMont Show

DUMONT TV Network’s adven-
ture series for youngsters, Cap-
tain Video, has been purchased by
the Walt Disney Television Company, Chicago. The program will be
sponsored Monday, 7-7:30 p.m. on
WABD (TV) New York, WXEL
(TV) Cleveland, WCP0-TV Cin-
necit, WTIN (TV) Columbus and
WTG (TV) Washington, Tuesday through Friday the program will
continue sustaining.
The contract, effective Jan. 23, was placed through Franklin Bruck

Canada TV Units

TWO CANADIAN branches of U. S. companies will build the first
two TV transmitters in Canada.
Canadian General Electric has been
given an order for a TV station at
Charlottetown by the Caledonia
Broadcasting Corp., with the transmitter to cost $184,000. At Montreal, CBC gave the
order amounting to $2,040,000 to
CACTC. Only these two companies were asked by CBC to quote prices, it was reported.
Transmitters are expected to be in
full operation by fall of 1951.
The money is part of the $4,500,000
recently loaned the CBC by the Ca-
nadian government for the building
of TV stations and studios at
Montreal and Toronto.

WLWT (TV) Cincinnati announces increase of 26% in number of spon-
sors during past year.
**Film Report**

TRANSFILM Inc., New York, has introduced two one-minute TV spots for Camel cigarettes. Spots to be seen this month feature press box interviews with big league ball players. Agency, William Esty, New York. Harris, television director of Ruthrauff & Ryan, Chicago, for past 4-1/2 years, has resigned and established her own TV creative service, Fran Harris Productions, at 6553 Hollywood Blvd., Board of Fox Theatre is Hillside 9254. Among accounts being handled on a freelance basis are Ruthrauff & Ryan Inc., Hollywood.

Norman Charles Lindquist, formerly with Malcolm-Howard Agency, Chicago, Ill., in Chicago, has resigned and established her own TV creative service, Fran Harris Productions, 1512 Crossroads of the World, is new Hollywood film producing TV programs. Principals are Gene Gach, independent press agent; Joe Yokum, announcer, and Alan Mann, radio and television producer.

Cinemart, 565 Fifth Ave., New York, has completed series of 20-second TV film spots for National Title Underwriters. Series being offered free to all TV stations willing to air spots from time to time as public service. Film features common causes of home fires and stresses simple precautions required to prevent them.

Ernest Chappell does narration. Telefilm Inc., Hollywood, filming sequence of television commercials for (passenger cars) at ABC Television Center, Hollywood. This is the first time outside organization has used facilities of network. Agency for Pontiac, Taggart & Young, Los Angeles. Telefilm has completed nine-minute video film, "The Sea Devil," based on hunt for giant ray off coastal waters of Central America. Film to be released on rental basis.

Inter State Bakeries, Kansas City (Butter Nut Bread), through R. J. Potts-Calkins & Holden, that city, has signed for production of 12 one-minute film spots by Star Productions, Hollywood. William Brewer, radio and TV director, is supervising production. Fully animated spots are to be used over stations in Midwest. Sylvania Television of America, Burbank, Calif., has been signed to do third series of television commercials for Ford. Agency: J. Walter Thompson Co., New York.

Estimated 1½ million set of 12 one-minute spots will be used by KBEA-TV Hollywood for kinescoping, according to Ernest Felix, assistant treasurer of ABC Hollywood. Film will be used for making master and copy kinescopes of Hollywood-originating productions for release on other ABC-TV stations. Station recently completed construction and tests for two video recording units. Peter Paul Inc. (Mounds candy bars) currently running spots on 40 TV stations throughout country. George Pal Productions Inc., Hollywood, produced "Puppetoon" films which have musical comedy. Candy firm plans similar campaign for Almond Joy candy. Agency Braschler, Wheeler & Staff, Los Angeles.

Harvey Pergament, president of Cavelcade Pictures Inc., 959 Seward St., Hollywood, has announced establishment of New York sales offices and entering of audio-visual education field. Production will take place at West Coast.

Negotiations are underway with several lecturer photographers to adapt their films with narration of factual information for release. Frederick and Sylvia Bronson, the first to be signed. Audio-visual series to be titled "Far Away People and Far Away Places." Theatre and TV series to be called "A Dream of a Holiday." Firm's first film in cutting and editing stage is "The Earth Speaks."

Formation of national distributing division, for sale of several KTV (TV) Los Angeles television programs, has been announced by Norman Chandler, president of station. New operation, to be known as Television Recording Ltd., to be supervised by Frank Pergament, KTV sales manager, assisted by Ralph Tuchman, sales service coordinator. Programs being offered for sale at this time includes Pantomime Quiz, now being shot in Los Angeles and scheduled for WCLF-TV New York, sponsored by Metropolitan Chevrolet dealers; Buster Keaton Show, sponsored by L. A. Studebaker dealers and sustaining Mystery Is My Hobby.

Jerry Fairbanks Productions, Hollywood, currently producing six one-minute film commercials and one five-minute color short for TV by Oldsmobile Agency: L. P. Brother & Co. Inc., Detroit. Firm recently copyrighted name of its new multi-camera technique as Multicam Process. New process can film long, medium and closeup shots simultaneously, cutting production costs by 80%.

Sylvania Television is recommending that all its dealers and distributors use maps showing television reception in their areas as a means of selling more sets. Maps illustrate how unusual topography influences set performance and how expert installation can provide the best possible reception.
COLOR'S DEBUT

(CONTINUED FROM TELECASTING 3)

were “a little too bright”; 86.6% rated clearness of detail excellent or very good, 10.5% only good and 3.9% “not bright enough.” The “red-and-blue and green colors” as excellent, very good or good.

Color sets also were installed in the homes of the FCC Commissioners to enable them to view programs telecast this month. Other test operations, of a technical nature, are being conducted in New York and Philadelphia [TELECASTING, Dec. 26, 1949]. Data obtained from the three-city operation, including the public reaction, will be furnished FCC for use in the color hearings.

Other special color features were shown in Washington prior to Thursday’s public debut, beginning with a “sneak preview” New Year’s night. On Jan. 8, CBS telecast a half-hour drama, Sorry, Wrong Number.

COLOR ADAPTOR

CBS TO STUDY FCC UNIT

PERMISSION was granted by FCC last week for CBS to duplicate for study, the automatic adaptor, invented by Edwin W. Chapin and Willmar K. Roberts of the Commission’s laboratory division, which permits monochrome receivers to be used on CBS color systems as well as standard black-and-white TV [TELECASTING, Nov. 28, 1949].

Authority also was given CBS to distribute copies of the circuit diagram for the automatic adaptor which has been patented by the inventors and assigned to the government and FCC. CBS, in making its request, had told the Commission it wished to study and test the adaptor and possibly construct suitable models.

The adaptation was described during the color television hearing in late November as being a one-tube unit constructed at a “minor” cost and capable of automatically following the transmitter from 325 lines and 60 fields to 405 lines and 144 fields.

The authority to CBS was granted on the following conditions:

(a) The authority granted herein is non-exclusive and shall expire six months from the date of this letter.

(b) No construction and testing of the above invention shall be carried on for commercial purposes in the U.S. and outside until 180 days after the receipt of royalties to the Government of the United States for the authority granted herein is waived.

(c) CBS shall furnish to the FCC the results of any testing of the hearing in Docket Nos. 8776 et al. of color television transmission on the above subject and construction and testing under this authorization.

New NBC-TV Affiliate

NBC-TV has signed WSYR-TV Syracuse as the network’s 27th interconnected station. The station, which will begin operations Feb. 15, becomes the 57th television station to affiliate with NBC-TV. WSYR-TV has no other network affiliation.

TV ‘THROTTLED’

WEBSTER CRITICIZES FCC

TELEVISION is a “multi-billion dollar industry being throttled by a government bureau unable to make up its mind,” Glenn E. Webster, president of Webster Engineering Co., Cedar Rapids, asserted last week in a letter to Rep. Bourke B. Hick- enlooper (R-Iowa).

He contended the freeze should be lifted “at once,” and said “if and when color television is ready it will be absorbed by the industry as new improvements are incorporated in the motor car field.” He claimed color is not ready, and expressed hope that “something can be done to break up these long hearings.”

Mr. Webster said he considered the situation “so serious as to need some congressional attention.” He felt that “if more of us would write our Senators and Representatives we might force some action out of this stagnant Commission.”

He wrote:

“Every segment of society would be served from the steel maker to the manufacturer and the public by a decision on the part of the Commission. . . . (The freeze has been in effect for nearly two years now and the end

TV CONFERENCE ASKS FOLSOM TO KEYNOTE

MARCH 6-9 MEET

FRANK M. FOLSOM, president of RCA, has been asked by the Chicago Television Council to keynote the opening session of the annual National Television Conference March 6. He will explain how and why executives will address an expected 

has been invited to lead discussion of “What Research Can Contribute to Television in 1950” on the closing day, March 8. Prof. Charles L. Webber, research director, Medill School of Journalism, Northwestern University, is expected to give results of an independent survey on Chicago TV successes which he is conducting for the council. Treetv research firms—C. E. Hooper, A. C. Nielsen, Pulse and Jay & Graham—will probably be represented also.

Theatre TV

A theatre TV panel will be followed by a Phonovision seminar. H. C. Bonfig, advertising manager of Zenith, which developed the pay-as-you-see TV system, has agreed to speak.

“TV Versus AM” will be debated at luncheon by a TV and an AM expert, after which they will answer questions from the floor. The closing session, “Stations, Agencies Solve Program Problems,” will feature former MCA-ABC-TV; Fred Freeland, TV director, Ruthrauff & Ryan; Don Cooper, WGN-TV, and Norman Lindquist, TV director, Atlas Film Corp., all Chicago. Joseph Betzer of Sarra Inc. will describe fundamentals of TV film commercials.

MIXED VHF-UHF

FCC DENIES CML REQUEST

FCC last week a request that it withdraw the mixed VHF-UHF television plan that it proposed last July [TELECASTING, July 18, 1949].

The request had been advanced by Communications Measurements Labs., New York, which opposed adoption of a “hybrid VHF-UHF” television system [TELECASTING, Dec. 26, 1949].

Other requests submitted by CML were accepted by the Commission for consideration by participants in forthcoming UHF television conferences. These included proposals that FCC:

1. Establish a municipal or small-town station classification with a maximum power of 1 kw effective radiated power and a maximum height of 150 feet.
2. Reduce the minimum antenna height for the community type station to 250 feet.
3. Abolish channel assignments to metropolitan, community or municipal stations exclusively.
4. Establish new interference ratios.
5. Amend the television engineering standards to provide for the directivity of receiving antennas be integrated into the “inter area interference calculations.”

Cross-Plugging Policy

WITH the exception of sign-off time on television where such periods come before the regular radio sign-off, KSTP and KSTP-TV, Minneapolis, effective Jan. 1, eliminated all cross-plugging of air features, a general practice in organizations with A.A. and TV outlets. Explaining the order, Miller C. Robertson, vice president in charge of sales, said: "Elimination of cross-plugging is being done because in the Minneapolis-St. Paul market television has come of age. It is no longer fair to advertisers on either fac- 

Theatre Service

(Continued from Telecasting 3)

Amen. of America Inc.; Tenth-D-cent-Fox Film Corp.; Fabian Enter-
prises Inc.; Motion Picture Theatre Owners of West Virginia; Walter Reading Theatres Inc.; Sidney Lust Theatres; Theatre Owners of Oklahoma Inc.; Paramount Television Productions Inc.; Motion Picture Theatre Owners of St. Louis, Eastern Missouri and Southern Illinois; Kansas-Missouri Theatre Assn.; Tri-State Theatre Corp.; Greater Huntington Theatre Corp.; Oak Ridge Theatres and Capitol and Ferguson Theatres; Republic Enterprises Inc.; Martin Theatres of Florida Inc.; Mar-
lin Theatres of Alabama Inc., and Martin Theatres of Georgia Inc.; Independent 
 
Theatre Owners of Arkansas; United Detroit Theatres Corp.; El-
lasses Theatre Corp., Lockwood & Gordon Enterprises Inc.; Balaban & Katz Corp.; Motion Picture Theatre Owners of Metropolitan, D. C.; New 

Mexican Theatre Assn., and New England Theatre Inc.

The hearing will be held upon the following issues:
(a) To determine whether the existing and proposed requirements for television broadcasting be satisfied by existing and proposed common carriers, facilities or bands of frequencies now allocated to such stations.
(b) To determine the order of frequencies and the spectrum space required, if any, at each order of frequencies which would be necessary to establish a television service.
(c) To obtain full information concerning existing or proposed methods or systems for exhibiting television programs on large screens in motion picture theatres or elsewhere.
(d) To obtain full information concerning existing or proposed methods or systems for transmitting or relaying television programs from the point of pickup to the exhibiting theatre, by use of radio frequencies, coaxial cable, wire, or other means, including intra-

city and intercity transmission.
(e) To obtain full information concerning any technical data obtained in experimental operations conducted in the theatre television field, or otherwise available.
(f) To obtain full information concerning any technical data obtained in experimental operations conducted in theatre television field, or otherwise available, includ-
ing public need and demand for the proposed service, public need or de-

quire,s of the service, and commercial practicability of the service.
(g) To obtain full information concerning plans or proposals looking toward the establishment of theatre television on a commercial or non-

commercial basis.
(h) To determine whether persons engaged in furnishing theatre tele-
vision services would be engaged as

common carriers for hire in inter-
state communications by wire or radio, within the meaning of Section 3(b) of the Communications Act of 1934, as amended.
(i) To determine whether, if fre-
quency assignments should be made, the purpose of providing a theatre television service should be established on a common carrier or non-common carrier basis, and if on a non-common carrier basis, the condi-
tions under which such service would be made available.

In the light of the evidence 

duced under the foregoing issues, to determine whether or not the public interest would be served by the issuance of a permit for allocation of frequencies to a theatre television service and by the promulgation of proposed rules and regulations governing such a service.

TEST PATTERNS

Would Ease FCC Policy

NUMBER of telecasters last week told FCC the proposed "liberalized" or its prohibition of separate aural and visual operations was commendable, but many desired some additional modification [BROADCASTING, Dec. 12, 1949].

Most want some test pattern-with-
music operation for sales demonstration, installation and pre-program warmup purposes.

The Commission proposes to continue the policy announced earlier to allow test patterns to be accompanied only by a single tone or series of varied tones. Separate operation of the aural transmitter would be allowed only for test or experimental purposes, or an emergency fills upon failure of visual equipment.

NAB suggested stations be al-

lowed to use test-pattern-music format for 15 minutes a day for warmup before the regular program schedule. Similar view was expressed by KTTV (TV) Los Angeles, KSL-TV Salt Lake City, WBTW (TV) Charlotte, N. C., and WKRC-TV Cincinnati. KTTV noted if this were not allowed, stations would have difficulty getting sponsorship for the first program.

Authority Asked

WBTW and WKRC-TV further asked for test-pattern-music format authority at other times during the day to aid sales demonstrations and installation of receivers and antennas. This position also was taken by ABC, NBC, KPIX (TV) San Francisco and Port Industry Co., operator of WSPD-TV Toledo, WAGA-TV Atlanta and WJBK-TV Detroit.

RCA Service Assn. stressed need for one set of rules as soon as adjusting sets upon installation and servicing as well as in teaching set owners how to operate them. Firm, which has 5,000 technicians in field, reported many service call-backs now necessary under restriction.

Television Broadcasters Assn. asked FCC to hold informal confer-

ence with TV operators to consider practical problems involved.

KTLA (TV) Hollywood suggested music with still picture be al-

lowed to introduce and set the mood for a forthcoming program. Parma-

ount's outlet also asked that news and music be allowed to retain audience during periods of visual trouble.
1950
The Broadcasting Yearbook
and your business . . .

the only single-source book of radio-tv information, facts, and figures . . .

How much do advertisers spend for spot, network, regional and local campaigns—who handles the account?

The top radio-tv agencies—personnel and gross billings?

You'll find the answers—and many, many more hard-to-get facts—plus these exclusive features in the 1950 BROADCASTING • TELECASTING YEARBOOK.

Gross network billings by advertisers, by agencies, by product classifications, by months ★ Comparative radio costs vs. newspapers, magazines ★ Year's top ratings, program trends, awards ★ National, regional advertisers-agencies ★ Fifty directories covering AM FM TV stations, executive personnel; networks; equipment mfrs; representatives, film, transcription and related services.

These and a thousand facts/charts more are the 1950 YEARBOOK, classified under easy-to-find headings, indexed for quick reference.

There's nothing like this 3½ lb. YEARBOOK for radio-active agencies, advertisers or any radio-connected business. It's your indispensable year round tool.

The Yearbook comes free to BROADCASTING • TELECASTING subscribers as of February 1. A limited supply of copies will be available at $5 each.

$7 pays for 52 weekly issues and includes the 1950 Yearbook

Programs

BASED on success of Thanksgiving-to-Christmas series of nightly readings from Bible, WCAU Philadelphia and Philadelphia Council of Churches will inaugurate new series during Lent. Programs will begin Ash Wednesday and continue through Easter Sunday, from 11:15 to 11:30 p.m. Object of series is to encourage laymen to read Bible by themselves or groups by men in every walk of life. Bookmarks listing suggested Bible passages for each day of Lent, published by American Bible Society, are available by writing to WCAU.

On-the-Spot Donation

ESTABLISHMENT of Omaha Regional Broadcast Center in Council Chambers of Omaha City Hall was occasion for special program aired by News Commentator Ray Clark of WOW there. During five-minute show, Mr. Clark interviewed Mayor Schulte, chief Red Cross nurse, concerning continuous need of donations and current problem of blood and operation of blood bank. While discussion was going on, Mr. Clark donated pint of his blood, giving listeners encouraging example of simplicity of process.

'Politics 1950'

JOINT political forum conducted over KEX Portland, Ore., features Republican and Democrats discussing points on current state issues in eight-week series. Show is titled Politics 1950, and each broadcast includes seven-minute, interrupted presentations by two representatives of each party, outlining viewpoint on appointed topic. Subject is then thrown open for discussion, questions and comments by four speakers. Bob Thomas, news editor for KOIN, is moderator. Subject for following week is announced at end of each show and questions from listeners, directed to either party, are solicited.

WAVE-TV's 'Spring Training'

NEW series, titled Spring Training, aired on WAVE-TV Louisville, features mahogany, league players and their "specialties" to video audience. Players who make their homes in Louisville cooperate in demonstrations with Bernie Broacher, TV sports announcer, and Dick Jackson, show's director. Series will wind up with films directed from big league spring training camps.

British Transcriptions

EXCLUSIVE Central New England radio rights to World Theatre, series of stage-length transcriptions of dramas featuring stars of Old Vic Theatre, stage company is given by WTAG - AM-FM Worcester, Mass. Plays run about three hours in length and will be broadcast Saturdays over 8 and 6 p.m. Majority of plays are Shakespearean. Series is under local sponsorship of WTAG-FM. Tom Murphy, WTAG special program assistant.

Hat Designing

NEW fashion show, Frankly Feminine, on KEGO-TV San Francisco, makes interesting viewing of 15 minutes of almost total commercial. Program features Bobby Lyons, advertising and fashion consultant, who demonstrates how to create hats at home from basic pieces available at The Millinery Bazaar, local hat shop and one of show's sponsors. Completed hats are modeled by girls wearing fur from another of program's sponsors. Feminine guest from foreign country is interviewed about fashions and news of home interest in her homeland each week. Show is created and packaged by William Winter.

Custom-Made Stories

YOUNG listeners can order custom-made stories from Paul Bole, writer and narrator of children's series, My Own Story, on WBZ Radio, Mich. Children are requested to write to station and suggest ideas for stories they would like to hear. For example, a boy or girl might ask for story about dog, passenger train and snowman. Around such ingredients, Mr. Boles weaves his broadcast.

TV Goes Latin

FLOOR show of Pan American Radio Club in Baltimore has been incorporated into local live program on WAAM (TV) Baltimore, Saturday, 7-7:30 p.m. Show is titled Pan Americana and is produced from WAAM's studios. Background for singing and dancing talent is provided by Producer Dennis Kane and Art Director Barry Mansfield. Show is participating.

Long-Distance Cooperation

MERE 1,000 miles was no obstacle to WHIT New Bern, N.C., when it aired game by its local jockey football squad in Miami recently. Broadcast originated in Orange Bowl and was piped over special lines to New Bern. WKAT Miami furnished sportscaster, announcer and remote engineer to WHIT for broadcast. Team's trip and game airing were sponsored by New Bern Recreation Dept.

Good-will Sponsored

BI-LINGUAL good-will program, Inter-American Voice of the Air, began demonstrating in Washington for foreign language. Conducted by Mr. Francisco C. Bandi, show emanates from WQQW-AM-FM and is heard Monday, Wednesday, Friday and Sunday. Latin-American music, news, commentaries, and interviews with distinguished personalities in international field are featured. Mr. Banda is well-known figure in Washington diplomatic world and is recognized authority on Inter-American affairs.

The Prisoners Speak

INMATES of penal or reformatory institutions in Massachusetts currently being series of weekly half-hour broadcasts over WMEX Boston. Colloquy, The Prisoners Speak, each program has panel of four inmates and is presented by United Prison Assn. of Massachusetts. Association also presents expert in penology or inmate activity. Series has been planned by UPA in cooperation with Massachusetts Dept. of Correction and inmates of Norfolk State Prison Colony and Men's Reformatory at Concord. The Prisoners Speak is produced by George W. Slade, former educational director for New England Westinghouse stations WBZ Boston, WBZA Springfield.

FIRE AWARDS

Radio To Share in Gold Medal Awards

RADIO again this year will share in the annual Gold Medal Awards of the National Board of Fire Underwriters in recognition of outstanding work in fire prevention. A gold medal or $500 in cash will be awarded to the station which has contributed the most to improving the fire safety of its community. Other stations will receive honorable mention citations for campaigns of unusual merit.

Last year's top radio award went to WOWO Fort Wayne, Ind. Deadline for nominations for the Gold Medal Awards is Feb. 28. The nominations may be made by fire chiefs, city officials, officers or local business or civic organizations, fire safety councils, or other individuals or groups.

Nominations, accompanied by exhibits or brochures indicating the scope of the respective campaign, should be sent to the NFBU, 85 John St., New York 7, N. Y.

The Gold Medal Awards were established in 1941 to give recognition to stations and daily newspapers for outstanding public service.

TRANSCRIPTION by Betsy King, nine-year-old disc jockey for WCOF Boston, on behalf of Children's Hospital Fund drive, distributed to 40 stations in Massachusetts.

Because we SELL — We're 65% SOLD!

WGRD
GRAND RAPIDS, MICH.

Because we SELL — We're 65% SOLD!
annual election in which Neville, Washington, and former NAB president, was named FCBA president succeeding Guilford Jamason.

Other officers elected were: William S. Sargent, second vice president; Arthur W. Scharf, second vice president; Thad H. Brown Jr., secretary, and Reed Miller, treasurer.

Mr. Johnson told FCBA that it is FCC's "duty" to be more than a regulator lookinging other salesmen. He will be a "marketplace" magazine. It is FCC's "duty" to influence the marketplace by the way it licenses stations.

He said regulations are more likely to become arbitrary and onerous only when the licensee is doing a minimum job.

When the licensee pursues only stockbroking interests, how little he can get by with, and is only a "stockbroker," the trend is to the "day's work"

Licensees and their lawyers constantly cry about the Commission and its greed for more power, but the most effective way to pull the Commission's strings is to bring a complaint. It is easier to say something than to do it. On the other hand, the FCC is making it clear that there is little for the Commission to do except formulate technical regulations.

On Color TV

On the subject of color television: "Since it is generally agreed that color is practical, most emphatically the public interest would not be served by waiting until 50 million dollars are invested to market $6 billion dollars in black-and-white sets before switching to color."

He said he was "sorry there has been unavoidable delay in reaching a final decision" on color but that he thought FCC's "present hearing has been justified by the new interest it has aroused in this area."

The entertainment program for the dinner included Eddie Gallaher of WTOP-CBS Washington as m.c., and radio and television singers Mel Torme andPatsy Cline.

Guests aside from FCC members and staff executives included Navy Sec. Francis P. Matthews, who is part owner of WOW Omaha; Sen. E. W. McFarland (Ariz.), whose bill to reorganize FCC procedures has passed the Senate and was promised further assistance by the House Appropriations Committee; Sen. Charles W. Tobey (R-N.H.), "Dean of the Senate," former President Eisenhower; Sen. Burton K. Wheeler of Montana, now practicing law in Washington; Rep. Robert C. Byrd of West Virginia, chairman of the House Interstate and Foreign Commerce Committee, and a number of other congressmen and government officials.

Traffic

Pittsburgh, Jan. 16--The Chamber of Commerce in this city actually intended to construct the station for purposes of sale rather than operation. In cases where in addition to a transfer of license, there is also involved a transfer of a construction permit for modification or expansion, under which construction permit program test have not commenced, the Commission will authorize the transfer of such construction permit if it represents a relatively minor modification of existing facilities but not when it represents a major change in a station that is minor or will major upon the facts of every case. Illustrative of the former is a construction permit to change transmitter site. Illustrative of the latter is a construction permit to change from Class A to Class B; in television, to change from community to metropolitan station.

This section shall not apply to an assignment or transfer of control of a noncommercial educational or university or educational-advisory-the same community.

Subchapter IV, Title 12, Article 3, Section 3.215.

[Editor's Note: In FM section, this footnote permits transfer of FM stations from one owner to another, including transfer of license. No comparable footnote appears in section dealing with television transfers.]

WIBG ELECTS

Price Is Board Chairman

ELECTION OF RALPH C. PRICE, president of Jefferson Standard Life Insurance Co., as chairman of the board of WIBG Greensboro, CBS-affiliated regional, was announced at the annual meeting of the board of North Carolina Broadcasting Co., WIBG licensee. Mr. Price formerly was chairman and president of the Greensboro General manager, was elected president and a director of North Carolina Broadcasting, and Mrs. Lorraine P. Ridge, widow of Edney Ridge, former director, was re-elected to the board. Jefferson Standard owns two-thirds of the corporation and Mrs. Ridge one-third. A letter from Miss Gilmore was read by Secretary-treasurer Joseph M. Bryan, executive vice president of Jefferson Standard, formerly a director, resigned.

HELP WANTED

A good Philadelphia station is looking for a good AM time salesman who wants to work and wants to make money doing it.

BOX 810D, BROADCASTING
NARBA CONFERENCE SCHEDULED TUESDAY

GOVERNMENT-industry conference called for Tuesday to discuss NARBA and forthcoming (Feb. 1) U. S.-Cuban sessions on television and radio. Plans announced by FCC and State Dept., which said “any licensee or other person associated with or interested in standard broadcasting and its international regulation is invited to attend and participate in the (Tuesday) meeting.”

FCC Comr. Rosel H. Hyde, who headed U. S. delegation to Montreal NARBA conference last fall and is slated to go to U. S.-Cuban session in Havana in same capacity, will be in charge of Tuesday session. It will start at 10 a.m. at State Dept., 1776 Pennsylvania Ave., NW, Washington. NARBA conference, currently in recess after U. S. refusal to accept Cuba’s channel demands, is slated to resume in U. S. about April 1, following completion of U. S.-Cuban negotiations. Meanwhile, it was considered almost certain that industry would be invited to send delegation to Cuban sessions along with official government delegates.

AID OFFERED FOR STUDY OF TV IMPACT ON ‘GATE’

JOSEPH H. McCONNELL, NBC president, Friday afternoon offered National Collegiate Athletic Assn., on behalf of all network broadcasters, financial aid and assistance in studies to find solutions of problem of impact of TV on sports attendance. He urged NCAA members in convention in New York that until facts of TV impact on sports gate are in “don’t blame everything on television.”

Meeting, on motion of Ralph Furey, Columbus U., recommended that NCAA business meeting held Saturday appoint committee to investigate sports attendance and report at June meeting of NCAA’s executive committee. Resolutions also recommended that NCAA members make no television commitments beyond 1950-1951 college year.

DELAY GRANTED IN SUIT

SECOND extension on suit brought by Salt River Valley Broadcasting Co., for KOY Phoenix and KTUC Tucson against CBS has been granted until Feb. 6 by Chicago Federal District Court Judge James P. Campbell.

KHTH HOUSTON’s new studio facilities, termed “Radio Plaza” and described as one of most luxurious and complete in South, dedicated Saturday with Frank White, MBS presi- dent, scheduled to participate. Ultra-modern design to accommodate TV with only slight modifications; 200-seat auditorium included. Executive office of President Roy Hofheinz has private dining room and kitchen.

WMEX CASE ARGUED

COMPLEX WMEX Boston license renewal and transfer case went before full FCC Friday in oral argument on examiner’s recommended report which failed to find sufficient evidence for conclusion that ownership data had been willfully withheld [BROADCASTING, Sept. 12, 1949].

Commission Counsel Walter Emery in substance argued that Alfred J. and William S. Pote, who with their sister, Antoinette Iovanna, would gain majority interest under proposed transfer, had assumed “real” or practical control of WMEX since inception although they were only minority stockholders technically. WMEX counsel, Arthur W. Schwalme, contended it cannot be said that they demeaned their identity and had reported stock interests when required. He urged renewal and transfer grant as recommended by examiner.

Spiegel Corp. All four networks submit thin shows.

ESSO CHannels OIL Co., through its agents, MacDonald & Pratt, New York, reportedly looking for television show.

IL PROGRESSO ITALIANO-AMERICANO owner of WHOM Jersey City, which last wee failed to complete contract to buy WINS New York (story page 4) because of inability sell WHOM, reportedly intending to reapply to FCC for permission to move WHOM to New York. Sale was withdrawn by IL Pro- gresso when WINS prospective purchase was not consummated.

FIRST RETURNS from Electric Institute telephone survey of Washington area te- dalers and service companies on effects of CBS public demonstrations of color last wee reportedly show black-and-white set sale ‘way down, service calls (from people who) to adjust monochrome sets to get color ’way up. Final results due this week.

EYES will pop and tongues wag in at least one district when list of nominees for NA board elections is sent to member stations each next week.

WITH ACQUISITION of facilities of WWD Washington (presumably to become WOL) b Peoples Broadcasting Co., licensee also c WRFD Worthington, Ohio, Fred Palme broadcast consultant and station executive, will become supervising manager of both properties. Edgar Parsons, manager of WRFD, will transfer to Washington as directing head of new operation.

MONTGOMERY FOR LUCKIES

(Continued from page 4)
It's still bargain day at WLW

The number of radio stations competing for listening within the WLW Merchandise-Able Area has increased from 153 in 1946 to 258 in 1949... an increase of 69 percent.*

Nevertheless, during February-March, 1949, WLW received 20,046,400 Home Hours of Listening per week—compared to 20,315,137 during the same period in 1946... a decrease of only 1.3 percent.*

Further, on a cost-per-thousand basis, WLW delivers advertising impressions at slightly more than half the cost of using a combination of the best local stations in each of the 27 major markets of WLW-Land.

And that's why we repeat... it's still Bargain Day at The Nation's Station!

*Nielsen Radio Index
DETROITERS have the money now.

TEN CONTINUOUS YEARS of full employment for over a million workers have made Detroit America's most prosperous major market. With auto manufacturers planning to EXCEED last year's record production of 6,240,400 cars, the 1950 outlook is exceedingly bright. Looks like another three-billion-dollar year for Detroit's retailers!

WWJ-TV has the audience now.

THE 150,000 TV sets now in the Detroit market are concentrated within easy range of WWJ-TV's strong, clear signal. Lion's share of this audience belongs to WWJ-TV, first television station in Michigan . . . two years ahead of Detroit's other two, in TV know-how and programming.

ADVERTISERS are doing the business now.

1949 WAS A GOOD YEAR for WWJ-TV advertisers. Naturally, 1950 is proving even bigger. Aggressive advertisers seeking increased sales in this fabulously wealthy market can achieve them through WWJ-TV.
Farm families of the huge Midwest Corn Belt have come to expect a friend, a neighbor, one of the family—someone to lose or mangle a hand in every corn-picking season. The National Safety Council reports injuries occur on U.S. farms at the rate of five a minute and the cornpicker they say is one of the major causes. Trouble comes from clearing stalks and ears that lodge themselves in dragon-like teeth, deep within the machine.

An Illinois farmer recently developed a simple tool for safely clearing his own machine. In friendly Midwest fashion, he wanted to share his idea, so he wrote WLS describing the tool above. Within four days after he sat down to write us, WLS “Dinner Bell Time,” America’s oldest farm service program, was telling listeners all over Illinois, Indiana, Michigan and Wisconsin how to make the tool for themselves. A little thing—yes, but then

Service is a lot of little things:

Clear Channel
Home of the National Barn Dance

890 kilocycles, 50,000 watts, American affiliate. Represented by John Blair and company.
Always a believer in the best possible radio signal to the most people, WHAS adds TV to its call letters resolved to deliver the best possible picture signal as well. The 12 bay high gain antenna now rising toward a 600 foot peak in the heart of Louisville will be the first such antenna in the United States. It heralds a new era of picture quality ... a WHAS promise of better television service to more Kentuckiana viewers.
FLYING SAUCERS? MAYBE.
WSPD & WSPD-TV
DEFINITELY YES!

There's been a lot of doubt about Flying Saucers, but there is no doubt about the

Represented Nationally by KATZ
NEGOTIATIONS completed last week whereby KRTV (TV), Dallas operation licensed to Potter Television Corp., would be transferred to Dallas News, operator of 50 kw WPAA. Purchase price understood to be in neighborhood of $550,000. KRTV took air Sept. 17, 1949.

IN FINAL stages last week was sale of KYA San Francisco by Mrs. Dorothy Schiff, New York Post publisher, to J. Elroy McCaw, owner of KELA Centralia and share-holder in KLZ Denver and KPOA Honolulu, for $155,000 plus net quick assets, bringing overall price to about $200,000. Associated with Mr. McCaw is Jack Keating, West Coast station representative. Transaction being handled by Howard Stark of Smith Davis.

CHICAGO is about to drive hard in effort to break FCC's TV freeze. City Council has pending strong resolution petitioning FCC to reopen licensing in Chicago lest it suffer in reparation as program-originating center. Chicago has four TV stations, as against seven in New York-Newark and equal number in Los Angeles.

THAT FCC staff study of transit radio may be nearing climax. Hilda D. Shea, chief of FM law, who's been on it practically fulltime for several months, has made five drafts of report, and is expected to come up with final one shortly. Question is whether transit radio is "broadcasting" in strictest sense of word. Whole subject still at staff level, but Muzak people (story page 29) may provide vehicle for public hearing.

ANOTHER COWLES station—WCP Boston—may be sold in near future. Negotiations were reportedly under way last week to sell station to Boston College, Catholic institution.

EXPLOSIVE plan whereby Drew Pearson, provocative ABC commentator, would repeat his Sunday broadcast on WTOP, Washington Post-owned CBS-affiliated outlet, is still in suspended animation. Pearson, now on Coast, was thwarted by Washington Star-owned WMAL (ABC) but has said that project isn't dead. Adam Hat, Wm. H. Weintraub Agency and ABC understood to have previously agreed to repeat.

FOUR-Ply convention plan to come before NAB board subcommittee Wednesday. Mid-April proceedings would be bracketed into three-day engineering session followed by Saturday FM and Sunday independent meetings and closing with management conference.

GRiffin SHOE LOTION through Birmingham, Castleman & Pierce, New York, preparing to add stations to its spot announcement campaign. Starting date Jan. 30, with contract to run through Nov. 11.

FORMER Judge Roy Hofheinz, president of KTHT Houston and licensee of other stations, (Continued on page 86)

**Business Briefly**

**Radio Prospect**

Chicago (beer shampoo), names Marmat Agency, same city, to handle account. Joseph Seideman account executive. Radio may be used.

**Clock Spots**

General Time Corp., New York, buys weekly participation on WABI (TV) New York Vincent Lopez program, Mon. 7:45-8 p.m., for Seth Thomas clocks any Westclox Moonbeam alarm.

**Buchen Appointed**

Meadonite Corp. Chicago (wood products), names Buchen Co. Chicago as agency. John McDonald, account executive. Media schedules to be complete in month.

**TV System Committee Is Created by RMA**

NATIONAL Television System Committee created by Radio Mfrs. Assn. with twofold program—industrywide accord on technical developments needed to give all parts of nation TV service, and creation of basic standard to bring color TV to reality.

Chairman of new committee is Dr. W. R. G Baker, General Electric Co. vice president and director of RMA Engineering Dept. Vice chair men are David B. Smith, Philco Corp. engineering-research vice president, and Donald G. Fink, editor of Electronics.

Technical societies, broadcasters and nonmembers of RMA to be in with to participate. Committee to report regularly to FCC on studies of technical prog ress. FCC has said it will "welcome" com mittee participation in TV hearings, though for policy reasons it declined to take any possi tion on establishment of committee [Telecast ing, Jan. 9].

Committee created after RMA Television Committee, headed by Max F. Balcom, vic president of Sylvania Electric Products, has reviewed recent TV progress including color. It will gather technical data on ultra-high allocation, lifting of FCC television freeze on color standards. Dr. Baker headed similar TV committee that drafted in 1941 FCC stand ards on which black-and-white TV has been built.

Raymond C. Cosgrove, RMA president, sat color TV has reached point where data should be pooled and standards set up to bring it out of laboratory eventually. TV set makers are eager to present color to public as soon as practical, he said.

**Terry Returns to KSGN**

Edward L. Terry returns to KSGN Free no-Sanger, Calif., as general manager, posi tion he served in when station took to air September 1947. Mr. Terry was KSBV Salinas business manager early part of 1947, resigning in April to engage in public relations at Fresno.

32% MORE INDIANAPOLIS LISTENERS
TUNE TO WFBM!

- The October-November Hooper Station Audience Index proves WFBM's BETTER RADIO PROGRAMS pay off! It shows this favorite station of radio listeners in Indianapolis and the rich central Indiana area has 32% more listeners, in the total rated time periods, than any other Indianapolis station.

WFBM's "better radio" formula isn't magic ... it's the potent combination of top network shows (WFBM is the only basic CBS affiliate in the State) plus outstanding, locally produced news, sports and musical shows and tie-ins with activities of top local interest.

What's more, WFBM's fine programming is supported by consistent promotion and aggressive merchandising activities ... two more good reasons why your first radio effort in Indiana belongs on the Hoosier State's first station—WFBM!
Advertisers and listeners alike are flocking to KFH and KFH-FM. This is not accidental. It has been planned that way. Professional programming know-how combined with a generous budget for smart local shows, with top-notch talent and all the best on CBS have attracted most of the listeners. Little wonder that advertisers are flocking to KFH and KFH-FM. Study the gains in the Hooper Index. If you're not on KFH, call your nearby Petry man for availabilities.

**NOTE:** No interviewing was conducted during the World Series broadcasts. 

"SHARE OF BROADCAST AUDIENCE" represents the proportion of the total broadcast audience (radio plus television) looking at or listening to a particular station. Base for "HOMES USING SETS" computation is "Total Homes Called." Where an FM station duplicates its corresponding AM station's program schedule in its entirety, the FM station mentions are combined with the AM station's mentions. *Every rated hour given equal weight. For this reason this Total Index is not an arithmetic average of the Day-Part Indexes.* The Code of Practice governing the use of "CITY HOOPERATINGS" applies to this "STATION AUDIENCE INDEX." 

**COPYRIGHT 1949, C. E. HOOPER, INC.**

**EXPLANATION**

The above is reproduced directly from the Hooper Station Audience Index. The top row of figures give the exact figures appearing on the report made by Hooper covering the same period, one year ago. The middle figure is the current October-November, 1949 index while the bottom row in each tier of figures indicates the percent of gain or loss for 1949 over 1948.
FRANCIS X. BRADY appointed director of new combined media and research department at McCann-Erickson, Chicago, where consolidation of the divisions took place Jan. 1. He assumes all management responsibilities, personnel direction and coordination of activities.

ROBERT P. KEEFE joins staff of Kal, Ehrlich & Merrick Inc., Washington. He also will handle some promotion for firm.

M. L. McELROY, currently with Cluett, Peabody & Co., New York, specializing in market research and sales work, appointed vice president of Assn. of National Advertisers. In new post, effective Feb. 1, Mr. McElroy will head ANA's media and research department.

BLAYNE BUTCHER resigns as radio director of former Newell-Emmett Co (now Cunningham & Walsh), Hollywood, following transfer of Auto-Lite account to Cecil & Presbrey. He has announced no future plans.

EDWARD E. COVILL, formerly with CBS, joins Kenyon & Eckhardt, New York, as business manager of radio-television department. He had been with CBS since 1936 and prior to that was with J. Sterling Getchell Adv. and R. H. Macy.

HUNTER SCOTT ADV., Fresno, Calif., opens San Francisco branch office at 400 Montgomery St.

HARRY R. PEEBLES elected president of Albert P. Hill Co., Pittsburgh, succeeding ALBERT P. HILL, deceased.

IRA ALAN GOFF, formerly sales promotion director of WAMS Wilmington Del., and Sunday Star, that city, joins Kates-Haas Advertising, also Wilmington, as account executive and director of radio and television.

Mervin D. Field, formerly with Field & Peacock Assoc., San Francisco, establishes advertising agency under his name at 400 Montgomery St., same city.

C. GILBERT NORTON, account manager at O. S. Tyson & Co., New York, named agency's media director, succeeding LEIGH DOORLY, who has become account manager for different group of accounts.

WELDON HANBURY and ALAN AINSWORTH, latter formerly announce a CBR Vancouver, join radio department of O'Brien Adv. Ltd., Vancouver, B. C.

CONNER, JACKSON, WALKER, McClure Adv., San Francisco, moves to new and larger quarters in Sheldon Bldg., 461 Market St.

NORMAN GLADNEY Joins Scheck Advertising Agency Inc., Newark, N. J., as vice president in charge of television and radio.

EDWARD R. MCNEILLY, radio writer and formerly KFI-TV Los Angeles director, joins Rockett-Lauritzen, Los Angeles, as radio and television director. Other new additions to agency include JOHN SHERMAN, formerly of Air Services, as account executive; WARREN PRATT, formerly associated with Edgar Bergen, as account executive.

NORMAN P. TATE, formerly with Newell-Emmett (now Cunningham & Walsh), New York, joins New York office of N. W. Ayer & Son Inc., to handle as duties in the radio-television department.

PAUL WINANS, for 20 years head of his own Los Angeles agency, joins Haney-Stebbins Inc., that city, as vice president. He will head media relations department as well as service his own accounts.

MILDRED FLUENT, account executive of Abbott Kimball Co. of Calif., Los Angeles, for past five years, named a vice president.

HERBERT GRUBER, timebuyer with Bow Co., New York, for past six years resigns to join Cecil & Presbrey, New York, in similar capacity.

BOONE, SUGG, TEVIS & WALDEN, San Francisco, will close its offices at end of this month. WILLIAM SUGG will leave agency field for sales work. PHIL BOONE, RICHARD TEVIS and CHARLES WALDEN will affiliate with other agencies, dividing BST&W accounts among them. Their future affiliation have not been announced yet.
Business is always better in Washington, D.C.

Washington's mid-winter telephone book for this always-richer market bulges with 44 more pages than ever before . . . and in this all-ways richer market, Pulse shows that WTOP's always-bigger share of audience is now 36% larger than any other station.
INDIANAPOLIS’ DYNAMIC NEW NEWS ANALYST...

Bill Folger

He joins the increasing list of WISH “personalities” featured in an impressive list of BIG shows programmed locally.

Fresh from several major news “scoops” in Washington, D.C., and the East. Bill is a reporter and analyst of national stature. His long background in reporting, his keen knowledge of people, his ability to snoop out the REAL news, plus his easy-to-listen-to manner are already keeping a majority of Hoosier ears glued like magic to his every broadcast.

New Business

FALSTAFF BREWING Corp., St. Louis (beer), April 3 starts three-weekly 15-minute transcribed Meredith Wilson Show on stations in more than 20 markets. Packaged by William Morris Agency, format is comedy-music similar to previous Willson shows. Agency: Dancer-Fitzgerald-Sample Inc. Chicago.

TRANS-WORLD AIRLINES, New York, through BBDO, also New York, currently using spot campaigns on four New York and three Chicago television stations. Twenty-second and one-minute announcements being used to promote TWA’s “quickie vacations” to Arizona and Southern California.

FRENCH SARDINE Co., Terminal Island, Calif., places Cuy Watson-Erskie Johnson production, Hollywood Revue, for 15 weeks in 14 national markets: Los Angeles, Chicago, San Francisco, Cleveland, Washington, St. Louis, Milwaukee, Omaha, Buffalo, Pittsburgh, Columbus, Syracuse, Seattle and Rochester. Account was placed by Rhoades & Davis, San Francisco.

WEATHER SEAL, Atlantic City, N.J., signs with WMID same city for 15-minute across-the-board program, Watch ‘Da Doon’, Mon.-Sat., 6:30-8:45 a.m. Show also will be carried by WDKN Camden. Plans call for addition of five more stations on intra-state network basis for complete New Jersey state coverage.

REDDI-WHIP, Los Angeles, appoints William Kester & Co., that city, effective Feb. 1, to handle advertising. Plans include use of radio for first time with 11-week participations on stations in Southern California and Phoenix. KRISP, KAKE KONE KJL, Los Angeles (bulk and packaged ice cream cake cones) appoints same agency to handle advertising. Television participations are planned in Los Angeles area starting in February with later expansion to six Western states.

COLGATE-PALMOLIVE-PEET Co., Toronto (soap products), buying local programs on stations in various parts of Canada, and expanding regions programs. Who Am I? (Supersuds, Odex) expanded to Ontario stations, five times weekly, 10 minutes, through L. J. Heagerty Ltd., Toronto; Barry & Bett (Vel) expanding to five times weekly throughout Canada, through Harry E. Foster Adv. Ltd., Toronto, and half-hour Mailbag (Vel, Palmolive) being used six times weekly on CHAB Moose Jaw, through Harry E. Foster Adv. Ltd., and Grant Adv. of Canada, Toronto.

Network Accounts • • •

FORD DEALERS OF AMERICA, Detroit, will sponsor Kulka, From & Ollie of 56 NBC-TV stations, 7 p.m., starting Feb. 1, one night a week, Wednesday, for 13 weeks. Agency: J. Walter Thompson Co., New York. Program is sponsored by RCA Records and Sealtest Inc. on other four evenings.

Adpeople • • •

SAMUEL HENRY Jr., in charge of Trans World Airline, New York, domestic advertising, and H. G. RIEGNER, head of advertising on TWA’s overseas routes, given new titles of assistant advertising directors. Mr. Henry will be responsible for all media advertising, including radio and television, while Mr. Riegner will head production and distribution of promotional literature.

"Oregon's population has increased by 59.3 per cent in the last nine years — the largest growth of any of the 48 states"—(News Release, Nov. 4, 1949). The rich, fertile counties of southwestern Washington, lying within KGW's north-south broadcasting beam, have enjoyed a similar rapid population rise.

These new residents, already familiar with the high quality of NBC programs, have naturally turned to KGW to continue their established listening pattern.

This increasing population creates expanding markets for goods, greater demands for services and facilities of all kinds. Oregon's enlarged population offers an ever-growing advertising opportunity, bringing with it a more urgent need to concentrate effective selling on KGW, the ONLY Portland station that delivers Comprehensive Coverage in the fastest-growing market in the nation.
Feature of the Week

Two of the "Twinpiration" homes.

PUBLIC exhibition recently of the "Twinpiration" homes in Wichita, Kan., was the climax to a public service inspiration by KFH in that city. The station kicked off a non-stop promotion for the enterprises following the first turning of the earth in their construction. The homes are identical and of the modern ranch type. The project was sponsored to demonstrate the effective use of new building materials and the advantage of careful planning.

KFH's morning program, E. J. Notebook, that features Ethel Jane King and her announcer-partner, Dave Wilson, kept listeners up-to-date with daily progress reports. Both Miss King and Mr. Wilson extended invitations over the air for the public to inspect the site while construction was underway. They also supplemented radio promotion with written invitations and newspaper publicity in the local newspaper for an "open house," which during Dec. 14-22 drew an estimated 18,000 persons.

The homes, KFH explains, to all (Continued on page 47)

On All Accounts

HE got the notion during World War II while serving as a public relations officer with the Army Air Forces: Why shouldn't a man experienced in radio teaching, announcing, continuity writing, program direction and station administration make a good radio salesman—especially since he really believed he could sell?

George Richard Guyan tackled his first sales assignment less than three years ago. Today, he is western sales manager of WGN, the Chicago Tribune's 50 kw operation—proof of his earlier convictions.

"There are so many ramifications to radio sales that come to you sooner if you know broadcasting from the inside," he believes.

George got his know-how the hard way. Fired from his first announcing job at WTMV East St. Louis after six weeks of being told repeatedly he "didn't know from nothin'," he moved west to KFRU Columbia, Mo. At this seat of Missouri U., he found a sympathetic soul in one Mr. Chet Thomas, then general manager of KFRU and now head man at KXOK St. Louis.

Mr. Thomas not only restored the Guyan self-confidence by making George program director, but sensing a pedantic air about the man wangled him a couple of teaching jobs. One was at Missouri's famous journalism school where George taught radio writing, one was at Stephens College, one of the midwest's top-rate women's schools, where he dispensed a practical course in broadcasting. He used KFRU's studio as a laboratory.

Mr. Guyan's handbook for radio news-writers prepared while he was at M. U. was standard equipment in United Press radio bureau for several years.

About half-way through his three year tenure a KFRU, two big things happened to George: He was named assistant manager of the station and he copper one of Stephens "Ideal Girls" as his bride. (Each year the college selects ten seniors as "Ideal Girl" graduates.)

In 1949, he joined WBBM Chicago announcing staff. He worked General Mills' Betty Crocker Show, handled narration work and commercial announcing on Procter & Gamble's Road of Life and served as announcer on Glenn Miller's CBS Chesterfield show when they came to town. He handled WBBM's well-known Golf.

(Continued on page 47)
WHEN WDAY takes its Talent Parade "on the road," farmers and their wives for miles around turn out in a gay party mood. To quote a recent radio magazine article:

"WDAY has promoted its weekly 30-minute Talent Parade until it is a regional phenomenon. . . . For many (people) it is the first live entertainment they have ever seen. . . . For others, it is the big social event of the season."

WDAY's amazing popularity among the Red River Valley's "landed gentry" is one of the wonders of radio. But there's a lot more to the story: WDAY also gets the highest city Hoopers in the nation! What's more, both "audiences" have average Effective Buying Incomes 'way above the national average!

Write to us or ask Free & Peters for all the facts about this fabulous station!
WE could paint a very fancy picture of all the things that make KWKH a truly outstanding station—but it would boil down to this: a "native-southern" flair for Southern programming, together with 24 years of solid radio experience in this market. Know-How, we call it. . .

Latest Shreveport Hoopers (Nov.-Dec. '49) prove that KWKH's formula and methods really pay off:

For Total Rated Periods, KWKH gets a 52.0% greater Share of Audience than the next station.

These figures are for Shreveport only, of course. But better yet, KWKH delivers an equally loyal rural audience throughout our prosperous oil, timber and agricultural area.

Let us send you all the facts, today!

50,000 Watts • CBS • The Branham Company Representatives

Henry Clay, General Manager
TIME SALES

RADIO TIME SALES reached an estimated $429 million in 1949, maintaining their consistent upward trend to reach a new record 3% above the preceding year's totals, according to the 1950 BROADCASTING - TELECASTING YEARBOOK, which will be mailed to subscribers this week.

The YEARBOOK estimates television time sales at $24,750,000 and FM's at $6 to $7.5 million, for overall AM-TV-FM time sales approximating $460 million. These figures are before deductions of agency commissions, etc., which broadcasters count as an expense of sale. AM time sales were divided as follows, according to the YEARBOOK's 16th Annual Business Index, which is based upon extensive sampling of all types of broadcasting stations throughout the U. S.:
- 42.2% local time sales
- 29.5% national network time sales
- 26.2% spot sales
- 1.8% regional network time sales

Local advertising remained the foundation of radio revenues but spot sales showed the largest gain—7% as against a 6.4% increase in local time sales. Network advertising showed its first decline: A loss of 4.6% resulting from a hot summer despite fall and winter rallies. Regional network revenues gained about 2.3%.

Radio Receipts Up

In terms of dollar volume, AM radio's 1949 time sales receipts ran some $12,270,000 ahead of 1948's. Local advertising was up $1 million; spot sales up $7.2 million; national network down $2.1 million, and regional network up $170,700. (See Table I.)

On the basis of past year's experience, the YEARBOOK estimates that radio's income from the sale of talent and from other sources totaled about $22 million in 1949, bringing gross revenues up to $451 million, aside from TV's FM time sales and without counting an estimated $77 million spent by advertisers for talent and programs on their own account.

In television, network time sales were placed at $9.9 million; spot sales, $8.6 million, and local time sales, $6.35 million. There seemed little doubt that a substantial portion of this sum was new money to broadcasting, surveys having shown that TV budgets for the most part are an additional appropriation rather than a deduction from AM budgets.

Radio's 3% gain in net revenues, which should be compared to 1948's 11.4% increase, was the smallest gain percentage-wise since the end of the war. But it should be remembered that 1949 was a year of business jitters. Other indices of prosperity dropped off sharply, especially during the summer and early fall. There was a general feeling of insecurity among the nation's businessmen. Thus radio's revenue picture at the end of 1949—$12 million ahead of 1948—was considered excellent.

Radio's net time sales since 1940 have almost tripled. With the growth of television, they seem destined to reach the $500 million mark early in this new half of the century.

TV Sales Triple

The estimated $24,750,000 in television time sales in 1949 should be compared with $8.7 million in aggregate revenues for the visual medium in 1948, which means that TV's time sales revenues almost tripled in 12 months. Authorities thought it reasonable that this total could be nearly doubled if TV's problems with the FCC were removed quickly.

Accurate FM revenue estimates are difficult to make in the absence of a complete division of revenues where AM and FM stations are operated jointly. In many such cases, of course, FM is sold as a bonus to AM. In these circumstances, any time sales figure is a rough estimate. Most experts, however, felt (Continued on page 57)

HOOPER SALE?

RESURGENT REPORTS that C. E. Hooper is about to sell his radio research organization to A. C. Nielsen were again denied last week by Mr. Hooper, who admitted, however, that he and Mr. Nielsen have discussed the sale of "certain portions" of the Hooper Network Program Rating Service.

Mr. Hooper insisted that any proposals which have been made by Mr. Nielsen "do not involve his reported absorption of our business or organization."

He did not define the "certain portions" of his service which are under discussion, but it was believed that they are confined to the National Network Program Ratings commonly known as "Hooper's." The Hooper City Ratings Service, which measures the division of audience at various hours of the day and evening among the stations serving each city in a list of more than 100 U.S. markets, would presumably be retained by Hooper and continued by his organization.

Mr. Hooper's statement said: "It is true that there have been discussions between A. C. Nielsen and me regarding his purchase of certain portions of our network audience rating services. Most emphatically the proposals do not involve his reported absorption of our business or organization. Such proposals are not firm or final and are contingent upon approval by Nielsen stockholders and directors. If and when I have received a firm proposal, the trade will learn of our reaction to it without delay."

Despite Mr. Hooper's emphasis in denying that his conversations with Mr. Nielsen involve more than "certain portions of our network audience rating services," some observers believe that a deal for the sale of C. E. Hooper Inc. can and probably will be made in the months ahead.

They recall that in June 1947, Mr. Hooper offered to sell his complete service to BMB for $81 million and believe that the offer would stand today if the industry were inclined to reconsider it. They argue that Mr. Hooper would prefer to sell to an industry group such as BMB, which presumably would conduct the audience research as a nonprofit industry service, rather than to another individual business concern (Continued on page 58)
A NEW national advertising agency to be known as Carlock, McClinton & Smith Inc., will be established on May 1, it was announced jointly by H. L. McClinton, who has resigned as vice president and director of N. W. Ayer & Son, and Paul Smith, president of Paul Smith Advertising Inc. The firm is expected to have the account of Prudential Life Insurance Co., which sponsors Famous Stars on CBS and the Jack Barch Show on NBC, as one of its clients, Broadcasting learned.

The agency will have its head-quarters in New York. Officers of the new organization are Mr. McClinton, president; Mr. Smith, vice president and chairman of the plans board; and M. E. (Mike) Carlock, who has resigned as vice president of Benton & Bowles, vice president and secretary. Mr. Smith's present agency will be merged with the new firm.

Mr. McClinton has been with N. W. Ayer since December 1929, in the Philadelphia, Detroit, Chicago and New York offices. He was first with the public relations department; for 12 years was vice president in charge of radio, television and motion pictures, and for five years had been a member of the board of directors and of the creative production board.

Carlock's Background

Mr. Carlock had been with Benton & Bowles for seven years. He formerly was with the Metropolitan Life Insurance Co. and had been promotion manager of the Encyclopedia Britannica and prior to that with the Hutchinson Agency, Minneapolis.

Mr. Smith, before organizing the agency bearing his name, was with D'Areyc Adv. Co. on the Coca-Cola account for 5½ years. Between

1932 and 1942 he was art director for Kenyon & Eckhardt.

James E. Hanna, vice president and manager of the radio department of N. W. Ayer & Son, will succeed Mr. McClinton at N. W. Ayer as vice president in charge of radio and television.

Mr. Hanna has been with N. W. Ayer for the past 22 years. At one time he was in the Detroit office as copy chief and in 1940 moved to the New York office as copy chief of radio. In 1944 he was named vice president and manager of the radio department.

Other accounts for CM&S are expected to be announced soon. Prudential Insurance is currently handled by Benton & Bowles, New York.

HILL APPOINTED

LUTHER L. HILL, formerly general manager of the Cowles Broadcasting Co., which includes KRNT Des Moines, WNAX Yankton-Sioux City, WCO Boston, and WOI Washington, was named publisher of the Cowles-owned Des Moines Register and Tribune, at the annual meeting of the company's stockholders Jan. 11.

Mr. Hill joined the Register and Tribune organization in 1935 and in 1936 was named general manager of the firm's radio stations. After serving as a brigadier general in the Air Corps, Mr. Hill was named advertising director of the newspapers in addition to his duties with the broadcasting company. He served in these capacities until September 1946, when he was made vice president and general manager of the newspapers.

Also at the meeting, Carl T. Koester, formerly controller and assistant treasurer of the newspapers, was named treasurer, and the following officers were re-elected: Gardner Cowles, president; John Cowles, chairman of the board; Kenneth MacDonald, vice president and executive editor; Arthur T. Gormley, vice president and business manager; Vincent Starnzinger, secretary and general counsel.

SET PRODUCTION

PRODUCTION of radio and television sets totaled 9,680,773 units in 1949 of which 6,391,371 were AM only, 875,505 AM-FM and FM only, and 2,413,897 television, according to annual figures of Radio Mfrs. Assn.

RMA members are estimated to turn out about 80% of TV sets and a somewhat higher proportion of AM and AM-FM models.

While the numerical production compared to 14,132,623 sets in 1948, the average dollar value increased as TV output comprised a larger share of the total.

Production Gains

Early in 1949 the AM-only volume was at a low ebb but it picked up swiftly last August and the production rate in latter months almost equaled that in 1948. Peak 1949 month for AM-only was November, with 787,553 units.

FM-AM and FM-only sets produced by RMA members are approximately 400,000 television sets with circuits tuning the FM band. Allowing for a heavy share of FM circuits in non-member company TV sets, the total increase in FM circulation last year is estimated at about 1,500,000 sets.

Peak month in television production last year was November, with five work weeks. That month the RMA companies turned out 414,223 TV sets. In December (four weeks) the TV total was 292,061 sets. As usual, the year-end holidays cut down the December output. Post-

war output of TV sets by RMA companies has passed the 3,500,000 mark and the all-industry total is in the neighborhood of 4,000,000 sets. The 1948 TV output totaled 866,832 sets.

Auto and portable sets continued in high production last year. In the case of auto sets, production totaled 2,291,884 compared to 3,409,013 in 1948. Output of portables totaled 1,175,056, compared to 2,114,153 in 1948. Post-war is a month-by-month table of RMA television and radio set production in 1948:

Near 10 Million for '49

RELAXING with conversation at the Jan. 12 luncheon meeting of the Radio Executives Club of New York were (left to right) Frank Stetson, CBS president; Ben Duffy, president, BBDO Inc., and Robert Kintner, ABC president. Mr. Duffy was featured speaker [Broadcasting, Jan. 16].
SADOWSKI RADIO BILL

By JOHN OSBON

EXTENSIVE enlargement of the McFarland FCC bill and far-reaching hearings on many controversial radio-television issues — lasting from six to eight weeks and slated to get underway next month — were prescribed last week by House Interstate & Foreign Commerce Committee leadership.

After consultation with Rep. Robert Crosser (R-Ohio), committee chairman, Rep. George Sadowski (D-Mich.), head of the radio subcommittee, told Broadcasting he means to introduce his own bill, now being prepared, which would incorporate certain features of the McFarland measure (S 1973) and a host of "more substantive" matters.

The Sadowski version will be ready in "about two or three weeks," and will serve as the basis for hearings on a host of communications problems benefiting not only FCC but other government branches. Rep. Sadowski wants to elicit views of broadcasters, Justice Dept. and other branches, in addition to those of the Commission.

Rep. Sadowski said "we may not press for legislation but we do want to get all the information we can," during the proposed hearings, on these subjects:

- Allocation and assignment of frequencies as between those allotted through FCC for private users, and those through the President for government utilization.
- Cancellation of licenses by FCC — the only penalty under present regulations.
- Immunity of licensees from slander voiced by political candidates — the question of FCC regulations which conflict with state laws.
- Radio fraud provisions, currently embodied in the McFarland bill.
- FCC's network regulations.
- Television and particularly color TV with respect to present allocation of channels in some areas and lack of provision for others.
- Monopoly and "intertwined ownerships" involving investigations by the Justice Dept.

'Broader' Hearings Wanted

In disclosing his plans for new legislation and hearings, Rep. Sadowski emphasized his subcommittee is not "ignoring" the non-commercial, intermedial and guided by the Senate by Sen. Ernest W. McFarland (D-Ariz.).

But he also stressed that his group wants to hold "broader" hearings than conducted by the Senate Interstate Commerce Committee last summer [Broadcasting, June 13, 1949].

The McFarland bill passed the Senate last August after the Commerce Committee reported it out, with certain amendments to the original measure, including one imposing a "deadline" on FCC's action on applications [Broadcasting, July 25, 1949], and dropping certain other features.

During the hearings, which drew broad approval of the bill, the Commission called for revision or deletion of a number of basic provisions. Sen. McFarland reportedly had the tacit approval of the Commission, save Comr. Frieda Hennock, before steering his measure unanimously through the Senate.

Opposition from FCC and others mounted, however, when the legislation came before the House Commerce committee, which deferred consideration in the last session.

Full Exploration

Elaborating on his outline for the hearing, Rep. Sadowski said he thought communications should be explored from "top to bottom," starting at the government level with use of frequency space by various agencies and departments, including the State Dept., Commerce Dept., General Services Admin., and Defense Dept. (Army-Navy-Air Force), and involving the Interdepartmental Radio Advisory Committee, which makes spectrum space for government use.

This phase of the House plan is apparently borrowed from the Senate. McFarland subcommittee, which is investigating the allocation of frequencies between government and private users, as well as a proposed single system of domestic and international records communications [Broadcasting, Oct. 24, Nov. 28].

Rep. Sadowski reported there had been complaints that cancellation of licenses by FCC is "too severe a punishment." He said the whole question of sanctions would be explored by the subcommittee.

The McFarland bill presently calls for revocation through "show cause" orders, and includes a "cease-and-desist" provision for less serious violations.

The whole question of slander by radio — touching on FCC's celebrated decision on political broadcasting — needs a thorough going-over, too, Rep. Sadowski asserted, outlining the dilemma of the broadcaster subject to state laws and FCC rules.

Network Question

With respect to the Commission's network regulations, Rep. Sadowski said he wanted an answer to this question: "Shall networks be subject to direct FCC regulation?" He said he has received, from time to time, numerous complaints from affiliates and others to look into anti-trust laws, as charged by Gordon Brown, WSAY Rochester, who has suits pending in court.

Mr. Brown paid Rep. Sadowski a visit last week, apprising him of (Continued on page 50)

SAD

Legislative Stiletto

UNBEKOWNST even to some members of the FCC, there is about to be perpetrated one of the most artful acts of legislative sabotage ever foisted upon an unsuspecting Commission.

Barring a reversal of tactics, there is to be introduced in the House a bill bearing the name of Rep. Sadowski (D-Mich.) to amend the Communications Act of 1934. But we doubt whether it is Mr. Sadowski's handiwork. It was drafted in the rough by the Law Bureau of the FCC in collaboration with Kurt Borchardt, communications specialist of the House Interstate & Foreign Commerce Committee.

While the concept of the bill is designed to block House approval of the McFarland Bill (S 1973), which unanimously passed the Senate last August and which had the support of the FCC, The McFarland Bill would reorient the FCC and strip the lawyers of the power they have accumulated over the years — power that has permitted them effectively to run the Commission.

The lawyers do not want the Commission reorganized. They do not want to meet deadlines. They do not want the appellate provisions of the archaic Communications Act changed.

So, after the last session adjourned, the lawyers set out quietly to change things. Richard A. Solomon, chief of the Litigation and Legislation Branch, maintained the liaison with Mr. Borchardt. The draft that was to become the Sadowski Bill was cleared through Gen. Counsel Benedict P. Cottone. The masterminding, we believe, was done, as always, by Assistant General Counsel Harry Pletkin, brilliant New Dealer whose credo is that those encounters he hasn't won just aren't finished.

The McFarland Bill could have passed the House last session, since there had been exhaustive Senate hearings. It was a stripped down compromise measure in which virtually all differences had been resolved. It would eliminate dilatory tactics by the FCC staff, and place policy responsibility where it belongs — with the Commission, rather than in its self-appointed brain-truster legal lights.

But the FCC lawyers got in the licks.

If our grapevine is correct, the Sadowski Bill would (1) impose penalties short of revocation of licenses through suspensions and fines, and imbue the FCC with power to play fast and loose with licensees, in a manner far more drastic than the "cease and desist" provisions of the McFarland Bill; (2) write into the statute the explosive substance of the Port Huron decision on political broadcasting; (3) subject all frequencies to license, including those allotted to Government for the military; (4) and most serious of all, license such a furor when incorporated in the White Bill several years ago; (5) get into the TV-color fracas; and (6) barge into FM.

Such a bill would embody such a strange admixture of bitter and sweet as to what the appetite of many a crusading politico. It also would mean smear-hearings and headline hunting. It could mean, without a doubt, in this election year. And, if we fathom the strategy of the FCC lawyers, that is what they're shooting for. It would leave things status quo. It is the divide and conquer thesis.

We hope the House Committee won't be taken in. We hope Chairman Crosser will ascertain why the FCC (by letter) supported the McFarland Bill in the Senate and (by letter) opposed the identical bill in the House. We hope we will find anti-trust, lobbying aspects, since the anti-lobby laws apply to Government as well as to industry.

The McFarland Bill, from radio's standpoint, is not optimum legislation. It is not a bill drafted by broadcasters for broadcasters. The need for improvement in the law is evident. That is what all the shouting has been about. The House should pass the McFarland Bill without hearings, and on the Senate record. Then if the House Committee or the FCC, large trust, political "fairness," licensing of Government frequencies, and other controversial matters, let it hold hearings for further amendment of the bill.

If the House Committee fails for this smoke-screen, FCC's lawyers can claim Congressional scalp along with those of the Commission.

AN EDITORIAL

Broadcasting • Telecasting
LIGHTNING THAT TALKS

THE DRAMATIC story of broadcasting's role in the personal, economic and political life of the United States will be told this year to hundreds of audiences through the medium of the radio-sponsored All-Radio Presentation film, "Lightning That Talks."

Starting with the first formal showing in New York March 1, with a thousand top advertising industry executives attending, the promotion film will tell radio's story in the dramatic language of motion pictures.

Once before the motion picture medium was utilized by broadcasters but on a more modest basis. This film, produced a decade ago, was widely shown.

"Move to do a similar job, but with a modernized touch, developed at the 1947 NAB convention at Atlantic City. Eventually the All-Radio Presentation Committee was formed. This committee has held dozens of meetings and its members have devoted large amounts of their time to the difficult task of planning, writing and producing a motion picture film that depicts broadcasting's important place in the national scheme."

Total subscriptions—including a fund of $50,000 subscribed by ABC, CBS and NBC—are around the $150,000 mark. Final cost of the film, turned out by the Independent Motion Picture Producers Society, will be $85,000 for one 35mm print, additional 35mm and 16mm prints costing extra. Station subscription fees are based on station income and range from $25 to $1,000.

Elaborate plans have been worked out for community showings of the film. The All-Radio committee is preparing full instructions with publicity and promotion kits. Committee officers are Gordon Gray, WIP Philadelphia, chairman; Maurice B. Mitchell, director of Broadcast Advertising Bureau, secretary; Herbert L. Kreuger, WTAG Worcester, Mass., treasurer; Eugene S. Thomas, WOIC (TV) Washington, assistant treasurer. Victor Ratner, former CBS vice president and now a vice president of E. H. Macy Inc., New York, was producer.

WITH A HIGH voltage hiss, roar of thunder and musical background, the filmed story of radio is introduced. These titles appear, "The Broadcasting Industry of the United States Presents 'Lightning That Talks.'" The scene quiets down, many stars are seen, followed by the subtitle, "The Story of America's Greatest Voice."

A rolling title carries on the introductory sequence in this way: "This is a true story. Every incident shown here is an actual experience, showing the businessmen and radio listeners to whom these things really happened . . . filmed where they happened."

The story opens with a sequence of heavenly orbits, a storm appearing in the background as Benjamin Franklin is introduced during the lecture of a professor in a planetarium. As the story is moved along by use of screen devices, the professor explains that Franklin's "greatest interest was how to bind the people of the Colonies together by improved communications. He published seven newspapers."

The camera dollies in to Maurice B. Mitchell, director of Broadcast Advertising Bureau, seated in the professor's audience. Mr. Mitchell comments, "I wonder what Franklin would have thought of my kind of communication—radio."

The heavens become an electronic battleground as the camera tells the story of Franklin and the kite, using a true replica of the original key. Sparks jump from the key across Franklin's knuckles as the electrical storm subsides and the scene returns to the peaceful beauty of the opening.

"Verily, what a wonderful place to continue my experiments with lightning. This is truly heaven," Franklin comments.

From the key comes, faintly, then strong and clear, the 1920 voice of KDKA Pittsburgh and the Harding election returns. Sparks jump from the key to Franklin's

PRODUCTION crew for the International Movie Production Service on the all-radio film (l to r): Gene Farrell, music composer; Dr. I. M. Levitt, technical advisor; Ben Gradus, director; Joe Brun, cameraman.
knuckles, providing the only static in sight. His hand pulls away from the key as though in astonishment, as he says, “What! They have made the lightning talk?”

Through a series of heavenly sweeps, Franklin approaches the ground, traveling through the years of radio as he desires to learn how radio is being used after 30 years of development. History from 1921 to 1941 is depicted by snatches of broadcasts, including events, personalities and music.

“Every aspect of America... and the world... every interest... every mood of the people is reflected by radio,” Franklin observes. As he gets closer the sound track introduces a series of commercials, the audience becoming aware of messages promoting soap, cigarettes, food... DIAMONDS. The camera stops short, the earth appears as a ball in the distance as Franklin says, “Verily, can even a diamond be sold by the unseen spoken word?”

Thus the first of a series of sequels showing commercial radio in operation is presented, abetted by the techniques of the cameraman and the producer.

Sequencing 2 has been introduced by the diamond reference and opens with a radio commercial built around “D. A. D. ... not Dad but... Diamonds at Davison’s.” The voice is coming from WDAK Columbus, Ga., which Franklin observes from his heavenly perch via an airplane shot of the city.

The commercial continues: “This is Bill Byrd, the manager of Davison’s Department Store in Columbus. That explains one D—Davison’s... Yes, Davison’s has opened a new department of fine jewelry...” The shot dissolves from a Columbus street scene to the facade of the store and into the counters. Franklin exclaims, “How wonderful the general store has become since my time.”

A jewelry counter scene is spiked by the babble of customer-clerk discussions. The camera moves up a few floors to the office of Mr. Byrd, the manager, who is chatting with Allen W. Woodall, president and general manager of WDAK Columbus.

“The boys in the New York office,” Mr. Byrd observes, “are so impressed with our diamond campaign, Allen, that I can now go along with you on this new idea. And it was only a month ago that I called you in.” Follows a flashback showing Messrs. Byrd and Woodall in Mr. Byrd’s office after store hours. Here is their dialogue:

BYRD—Allen, I’ve got a sick baby on my hands. I’ve tried to push our new diamond department but it won’t go. Frankly, I don’t think you and your radio can do much with it, either.

WOODALL—The trouble is, Bill, though everybody knows Davison’s, people down here just ain’t used to buying good jewelry in a department store. They have got to be taught that they can buy them at Davison’s, and can buy them cheaper here.

BYRD—Heck, I know that, Allen, you don’t have to remind me. But can radio do it better?

WOODALL—Bill, give it a chance. You’ve spent $400 this month advertising diamonds in the newspaper—and sold two of them. Spend the same money on my station. We can beat that.

BYRD—You’ve had to beat that...

WOODALL—How many sales would you be satisfied with?

BYRD—Sell four diamonds for me and I’d be happy.

WOODALL (as they walk away)—O. K. Here’s what I want you to do.

The scene shifts to a romantic moonlight scene with a young couple sitting on a swing listening to a radio on the window sill as an announcer’s voice intones:

Yes, Diamonds at Davison’s. Davison’s Department Store has just opened a brand new department. Now you can buy diamonds at Davison’s. Davison’s can afford to give you top quality for at least 10% less since the purchasing power of...

Another closeup shows a wife ironing kiddie clothes as hubby smokes his pipe and reads. They hear a Davison’s commercial which inspires the wife to suggest her husband buy a dinner ring. He’s highly unconcerned at first, does a slow burn, but a few frames later he’s at the Davison jewelry counter approving the wife’s selection.

End of flashback and Messrs. Woodall and Byrd are talking again in the latter’s office:

WOODALL—(chuckling)—Well, did we sell your four diamonds for you?

BYRD—Oh Brother! We’d never been on the air before and in less than three weeks we sold more than 60 diamonds.

WOODALL—What does that come to in dollars?

BYRD—Does Macy’s sell WDAK?

WOODALL—Mind your own business.

WOODALL (laughs)—That’s right, you are an affiliate of H. H. Macy’s.

BYRD—and now they’ve okayed our establishing a radio program on all merchandise for their southern stores. I’d like to...

As a comely miss admires a diamond ring on her finger, she picks up the telephone to put in a call for Cedar Rapids, Iowa.

GIRL—Did you get our Cedar Rapids office yet?

FRANKLIN—Cedar Rapids? That’s many miles from Columbus, Georgia.

GIRL (reacting to Cedar Rapids voice)—Peaches. How come she’s out buying peaches at this hour of the morning?

The scene dissolves from the girl to the ME TOO store in Cedar Rapids where auto salesmen and a long line of people stretches around the corner. At the head of the line is a truck of peaches with customers buying crates of fruit right off the truck. The women dollies back to a shirt-sleeved meeting where Weaver Witwer, wholesale grocer, and the others are worried because some cars of peaches are two weeks overdue from Colorado.

The meeting breaks up, the peaches are still missing, and after some informal scenes Ralph Whitlock, Mr. Witwer’s assistant, looks flabbergasted as he says on the phone:

Holy cow! Did the refrigeration conk out on all three cars? Be there (Continued on page 20)
Lightning That Talks

(Continued from page 19)

in an hour. O.K., we’ll look at ’em.

It’s night, and the merchandisers
sample ripe peaches as they juice
squirts all over them. Bill Drake,
ME TOO owner, shakes his head:

DRAKE—Three cars! What do you
think, George (his assistant)?

GEORGE—Well, I guess we’ve
solved tougher problems than this.
We’ll tell ’em on the radio tomorrow
this little special instead of the
canned beans we were planning —

meh...

WITWER—That’s right, Bill. You
really do use radio to push this stuff,
don’t you?

DRAKE—I use it all right. I’ve been
telling them, six days a week for 11
years, that no matter how low any-
body else sells any item, I’ll match that
GEORGE (on phone)—Johnny, hit
this real hard on the air tomorrow.
ME TOO has three cars of peaches
that will be sold tomorrow at a great
price—69 cents a lug. Yes, hold up
the beans . . . Yeah, Colorado . . .

O.K., Johnny.

RADIO ANOUNCER (voice coming
from radio in home of Mr. & Mrs.
Milburn)—U.S. Grade 1 Colorado
peaches marked 3, 4 and 5 to the case.
What a buy. What an opportunity.
Your last chance to get these ripe
peaches for canning, far pies, for the
table. Remember, first come, first
served, so be early . . .

MR. MILBURN—Don’t we have
enough canned stuff already?

MRS. MILBURN—Oh, we could al-
ways use more.

The commercial continues in
other homes and in other towns as
radio sets in with vigour and ex-
citement. A policeman waves his
arms and blows his whistle as cars
come from all around to buy peaches,
and the sequence ends with this
dialogue:

WITWER: Bill, looks like you’re not
going to have a peach left by noon.

DRAKE—Oh, we always crowd
them in. This is our radio special. Radio’s the
way we’ve built this business—from
one to nine stores since 1938. You
should have heard me bang when we
nudged our announcement . . .

A series of dissolves passes
through kitchens where folks are
frantically processing peaches as a
radio announcer says:

And now, Jack Birch, brought to
you by the Prudential Life Insurance
Co., etc.

Transitional shots take the audi-
cience to a powder mill with portfolio
waiting. Housewife opens the door and
looks at him testily:

SALESMAN—I’m Mr. Conway from
the powder mill. We can save you
a buck, ma’am; I’d like just a couple of minutes
of your time.

HOUSEWIFE—Oh, Prudential! Wasn’t
this morning your show, Jack Birch program.
I’ve been listening to him for so long I feel we are
friends. Come on in.

FRANKLIN’S VOICE—Radio’s
a foot inside the door—a good insur-
ance man needs little else.

SALESMAN—Jack Birch has been
making friends for us from Maine
to California.

FRANKLIN—California? How big
this country has become.

The camera tilts up to the sky
and comes down to show Oakland
bridge, San Francisco at late dusk.
A Marion-Dell Dairy milk truck
passes the camera, which then
moves into the plant where Tom
Foster, general manager, is talking
with Mr. Spinetti, head salesman,
both radio and television.

SPINETTI—Did you have to come
in tonight just for that?

FOSTER—They’re important com-
petitors. I’m sure they want a
new territory before us—we’ll it that
much harder.

Plant Superintendent
MacDonald, in pajamas at home, is
informed he’s to take a truck and
move into San Jose in the morning.
With Ed DeBorba, a salesman, they
enter Avilla’s Market in San Jose
in early morning:

DEBORBA—Avilla’s the name of
the radio we’re all going to try
here.

A VILLA—Well, that’s good, I guess,
but whadda I wanna take another
dairy in here for?

DEBORBA—We’ve been buying a
lot of our milk from families in this
valley.

BREAD MAN (seeing Marin-Dell
truck)—Hey, since when did Bard
come into our radio.

DEBORBA—Budda’s the name of
our amateur show—know your radio
program?

A VILLA—Sure, I know it—how do
you think I know your milk?

MACDONALD—Your customers
know this milk, too, even though they
never say it.

A VILLA—I guess so, well—let’s try .

At Alongi’s Super-Market an-
other scene takes place as the
Marin-Dell truck makes another
pitch. A pretty Spanish girl over-
hearing, says:

GIRL—I once wrote Budda and told
him that I would buy Marin-Dell if
they sold it here.

DEBORBA—We have boxes of such
letters from here. As from every-
where else around San Francisco.
Since we first talked with the
general manager, has put 90% of
our advertising money into radio.
And look what it cost. Last year
Marin-Dell was worth $60,000. Today,
it stands better than $4 million.

MACDONALD—We went from fourth
place to first place in the same
year, and have held that place
ever since 1935. Why, I bet you that
we have eight full routes in San Jose
inside one year.

FRANKLIN (after a few more com-
ments)—Verily, here is lightning that
peaches—dairy—in a glass—

FRANKLIN—It seems to me that
the man who never reads the ads
in newspapers or on radio

FRANKLIN begins to talk in a
voice impact demonstration with
the appeal of printed and
spoken copy compared. Back to Mr.
Mitchell:

MITCHELL—In radio you can’t help
but get more listeners to your sales
message . . . there’s nothing that even
competes with the commercial. List
. . .

BROADCASTING • Telecasting
FRANKLIN—What facts are there to support that? I suppose I can find them at any of the large advertisers in America.

An office building in Cincinnati is shown in a low angle shot, followed by a shot down a long row of offices. The office door is labeled 'Procter & Gamble, Information.' Franklin walks in. He finds vast arrays of charts and other material on radio. They show how much people listen every hour, by income level and city size, along with the circulation of radio. The P&G charts follow:

**How Much Do They Listen Daily?**

U.S. RADIO FAMILY LISTENING BY INCOME:

- Upper Incomes 4 hrs., 15 min.
- Middle Incomes 4 hrs., 37 min.
- Lower Incomes 4 hrs., 45 min.
- U.S. Average 4 hrs., 32 min.

(Source—A. C. Nielsen Co.)

**How Big Is Radio?**

- U.S. Families 45,000,000
- Average Family 42,000,000 (95%)
- Auto Families 27,000,000 (60%)
- TV Families 7,500,000 (17%)

(Source—BAB Estimates for 1951)

**How Much Do They Listen Daily?**

U.S. FAMILIES LISTENING BY CITY SIZE:

- Metropolitan Areas 4 hrs., 37 min.
- Medium Size Cities 4 hrs., 28 min.
- Small Towns & Rural 4 hrs., 14 min.
- U.S. Average 4 hrs., 32 min.

(Source—A. C. Nielsen Co.)

FRANKLIN (after scanning charts carefully):—How much radio has become part of America—as big as the United States itself.

And now television too—broadcasting's latest development—is also coming to take its place among the great media of America.

What a universal medium it is—everybody listens—they spend more time listening to radio than doing any other thing, except working and sleeping.

But when do they listen? In what part of the day?

* * *

A close-up of a radio dial, followed by shots of food and milk being poured into a bowl. The camera then pans down to a radio and back up to the milk.

In the background, a radio is playing, with the sound of a flute and a piano.

The scene is a kitchen, with a woman cooking and a man listening to the radio.

The woman: "What do you think of the new program?"

The man: "I don't have time to listen now.

A well-to-do young man and his girl enjoy the radio's portable radio.

Next scene shows the mechanic's wife hanging out the wash as a radio on the window sill plays a segment of a daytime serial.

In a big garage, two men are working on an auto and listening to the radio.

A schoolroom scene is built around a historical radio drama.

An elderly man, propped up in bed, listens to the radio:

"Is the pitch too long?"

The woman: "I don't drive down to right field and it looks good for a . . . no, Blank scoops it up and wings it to second. Jones touches the bag and throws to first—it's a double play.

Sore as blazes, the old man shouts at the radio.

In the interior of a bus, the passengers listen to FM transit radio.

One man speaks to the driver:

FIRST MAN—Oh, we finally got radio on this bus. 'Bout time.

SECOND MAN—Yes, but another 50 cents.

DRIVER—Oh, sure, it's FM and . . .

SECOND MAN—FM! Our radio at home has FM in it.

From car radio comes sports casts, music, serious music, news, the Lone Ranger (it's evening).

FRANKLIN—A man can listen to a radio everywhere he goes— everywhere.

No one need be lonely anymore. There is entertainment and company all the time and everywhere—something for everyone.

The mechanic's children, in their bedroom, listen to the Lone Ranger. Father comes in. The kids kiss him and return to their listening. The whole scene is filled with families listening to their radios.

The mechanic's son tunes in his radio homework, a political discussion.

In the medium-income home of a large family group (grandma, parents and a bunch of children, all eating ice cream), Bob Hope is wise-cracking via the radio.

FRANKLIN—People listen together as well as alone. That must be another reason for radio's great strength. For as any good speaker knows, people respond more when they are together.

A well-to-do family listens in a large garage to Jack Benny's quips. An elevator operator in a swanky apartment house listens intently to the introduction to 'The Fat Man' program, jumping as the indicator board buzzer shows a penthouse call.

On the penthouse terrace overlooking New York City the folks are sitting around in formal garb, talking quite informally. One couple leaves, winding up in a coffee shop where they listen to a disc jockey introducing "Good Night Sweetheart."

The camera dollies out into the dark night.

The final scene finds Franklin appearing in a heavenly scene where he's headed upward with a portable radio. After an auditory end title: FRANKLIN—Radio reaches everywhere. It's the only medium that gets into people's houses.

Shot of globe turning; voices.

JAMES C. PETRILLO (l) president of the American Federation of Musicians, receives a certificate of appreciation from A. W. Wooldridge, special assistant to the Veterans Administrator, for the AFM's aid in making possible the transcribed radio series Here's to Veterans. The show is recorded for AFM radio, and is being broadcast over 2,200 radio stations, giving it the widest coverage ever achieved by a program in the U. S. and Canada.

**AFRA ELECTION**

Reel May Be Secretary

FRANK REEL, assistant national executive secretary of American Federation of Radio Artists, is expected to be elected AFRA national executive secretary by a referendum of national board members, results of which were to have been tabulated over the past weekend. If chosen, he will fill vacancy caused by resignation of Mr. Heller, who took leave of absence from AFRA to head Television Authority.

Mr. Heller's job as executive secretary of AFRA's New York local, from which he also took leave, is expected to be filled by his assistant, Ken Groot, action this week of the local's executive council.

**BROADCASTING • Telecasting**

January 23, 1950 • Page 21
SIGNALLING the start of an “all-out” advertising campaign, 81 dealers comprising the Greater Detroit Plymouth Dealers have launched two half-hour shows on a 52-week basis to be programmed over CKLW Windsor.

The programs, Hollywood Theatre of Stars and The Henry King Show, are heard Sunday 9-20-3:30 p.m. Blending drama and music, the shows were produced by C. P. MacGregor Co.

Commenting on the arrangement, MacGregor’s midwest manager, William M. Mertz Jr., said one important thing that he had discovered during the negotiations was that radio needed to be really “sold” to the automotive people. The medium itself must be sold to the dealers first before attempting

S. C. SESSIONS

Eye Radio Budgets, Sales

THE subjects of sales, agencies and station budgeting were featured at the annual meeting of the South Carolina Broadcasters’ Assn. held Jan. 28-20 at the Hotel Columbia, Columbia, S. C. Registration Friday (Jan. 20) was followed by a luncheon at which Gov. J. Strom Thurmond and Columbia’s Mayor Frank Owens delivered welcome addresses. In the afternoon, three speakers were heard closely followed by discussion participation. Speakers were: W. Wright Robb, WMFJ Daytona Beach, Fla., owner, and past president of the Florida Broadcasters’ Assn. on “Small Market Sales and Operation”; Jim Henderson, president, Henderson Advertising Agency, Greenville, S. C., on “The Agency Side—Is There a Good One?”; and Robert W. Roundsville, WQXI Atlanta, on “Putting a Station on the Air in the Black.” At an evening cocktail party Columbia stations WIS WKX WCON WNOK were hosts. Dinner speaker was Allen Newcomb, WIS, morning m.e. author and lecturer, who spoke on “This Racket Called Radio.”

Saturday sessions were concerned with business topics with a report delivered by Mel Purvis, WOLS Florence, chairman of the committee on preparation of a libel bill. Discussion also centered on the problem of exclusive rights agreements by stations for football broadcasts [Broadcasting, Jan. 16].

Kenneth Fox Resigns

KENNETH J. FOX has resigned as advertising director of Fox Brewing Co., Chicago, maker of Fox De Luxe and Silver Fox beer. His resignation last week followed that of J. R. Fox, secretary and director.

OUTSIDE SALES

Test Period by WMOR (FM)

SUCCESS of non-station salesmen in an outside organization selling radio to local merchants is being tested by WMOR (FM) Chicago for 13 weeks with Anthony A. Abraham, publishers representative. Mr. Abraham, through arrangements completed with Station President Bernard I. Miller, is selling one-minute spots to be aired only between 6 and 7 p.m. daily. Minimum cost per spot is $6.50. He also is booking English and foreign-language shows on WMOR, and selling a few of its packaged programs.

Although this is his first radio assignment, Mr. Abraham is using his regular telephone sales force of 20 persons to contact potential Chicago-area FM clients. A former employee of his firm, Marie Mason, has been named station sales manager, Mr. Miller said. She will handle time sales for all evening accounts between 6 p.m. and midnight. Daytime hours are completely sold to Consumers Aid Inc., which has installed an in-store broadcasting service in Jewel Food Stores. Station retains control over product type, copy content and sponsor, and programming remains unchanged.

SPAC COMMITTEES

NBC’s 1956 Stations Planning and Advisory Committee has elected its convention and promotion committees, Clair McCollough, SPAC chairman, announced last week.

They are:

Sound Broadcasting Promotion Committee—Ewing C. Kelly, KCRA Sacramento, chairman; Stanley W. Barnett, WOOD Grand Rapids; J. B. Conley, Westinghouse Stations, Philadelphia; Harold Essex, WSJS Winston-Salem; Milton L. Greenbaum, WSAM Saginaw; Jack Harris, KPRC Houston; P. A. Sugg, WY Oklahoma City; Walter E. Wastafa, KIDO Boise; Charles P. Hammond, NBC, New York, and Sydney Eigers, NBC, New York.

Television Interconnected Promotion Committee—John T. Murphy, WLWT (TV) Cincinnati, chairman; Harry Bannister, WWJ-TV Detroit; Walter J. Dann, WTMJ Milwaukee; Wilbur M. Havens, WTVR (TV) Richmond; Robert Thompson, WENK-TV Buffalo; James Nelson, NBC, New York, and Sydney Eigers, NBC, New York.

VICTOR C. DIEHM

Named WHOL Executive

VICTOR C. DIEHM, co-owner and general manager of WAZL Hazleton, Pa., and general manager of W M G W Meadville, Pa., has been elected vice president and a director of the Allentown Broadcasting Corp., owner and operator of WHOL Allentown. Mr. Diehm will continue his affiliation with WAZL and WMCW.

The WHOL board of directors will remain the same with Lewis Windmuller as president. Other directors are Charles G. Heigl, Henry E. Schell and Mr. Schell.

Mr. Diehm is a director of the Pennsylvania Broadcasters Assn., member of the NAB Planning Committee and chairman of the Pennsylvania State Chamber of Commerce Community Development Committee. He formerly served as Pennsylvania Governor of Kiwanis, international chairman of Kiwanis Public Relations and program chairman of Kiwanis International Convention. Mr. Diehm previously was affiliated with the Steinman stations.

Page 22 * January 23, 1930
Muzak Refuses Renewal With WWDC-FM

Muzak Corp., this week is expected to file a petition with FCC for a rule-making proceeding to permit it to use FM stations to carry its music programming.

If the piped music organization is successful in its FCC action, it was said, Muzak will abandon, wherever possible, use of the telephone lines now used in its operations, and contract with local FM stations for transmitting its programing.

The result would be, according to a Muzak spokesman, a revenue increase for FM stations. Since Muzak now has 75 franchisers operating in over 200 cities in the U. S., Canada, Mexico, Puerto Rico and the Hawaiian Islands, the number of FM stations which might benefit is considerable.

At the same time, Muzak believes it will benefit because FM transmitters can be heard better than by telephone lines. Muzak clients also will benefit, the company feels, because the savings will be passed on to its customers via cheaper rates.

Harry E. Houghton, president of Muzak, and Paul A. Porter, of the Washington law firm of Arnold, Fortas & Porter, Muzak's counsel, announced that they were about to take its petition before the FCC.

Specifically, Muzak's petition envisions the use of supersonic signals and of multiplexing.

Details of Request

The FCC will be requested to amend rules to authorize use of supersonic signals which would be sent simultaneously to many stations, and to others: (1) enter into special contracts with FM stations on an affiliation basis to provide the service; (2) to modify present requirements which prohibit the installation of additional equipment in the transmitters of FM stations, and (3) to amend other regulations relating to station identification, the identification of musical records, and the announcements of sponsored programs.

The petition for special multiplexing, Muzak said, was prompted by the purpose of permitting it to send a number of programs simultaneously to take care of all types of its business. Currently Muzak clients largely fall into four categories, each of which is given individual music.

The categories: hotels and restaurants, stores and shops, business and banks, and industrial plants.

At the present time, a Muzak spokesman, some FM stations already are utilizing the supersonic signals in connection with broadcasts of background music and are renting the necessary receiving equipment to commercial establishments. Muzak counsel considers such arrangements as violations of FCC rules and policies.

Pending action by FCC on the Muzak petition, the company will request the FCC to advise all FM broadcasters that the sale of a supersonic signal and the sale of such services to multiple addresses, either by the station itself or through agency relationships, is contrary to current FCC regulations and policy until they are amended as requested.

Muzak said a large number of its franchise holders are also licensees specifically asking that a number of licensees join with Muzak in the request for the rule-making hearing.
LUCKMAN QUITS

WITH startling suddenness last Wednesday, Charles Luckman announced his resignation of the $300,000 a year presidency of Lever Bros. Co., a more than $7 million advertiser in radio and television.

Coming in the middle of one of the periodic visits to the U. S. of the European head office of the parent companies, Unilever Ltd. and Unilever N. V., Mr. Luckman's statement gave as his reason for resigning "our inability to reach a basic disagreement in the future policy of the American company."

In a simultaneous statement, Sir Geoffrey Heyworth, chairman of Lever Bros. and Unilever Ltd., and Paul Rykens, Dutch chairman of Lever Bros. and Unilever N.V., said:

"The boards of the parent companies accept with regret the resignation of Mr. Charles Luckman from the presidency of Lever Bros. Co., arising from a disagreement as to the future policy of the American company that we were unable to resolve."

"We wish to express appreciation for the quality of the service rendered to the company by Mr. Luckman during his four years as president, and most recently of his undertaking and execution of the consolidation and moving of the company's interests in New York."

"Last summer the directors gave full approval to the policies and plans formulated by Mr. Luckman for this move, and we believe that these have now been brought to a successful conclusion."

New Building

"The construction of the new Lever House Building at 53 St. and Park Ave., the final design of which has been completed, will start in the early autumn. All arrangements have been made for the filling of Mr. Luckman's position. For an interim period the executive responsibility will be placed in the hands of the directors of Unilever, Arthur Hartog, J. L. Heyworth and F. D. Morrell, who are being loaned to Lever Bros. Co."

"No changes are contemplated in the existing officers of the company."

The full statement by Mr. Luckman after announcing his resignation:

"My relationship with Lever Bros. and the directors of Unilever has been a source of pleasure and satisfaction to me."

"Our inability to resolve a basic disagreement as to the future policy of the American company in no way lessens my regret in ending our association."

"I express to the officers and employees of Lever Bros. and its subsidiary companies, my deep appreciation for their splendid work and loyal devotion which has contributed much to the company's success."

The suddenness of the break is indicated by the fact that little more than two weeks ago, Mr. Luckman called a news conference to outline his extensive future plans in behalf of the company. These included projects that would, in their normal course, have occupied Mr. Luckman for several years. At that time he told Broad-casting of his contemplated plans to widen the company's use of television without intruding on the established budget of radio.

Mr. Luckman's resignation comes at the successful completion of one of the largest industrial moves of recent years, the shift of Lever executive headquarters from New York to a new bridge to New York, coupled with the integration of the company's affiliates — The Pepsodent Division, The Hart Hotel, Hubbard Ayer Inc. and the John F. Jolke Co. — in centralized headquarters.

Volume Doubled

During Mr. Luckman's six year tenure at Lever Bros., the company almost doubled the volume of its soap and food business. Under his guidance, Lux toilet soap was brought to first place in the industry. Rinco became one of the largest selling soaps in the world.

Moreover, during that time, Mr. Luckman guided all six of the company's radio networks in plans into the 15 top-rated shows on the air, marking the first time in the history of radio that any company has been able to accomplish uniformly high ratings for its programs.

Mr. Luckman always has been a strong advocate of radio, consistently allocating half of the total advertising dollars of Lever into that medium, thus making radio his single largest sales channel. A native of Kansas City, Mo., the 40-year old Mr. Luckman has been hailed frequently in the past as the "boy wonder" of American industry.

Graduating magna cum laude from the Architectural School of the U. of Illinois in 1931, Mr. Luckman, finding building construction to be in a depressing state of inactivity, took what he considered temporary jobs as a salesman in the Chicago office of Colgate-Palmolive-Peet Co. From a canvasser in a small sales territory in Chicago, he rose to supervisor of all of Colgate's Chicago

OPPOSITION to the proposed Langer liquor bill, which would outlaw all alcoholic beverage advertising, was mounted on Capitol Hill last week.

There were indications that the Senate Interstate & Foreign Commerce Committee was mulling major amendments before reporting out the controversial measure.

The bill (S 1847) is given little chance for committee approval in its present form. Authorities hinted that the committee would settle for less restrictive legislation aimed chiefly at curbing certain advertising practices. Meanwhile, Sen. Ed C. Johnson (D-Col.), chairman of the committee, has given interested parties until tomorrow (Tuesday) to file additional statements following hearings Jan. 12-14 [Broadcasting, Jan. 16]. The committee may consider it at Wednesday's executive meeting.

NAB Opposition

Last week in a statement to Chairman Johnson, NAB stated its opposition to the legislation proposed by Sen. William Langer (R-N.D.). The letter, dated Jan. 17, was signed by NAB General Counsel Don Petty.

NAB stressed its action should not be construed as "condoning or promoting" liquor advertising "detrimental to the public interest or not in good taste or not in accordance with the Standards of Practice of NAB."

Furthermore, the radio and television networks in areas where the sale of liquor is unlawful comply with the existing local laws like any other responsible advertiser, codes added, citing other regulatory laws.

Partial text of NAB's statement:

The National Assn. of Broadcasters wishes to go on record . . . as opposed to the so-called "liquor bill" which is pending in the Senate.

If passed, this bill would severely restrict, if not completely prohibit the advertising of such products without recourse to the national Congress. Radio and television stations are licensed by the Federal Communications Commission which exercises jurisdiction over such matters.

"It is the Association's belief, and the opinion of the overwhelming majority of the broadcasting industry, that the broadcast of the sale of alcoholic beverages is subject to the regulations of the Federal Alcoholic Beverage Act. . . . The broadcast of any such reasonable public service in behalf of such beverages is much more in consonance with the public interest than the broadcast of the sale of alcoholic beverages.

The broadcast of this public service is in the public interest and is shown to be in the public interest.

We do not recognize the present as the occasion to limit the broadcast of such public service and we do not believe this restriction is in the public interest. . . . We call upon the Congress to adopt legislation which will be in the public interest and which will protect the constitutional rights of the American people…"

For this reason, the National Assn. of Broadcasters respectfully urges the members of the Senate to support the candidacy of Sen. William Langer on the grounds that the effort to legislate the public interest is in the public interest and that the proposed liquor bill is not in the public interest.

The Association is pledged to defending the free transmission of public service in the public interest, which is the supreme interest of the American people.

We do not recognize the present as the occasion to limit the broadcast of such public service and we do not believe such restriction is in the public interest. . . . We call upon the Congress to adopt legislation which will be in the public interest and which will protect the constitutional rights of the American people…"
Spot Radio Does Cost Less Today—

Startling Comparisons Prove That WHO Costs 52% Less Than In 1944!

By every standard that means anything whatsoever to forward-looking advertisers, advertising on WHO costs less today than in 1944.

Comparing figures from the 1944 and the 1949 Editions of the Iowa Radio Audience Survey,* you find that in 1949 Iowa radio homes had increased to the point where WHO cost 10.6% less per thousand radio HOMES than in 1944!

Even more startling, you find that in 1949, multiple-set homes had increased to the point where WHO cost 52% less per thousand radio home SETS than in 1944 — and modern research has proved that the increased number of home sets is even more important than the increase in radio homes. (Junior listens to his favorite serial program while Dad hears the evening news — Mother listens to a dramatic program while Sister is tuned to popular music — or the whole family listens to the same program, but in different parts of the house. Thus it is no longer correct to speak of “radio homes” — SETS make today's audiences!)

By applying the Iowa Surveys' percentages of one-set radio families and multiple-set radio families, against population estimates,** you find that Iowa had 769,200 radio homes in 1949, against only 596,000 in 1944. Whereas there were only 904,000 sets in Iowa homes five years ago, this number had sky-rocketed to 2,140,000 in 1949! Yet this 136% increase in radio sets is for homes alone; it omits the hundreds of thousands of sets in Iowa cars, offices, barns, stores, trucks, restaurants, etc.

The phenomenal increase in the number of Iowa's radio homes and radio sets — and the decrease in costs — boils down to this:

| WHO — CLASS C — 1/4-HOUR MAXIMUM DISCOUNT† |
|-----------------|-----------------|-----------------|-----------------|
| Number of Iowa Radio Homes | Cost | Cost Per Thousand Radio Homes | Percent Decrease In Cost Per Thousand Radio Homes In 1949 |
| 1944 | 596,000 | $67.50 | 10.6% |
| 1949 | 769,200 | 77.00 | |

| Number of Iowa Radio Sets (In Homes) | Cost | Cost Per Thousand Radio Sets (In Homes) | Percent Decrease In Cost Per Thousand Radio Sets (In Homes) in 1949 |
| 1944 | 904,000 | $67.50 | 52% |
| 1949 | 2,140,000 | 77.00 | |

†The 1/4-hour rate is indicative of all other time segments since WHO's cost is figured on a ratio basis. Class C time is shown because it changed very little during the last five years — that is, Class C has remained primarily Daytime ... from 8 to 12 mornings and from 1 to 6 afternoons.

Note that all these figures are based only on extra sets in Iowa homes. The figures do not include hundreds of thousands of "non-home" Iowa sets, plus millions of sets in WHO's BMB secondary night-time counties — these are the reasons why WHO is today a "better buy" than ever. For additional facts about WHO's great audience-potential, write to WHO or ask Free & Peters.

*The 1949 Iowa Radio Audience Survey is the twelfth annual study of radio listening habits in Iowa. It was made by Dr. F. L. Whan of Wichita University — is based on personal interviews with over 9,000 Iowa families, scientifically selected from cities, towns, villages and farms all over the State.

As a service to the sales, advertising, marketing and research professions, WHO will gladly send a copy of the 1949 Survey to anyone interested in the subjects covered.

**Sales Management's Surveys of Buying Power.

CENSUS FACTS
Will Aid Advertisers

BILLIONS of facts providing advertisers with new and accurate information on the nation's business and populace will be made available by census projects now underway. Philip M. Hauser, acting director of the Census, told the Washington Advertising Club Tuesday. New data on radio and television homes will come from the 1950 decennial census, he revealed.

In bringing out the extent of recent changes in the people and economy of the nation, Mr. Hauser explained that retail sales increased from $40 billion in 1938 to $120 billion in 1948. After discounting the effect of the changing value of the dollar, he said, the decade's percentage increase in the physical volume of goods sold to the public was not change materially.

Mr. Hauser chided newspapers for political-inspired criticism of the census question on personal income. The editorial pages of those newspapers don't see eye-to-eye with their advertising departments, he said, judging by letters sent to the Census Bureaus.

Release of Data Soon
Business census data, based on 1948 figures, will start coming out in about a month, he said. The 1950 decennial census will provide more information by state, geographical division on population, housing and agriculture. Fifth type of basic nationwide information coming out of the bureau is the census of manufacturing, based on 1947 production, he added.

Mr. Hauser said the census will provide the nation with a measurement of the significant changes since 1940 among 150 million people in 43 million families, 48 million dwelling units, 6 million farms, 2.7 million retail, wholesale and service businesses, and 240,000 manufacturing establishments.

The 1950 census data will cover metropolitan areas including all adjacent and related counties; urbanized areas, including all central cities of 50,000 or more plus thinly settled areas; unincorporated places having 1,000 or more inhabitants, never before identified separately, and all places of 2,500 or more.

Pioneers Dinner
RADIO PIONEERS, organization of veterans of over 20 years radio background, will hold its annual dinner April 4 at New York's Ritz Carlton Hotel. William S. Hodges, NBC, president of the club, announced last Monday. Mark Woods, of ABC, chairman of the Hall of Fame committee, reported the committee's decision that candidates who have been deceased two years or more qualify and he asked members to submit names of these late radio pioneers.

WCAU Election Ordered
ELECTION for technicians at WCAU in Philadelphia, member of IBEW (AFL), has been ordered within 30 days by the National Labor Relations Board. NRLL issued the order Jan. 13.
IT'S YOUR MOVE, BUSTER!

Buster better stop yawning and make a good move in his checker game. If he'd be more alert, he could win the game.

Alert advertisers know about a good move to make in Baltimore radio. They buy W·I·T·H, the BIG independent with the BIG audience.

The reason why this is such a good move is that W·I·T·H delivers more home listeners-per-dollar than any other station in town. And in addition, a survey made under the supervision of the Johns Hopkins University showed that of all radios playing in grocery stores, 42.3% were tuned to W·I·T·H.

That means that just a little money goes a long way on W·I·T·H. Get W·I·T·H on your schedule fast! Call in your Headley-Reed man for the whole story today!
we pause to honor...
MARTHA DEANE, because she was twice cited by Ohio State University’s institute for Education by Radio for outstanding versatility and exceptional reporting; because she is a happy housewife and mother of twins; because her show, as judged by Pulse, Inc., has been one of the most popular women’s shows in New York during the year 1949; because 32,000 women wrote her within 5-days after her asking them to do so; because she jumped sales 200% for one sponsor in New York and brought him 33 new wholesalers; because she’s a grand woman to represent WOR.

continued
we pause to honor... (continued)
BARBARA WELLES, because she is a smalltown girl who made big-time radio gasp by her sensational and exclusive WOR reintroduction of Britain’s Pears Soap to the American public; because, within two weeks, she pulled 19,334 requests for a sample of paint; because she’s a gifted ex-actress, but no prima donna; because her WOR show ranks consistently as one of the most popular women’s programs in New York; because she’s a shimmering tribute to why WOR sells more, more often, for more people, to more people, than any other station in the United States.

Martha Deane and Barbara Welles are only two of the personalities who, day in and day out, contribute their great talents to making WOR the station heard by the most people where the most people are from Canada through Georgia. It is people like these who can permit WOR to use a phrase to be long remembered; i.e.,

WOR

—sells more, more often, for more people, to more people

... than any other station in the United States!
MBS AWARDS

Mutual’s “President’s Cup” for the outstanding promotion of a network children’s show was awarded to KVER Albuquerque for its work on the network’s “Kid’s Block” of shows.

Robert A. Schmied, MBS vice president in charge of advertising, promotion and planning, announced the winner last week. William T. Kemp, the station’s general manager, received the award from Frank White, MBS president, at the close of the two-month-long contest among the network’s 50 affiliates.

Awards were made on the basis of promotion of the 5-6 p.m. children’s shows, Straight Arrow, Tom Mix and B-Bar-B Riders.

Divided Into Categories
A total of 37 prizes were awarded, including 15 awards for the best overall promotion of the “Kid’s Block,” and 22 prizes for the outstanding jobs in specific promotion categories.

The top 15 awards were distributed in the three station classifications—stations in cities of 100,000 or more; cities between 25,000 and 100,000; and cities under 25,000 population.

These winners are: Classification No. 1—William Schweitzer, WEBB Buffalo; Ron Tutten, WJHP Jacksonvile; Joe Baker, KBON Omaha; Vivian Blanken, KFEL Denver; Herb Sonnenberg, KJH Los Angeles.

Classification 3: Ed Breen, KFVD Fort Dodge, Iowa; Dan Corriigan, KCOK Tulare, Calif.; Ben Nick, KWHK Davenport, Mo.; Don N; Louis C. Whereto, WUEN Union City, Tenn.; Bob Bingam, WCNC Elizabeth City, N. C.

22 Awards
The 22 winners and the winners of prizes for outstanding jobs in specific promotion categories are:

Harry Hoesly, WHQ Columbus, Ohio; William Sprague, WHK Cleveland, Ohio; Kermit Edney, WHKP Hendersonville, N. C.; Bill Monroe, KENT Sherrevelop, La.; Gene Hoesly, KMHO Hannibal, Mo.; Bob Instad, KOVC Valley City, N. D.; Betty Brecker, KNRS Redwood, Ore.; Wayne Phelps, KHUZ Borger, Tex.; George H. Wilson, WSTV Steubenville, Ohio; Dick Rapp, WHK New York; Maurice Singletary, Miss.; Dick Bolender, WBKB Pittsfield, Mass.; Earl Corbett, WCPO Cincinnati; Ken Gordon, KDTH Dubuque; Don Getz, WGN Chicago; Dr. N. O’Neal, WHK Akron; Fran Ide, KGB San Diego; Mack Newberry, KPAC Port Arthur; Clarence Waggner, WMAK Muncie; Jack Swaab, WLWL Minneapolis; Helen Penny, WRCX Duluth; Lennon Kelly, KTRI Sioux City; Charles Curtin, WNAC Boston.

THE Silver Horse Emblem of the Round-up Riders of the Rockies is awarded to CBS star Gene Autry (2d l) on the occasion of his visit to Denver a fortnight ago. L to r are Joe Dekker, Denver Civic Theatre; Mr. Autry; Hugh B. Terry, KLZ vice president and general manager, making the presentation; Harold Rice, Southern District manager, Fox Intermountain Theatres, and Robert C. Hill, district manager, Columbia Pictures.

TAX REVISION
Would Curb Co-op Station Buys
OVER 200 U. S. Senators and Congressmen are on record favoring proposed tax-equity legislation which would “discharge” cooperative and educational organizations from paying excise taxes. By closing these loopholes, Rep. Mason figures the government stands to pick up about $1 million to compensate for loss of $600 million or $700 million from excise tax repeal.

REVENGE
House Launches Inquiry
PROBE of lobbying activities by a House Select Committee got underway on Capitol Hill last Thursday. As the first step staff investigators outlined progress of their work to members of the group headed by Rep. Frank Buchanan (D-Pa.).

After the session, which did not touch on radio, Chairman Buchanan indicated hearings would deal first with groups whose activities are considered by the committee to border on possible violation of the Lobby Registration Act. No date has been set for the hearings, he added. Preliminary reports, dealing mostly with housing legislation, reportedly uncovered some “irregularities” but no "flagrant abuses," some members indicated.

Meanwhile, Sen. John Bricker (R-Ohio) has charged that certain heads of independent agencies—some of them “experts”—have tried to influence legislation. “In some cases,” he noted, they are the “very men who drafted the legislation under committee consideration.” He did not identify any.

The committee is trying to determine whether certain organizations have failed to register as lobbyists, and whether certain registrants have complied with the act. Representatives of radio interests are expected to come under the committee’s scrutiny.

SLATER NAMED
Is Ruthrauff & Ryan V. P.

THOMAS G. SLATER, who has been with Ruthrauff & Ryan, New York, since September 1946, has been elected a vice president. He will continue to handle network relations, program and talent development, as well as Canadian radio operations.

Prior to joining R & R, Mr. Slater had 12 years of radio experience in producing, performing and executive capacities. His last appointment before joining the agency was director of special events and sports for Mutual.

Mr. Slater was in charge of the Friendship Train for Citizen’s Food Committee and received the National Headliners award for radio during the outstanding special events broadcast in 1946. He also won the Treasury Dept. Silver Award for patriotic service and the King Haakon Liberation Medal for wartime assistance to the Norwegian Government.

WANNA LIFT YOUR VOICE TO PRAISE (Ky.)?

Sure, you could probably find a lot of kind words about Praise (Ky.), but there certainly wouldn't be any superlatives about sales or business!

Us, we save our applause and admiration for the Louisville Trading Area, our State's one great market. And by broadcasting exclusively to these 27 Kentucky and Indiana counties, WAVE gets the plaudits and commendations of a high-income audience—one whose families have a 40% higher standard of living than those in the rest of the State.

Truly now, Gents, isn't WAVE's market the kind you revere, respect, and revel in? We pay off in cash—not Praise!

Lang-Worth Member Stations to Share in Rich Bonanza of Sponsors’ Gold during 1950

A Nation-wide survey, just completed, conclusively proves that advertisers and agencies are supporting Lang-Worth’s plan to increase local station income. This plan, initiated July 1947, was designed to promote a greater use of the Lang-Worth Library Service among advertisers and agencies—to facilitate the use of this service over Lang-Worth member stations and capture advertising money that heretofore was directed to local newspapers and other non-radio media.

160% DOLLAR INCREASE

According to signed reports from Lang-Worth station members, advertisers and their agencies spent $3,521,430 during the 12 months of 1949 sponsoring Lang-Worth production programs. This represents an increase of 160% over 1947, the year the plan was started, and 66% increase over 1948.

Reports from member stations and interviews with agencies all point to a still greater commercial use in 1950, making the estimate of $5,200,000 most conservative (see graph).

573 STATIONS POLLED

The figures used in this statement are based upon signed reports received from 573 Lang-Worth stations (92% of the total). Every type of station was represented. From 50 KW’s in major markets to 250-watt outlets in suburban areas. 55% were network, 45% independent.

I feel it important to emphasize that this statement is restricted to income received solely from a special group of shows conceived and written by our program department and made available to advertisers and agencies for sponsorship over Lang-Worth member stations. It does not include several million dollars of additional revenue from participating and disc jockey programs built from the Lang-Worth Library by the member stations, but not reported in this survey.

The Lang-Worth shows included in station reports were: The Cavalcade of Music, Mike Mysteries, Through the Listening Glass, The Emile Cote Glee Club, Meet the Band, Riders of the Purple Sage, The Concert Hour, Blue Barron Presents, Keynotes by Carle, The 4 Knights, Drifting on a Cloud, Salon Serenade, Airlane Melodies, Pipes of Melody, Time for ¾ Time and Your Community Chapel.

WHY $5,000,000 FOR ’50

The normal trend of advertisers toward an accelerated use of Lang-Worth Service during the past 3 years (see graph), coupled with “inner-circle” reports from advertising agencies and station representatives, more than justify the statement that “$5,000,000 for ’50” is a modest estimate.

However, Lang-Worth will not sit by complacently and rest on yesterday’s laurels. Rather, we are now geared to use these success records as the impetus for an even greater effort towards fulfilling tomorrow’s prophecy.

Lang-Worth Program Service will be still more attractive to advertisers in 1950. New and outstanding name talent is making our present production programs even more inviting to
sponsors’ gold. New IDEA programs, half-hour and 15 minutes across-the-board, with separate voice tracks and personalized announcements are in the works . . . plus an abundance of production aids and gimmicks which are made possible only through the amazing NEW Lang-Worth 8-inch Transcription.

NEW 8-INCH TRANSCRIPTION
Advertising agencies have a reputation to protect and must exercise extreme caution when recommending a product for their client’s use. The NEW Lang-Worth 8-inch Transcription has received the enthusiastic endorsement of every advertiser and agency who attended the special auditions held throughout the country.

Beginning April 1, 1950, all Lang-Worth member stations will be equipped with full service of the NEW Lang-Worth 8-inch Transcription. Not only is the product superior in tonal fidelity . . . not only is the signal to noise ratio greatly increased, but now, for the first time, agencies can guarantee to their clients brand-new, crystal-clear transcriptions. Now, for the first time, agencies may recommend with complete confidence a still broader use of the Lang-Worth Program Service.

85,000,000 for ’50 is a pushover! Personally, I anticipate a 100% dollar increase in 1950 over 1949.

C. O. Langlois, President

Business Bolt

WITHOUT ATTEMPTING the risky business of reviewing radio’s new promotion film in advance of its full-length showing, we can predict from a reading of the script that Lightning That Talks sought to talk big for broadcasting.

It would have been easy for the creators of the film to fall into one of two errors. The one being excessive emphasis on the furrowed brow type of somber documentary with lots of wind in it about the social significance of radio. The other being a hell-for-leather pitch about radio’s advertising effectiveness.

It is nice to report that, judging by the scenes thus far, the film will do neither. Quite likely, when seen on the screen, the picture will make clear on the one hand, that broadcasting is seriously regarded by the American public and, on the other, that there is a very useful purpose in helping to distribute goods.

The four sales success sequences in the film are convincing demonstrations of both points.

Some people who have been inclined to undervalue LIFE are apt to be as astonished by Lightning That Talks as the public was when Ben Franklin flew his kite.

For making them up, the industry should compliment the men chiefly responsible for making the film. They were:

Victor Ratner, former CBS vice president, now R. H. Macy vice president, producer of the film.

Gordon Gray, vice president of WIP Philadelphia and chairman of the All-Radio Presentation Committee.

Maurice Mitchell, BAB director who turns actor in Lightning That Talks and who has made his sales wizardry into selling Lightning.

Ben Gradus of International Movie Producers Service, a film expert who absorbed enough radio lore to shoot a radio picture of great conviction.

We look forward to the lightning striking all over the U. S.

Ledge Lesson

THERE’S a business lesson to be had in Broadcasting’s new, 1950 Yearbook, starting with the figures on radio’s 1949 net time sales as summarized elsewhere in these pages.

The pertinent time-sales figures: In AM, up $12 million to a total of $429 million; in TV, up $16 million to a total of $24.7 million; in FM, for which no previous years’ figures were available, up to a total of $6 to $7.5 million.

The gain in AM sales, still the nationwide backbone of broadcast advertising, sounds better dollar-wise than percentage-wise, the lowest, since a bare 0.6% increase was eeked out in 1938. But 3% in the year 1949, though no cause for complacency, does not call for shamed faces, either. No other major advertising medium showed a gain.

That 3% gain should signal new and greater sales drive in 1950—a need which is underlined by another section of the 1950 Yearbook.

The chapter on “Radio’s Payroll and Operating Costs” reports that on the basis of official figures for 1948—the latest available data—radio’s employment was up 17% and its payroll was up 20%, exclusive of other basic operating expenses. There is no sign that this upward trend is about to be reversed.

The 3% gain was accomplished coincidently with an overall gain of almost 10% in operating-station population, as yet another section of the Yearbook will indicate. Although the number of authorized stations is less, the number of operating outlets is greater—by about 2,916 as compared to 2,600 a year ago. New stations taking the air in 1950 will stiffen this intra-media competition by that much.

Yet to be answered, of course, are the questions of when, whether, and how much television will affect the other media. There is no indication of any real effect on broadcasting media yet, despite a virtual tripling of TV revenues in 1949. Nor does it seem likely that inroads will be made this year.

In the continuing buyer’s market, many advertisers in 1950 will undertake to work on medium against another for their own benefit, but to this radio has a perfect answer. Radio is the medium of deepest penetration. It is the “blanket” medium; it gets the most attention, and it costs less. With facts like those, and aggressive shirt-sleeve selling, radio can’t miss.

T-V Formation

ABOUT A YEAR ago, it was assumed in many college athletic counting rooms that television, unlike radio, would hurt the football gate. It also was assumed that the telecast of a big college football game would hurt the box-office of smaller colleges.

The result would be chaos in all college sports, for football is the support of them all.

Cries of anguish rent the air at the prospect. Many coaches and athletic directors saw in 1949 the first telecasts of football games.

Now, however, a welcome breath of fresh air has blown through the nation’s college locker-rooms—it’s a breath of fresh air that was wafted in from the more academic parts of universities. For now, after all the cries, it has been suggested that a bit of the scientific spirit be applied to the problem, that all the facts be gathered and studied.

In fact, quite an ambitious study on the subject already is on. A graduate student of University of Pennsylvania, Jerry M. Jordon, has such a project in progress (see Telecasting 3). While his study will not be completed until April, his findings at the part-way mark indicate that once the novelty of television wears off, television does not hurt attendance but may even increase it. Also his study shows thus far that telecasts of U. of P. football games have not hurt attendance of smaller college games in the Philadelphia area.

In addition to this study, it seems likely that the National Collegiate Athletic Assn., will undertake a study of the impact of TV on sports attendance.

Financial aid in making such an investigation is offered by NBC President Joseph H. McNellis, who spoke for the country’s network telecasts.

We hope that aid is accepted and proper studies are made in the accepted scientific manner. The application of brains and not brawn is what is needed to this phase of the college athletic program.

The facts that will be developed will speak for themselves and indicate what should be done. Until then, college athletic advisers would do well to adopt the advice of Mr. McNellis, himself a college football coach.

Until all the facts are in, he advised, “don’t blame everything on television.”

Our Respects To—

IT WAS in July 1947 that “Doctor” Jerome Sill decided to sample some of his own medicine. For years he had been ministering to sick radio stations for CBS and Mutual. His textbook, The Radio Station, one of the first books on station management ever published, had run through two printings. It was and is standard in most American colleges and universities.

But Jerry Sill wanted to prove-test his theories. He put out feelers in a score of cities, and had visited half of them when he pulled up in Milwaukee. He says he picked the Wisconsin metropolis because he liked the idea of building an independent station in what is reputed to be one of America’s toughest markets.

Born Feb. 7, 1905, in the Yorkville section of Manhattan, Mr. Sill went to grade school there and then to Stuyvesant High where he won a scholarship to St. Lawrence U. He was graduated from St. Lawrence in 1924 with an A. B. degree.

Following graduation, he became a copywriter at the old Bates agency in New York, was personally tutored by Charles Austin Bates and soon rose to copy chief and eventually secretary-treasurer of the company. When the Bates firm became an early depression casualty, Mr. Sill hitched his wagon to the star of Paul Kesten, vice president in charge of promotion of the young CBS.

Starting in 1928 as a copywriter, he won advancement in a relatively short time and soon was placed in charge of all promotion for Columbia-owned properties. He later took over promotion of Radio Sales, as well, and at length was named director of station promotion of the network.

Toward the end of this last job, a survey by an industry journal showed that every station in metropolitan New York, with one exception, had a promotion director trained in the CBS Station Promotion Department.

After nearly a decade of directing CBS station promotion activities, Mr. Sill was drafted by the network for a new job. In those days, many stations weren’t doing so well inasmuch as volume of network commercial business was concerned. So he was sent out trouble-shooting. His recommendations formed the basis for a new CBS department, headed by himself, with in the station relations setup.

“It was my job to help make stations better broadcasting operations, thus better advertising media, thus more sought-after media for the network advertisers,” he explains.

The new department was so successful that

tee.

MARKET STUDY

Thompson Co. Issues Booklet

A 35-PAGE re-analysis of the American market, Marketing Opportunities, 1950, has again been published by J. Walter Thompson Co., New York.

Study this year indicates that potentials can be the best yet if American business seize its opportunity. The booklet points out that the challenge of business this year is: How to convert the power-to-buy into the will to buy?

Revealed in the survey are these points:

• 40% of all U.S. families are new since 1940.
• Nine million people have moved from rural areas to cities since 1940.
• Rates have risen in major national advertising media, but audi-

ences and circulations have risen nearly comparatively.
• Average costs per thousand in these media have not risen compar-

ably with prices of other commodities and services.
• Each 1950 listener or reader will have an average of 39% more pur-

chasing power than in 1940, after full correction for higher taxes and prices.

AFA to International

ADVERTISING Federation of America, after approval of its ex-

ecutive committee, last week joined the newly-formed International Union of Advertising, cooperating with the advertising associations of 13 other nations to work to-

gether for the benefit of advertising.

Management

ANSEL GRIDLEY, manager of WARE, Ware, Mass., resigns to accept appointment as general manager of WFOM, soon to open in Fitchburg, Mass. He is succeeded at WARE by DONALD W. HOWE, owner of station.

GEORGE GREELEY, manager of WASH-AM-FM Oaksho, Wls., since 1945, resigns to take position with Senator Joseph Mc-

Carthy in Washington Feb. 1.

GEOE K. STROUGE, new to radio, named presi-

dent-business manager of WCUE Akron, Ohio. He was formerly with an industrial plant in that city. TIM ELLIOT named vice president-op-

erations manager of station. WCUE will begin regular programming early in February.

J. D. SWAN, former assistant manager of WCAX Burlington, Vt., ap-

pointed manager of station.

KEN RANDOLPH named general manager of KBSS Saltans, Calif., re-

placing MILT HALL, resigned.

ALAN L. TORBET, former commercial manager of KPOJ Portland, Ore., ap-

pointed general manager of KROW Oakland, Calif. He succeeds MILT-

GUNZENDORFER, resigned [Broadcasting, Jan. 16].

CHARLES SEBASTIAN, assistant manager of WFJL (FM) Chicago, elected president of Chicago News Broadcasters Assn., formerly Chicago Radio Correspond-

ents Assn.

A. S. TEDESCO, formerly of WSHB Stillwater, Minn., joins WRLX Clo-

quet, Minn., as general manager. Sta-

tion is to take air Jan. 29.

ANGELINE KOPKA, previously secre-
tary to general manager of WOTW-

AM-FM Nashua, N. H., appointed as-

sistant general manager of stations.

LAWRENCE M. G. SMITH, president of Franklin Broadcasting Corp., oper-

ator of WFLN (FM) Philadelphia, ap-

pointed chairman of 1950 membership enrollment of Philadelphia Fellowship Commission.

MIG FIGL, station manager of WAXA Waukesha, Wis., named radio chairman of Wisconsin Savings Bonds Commit-

tee.

DAVE BROWN, manager of KSVP Artesia, N. M., and VERONA LEE McGINN, former continuity director for Seward Broadcasting Co., Liberal, Kan., have announced their marriage.

BENEDICT GIMBEL, Jr., president and general manager of WIP Phila-

delphia, listed as member of dinner committee for National Conference of Christians and Jews to be held Feb. 18 in Harrisburg, Pa.

SANDY SAUNDERS, farm director of WKY Oklahoma City, appointed chairman of soil conservation committee for Oklahoma City Chamber of Commerce.

CHARLES L. GLETT, vice president in charge of Don Lee Television, Holly-

wood, Calif., owner of New York for two weeks conferences.

WEBBER RESIGNS

Was Talcorm Sales Mgr.

RESIGNATION of George W. Webber as sales manager of the Iowa Talcorm Network, effective Jan. 12, has been announced by Paul E. Millen, Cedar Rapids radio executive and president of the 14 independent station network.

According to a network official, Mr. Webber's decision was brought about because of constantly in-

creasing pressure of sales and management activities at KWDM Des Moines, of which he is presi-

dent.

Simultaneously, Mr. Mullen an-

nounced that a new representative firm, the Talcorm Network Repre-

sentatives, 501 Garver Bldg., Des Moines, has been named to succeed Mr. Webber in the sales job. Prin-

cipals in the new group include Max Friedman, Don Alt, Arnold Cecka and Virgil Crain, Everett-

McKinney Inc. will continue as na-

tional representative for the entire network, Mr. Mullen said.

'Cisco Kid' Sales

FREDERIC W. ZIV Co. has an-

nounced sale of its transcribed Cisco Kid show for syndication in the following markets: Crew, Va.; Lake Charles, La.; New London, Conn.; Richmond, Va.; Norfolk, Va., and Oklahoma City, Okla.

Respects

(Continued from page 38)

it wrote its own fins, but out of it bloomed the "full network discount plan," now standard in net-

work radio.

Still intrigued by station rela-

tions work, Mr. Sill found a job to be done in the just-reorganized Mutual organization, so in 1945 he left CBS and joined forces with Miller McClintock at the behest of his leisure.

He handled station relations for MBS in the east until the second year of Edgar Kobak's administra-

tion.

At the start of his career, Mr. Sill took time off to write The Radio Station, and after its publication in 1946 he re-entered the broadcast-

ing business via the agency route. As director of New York City's Tarcher Agency, he handled such major accounts as Grove Labs., Benrus Watch, McKesson and Rob-

bins, Tums and a score of others.

Deciding in 1945 "to quit taking other people's money to do it and try it myself," Jerry Sill took over WMLO (now WMIL) Milwaukee three months after it was founded. When he arrived, WMIL was an "awful station," but within a few weeks his "programming in a straight line to the hearts of our listeners" started paying dividends.

He developed an interest in the basis of his program policy and today, with a great variety of origi-

nal local programming, WMIL is one of the highest rated Independents in existence.

Other Activities

In addition to managing the sta-

tion, Mr. Sill is secretary-treasurer of the corporation that owns it, as well as president and general man-

ager of the Belle City Corp. in nearby Racine, licensee of a new station, WRAJ. In that capacity, he has been active in the formation and development of Assn. of Inde-

pendent Metropolitan Stations, and continues his writing activities. He also lectures at universities, among them Marquette, Stanford, Oklahoma, St. Lawrence and New York U.

Mrs. Sill, the former Ethel Strouhman, was copy writer at the Bates agency when Mr. Sill wooed and won her. They were married March 7, 1928. The Sills now have two children, Peter Lewis, 10, and Joan, 19, and make their home in suburban Whitefish Bay, Wis. Joan is a junior at Stanford.

"Joan is majoring in drama," says her Dad, "but that isn't my fault. It's just that some diseases are hereditary. There isn't much I can do about it."

Aside from his active business life, Mr. Sill finds time for member-

ship in the Radio Pioneers and Ra-

dio Executives Club of New York and the Milwaukee Athletic Club. But when it comes to hobbies, his work is his favorite.

ASSOCIATED Program Service, New York, signs Dick Jurgens Orchestra to exclusive contract.
Are you eyeing the bigger one? That's natural. We all want the most for our money.
And that makes a point about the audience you get when you advertise on WGAR.
The pie is bigger than it was last year. The potential audience is greater!

FM PROMOTION

Group Plans Programs To Whet Public Interest

AN EFFORT to whet the public appetite for FM broadcasting by ambitious programming was launched last week by a group of independent FM broadcasters in the New York area.

At a meeting Jan. 16 in the office of William W. Boyne, general manager of the Zenith Radio Corp. of New York, six FM stations were represented. They were promised financial aid in their programming program by Mr. Boyne.

Called at the behest of August A. Rickert, program director of WFUV-FM Fordham U., the meeting was attended by Dr. North Joseph and Julian H. Gins, WGNR-FM New Rochelle, and by these representatives of the New York City stations: Harold Hirschman, WABF-FM; Bob Oelrud, WGYN-FM; Gordon Myers, WGHP (FM); Hartley Samuels, WFDJ (FM). Mr. Rickert represented WFUV-FM.

Among proposals made by Mr. Rickert was one to have an orchestra comprising members of the New York Philharmonic. Another was to bring to New York audiences up-state university basketball games, such as contests involving Cornell, Syracuse and Army.

Exclusivity Would Stimulate

Entire purpose of the programming would be to create exclusive features which would stimulate the public to FM tuning because the features could not be heard in any other way. The programs would be promoted by all the stations, not on the basis of their individual outlets but on the basis of selling the FM medium.

The stations themselves would carry the programming as a group by relays. They would be permitted to obtain their own individual sponsors for the programs. Fordham, however, does not sell its programming.

Mr. Rickert had said that FM stations owned by AM outlets would be permitted to participate but the special programming would not be available for AM transmissions.

For Monday, Jan. 24, stations have been scheduled to present their exclusive programs and a list of such programs will be printed in the Feb. 14 issue of Broadcasting and available to stations at a cost of $1.00 per copy.

Complete Reorganization

COMPLETE reorganization of the staff of KSVF Artesia, N. M., and an increase in its daily broadcast schedule have been announced by Dave Button, manager of KSVF, who is housed in the Artesia Broadcasting Co.

New alignment includes Mr. Button as manager; Wayne Griffin, commercial manager; Joe Aldridge, traffic director; Bob Matt, chief engineer; Bob McDaniel and Bill Barker, announcers-engineers. Station also has added an hour a quarter-hourly to its schedule, signing on at 6 a.m. and off at 10:15 p.m. Public service and local coverage are being emphasized, according to Mr. Button.

Bakery Success

Owner Credits Radio

RADIO has played a major part in success of Bargroats, Great Falls, Mont., according to Ed Harberson, owner and president of Montana Bakers Assn. It has been his major advertising media for many years.

Mr. Harberson added a "Hostess Room" in the basement of his bakery three years ago for parties, dinners and socials, and he credits radio advertising for making that a paying success too.

Using one-minute and 60-second announcements, he started his advertising campaign originally on KZKL and later on KFHX, which has facilities on KKLX and KMON Great Falls when they took to the air. Although newspaper space was utilized too, Mr. Harberson declares that didn't produce the same kind of church party business that is credited to his radio announcements. Mr. Harberson believes in the effectiveness of the spoken word as against print.

Wiry Debut

Set For Next Thursday

Wiry Plattsburg, N. Y., is scheduled to take the air next Thursday (Jan. 26), according to Joel H. Scheir, president, general manager and part owner of the Clinton County Broadcasting Corp., station WQMM. It will operate full time with 250 w on 1,340 kc.

Final testing was carried out last week, with a five-hour inaugural ceremony program on the agenda for Wednesday, Jan. 25, at 6 p.m. Mr. Scheir formerly was commercial manager of WMFI (now WEAV) Plattsburg for seven years. Other officers of the station are: W. H. Peterson, vice treasurer and station manager; Betty Kraus, program director, and John M. Nazak, chief engineer.

Studies, transmitter and offices are housed in a new building erected in Plattsburg. WQMM is an MBS affiliate and will use AP news service and Standard Library. W. S. Grant Co. is its national representative. Station employs Gates equipment.
AUTO RADIOS
Pulse Lists 72.5% in L.A. Area

IN Metropolitan Los Angeles, 72.5% of passenger automobiles have radios of which 32.8% are in use sometime between 8 a.m. and 8 p.m. daily, ranging from a low of 20.2% at 8 a.m. to a high of 39.6% at 7 p.m. These percentage figures are based on a survey conducted by Pulse Inc. for the Southern Broadcasters Assn. during the week of Dec. 10-14, 1949.

The survey also revealed that the average car radio is heard by 1.66 passengers in 8,908 cars checked at widely scattered intersections in the metropolitan area. Of these, Pulse reports, 6,450 had radios, 2,114 radios were turned on and 3,500 passengers were listening.

Robert J. McAndrews, managing director of SCBA, said that Los Angeles’ 72.5% for radio-equipped cars tallies closely with the 72.8% discovered in the Pulse New York survey for WNEW last summer. It far exceeds national estimates and slightly exceeds the 70.4% discovered by a U. of Southern California survey in the spring of 1949,” he stated.

Patricia Hart Wed

MARRIAGE of Patricia Weiss Hart and John Austin Armitage took place Jan. 7 in Vienna. Mrs. Armitage, formerly member of Information and Education Service staff of U. S. Embassy at Prague, is the daughter of Mr. and Mrs. Lewis Allen Weiss. Mr. Weiss is chairman of the board of Don Lee network and member of MBS board of directors. Mr. Armitage is now head of economics division in American legion at Berne, Switzerland.

News

GLEN B. WEBBER, announcer and newscaster at WJPS Evansville, Ind., appointed new editor of station’s news department.

HARRY GIANARIS, former news and sports editor of WHAN Charleston, S. C., named news and special events director for WMAT Charleston.

STONEY McLINN and BOSH PRITCHARD, Philadelphia Eagles football star, John North Philadelphia, bringing to sight the total of sports figures on staffs of WCAU and WCAU-TV.

JAMES LAWRENCE, formerly news director of KSD-AM-TV St. Louis and now editorial writer for St. Louis Dispatch, newspaper affiliate of KSD, cited by Pathfinder magazine for his editorials attacking violence and mayhem in many TV programs.

TRANSIT MEET

Optimistic Forecasts
Given for 1950

OPTIMISTIC forecasts for 1950’s Transit Radio business were voiced Jan. 8-10 at a meeting of 18 affiliated FM stations of Transit Radio Inc., holding its second annual national sales convention at New York’s Hotel Roosevelt.

Steadily mounting revenues from local, regional and national advertisers were reported, as well as unusual “cash register results” obtained by sponsors in the new medium. An excellent renewal record was cited by members, with one station reporting 14 renewals in one week among 17 users.

Public service programming was discussed at a half day session, with instances cited of traffic rerouting due to fires and other local emergencies, as well as safety and other civic drives.

Limitations on commercials were stressed as important to the continued public acceptance of the service. Copy limits of 65 words on announcements and 30 seconds on pre-recorded commercials, to be spaced at least five minutes apart, were approved by the sales managers for recommendation to the Transit Radio board, which met Jan. 12 also at the Roosevelt.

Recommendation was also made for a cooperative promotion and advertising campaign, with all stations to participate.

Guest luncheon speakers were Frank Silvernail, manager of radio time buying, BBDO, and Carlos Franco of Kudner Agency. Both lauded Transit Radio affiliates for their efforts in standardizing sales data, rate card format, traffic data and other materials required by agencies and advertisers, and advocated continued effort as new affiliates are added.

Delegates to the meeting included:

Raymond F. Kohn and Horace Gross, WFMZ(FM) Allentown; Ernest Lang, WIVM-FM Baltimore; Robert F. Bender, WCTV(FM) Cincinnati; Jack Harris, KPGC-FM Houston; Paul R. Fry, KBON-FM Omaha; Joe Hartenbauer, KCNO-FM Kansas City; Charles Dewey and Charles Kreitzer, WKJX(FM) Pittsburgh; Robert Hyland Jr., KJOK-FM St. Louis; Helen Moibberly, WVDQ-FM Washington; Dick Evans, WIZZ(FM) Wilkes Barre; C. Robert Manby, WGTR(FM) Worcester; Bill Lemmon, WTV Enterprise, Cleveland; Jerome McCarthy, WHOA(FM) Trenton; J. Boys, WAUL(FM) Flint, Mich.

Representing Transit Radio Inc., were Frank E. Pellegrino, vice president in charge of sales, William H. Ensign, eastern sales manager, and Carl S. French, Chicago, western sales manager.

WTTM Trenton, N. J., airing five-minute, across-the-board weather broadcast from Trenton’s Weather Bureau, by permission of U. S. Weather Bureau.

“give em both barrels!”

The City Market

Topeka — a 21-county market that has 28% of the state’s effective buying power and 23% of all Kansas families.

*Audio Bureau of Circulation

WIBW is the station “listened to” most by buyers in the Topeka Market — three times more listeners than all other Topeka stations put together.

*Kansas Radio Audience 1949

Just one station—WIBW—gives you the hardest hitting selling force in both city and farm markets.

FOR THE CITY MARKET

FOR THE FARM MARKET

ALL YOU NEED IS WIBW

The Farm Market

WIBW’s farm market is made up of big-buying families on farms located in agricultural counties in Kansas and adjoining states.

*Consumer Markets, 1949

Here again, WIBW is the “most listened to” station, having ten times as many listeners throughout Kansas as all other Topeka stations combined.

*Kansas Radio Audience 1949

GIVING YOU THE OPTIMUM OF YOUR ADVERTISING DOLLAR

WIBW - TOPEKA, KANSAS - WIBW-FM

Rep: CAPPERS PUBLICATIONS, INC. • BEN LUDY, Gen. Mgr. • WIBW • KCKN

January 23, 1950 • Page 43
A CONFERENCE between Sen. Ernest W. McFarland (D-Ariz.), chairman of a Senate Interstate Commerce communications subcommittee, and heads of long-haul telephone communication carriers, including Brig. Gen. David Sarnoff, chairman of the board of RCA, was held Jan. 12.

Sen. McFarland, whose group also has investigated a study of the use of radio frequencies by government agencies and allotment of radio spectrum space to private commercial broadcasters through FCC, stated that “substantial progress” had been made. Further conferences will be held shortly before final recommendations are presented, he added.

The subcommittee is exploring the records communications problem first in its proposed two-play inquiry of the general communications picture. Sen. McFarland told Broadcasting, comments and reactions already have been elicited from numerous government departments—among them the military, State Dept., etc.—which use valuable frequencies.

Carriers officials reported to Sen. McFarland the results of their studies and discussions to date. They included, in addition to Gen. Sarnoff, heads of International Telephone & Telegraph: Western Union Telegraph Co.; RCA Communications Inc.; American Cable & Radio Corp.

The White House is expected shortly to name personnel to a government commission which would probe the use of spectrum space among its own agencies.

AP Bureau Expands

WITH establishment of a sending bureau at Fargo, N. D., Associated Press announces start of new and expanded regional news service in that state. At the same time arrangements were completed for AP to serve four more North Dakota stations: KFYR Bismarck, KILO Grand Forks, KGCX Sidney-Williston, and KLPM Minot. All have been elected to AP membership.

They replace MARK JORDAN, transferred from KECA, Los Angeles, and LEE GIROUX, who resigned to free lance.

EDGAR B. CALE, associate professor of electrical science on leave of absence from U. of Pennsylvania, appointed civic advisor of WIP Philadelphia.

ROGER CLARK, formerly with WGTN-Georgetown, S. C., and WHAR Clarksboro, N. J., joins WNOR Norfolk, Va., as announcer-engineer.

RED BLANCHARD for four years disc jockey and program director of KPRO Riverside, Calif., and Broadcasting Corp. of America’s “Western Network,” resigns. He is to join KBCQ San Diego.

CEDRIC ADAMS, commentator for CBS and WCCO Minneapolis, will broadcast his CBS five-minute show, A Little Talk and a Little Tune to foreign listeners via Voice of America.

BILL HERSHEY, morning man on WRC Washington, cited as “Citizen of the Month” by American Legion, department of District of Columbia, was based on his work in connection with WRC Doll House which reportedly broke all records in soliciting Christmas toys for underprivileged children of Washington.

LIONEL (Chico) SESSMA, former trombonist with Ross Morgan and other orchestras, will have his own recorded program on KOWL Santa Monica, Calif., starting Feb. 1.

MR. HEA BARRY, formerly of WHJ Terre Haute, Ind., joins continuity staff of WIRE Indianapolis.

GEORGE B. WILLIAMS, formerly of KATE Albert Lea, Minn., joins program and news department of WKJL Cloquet, Minn.

RODDY McDOWELL is m.c. for new half-hour talent competition television show, Hit Talent Battle, on KLAC-TV Los Angeles.

CY NELSON, former sports director of WGL Galesburg, Ill., appointed program director of station. He was formerly with WEMP Milwaukee.

PAUL KEENE appointed program director of WOTW-AM-FM Nashua, N. H. He was formerly with WEMP and WHIL, both in Boston, as announcer.

SAM ARRABE, KEEN San Jose, Calif., disc m.c. is the father of a girl, Diana S.

STEWARD MacPherson, who recently joined WCCO Minneapolis as m.c., received British National Radio Award for outstanding voice of 1949. He was formerly with BBC.

GEORGE MOORE, formerly program director of KAMQ Amarillo, Tex., joins announcing staff of WROY Oklahoma City.

ROBERT (Smoke) MOAK, staff artist at WENR-TV Chicago, is the father of a girl, born Jan. 12.

MARY MARGARET McBride makes Midwestern debut in February on WCN Chicago, after 15 years of television broadcasting in New York. Negotiations handled by General Manager Frank P. Schreiber. Transcribed show will be aired Monday through Friday, 9:15-9:30 p.m. EST. Each show will feature six participation spots per day.

JACK WEBB, star of NBC Dragnet, is the father of a girl.

CHARLES CRAIG succeeds ELEANOR BARNEY as supervisor of Don Lee broadcasting system, Hollywood, traffic department.

SARAH SELBY of CBS Junior Miss is the mother of a girl, Star.

**HOT NEWSCAST**
**WONE Staffers Tape Fire**

HALF-MILLION-DOLLAR fire in downtown Dayton, Ohio, provided WONE with its hottest news broadcast on record. The fire started about 6:30 p.m., in a cafeteria in the same block with the studio, and was confined for several hours to one building. Shifting winds about 11 p.m. caused a back draft and the building exploded threatening the whole block.

Ray Raynor, news editor of WONE, and Art Burnham, continuity director, manning a tape-recorder, gave a graphic on-the-spot description of the fire’s progress.

The drama hit its peak when it looked as though Mr. Burnham was trapped in a burning market a few minutes after the explosion. On the air shortly afterwards, he commented—“I feel like Chapter 13 of Straight Arrow.”

Reports from Mr. Raynor were heard by Dayton listeners five minutes late, and after they were taped, WONE provided Miami Valley listeners with the only radio coverage of the blaze—one of the worst in Dayton’s history—which sent 45 firemen to the hospital.

**MR. RAYNER (r) congratulates Mr. Burnham for his “boy stood on the burning deck” participation in recording the Dayton fire.** Jack Gibbons, WONE program director, is in the center.

**Lang-Worth Renewals**

FOUR stations have signed new contracts for the eight-inch Langworth library, and 18 have renewed their contracts, Lan-Worth Feature Programs Inc., New York, announced last week. The new clients are: WAND Canton, Ohio; KENN Portales, N. Mex.; WCBS Green- wod, S. C., and KTRF Thief River Falls, Minn.
He's Varying the Pitch While Recording!

With the Fairchild Studio Recorder, Unit 523, George Piros of Reeves Sound Studios is cutting a microgroove, long playing disk. George varies the pitch while recording. There's no overcutting on loud passages — no need to closely ride gain on the audio. He just changes pitch to follow pianissimo and fortissimo. Result . . . unusual dynamic range on a long-playing disk!

FCC’s 5173 Fairchild Unit 523 offers continuously variable control of cutting pitch operable while recording. You don’t have to change feed screws, belts, pulleys or other mechanisms. Simply rotate a conveniently located knob for smooth and vernier control of cutting pitch. This gives you continuous and instantaneous variation of pitch from 80 to over 500 lines per inch during the actual recording.

FILM-SYNCHRONOUS

Fairchild Disk Recorders

Fairchild Unit 523 is used in fixed studio installations for dubbing sound tracks for motion picture production. Absolute lip synchronism is guaranteed for use with your cameras and projectors. You get this same performance with the portable Fairchild Unit 539-G Disk RECORDER shown at left. Many motion picture sound tracks are first recorded on FAIRCHILD SYNCHRONOUS DISK RECORDERS.

New, illustrated article contains a complete discussion of recording techniques. Write for your copy today. Ask for reprint SR.

**FCC HAS REFUSED to call off its inquiry into G. A. Richards’ news policies and has ordered hearing to commence in Los Angeles March 13 on the news questions and on the proposed transfer of control of his three stations to trustees.**

The action came Jan. 12 in a memorandum opinion and order denying a petition filed last November on behalf of Mr. Richards, principal owner of KMPC Hollywood, WGAR Cleveland and WJR Detroit.

The vote was 5-1. Comr. Rosel Hyde voting for a grant of Mr. Richards’ request that the hearing on renewal applications of Mr. Richards’ stations be postponed pending hearing on the transfer applications. Comr. Frieda B. Hennessy did not participate.

The Commission majority said it was not “indifferent” to the state of Mr. Richards’ health, which is such that spokesmen have expressed fear for his life if FCC goes through with its projected hearing. FCC said it would make “very reasonable provision and accommodation for his physical comfort and well-being” and that it felt a hearing could be held “in such a manner as to impose no uncustomed physical strain on him.”

Deletion Requested

In their petition, counsel for Mr. Richards had requested deletion of the news-policy issues from the transfer proceeding. They also asked that these issues be stricken out of the three stations’ renewal proceedings or, alternatively, that the transfer proceeding be handled in advance of the renewal question [Broadcasting, Nov. 14, 1949].

The FCC majority rejected the plea for action on the transfers ahead of the renewals, because:

... in the past the Commission has in a number of cases refused to permit transfers by licensees who have been found unqualified and has regarded the resolution of outstanding questions concerning the qualifications of licensee-transferors as a condition precedent to consideration of a transfer application. When such questions have been resolved in the licensee’s favor a transfer has been permitted. Conversely, if the licensee has been found unqualified, the transfer application has been dismissed. . . .

To Mr. Richards’ claims that he was prevented from inquiring into news policies amounts to censorship and violates the guarantee of freedom of speech, the majority replied:

... in our opinion the lengthy argument along these lines is not in point. It seems clear that the question presented by the present petition is not one of Richards’ private views and his right to express them, but rather whether Richards, whatever his own views, has and will adequately discharge the responsibility of a licensee.

Nor did the majority feel that its decision to go ahead with a hearing is inconsistent with the implication of its action, last March, in postponing the then-scheduled hearing and making provision for submission of the trusteeship plan. The March postponement order, it was pointed out, made clear that after the trustee application was filed FCC would then decide as to hearing.

With respect to Mr. Richards’ illness of heart disease, the majority said:

... it seems clear ... that the burden is on an applicant to go forward with his application; and that the inability of an applicant, because of permanent physical incapacity of key witnesses or for other reasons beyond the control of the Commission, to prosecute his application by availing himself of the opportunity to be heard afforded him by the Commission, does not necessitate the conclusion that the Commission act favorably on the application despite the applicant’s failure to make the legally requisite showing.

**Officer To Be Named**

FCC said a presiding officer for the March 13 hearing would be named later.

The questions with respect to Mr. Richards’ news policies relate to charges, filed by the Radio News Club of Hollywood, alleging that be ordered KMPC staff members to slant news against members of the late President Roosevelt’s family and against certain minority groups [Broadcasting, March 8, 29, 1948].

Under Mr. Richards’ trusteeship plan, control of the three stations would pass to these trustees: Dr. John A. Hannah, president of Michigan State College; L. P. Fisher, vice president of Fisher & Co. and a director of General Motors, and Harry J. Klingler, vice president of General Motors and general manager of its Pontiac Division.

KISW (FM) On Air

KISW (FM) Seattle went on the air last Monday (Jan. 16) on 99.9 mc, with 2.1 kw. Licensed to Ellwood W. Lippincott, the station emphasizes programming for university district housewives. KISW broadcasts 8 a.m. to 10 p.m., with a 24-hour schedule planned.
**Out of Season**

A BASEBALL broadcast on New Year's Day? With all the football bowl games scheduled for Monday, Jan. 2, Sports Director Jack Sandler of KOWH Omaha came up with a new twist for the previous day. Using an old Western Union telegraph report, Mr. Sandler did a re-broadcast of the play-off game between the Cleveland Indians and the Boston Red Sox, originally played on Oct. 4, 1948. During the broadcast, the KOWH sports announcer asked for telephone calls as to what the fans thought about it. The response was 99 to 1 in favor. Now Sports Director Sandler plans to re-broadcast a hockey game on the Fourth of July.

**TENN. GROUP**

**Meet Set for Feb. 24.**

THE Tennessee Assn. of Broadcasters, representing 37 stations, will hold its next meeting on Monday, Feb. 24, at the Andrew Jackson Hotel in Nashville. According to F. C. Sowell, TAB president and manager of WLAC Nashville, the meeting will be confined to a single day.

Highlights of the agenda will be the first Tennessee showing of NAB's All-Radio Film, presented by Maurice Mitchell, BAB head, and the annual election of officers. Current TAB officers, in addition to President Sowell, are Earl Winger, WDOD Chattanooga, vice president; Jack Draughton, WSIX Nashville, secretary-treasurer; John Hart of WBBR Knoxville, T. B. Baker of WKDA Nashville, and Marshall Pengra of WATO Oak Ridge, members of the board of directors.

**McDonald Elected**

JOSEPH A. MCDONALD, vice president, general attorney and secretary of ABC, has been elected a member of the board of directors of Television Broadcasters Assn. He succeeds Robert E. Kintner, ABC president, resigned.

**APS EXPANDS**

**Adds Space and Personnel**

EXPANSION of Associated Program Services' program and promotion departments has been announced. These units have moved to new quarters on the ninth floor of the Evans Bldg., giving the firm four floors at the 46th St. New York address.

New offices provide an additional sound-proof audition room for use of Associated's staff of programmers and complete facilities for functions of promotion department members. Air conditioning is to be installed. Other departments, including offices, studios and cutting rooms, are on other floors.

**ABC CHANGES**

**WALB, WJMJ Affiliate**

ABC last week announced the addition of an affiliated station and the replacement of another to bring its total to 287.

WALB Albany, Ga., 1 kw on 1590 kc will join ABC Jan. 29 as a fulltime affiliate. H. L. Tallman is the manager. The station formerly affiliated with MBS which does not intend to replace it, the network said. WJMJ Florence, S. C., 5 kw on 970 kc daytime, will replace WQGS in that city as the ABC affiliate. Paul H. Beeson Jr. is manager of WJMJ.

**KFW Joins CBS**

KFW Sitka, Alaska, has joined CBS as the network's sixth Alaskan radio affiliate, bringing to 186 the total of CBS affiliates. Others in the Alaska group include KRFB Fairbanks, KINY Juneau, KTFR Ketchikan, KIBH Seward and KFQD Anchorage. The 250-watt station is the newest of the Alaska Broadcasting System group, and is owned by William T. Wagner, Alaska Broadcasting Co., Seattle.

**Series of 23 Vinylite Children's Records Produced, Offered to Stations**

A SERIES of 23 vinylite children's records, produced with orchestra, organ and singing, being offered to stations throughout the country by Continental Dist. Co., New York, at manufacturers cost of 25¢ per record.

**KSTP Reprint**

REPRINT of story on Bernice Hulin, home economics expert for KSTP-TV Minneapolis, currently being distributed to trade. Two-page bulletin is headed "Glamorous Gourmet," and features pictures of Mrs. Hulin and short article describing format of program and her background. Cover of bulletin announces that her show, "What's Cooking," is a "most-watched daily time program on Twin Cities television."

**ABC Signs**

INSTALLATION of new ABC Hollywood signs atop network's new Vine St. studios at 1539 N. Vine now underway. Valued at $15,000, installations will include one-foot ABC microphone outline in neon lighting, sign reading "American Broadcasting Co." in large neon-lit letters, and new marquee with interchangeable letters.

**Hot Firecrackers**

RED mailing tubes, dressed up to resemble giant firecrackers and labeled "It's Hot," sent to trade. Ends of tubes are filled in with cardboard, and string resembling fuse is attached to one end to facilitate opening. Inside of "firecracker" is bulletin promoting Motorola 1950 "Hotel." "Firecracker" was distributed by Simon Distributing Corp., Baltimore and Washington.

**KYW Series**

**LATEST in series of promotion pieces by KYW Philadelphia is a mailer of "Ben Franklin" featuring cartoon of Ben Franklin. On kite Mr. Franklin is flying is written, part, "Earth-bound Ben Franklin . . . wasn't satisfied to wait for the lightning to strike . . . he sent his kite up after the lightning. Sales lightning won't strike your product (or service) 'kite' either unless you send it after the business . . . KYW . . . is your best 'lightning rod.'**

**Mr. Plus Again**

BUFF, white and black folder, is latest in series of Mr. Plus promotions to be sent to trade by MBS. Cover of folder carries drawing of sailboat and skier. Caption reads, "Mister PLUS ropes a BIG one . . . " Inside is report on Nielsen Index and graph illustrating results pointing out that no doubles will be used and families can be reached for price of five on Mutual.

**Gold Nuggets Are Prize**

TWENTY-FIVE thousand dollars in gold nuggets will be given away in an eight-week "Mystery Star" contest launched Jan. 22 by Jimmy Fifler on his regular ABC broadcast. Contest conducted on behalf of National Kid's Day Foundation Inc. of which Mr. Fifler is founder. Each week different "Mystery Star" and his family will be presented on program in conversation containing clue to his identity. Listeners will be invited to write in identifying person and submitting slogan of 10 words or less for National Kid's Day. Three weekly cash prizes of $1,000 each will be awarded, with weekly winners competing for grand prize of $25,000.
Feature
(Continued from page 12)
Coast Show on that time. He soon was named chief announcer, and by the time he left for the AAF in 1942 had risen to assistant operations supervisor. Entering the service as a second lieutenant, he was discharged as a major four years later.

George put into practice his war-time idea of a sales career a few months after his return to WBBM. He sold himself to WGN Sales Manager Bill McGuiness, and 1947 found him working on such "old standby" WGN accounts as Evans Fur, Nelson Bros. Furniture, Canadian Ace Beer, Norge Appliances, "Mister Brau" Beer, Northern Trust Co. and Studebaker.

A year later he became one of Mr. McGuiness' three lieutenants as western sales manager, the other two being the eastern sales manager and the sales manager of WGN-TV, the Tribune's video station. His duties embrace assisting in the direction of sales promotion in the station's home division, and liaison between management and programming.

George Guyan was born in Monticello, Iowa, where his father was a postmaster. At Grinnell College he was active in dramatics for two years, but transferred to the U. of Iowa to take advantage of its advanced speech and radio courses. He was graduated in 1935.

Although he met his wife, the former Helen Holat, at Stephens College, Mrs. Guyan was brought up in Onslow, Iowa, only 12 miles from George's home town. They have two children—Gwen, 11, and George Jr., 1½. The family—and that is George's only hobby—lives in Wilmette, Ill.

'NEW ERA'S' NEW ERA
WHOP Aids Paper in Storm

A SLEET storm in Western Kentucky isolated Hopkinsville from the rest of the world a fortnight ago, making it impossible to get any telephone calls through, either in or out of the city, for two days. Also, the New Era, local paper, was faced with the necessity of editing the newspaper with no outside news since its wire service line was out.

There was only one teletype line open—the one at WHOP Hopkinsville. The New Era called the station and WHOP turned over all the material needed to publish two editions of the paper.

From the paper's editor, WHOP received a letter which, in part, said: "We at the New Era want to express our appreciation for the splendid manner in which you rallied to our support while we were having trouble with our wire on account of the storm. We used a lot of the copy you turned over to us—and made it possible for us to get out a paper. Thanks a million. Call on us when we can help."

A Man Bites Dog Story

BROADCAST news coverage by WHP (CBS) and WKBO (NBC), outlets in Harrisburg, Pa., has been lauded by a competitor, the Mechanicsburg Daily News, in its column " Rid 'n the Airways."

The paper said: "In our opinion, both WHP and WKBO have performed a vital service to listeners in the Harrisburg area by diligently and accurately reporting the local news in the best traditions of a free press and radio."

On All Accounts
(Continued from page 12)

intents and purposes were the property of the station until the end of the open house showings when the buildings reverted to private ownership.

Public's knowledge of what was going on at the site, KFH says, gave ample testimonial to the effectiveness of the Notebook program. Station visits from people who traveled from distant cities for the sole purpose of seeing the homes. The projects also have stimulated Wichita civic and other clubs in centering interest on such a building trend and the new styling typified.

The homes were built in an undeveloped area within the city. They were designed to utilize the potentials of modern concrete, and floor plans were designed after exhaustive studies of housewife footsteps and traffic patterns. Other features in the homes, which were not for sale, included the use of pumic concrete (with high insulating value), use of building units of various sizes and radiant hot water heating.

SAFETY AWARDS
Radio-TV Entries Invited

RADIO and TV stations and networks are among the public information media invited to submit nominations for the National Public Safety Council's 1949 Public Interest Award.

The awards, according to the council, are in recognition of exceptional service to the public safety in 1949. One of the nation's foremost social problems, accident prevention has been receiving "growing and unstinting support from all public information," according to the council. "This magnificent team play has helped us bring the accidental death rate to the lowest point in history," said Paul Jones, council director of public information.

Nominations for the non-competitive awards must be self-made on official blanks obtainable from the National Safety Council, 20 N. Wacker Drive, Chicago 6, Ill., before closing deadline March 15.

From where I sit
by Joe Marsh

Why Scoop No Longer Works Here

Scoop Blake paid us a friendly call at the Clarion's office last week and we were talking about the time when he was a reporter here.

"Remember how mad I got when I found out you were writing that election story right from your desk?" I asked him. "And how I made you get out and learn what a sheriff's job was all about?"

"I sure do, Joe," said Scoop. "I want to thank you for teaching me the 'hat-trick'—putting on my hat and finding out the facts, that is." Then we both had a good laugh together because he found out so much about the job that darn if he didn't run and get elected sheriff himself!

From where I sit, we should find out the facts before we try to talk about anything. When we do, we're inclined to be more tolerant ... we're apt to understand a little more about the other fellow's preference for, say, his political candidate or for a temperate glass of beer now and then. I say, if you don't want to get tripped up, don't leap to conclusions!

Joe Marsh

WREN OPERATION

Now Under Co-Management

WREN Topoka, Kan., the first of the year began operation under a co-management plan, according to an announcement by the stockholders following the resignation of John S. Major as general manager.

Under the new setup, Fred L. Conger will serve as business manager, Max Q. Falkenstein as program manager and Carl B. Bliener, technical manager. All three men are veteran employees of WREN. Mr. Conger formerly was program manager, Mr. Falkenstein served as a sportscaster and commentator and Mr. Bliener was chief engineer for 17 years.

CBC Expense Inquiry

AT REVIVED hearings Jan. 10 of the Royal Commission on Arts, Letters and Sciences at Quebec City, the Quebec Chamber of Commerce presented a brief asking for an inquiry into the Canadian Broadcasting Corp. finances with view to cutting expenses. Chamber also asked that listener fee not be doubled as suggested by CBC, and asked for decentralization of CBC program structure. The Chamber states in its brief that CBC should not be in competition with privately-owned broadcasting stations and at the same time regulate broadcasting.

SHIP-TO-SHORE

WNAX Claims Beat on Ward

SHIP-TO-SHORE conversation between Art Smith, news editor of WNAX and Sen. Sioux City año, and members of Angus Ward's Communist-detained group enabled the station to give its listeners a first-hand account after the party left Japan.

While Mr. Ward said he would issue no statement until he returned to Washington and checked in with the State Dept., WNAX contracted Fred Hubbard Jr., vice consul to China and resident of Edgemont, S. D., and got a first-hand account. Attack was first made the morning of Jan. 2 but contact was not re-established until the following morning because of atmospheric conditions.

Mr. Hubbard had advised a Marine operator he would contact WNAX from San Francisco. Mr. Smith preferred the ship-to-shore conversation. The material was used on the 12:35 p.m. news period—two and a half hours after the call was completed.

Canadian Meet Set

MAURICE B. MITCHELL, director of NAB's Broadcast Advertising Bureau, will be one of the main speakers at the forthcoming annual meeting of the Canadian Assn. of Broadcasters at Niagara Falls, Ont. He is scheduled to talk at the afternoon session, March 30. The Canadian premiere of the promotion film "Lightning That Talks" is also scheduled for the CBC session.

Howard Confirmed

HUBERT E. HOWARD was unanimously confirmed by the Senate last Tuesday as chairman of the government's Munitions Board. In his new post he will be charged with responsibility for procurement of electronic equipment for the military as part of the overall mobilization program. Mr. Howard has been serving as chairman of the Defense Dept.'s Personnel Policy Board since last September.
Open Mike

(Continued from page 31)
tower will be the tallest in the world.

Just in order to clear the records, I thought it best to call to your attention and to the attention of Mr. Aderhold (to whom I am sending a copy of this letter) the advertisement which Truscon Steel Co. published in your magazine, issue of June 15, 1949, copy of which is attached hereeto.

Truscon Steel Co. has already shipped three of these 1,220-ft. towers to the United States Government. Their ultimate destination cannot at this time be announced, but we are quite positive their location is within the limits of this world; hence, Mr. Aderhold's claim would seem to be slightly far fetched.

George F. Bateson
Sales Manager, Steel Joint & Tower Div.
Truscon Steel Co.
Youngstown, Ohio

[Carbon copy to David Carpenter, WCON.]

And in Reply:
Mr. GEORGE F. BATESON:
I appreciate your sending us a copy of your letter of Jan. 5 to Sol Taishoff in the "battle of the towers"—since it appears that you have hung down the gauntlet. While we know that if you say you shipped those 1,220 ft. towers to the government, that's a fact, but still, nobody knows where they are. Besides we are not talking about radio towers—we say that WCON is erecting the tallest television tower in the world.

When your fine company have four of your towers actually builds and can locate a television tower that exceeds 1,056 feet, we will be very glad to bow out of our claims.

David Carpenter
Gen. Mgr.
WCON Atlanta, Ga.

Regular Rates, Please

EDITOR, BROADCASTING:
Thanks for bringing to light another distorted facet of radio. It was there all along, but many broadcasters didn't recognize it as the menace it might be in the near future. I refer to your editorial—"The Old Army Game" [BROADCASTING, Jan. 9]. KSJO, Mr. Mallory and Sol Taishoff are to be congratulated and commended for the stand taken on free advertising for government agencies.

I'm sure it would please many broadcasters if BROADCASTING and the many radio stations throughout the country applied pressure for equitable distribution of advertising money in all media indiscriminately.

Shamefacedly, after checking

our logs, I must admit that we donate several hundreds of dollars in time weekly to different government agencies. . . . the same agencies that pay for their advertising in other media. You may be sure of our support in any effort to create an equality between radio and other media.

Gordon Gray
Prog. Dir.
KAXY Waterloo, Iowa

Per Inquiry Plan

EDITOR, BROADCASTING:
May we request that all P. I. pitches be written on good quality, standard size, carbon backed. You see, we find they make excellent scratch pads, but irregular sizes are hard to put to use.

Cecil Woodland
Pres. & Gen. Mgr.
WCSS Amsterdam, N. Y.

'Let's Clean House'

EDITOR, BROADCASTING:
At last it happened! Congrats to WTAL's L. Herschel Graves (OPEN MIKE, Dec. 28, 1949). How long will it be before radio script writers, producers, and program directors wake up! Goodness knows we here in the small markets have our hands full enough getting our "share" of the advertising dollar without using our air-time to feed the other media.

Let's clean house on this archaic feeling that unless you read it in the papers, it ain't news! Radio has got to start blowing its own horn, and a sweet note it is too . . .

Alan Miller
Program Director
KVOS Bellingham, Wash.

Champagne for Free

EDITOR, BROADCASTING:
'Read with interest your article: "Miller Gets Champagne Results on a Beer Budget," in your Dec. 12 issue.

Everybody gets credit except yours truly who only thought up Lawrence Welk's "Champagne Music" tag for free back in '38 or '39.

Philip L. Davis
Continuity Editor
WCAE Pittsburgh

Opposes Payment

EDITOR, BROADCASTING:
In answer to Mr. Kennedy [BROADCASTING, Jan. 9] I say—"Speak for yourself John Alden." There is no reason in the world why the hams should pay license to pursue their hobby or to give the yeoman emergency and wartime service or to help develop the art as they will continue to do. Financially, most of the hams cannot see where their net piece of equipment is coming from.

The present method of licensing commercial operators is a small burden for the government. Why give the operators another headache to carry on their life's work? They pay income tax. Now Mr. Kennedy, a fee of $2 to $5 for every "ticket" is something else again.

J. W. Eckenrode
Chief Operator
WEST Easton, Pa.

'Awarditis' Cited

EDITOR, BROADCASTING:
We read your lead editorial, "Awarditis" (Jan. 9).

From a station which, for four consecutive years, has received first-place honors from the George Foster Peabody Radio Awards for Massachusetts, the following expressions of opinion may seem—shall we say—"unbecoming."

We agree that, like any citation for extraordinary or meritorious conduct, awards in radio can become so common as to be of

NO P.I. DEALS!...

One Rate For All!

WE DO NOT ACCEPT P.I. PROPOSITIONS

It's a matter of principle. We make our money from the sale of time—and we do well. We refuse to enter into competition with any manufacturer or advertiser, or any dealers or agents representing them. We sell for YOU — Mr. Advertiser — NOT US! We're in the business of entertainment and service to the public, providing YOU a great audience for YOU to reach with YOUR sales message.

Any Hooper report will prove that we consistently accomplish that job. Our never-longer-than-now list of clients proves that most advertisers recognize and appreciate that.

WE DO NOT CUT RATES . . . WE DO NOT VARY RATES

We have one rate — and one rate only. No one can buy time on KRNT cheaper than you. No one pays more than you. It's one rate for all. This is a long-established policy. There's no such thing as "get it for me wholesale". Everyone can earn the same low-rate-per-impact.

Our Listeners and Advertisers Have Long Since Learned That Our Principles Are Not for Sale. And That's One of the Reasons That KRNT Is One of the Nation's Most-Used, Most-Believed-In, Most-Proved and Highest-Cooperated Stations.

The station with the fabulous personalities and the astronomical Hoopers

January 23, 1950 • Page 49

DES MOINES — THE REGISTER AND TRIBUNE STATION REPRESENTED BY THE KATZ AGENCY
the suits and suggesting some provision of his own to curb the alleged practices. He is expected to testify at the hearing. He told Rep. Sadowski he could get no action from FCC or the Justice Department.

The network phase ties in with similar legislation by Rep. Harry Sheppard (D-Calif.) who previously indicated he would press for action on his measure (HR 2410) which would prohibit networks or equipment manufacturers from owning stations [Broadcasting, Dec. 5, 1949]. He likewise feels a broad network review beyond his bill is indicated.

TV Included

Some members of the Commerce Committee have told Rep. Sadowski they would like more information on television, and have expressed concern because they can’t get TV in their areas. Rep. Sadowski said. He added that television will be taken up near the end of the hearing after FCC has completed its own hearings which also begin next month. The whole question of allocation of channels will be brought up, he added.

The subcommittee is expected to go into the question of FM, too—whether its progress has been retarded, as consistently charged by Rep. Francis Walter (D-Pa.), and a measure (H J Res 65) by Rep. William Lemke proposing that a portion of the 50 mc band be set aside for the service.

Rep. Walter told Broadcasting late last week that, while he has no immediate plans to push for FM hearings (or to launch a probe of FCC for alleged violation of his Administrative Procedures Act), he is determined to take action this session, and has had meetings with the House Commerce committee in its hearings instead of initiating action through the House Judiciary Committee, he said.

Rep. Sadowski’s agenda for hearings includes many of the topics and questions raised by Kurt Borcherdt, investigating counsel for the committee, and first disclosed to Broadcasting in its year-end issue [Broadcasting, Dec. 26]. Notable among the issues, which he said FCC itself had raised, are those dealing with television, the use of frequencies between government and private users and sections of the McFarland bill covering licenses and renewals.

AP RADIO

Elections 22 New Stations

ELECTION of 22 more radio stations to Associated Press membership was announced last week by Oliver Gramling, AP assistant general manager for radio. Elected at the January AP board meeting, the new members are:

WOW FARM TOUR ‘New South’ On Itinerary

COVERING 16 to 18 states and a boat trip to Havana, WOW Omaha will sponsor its third farm study tour in mid-March, according to Mal Hansen, WOW farm director who will conduct the tour. The 6,000-mile “New South” tour will include pre-arranged inspections of farms, ranches, plantations, work projects and industrial plants directly associated with agricultural developments, Mr. Hansen said.

Starting from Omaha in an all-Pullman special train, the tour will be limited to farmers from the area. The tentative general route will be from Omaha to Tulsa, Oklahoma City, Fort Worth, Dallas, Houston, Montgomery, Birmingham, Atlanta, Savannah, Jacksonville, Miami, Cub, Asheville, Chattanooga, Knoxville, Lexington, Cincinnati and return via St. Louis. Mr. Hansen will make daily broadcast for his Farm Science Reporter program on WOW and a daily film program for his WOW-TV Grass Roots feature. Last September, WOW took journalism by Mr. Hansen took 200 farmers to the West Coast, Canada and Mexico, and a year ago, he conducted 26 Midwest farmers on a study trip through Europe.

RADIO THIEVES

Victimize WWOD, WROV

TWO Virginia stations fell prey to marauding robbers last week. Both WWOD Lynchburg and WROV Roanoke, less than 50 miles apart, reported thefts taking place in the very early hours of Wednesday (Jan. 18).

Jay Seibel, WWOD program manager, told Broadcasting the station’s transmitter building was entered through a window by thieves who took material valued at about $5,000. Frank E. Koehler, WROV general manager, later in the day, said the station’s transmitter building had been entered in the same way, with approximately $2,000 worth of material missing.

Curtled away from WWOD were recording equipment, power tubes, recording discs, library books, a Hallicrafter receiver, two Presto turntables and a Presto recorder. Thieves failed to take a new tape recorder and other valuable equipment, Mr. Seibel said. A similar “selective” thievery took place at WROV with the burglars making off with a Hewlett Packard distortion analyzer, an audio oscillator of the same make, a Presto turntable, Raytheon meter panel and a Western Electric limiting amplifier. Mr. Koehler pointed out that the equipment was believed to be of little use to a person or persons not in the broadcasting or radio business.

Radio Knowledge Shown

Both stations reported the thieves apparently were well versed in handling radio equipment as could be seen from the manner in which wires were clipped and the use of tools in disconnecting and dismantling equipment. In both instances, the robbers took equipment which did not interfere with the stations going on the air with AM broadcasting. However, WWOD reported its FM facilities were interrupted. Although suspects have been questioned, no arrests had been made. From the investigations made, it is believed the person or persons involved in both robberies were the same.
salesmen. At the age of 24, he was named head of the company's Wisconsin district, and a year later became divisional manager of the firm's largest district, covering six states.

In 1933 Mr. Luckman joined The Pepsi-Cotent Co. as sales manager, and a year later moved up to become vice president in charge of sales. In 1937 he became vice president in charge of sales and advertising. A year later he was promoted to president, and general manager, and in 1941 became executive vice president.

In 1943, at the age of 34, he became president of The Pepsi-Cotent Co., and five years later, Mr. Luckman took over The Pepsi-Cotent Co., Mr. Luckman went along to continue as head of the denterine firm.

A year and a half later, Mr. Luckman, was reportedly offered a position with Lever Bros., and allegedly turned down the offer to join Lever Bros. in Cambridge to serve as executive vice president and on July 1, 1946, at the age of 37, he became president of Lever Bros. 

Exhibiting, along with his industrial acumen, a remarkable "show" sense, Mr. Luckman was responsible while with Pepsi-Cotent for the discovery and management of the Amos 'n Andy show.

**Bob Hope Success**

A recent feature article in BROADCASTING described his role in the success of the Bob Hope program as follows:

At that time (1937), Mr. Luckman, then vice president in charge of sales for Pepsi-Cotent, began shopping for a new program. A young fellow named Bob Hope, playing at the time on Broadway in a musical comedy called "Red Hot and Blue," was named as a possibility, and Mr. Luckman went to see the show. After the show, Mr. Luckman is reported to have suggested to Bob Hope that he become a more sympathetic character by turning some of the comedy on himself, instead of directing it at others in the cast.

Mr. Hope allegret a sugg - tion, and went on the air for another sponsor. His success was only moderate and the program went off the air. Mr. Hope then reportedly returned to Mr. Luckman and said, in effect, "What was that you were saying?" The result: Mr. Hope revised his routine and went on the air for Pepsi-Cotent on Sept. 7, 1938, to become one of the most well-known comedians in the history of the industry.

The current Lever Bros. network shows are Lux Radio Theatre, Bob Hope 'n Andy, My Friend Irma and Aunt Jenny.

Lever Bros. Co. actually is a two-part holding company, one Dutch and the other British. The British firm is known as Lever Bros. and Unilever Ltd., with Mr. Heyworth as chairman of the board, while the Dutch firm is known as Lever Bros. and Unilever N.V. with Mr. Rykoff as its chairman. Each man also is vice chairman of the other company, Mr. Luckman was president of Lever Bros. in New York.

Recently Mr. Luckman is chairman of the national Jefferson-Jackson Dinner of 1950.

**LEVER PROBE**

Langer Wants Oleo Air

AN INQUIRY into charges that Lever Bros., one of radio's high-ranking advertisers, has violated anti-trust laws by allegedly conspiring to raise the price of oleomargarine was demanded in the Senate last week by Sen. William Langer (R-N. D.).

During the course of the Senate's oleomargarine debate, after which it voted to repeal taxes on the product, Sen. Langer proposed two resolutions—one calling for a probe of Lever Bros. and its affiliated firms, and the other to investigate amount of campaign contributions made by or on behalf of Charles Luckman. Lever Bros. president, who resigned last week (see separate story), and his firm, to either the Democratic or Republican National committees or state branches.

Sen. Langer's first resolution (S Res 214) would authorize an inquiry to determine (1) what connection, if any, Lever Bros. had with raising the price of oleo in the past 10 years; (2) whether it attempted to corner the market; (3) whether Luckman's role, if any, in such any such attempt; (4) whether there has been a conspiracy on the part of Lever Bros., its subsidiaries or affiliates, or any other concerns. The resolutions, referred to the Senate Judiciary Committee, results and recommendations would be filed with the Senate by April 1. The second proposal (S Res 214), referred to Senate Rules and Administration, would direct Mr. Luckman to testify during the investigation.

Lever Bros. traditionally is one of the three top network advertisers in the soaps and teleties categories.

**NBC Staff Changes**

PAT STEEL, manager of NBC's broadcasting promotion unit, last week was named manager of audience promotion, and Allan J. Hughes, formerly with CBS sales promotion division, has joined NBC in the same capacity.
**DON LEE**

**Biggest Year Ever in ’50 Theme of S. F. Meet**

IN SALES, in promotion, in programming, 1950 is going to be the biggest year ever for Don Lee and its 44 affiliated stations.

This was the optimistic theme of the network’s annual winter meeting held Jan. 14 at KFRC San Francisco.

Fifty-one representatives from 37 of the network’s affiliates attended the all-day meeting. They discussed local problems and plans for coordinating efforts to realize "the theme of ’50."”

William D. Pash, network vice president and general manager of KFRC, who served as chairman of the conference, said the attitude of all present was decidedly more aggressive and far more helpful than at last year’s meeting.

In the keynote address of the conference, Ward Ingrin, network vice president in charge of sales, told the delegates:

"I feel particularly optimistic about the future of regional networks in radio and especially for the Don Lee network, which has stations covering even the most inaccessible areas of the Pacific Coast.

"There is just no other medium available to advertisers providing such complete coverage as the Don Lee network," he said.

Mr. Ingrin also indirectly acknowledged a feeling on his part that radio in TV centers would soon face serious competition from the newer medium.

The acknowledgement was expressed in this statement: “The many Don Lee stations in areas where television is still a long way away, makes me most optimistic about the future of these stations.

The network’s promotion plans for the coming year were discussed in an illustrated presentation by George Whitney, network sales manager, who promised the affiliate representatives increased promotional activities aimed at increasing the revenue of all affiliations.

Reports of the conference will be sent to those Don Lee stations unable to have representatives at the meeting.

Registration list of representatives to the Don Lee meeting are:

Hal Shade, KOOS Coos Bay; Bill Taft, KRKO Everett; Bob Stoddard, KATY Reno; Frank Lorgen, KEND Bend; Ed IDZ, Powidz, Swinmar, KVI Seattle; Chet Wheeler, KLWL Albany; Eyro Monroe, KYAK Yakima; Joe Chvtil, KELO Centra; Chehalis; Dick Brown, KOQ Portland; Eddy Whalen, K-worker, KBBI Wrangell; John Hall, Ken Randolph, Dr. Morgan; Bill Oates, KSBW Salinas; Fran Ide, KGB San Diego; Joe Carroll, KMYE Marysville; Sheldon Anderson, KOKK Tulare; Dee Little, KTRC Tucson; Gene Lee, KFPM San Bernardino; Woody Wooding, KHSU Chico; Tom Olsen, KGY Olympia; Lee Hull, KYOM Eau Claire; Fred Steudel, HNBC Tucson; H. E. McCague, RBJ Bakersfield; Jim McCarthy, KAFY Bakersfield; John Hoeg, Al Johnson, KICL Boise; Gene Chenault, KYNO Fresno; Lee Bishop, KORE Eugene; Myron Elders, KNOA Sacramento; Herro Fergason, Keith Priion, KSTM Stockton; Dave McCall, Bill Smith, KIMB Bakersfield; Fred Merced; Bill Smith, KIKM Bakersfield; Don Wike, KYRO Aberdeen; Don Jorgenson, KJRU Redwood City; Bob Richey, Dick Brown, Don McCabe, Jim Richardson, Boyd Rippey, Bill Nichols, Dick Templeton, Mel Ven- ter, KFRC San Francisco.

**In the Public Interest**

Radio Prompts Confession

HOURLY newscasts over CKFY Toronto, Ont., concerning a hit-and-run driver who left a young boy and his dog on the side of the road, resulted in the driver’s turning himself in. Station broadcast continuous appeals to citizens to be on the lookout for the driver. The driver finally turned himself in, telling the station he was the wanted man.

KILO Aids Reunion

A MIX-UP in correspondence between a British mother who had gone to Grand Forks, N. D., to visit her daughter living in a neighboring town, left the mother stranded at the depot after her arrival. Attempts to reach her daughter by telephone and telegraph failed and KILO was asked to broadcast the story. Five minutes after the station was aired, the daughter called her mother and the pair were reunited.

'Happiness Exchange'

REGULAR feature of KLIF Dallas, Tex., programming is the public service Happiness Exchange show, conducted by Jimmy Jeffries. Here is one half-hour program is made up of calls from the weary who are relayed to the listening audience, and calls from persons listening who wish to respond to requests made. Personal visits to those he has been instrumental in helping are made between shows by Mr. Jeffries.

Radios Through Radio

AFTER receiving a letter from a patient at a tuberculosis rest home asking for a used radio, Bob Maxwell, disc jockey for WJW Detroit, passed on the request to his listeners. Before he could ask his audience to desist, 43 radios had been sent to the station, more than needed. All, however, were repaired and sent to the sanatorium.

Collections Exceed Pledges

CHARITY fund managers in Baltimore have stated that collections of pledges made during various campaigns are usually less than 65% of the total pledged. WMAR TV, however, had a different experience. A campaign, for the families of firemen killed in the line of duty, in the form of a TV auction sale, with items contributed by station’s sponsors, brought in pledges of $150,000. When the day began, 5 p.m. and was conducted by professional auctioneers via telephone until 5 a.m. of the following day over WMAR TV. After the money had been counted, it was announced that pledge was exceeded by $2,462.88.

Avoiding Disaster

WTHI Terre Haute, Ind., was instrumental in saving North Terre Haute, Ind., from a flood. Bulletins concerning the threatening high waters reached the station at 9:30 p.m. Messrs. Kell and Thomas warned the scene and returned to describe articles that were needed to stave off waters. Trucks in the area picked up needed items at the homes of listeners who phoned the station. Even after regular sign-off time, 1 a.m., WTHI personnel was still hard at work, airing bulletins and filling in with more emergency news, simultaneously threatened, station flashed warnings, sending its staffs into the danger areas for first-hand information.

Help for Students

ALL-COLLEGIATE boxing match was sponsored and telecast by WKY-TV Oklahoma City to benefit the group of Oklahoma students who lost their personal belongings in a dormitory fire Dec. 3. Viewers were asked to phone in their contributions during the 15 hours staged in city’s Municipal Auditorium. In less than two hours, 172 viewers had responded with a total of more than $3,000.

E. A. Wheeler Named

EDWARD A. WHEELER, president and general manager of WEAW (FM) Evanston, Ill., has been elected president of the FM Broadcasters of Chicagoland. He succeeds at the hands of Wood J., former president of WMOR (FM) Chicago. Two new directors will be elected tomorrow (Jan. 24). At that time, FM broadcasters will outline plans for an "accelerated sales drive" throughout the Chicago area.

**HOWARD CP**

Hawaii Hearing Ordered

NEW AM grant made a fortnight ago to Royal V. Howard for Honolulu [Broadcasting, Jan. 9] was withdrawn by the FCC last week and the application was designated for hearing with the adjacent channel held by Broadcasting Co. at Hilo, Hawaii.

Mr. Howard, consulting engineer and former head of the NAB engineering department, was awarded the construction permit for 250 watts full time on station KHJ at Hilo on Jan. 4 by the Commission. Later, however, FCC found that on the afternoon of Jan. 3 the bid of Island Broadcasting for 1 kw full time on station KHJ at Hilo had been filed. The Commission indicated there may be interference between the two proposed stations and hence ordered a consolidated hearing to commence in Washington March 28. Mr. Howard’s application had been filed Oct. 13, 1949.

Island Broadcasting’s request was stamped received Jan. 3, an FCC spokesman said. It was not publicly reported by the Commission until Jan. 5. Island Broadcasting is a co-partnership composed of John D. Keating, head of own station, with复制 entity, and J. Elroy McCaw, 50% owner of KELO Centra, Washington; one-third owner of KYAK Yakima, Washington, and 21.5% owner of KFXR Bakersfield, McCaw and McCaw also are chief owners of KPOA Honolulu, assigned 5 kw on 630 kc.

**EXCISE TAXES**

Radio Group Urges Repeal

LEGISLATION to repeal “discriminatory” wartime excise taxes on radio receivers, phonograph records and other equipment has drawn the written support of a national committee comprising several well-known radio and allied industries.

A petition to Rep. Anthony F. Tauriello (D-N.Y.), inserted in the Congressional Record last week, was signed by Edward Wallenstein, president, Columbia Records Inc.; J. V. Heffernan, vice president, RCA; Milton R. Rackmil, president, Decca Records Inc.; Henry P. Chamberlain, Bristol Myers Co.; Arde Bulova, vice chairman, Bulova Watch Co., and others.

**McCarthy Seeks Loan**

GLENN MCCARTHY, a wealthy Texas oilman and owner of KXZ Houston, has applied to the Reconstruction Finance Corp. for a $70 million loan, Washington RFC officials said last week. The money reportedly would be used primarily for development of Mr. McCarthy’s oil properties. A $70 million loan would be the largest made to private business since the war.
DON LEE WILL
Merrill Named Sole Heir; Plans No Change

R. D. MERRILL, 80, partner in Merrill & Ring Co., Seattle lumber concern and uncle of the late Thomas S. Lee, was named sole heir to the latter's $9,500,000 estate in a will dated Dec. 15, 1934, it was revealed last week.

Mr. Lee, 44, whose interests included the Don Lee Broadcasting System and associated radio-television properties as well as extensive automotive enterprises, either fell or jumped to his death from the 12th story of a Los Angeles office building on Jan. 13 [Broadcasting, Jan. 16]. He had been in poor health for many years.

Private funeral services were held in Hollywood last Tuesday. Cremation followed. At 2 p.m. Tuesday the four Don Lee owned-operated stations observed one minute of silence in tribute.

After reading of the will in Hollywood last Wednesday, Mr. Merrill expressed the desire that everything go on as has been in the radio and automobile properties. As far as is known to Zagon, Aaron & Sandler, attorneys for Mr. Lee and his estate, the 1934 will was Mr. Lee's last and Mr. Lee was fully competent at the time it was executed.

Mrs. Nora Patee of Pasadena, Mr. Lee's maternal aunt and personal guardian, was generally expected to be a major beneficiary. It was not known at this time whether she and other relatives will contest the will, which was to be filed and admitted to probate this week in the Los Angeles superior court. Executors will be approved at this time.

Radio Unchanged

Operation of the Don Lee Broadcasting System will continue under Lewis Allen Weiss, board chairman, and Willet H. Brown, president. It is known that Mr. Merrill has confidence in both executives and for the present plans no organization changes.

Mr. Lee had inherited the multiple businesses of his father, the late Don Lee, valuation of which were approximately $10,000,000. The youngest of Thomas S. Lee Enterprises Inc., which included Don Lee Broadcasting System, Don Lee Motor Corp. and KTLS (TV) Hollywood, which the younger Lee had helped to pioneer and build.

Guardians were appointed to handle his affairs in August 1948 when Mr. Lee was declared incompetent as result of injuries received in an auto accident several years ago. Messrs. Weiss and Brown were named guardians of the estate.

Mrs. Patte about a year ago petitioned the court to discharge her personal guardianship of Mr. Lee, maintaining that he was again well enough to conduct his business. This was denied by the court.

In addition to KTLS, the Don Lee radio interests include KJH Los Angeles, KGB San Diego, KFRC San Francisco and KDB Santa Barbara. Don Lee is also television program at San Francisco.

Applications for involuntary transfer of these properties to Mr. Merrill would be filed upon settlement of the estate. Two transfer applications are pending Commission approval, one from Don Lee to Thomas Lee and the other from Thomas Lee to the guardian of his estate. Comm. Frieda B. Hennock cited these requests in her dissent to FCC's proposed renewal of the Don Lee stations in its investigation of network practices [Broadcasting, Jan. 2].

PRODUCTION OF CANADIAN radio and television sets for the first nine months of 1948 totaled 509,700, according to report of Dominion Bureau of Statistics, Ottawa. Value of 469,800 sets shipped by factories for domestic consumption plus $5,100,000 shipped for export in first months amounted to $33,326,000.

NBC's three-note station-break chimes, heard on the network's radio and television stations, last week became the first "purely audible" trade mark to be dealt with by the U. S. Patent Office, announced last Wednesday, contained the allowance of the NBC application to register its chime signal as a "service mark" of the network.

Heinz Names Dimond

ARTHUR DIMOND, department head in charge of media with H. J. Heinz Co. sales department, has been promoted to manager of the company's advertising division. Mr. Dimond started with the company in 1922, while a freshman at college, as a part-time visitors' escort.

EDITOR, BROADCASTING:

A lot has been said pro and con about FM in the Open Mike column which I read with great regularity... as the owner of an FM Class A station 930 ERP in Madison, Wisc. I am perfectly satisfied with FM and the progress we have made to date. Our experience indicates FM is what you make it and we've done our best to make it good...

... We intend Sept. 1 of this year to broadcast 24 hours a day every day. It is our sincere belief that reducing schedule likewise reduces listeners, likewise reduces results to advertisers, likewise reduces FM. It is our opinion that expanding schedule expands listener, expands results to advertisers, expands FM and sells more sets.

... Earl W. Fessler, Pres. & Gen. Mgr. WFOW-FM Madison, Wis.

For FM in '50

EDITOR, BROADCASTING:

Let's Fight For FM in Fifty. In 1950, most of us were talking gloomily about a depression and unhealthy so...

In the Jan. 9 issue of Broadcasting, there appeared reports about FM both damaging and informative, that had me alternately frowning and smiling...

... The lack of FM progress can be traced to those of us engaged in the AM-FM business, who failed to make of it a sales audience building opportunity, but rather acquired an FM component just to keep somebody off our pasture.

... Let's unify our efforts and pull together, and providing the FCC cooperates fully, FM will become a going proposition.

Lauds Royster Stand

EDITOR, BROADCASTING:

"Doctor" Royster is absolutely correct in his diagnosis of why many small town stations are sick financially. As a former time salesman and agency man I wholeheartedly agree with his statement that our small station properly staffed can create programs that sell for the clients. Better pay always gets the better trained men in radio as elsewhere and station managers should keep this in mind when forming their staffs.

Best wishes for the continued success of Broadcasting and keep up the good work.

Bud Miller

WFMJ Repeats Pearson

EDITOR, BROADCASTING:

In your Broadcasting Deadline section of your Jan. 16 issue, you included a story on Drew Pearson's DB on WTOP Washington. You said "It would be first of a kind involved on a repeat basis for Mr. Pearson." It is understood.

This is to inform you that WFMJ has had Drew Pearson on a repeat basis since Dec. 11, 1949, 10:30-10:45 p.m., Sunday nights.

Robert B. Macdall
Program Mgr.

They Say

"THE RESPONSE to my recent column on FM radio was large, and so gratifying, that I am almost persuaded that my suggestion for "subscription stations" might be made to work... This is exactly what has happened in Berkeley, Calif., where... KPFA is run on a non-profit, listener-sponsored basis... There is little to choose between the evils of commercial broadcasting in this country and government broadcasting in Brit- ain. Canadian business may be public-supported FM stations, by and for the people who will not submit to the vulgarities and vulgarity that infect the air today!"

From Sydney J. Harris' column in the Chicago Daily News

"GROWTH of the television industry in the United States in comparison with its development in France, Great Britain and Canada provides an impressive object lesson to those who would thrive under the free enterprise system while it stagnates elsewhere under government domination. Throughout all of France there are only 15,000 television receiving sets... In Great Britain, where television also is a government monopoly, only 70,000 television sets had been licensed at the end of 1948... Canada started off 1950 with not more than 2,200 receiving sets...

"Free enterprise obviously is more conducive to the rapid development of a new industry than is a government monopoly."

From an editorial in the Fort Worth (Tex.) Star-Telegram.

STUDIO GUESTS

ABC Chicago Records '49 High

HIGHEST attendance record for audience shows in ABC Central Division history was hit last year, according to a report issued by the guest relations department. More than 415,000 persons visited radio and television originations at the network's Civic Studio, the former Civic Theatre in the Civic Opera House, and at the College Inn of the Hotel Sherman.

Most popular AM broadcast was Breakfast Club, which originated before 145,000 persons. Super Circus, most popular television program, played to a studio audience of 40,000.

SEMINAR on public service and special events conducted by Harvey Olson, program manager of WDBR Hartford, Conn., at Randall School there. Charles Parker, control room operator for WDBR, conducts seminar in technical operation of radio station.
RECOMMENDATIONS of the New York listening post of the George Foster Peabody Awards were announced last week. No recommendations were made in the regular stations category (no. 1), but those in others were:

No. II—Local Stations

1. WMCA (Education) for its over-all informative service to the community on important matters with special emphasis on the series, "New Blood." The committee gave special commendation for the excellence of production of this series.

2. WMJ (Education) for Books on Trial because this presents a series of programs which not only acquaint the public with outstanding examples of literature, but also furnishes a forum for discussion of important controversial topics.

3. WPX (Tele) for its over-all constructive treatment of various issues confronting the community, for its foresight in acquainting its audience with its own civic government, and for the generous amount of time allocated for such public service.

No. III—News

1. Erwin D. Canham (ABC) for his fine reporting of the news and especially for his objective analysis.

2. Clifton Utley (NBC) for his profound and yet dynamic interpretation of current affairs.

3. WNFC—For its continuous morning and afternoon broadcasts direct from Lake Success during the general assembly meetings there. Radio is particularly active in broadcasing "Reports of the Nation's.

No. IV—Drama

1. Studio One—TV (CBS) because of general excellence in production, acting, direction, casting and camera work and because the material presented is uniformly top grade, including a high percentage of classic series and plays.

2. Amos 'N' Andy—CBS because of its gentle humanity and warmth, achieving a consistent and lasting permanent value.

3. Dragnet (NBC) because of its reality of story, materials, atmosphere, acting, direction and dialogue because of the novel narrative technique employed.

No. V—Music

1. Metropolitan Opera (ABC) for the way in which the operatic listeners' enjoyment is enhanced by the skill with which the intermission features are handled. They are both entertaining and musically valuable.

2. At Home With Music (ABC) because of its high entertainment value through the services of Sigmund Sternberg as master of the ceremonies, as well as educational content in the realm of music.

No. VI—Education

1. College by Radio (formerly University of the Air) (NBC) for the entire project which included Living, 1949, Chicago Round Table, NBC Theatre, and The Pioneers of Music—Home study courses based on these programs have been developed by numerous educational institutions in cooperation with University of the Air and credits are given to those completing the course. The committee recommends this award to the only consistent and continuous educational project on the network.

2. Meet the Press (MBS) although this may be considered a news program, it is a fine example of the current controversial topics and is also commended for its forthright and challenging presentations.

No. VII—Youth

1. Youth from a Full-Sized Station WQXR (ABC) for its outstanding and consistent high performance in programming for young people and for making it possible for young people to participate in thinking and discussion of current interests to the nation and the world. With the limited numbers of truly fine programs for youth on the air, the increasing effectiveness of The Youth Forum is worthy of first consideration in the entire youth classification.

2. A Child's World (ABC) for its fine presentation and excellent interpretation of joint problems of youth and parents.

3. Kubla, Frau & Ollie—TV (NBC) because it appeals to adults as well as the child's audience to which it is directed because of the subtlety with which it makes its points and humor.

No. VIII—International Understanding

1. Radio Diffusion Francaise—In recognition of its efforts to link the peoples of the United States and France, and to promote international understanding and cooperation through an extensive exchange of programs between countries and continents; and the 200 stations in the United States, Alaska, Canada, Panama, Puerto Rico and Hawaii, affiliated to the International Goodwill Network established in April 1949 by Radio Diffusion and Telecommunications Francaise to promote better understanding and increase goodwill between the peoples of the world.

2. NBC—for its long and constant effort on behalf of the United Nations.

FARM SURVEY

On-Spot Shows Showed

TWO-THIRDS of farmers recently surveyed by Louisiana State U. and related organizations favor programs actually originating on farms rather than at studios, according to a report on "Radio Habits in Rural Louisiana." Farmers' preferences covered best listening times for men and women, length of programs, number of participants in farm broadcasts, and summer programs.

Most farmers listen weekday between 12 noon and 1 p.m. the survey showed, with listening reaching a peak Saturday between 8 p.m. and 9 p.m. Except for the 5-6 a.m. and 10-12 midnight periods, a substantial portion of farm women give some attention to their radios. On Saturday, fewer women listen in the morning than on weekdays, but after 6 a.m. at least one-third of the potential rural home maker audience is tuned to some station, the report added.

WVLW New York claims to be most multi-lingual outlet in area. Station carries broadcasts in 14 different tongues.
Hooper Sale?
(Continued from page 15)
cern. At time of the offer, Broad-
casting (June 23, 1947) reported: “In essence the plan calls for the purchase by BMB of AAA and XAB, of the capital stock of C. E. Hooper Inc. for $1 million, payable in quarterly installments of not less than $25,000, with interest at 5% of the unpaid balance. BMB would then publish, copyright, bill and service Hooper’s continuous reports, including Network Program Hooratings, Comprehensive Hooratings, Pacific Hooratings and City Hooratings.

“A new company organized by Mr. Hooper and his associates would take a 10-year contract with BMB to do the field work, tabulating and computations for these services on a basis of cost plus 10%.”

That deal did not materialize and subsequently Mr. Hooper proposed that his organization be engaged to collect and compile the station and network listening data for BMB’s next nationwide study [Broadcating - Sept. 1, 1947]. This proposal included adoption of a Hoor technique for collecting the field data in place of that used by BMB, which Mr. Hooper argued would produce better results at about half the cost that BMB had estimated for its next survey. The BMB board did not agree with Mr. Hooper’s reasoning and this proposal was likewise rejected.

As recently as last November, Mr. Hooper proposed (to NAB directors who were to consider BMB’s future at their Nov. 15 board meeting) that BMB continue to function in its present form but that for future studies it should adopt the Hoor area coverage index as its basic technique, contracting for C. E. Hooper Inc. “To apply our method concurrently to all-station, radio and TV, county-by-county, city-by-city survey. This contract would be cost plus.”

C. E. Hooper Inc. was formed in 1938 as successor to Clark-Hooper, which in 1934 had begun measuring audiences of network programs through use of the coincidental telephone technique on which today’s Hooratings are still based. In 1939 the National Network Ratings were supplemented by Pacific Hooratings and the following year the City Hooratings service was launched.

A long-drawn conflict with Cooperative Analysis of Broadcasting, which measured program audiences by a recall method, resulted in, first, CAB’s abandonment of this technique in favor of the coincidental method and, in July 1946, by the suspension of the CAB ratings service. A. C. Nielsen Co., rating programs by means of the Auidometer, a device that registers all dial tunings of a radio set, is today Hooper’s only competitor in the national radio program rating field.

In January, 1948, the first U. S. Hooperating report was issued, starting a new service which offered program ratings projectible to the entire country’s radio families. A month later, Hooper began reporting on New York’s TV audiences and last year expanded that service to provide national Teleratings.

Early this month Mr. Hooper launched a campaign to rid radio research of techniques that have arisen since the war, particularly on the local level, which he claimed are invalid and unable to deliver dependable data to advertisers who base their appropriations on research findings. In an address to the Radio and Television Research Council of New York, he urged this organization to take the lead in setting sound standards for radio audience measurements [Broadcasing, Jan. 16].

History by Dates

THIS pamphlet summarizes historical anniversaries and “firsts” in world history in short paragraphs under date headings. It is designed particularly for people engaged in writing the field, although applicable as well to those in the advertising and related fields. Firm calls the pamphlet “comprehensive treasury of basic events, history and biography, human interest, oddities and anecdotes.”

NEWS department of WFAA Dallas has acquired portable self-powered tape recorder for on-the-spot voice coverage.

Milestones

- Adrian Michaels, program manager of NBC Standard Hour since its inception in October 1926, recently celebrated his 30th year with Standard Oil Co. of California. For the occasion fellow employees honored him with a luncheon and a Standard Hour program in miniature.

- Traffic Manager Sterling V. Couch of WDBC Hartford, Conn., is observing his 22nd anniversary with the station this month.

- KVOO Tulsa, Okla. celebrated its 25th anniversary Jan. 14. Station started in Bristow, Okla., as KFRU, and call letters were changed one year later. In 1928 W. G. (Bill) Skelly purchased KVOO from its founder, E. H. Rollstone, and moved its studios to Tulsa, increasing power from 500 w to 5 kw. In 1932 William B. Way became vice president and general manager of the station and Gustav K. Brandborg, now commercial manager, joined the organization as a salesman. Also in 1932 power was increased to 25 kw and 50 kw transmitters were installed. In 1938 the station became fulltime and in 1941 full 50 kw power was granted. Today KVOO has a staff of five time employees, 18 of whom have been with it more than 10 years.

- Grace Cassidy, traffic manager of WLS Chicago, received a watch from fellow-employees Dec. 22 in honor of her 26th Christmas at the station.

- Dr. Charles E. Fuller, Los Angeles pastor and director-speaker on the transcribed Old Fashioned Revival Hour sponsored by Gospel Broadcasting Assn. on 235 ABC and 275 independent stations, observed his 25th year in radio on Jan. 8.

- Nancy Osgood, director of women’s activities for WRC Washington, began her eighth year with the station on Jan. 2.
FM revenues in 1949 would fall between $6 and $7.5 million.

Radio Gross Billings
Radio's gross billings—advertising volume at the one-time rate—were estimated at $837,200,000, compared to $816,500,000 for the preceding year. Of the 1949 total, local, time sales accounted for $274.6 million; national networks, $192.5 million; national spot sales, $160 million, and regional networks $101 million.

Advertisers by Product
Five product groups continued to account for almost three-fourths of network advertising in 1949. These are: Food products, toiletries, drugs and drug products, tobaccos, and soaps and cleansers.

The following table shows the top five and their respective expenditures in 1949, as estimated by the Broadcasting Business Index on the basis of a Publishers Information Bureau report for the first 10 months:

<table>

**ANDY’S MARRIAGE**

China and the State of The Union are not the only matters getting attention on Capitol Hill these days. Solons, thanks to the ingenuity of a New York public relations man, have been reported last week to be deep in talk in corridors and cloakrooms on the question of whether Andy, of the celebrated CBS Amos ‘n Andy show, is legally married.

George Weissman, with Benjamin Sonnenberg of New York, which handles publicity for the show, joined members of CBS’ Washington news corps with the use of WTOP Washington recording facilities transcribed 30-second statements from Senators and Representatives on Andy’s situation.

Andy Duped
On Dec. 11, Andy was duped into a trip down the aisle with Al Simpson, who paid a fee to “Kingfish” for the marital set-up. “Kingfish” was to have pressed into service a “stooge” to “obey” at the last minute—but failed to supply the objector. Result was Andy’s flustered “I do” with question in his voice. Andy is still involved in the problem of freeing himself from the marriage. Recorded Congressmen’s statements discuss the legality of the marriage. Discs will be circulated to CBS affiliated stations as promotional pieces.

Congressmen Discuss Legality for CBS

China and the State of The Union are not the only matters getting attention on Capitol Hill these days. Solons, thanks to the ingenuity of a New York public relations man, have been reported last week to be deep in talk in corridors and cloakrooms on the question of whether Andy, of the celebrated CBS Amos ‘n Andy show, is legally married.

George Weissman, with Benjamin Sonnenberg of New York, which handles publicity for the show, joined members of CBS’ Washington news corps with the use of WTOP Washington recording facilities transcribed 30-second statements from Senators and Representatives on Andy’s situation.

Andy Duped
On Dec. 11, Andy was duped into a trip down the aisle with Al Simpson, who paid a fee to “Kingfish” for the marital set-up. “Kingfish” was to have pressed into service a “stooge” to “obey” at the last minute—but failed to supply the objector. Result was Andy’s flustered “I do” with question in his voice. Andy is still involved in the problem of freeing himself from the marriage. Recorded Congressmen’s statements discuss the legality of the marriage. Discs will be circulated to CBS affiliated stations as promotional pieces.

**Congressional Comment**

Among the many comments: Sen. Warren G. Magnuson (D.-Wash.), a bachelor, said Andy is not married as there is no intent; Sen. Milton R. Young (R.-N.D.) demanded an investigation as Andy “tied the knot” on the Hill; Rep. Harold H. Velde (R-Ill.) said the words, “I do,” constituted acceptance and that Andy “has gotten himself in a mess”; Rep. Hardie Scott (R-Pa.), sympathetic bachelor, predicted it would take the “best legal talent in America” to relieve the radio personality “from the last freedom,” and Rep. Chester A. Chesney (D-Ill.) found a “suggestion category.”

Plum comment came from Vice President Alben W. Barkley, who said: “I don’t know if Andy is married or not. All I know is I am certain I am.”

**RCBS**

**Renews Opposition to Foreign Frequency Inroads Attempts**

RENEWED OPPPOSITION to foreign attempts to make inroads into U. S. channel rights was voiced by the Clear Channel Broadcasting Service in a regular meeting last Monday in Cincinnati.

Most of the meeting was devoted to the NARBA conference at Montreal last fall, the forthcoming U. S. Cuba sessions and subsequent resumption of the full NARBA conference on or after April 1.

The group endorsed the action taken by its representatives at the Montreal phases of the NARBA conference, which were: CBS Director Ward Quaal; Louis G. Caldwell, CBS attorney; John H. DeWitt Jr., of WSM Nashville, chairman of the CBS engineering firm; and G. F. Leydorff of WJR Detroit.

Officials said their opposition to Cuban or other intrusions on U. S. broadcasting rights was based not only on the harm such inroads would cause to clear channel stations but also on the damage that would be done to regions.

Director Quaal’s report to the Clear Channel conference included comments from some 10 farm organizations at the state, regional or national level in support of clear channels.

**NCFC Backs Stand**

These included the National Council of Farmer Cooperatives, which in its annual meeting in Chicago on Jan. 13 went on record for maintenance of the clear and for higher power to extend the rural service of clear-channel stations.

The resolution also put the farm group on record for a “firm stand against the attempted inroads of foreign nations” on U. S. channel rights.

The farmer council contended the economy of the rural people depend on a large extent upon clear-channel stations for their radio service” and that “such service should be protected and improved.”

This is “even more true,” the resolution continued, “since television will not reach many rural areas “for an indefinite period.”

The resolution continued:

Therefore, the Council requests that no action be taken by Congress or the FCC which will allow the breaking down of “clear channels” serving rural areas. On the contrary, it urges that such clear-channel stations be granted sufficient facilities to serve farm communities and rural areas. As a superior radio service available to all metropolitan areas.

Other resolutions of the U. S. has been a party to an international radio frequency allocation conference with other American nations. During that conference, the Council vigorously protested the demands of the Cuban Government for broadcasting rights on channels which are so essential to the people of the U. S. and Canada; and the Canadian Government radio stations.

**WRNL Richmond, Va., inaugurates new daily show prepared especially for information and entertainment of listeners in rural areas.**

Program, The Virginia Farm Show, heard Mon.-Sat., 12:45-1 p.m.

Mr. N. P. McEvoy
Cunningham and Walsh, Inc.
New York, N.Y.

Dear Max: We consider you to be an incomparable partner and friend, and we feel a great need to express our appreciation for your part in the recent success of the program. We believe that the program is the best in the business, and we want to make sure that our friends are aware of it.

Yours truly,

RADIO, TV's EFFECT
Lies in Simplicity—Moran

SIMPPLICITY is the keynote of effective radio and TV commercials, according to Joseph A. Moran, vice president and associate director of radio and television for Young & Rubicam. Addressing the Radio Executive Club of Boston, meeting at the Hotel Touraine, Jan. 11, Moran advised advertising men to recall some of the lessons learned in the early days of radio. Once these, he said was "commercials should cover only one specific point about a product and only such subordinate ones as serve to build or emphasize it."

If an effective sales job can be done in two minutes on a half-hour show — do it, he advised. The same points which determine good radio copy also apply to TV commercials, he said, adding that whether TV commercials should be live or film can easily be determined by the product, all things being equal such as expenditures. He further pointed out, since last day television commercials are "too devious."

Elected unanimously to serve as

COLORADO FIRE
Radio Beams Forest Fight

FOREST FIRE which swept uncontrolled near Colorado Springs last Tuesday enabled Colorado's radio outfit to perform a unique public service. Stations were in instrumental in informing residents of the fire's progress, which at one time threatened the city.

Among the many stations on the scene were three outlets which reported their typical experiences. KFEL Denver staffers were on a 24-hour coverage stint. Newsman WMMW Colorado Springs was within two hours after the fire was declared out of hand. He was relieved later by Newsmen Dick McDaniel and Duncan Ross in a mobile unit. Telephone checks periodically sent to the station were edited and compiled into regular newscasts and into Mutual News.

KFEL's News Director Jack Fitzpatrick and Night Editor Bob Erickson.

News staff of KOA Denver also employed a mobile unit airine nine complete broadcasts in a 22-hour period, in the wake of which a feed to the full NBC network where a description of the fire was used on Morgan Beattie's News of the World, 7:15 newscast.

By sign-off midnight, KVOR Colorado Springs closed the book on a day-long broadcast that had started about 4:40 in the morning. KVOR had two mobile units covering the day and fire lookout facilities were set atop the Exchange National Bank Bldg., where activities could be seen. Station aided county sheriff's office, state conservation patrol by providing fire department information, and reported it was credited by local authorities with being a major factor in bringing fire under control.

WCOP Claims Beat

WHEN Brink's Inc., armored car firm, suffered the loss of over a million dollars in last Thursday's Boston holdup, WCOP Boston claimed it landed first exclusive interviews with the victims. News Director Ron Cochran being on that town, the WCOP Program Director Gene King handled the tape recording of the interviews which were aired on four morning newscasts. WCOP also says it will continue on the report of the holdup and aired the story coast to coast over ABC on the 11 o'clock newscast the night of the robbery.

Additional members on the REC board of directors were Harold E. Fellows, WEEI Boston; Gerald Harrison, WMAS Springfield and WLLH Lowell; Paul Provandie, Hoag & Provandie Inc.; Stacy Holmes, Filelen's Sons Co., and Bert Georges Transacent Corp. Craig is in charge, present on the REC and general manager WCOP Bos-

FCC Amendment

TO EXPEDITE FCC procedures, the Commission last week amended Sec. 0.149 of its rules to authorize the Secretary to act upon applications for new noncommercial educational FM stations upon receiving approval of the Bureaus of Law, Engineering and Accounting. Heretofore the Commission itself has ruled on these requests.

STATION-OWNED NEWS SERVICE
Canadian Co-op Plan Augments National Coverage

NEW BRUNSWICK, Canada, has started a news gathering franchise that is radio owned and operated. C. Austin Moore, sales and promotion manager of CFNB Fredericton, says Radio Press Ltd. has emerged from a two-year baptism of news fire, and now is ready to add still other stations in the eastern section of the Dominion.

Stations that originated Radio Press are anchor facilities in a high-

ly-drawn triangle of coverage (CFNB, CKCW Moncton and CBCF Saint John). Since its founding, Radio Press has annexed several additional stations and three newspaper subscribers.

The cooperative association, Mr. Moore points out, was begun to fa-
cilitate, improve and broaden news coverage of a local nature. And, of course, the idea was designed to keep the cost of extensive local news coverage to a minimum.

Since all members are also subscribers to the British United Press, the latter's teletype facilities are utilized as a source of world news and time splits are arranged for the transmission of the local material. BUP in return gets com-

BEER ADS
Good Reaction Reported

BEER advertising has a high rate of acceptance, according to a survey made for United States Brewers' Association, which indicates that 48.7% of those interviewed thought favorably of present beer advertising.

There were 29.4% who had no opinion and only 21.6% made unfavorable comments. Even among prohibitionists, 26% were favorably impressed by the beer advertising they had heard or seen, the survey report said.

"The ratio of almost 2½ to 1 favorable to beer advertising is a tribute to the individual brewers, indicating that, by and large, they have kept their beer advertising in good taste, since the answers to this question must have been influenced quite largely by the local origin of breweries as well as by the industry campaign," the survey report said.

WMMW CITED
Manufacturer Files Suit

WMMW Meriden, Conn., has been named in a suit for $50,000 damages filed by a local manufacturing company which claims that remarks made by a political candi-
date during a campaign speech at the station injured the company's "in name, reputation, business and credit."

The suit was filed by The Charles Parker Co. after WMMW refused a demand by Parker B. Allen, president of the firm, that the station and Joseph N. DePaola, a candidate for mayor, retract a statement by Mr. DePaola. The firm labeled as "absolutely untrue" the DePaola statement that "this old, famous firm is now 90% out of production and is up for sale. How many jobs will disappear? The staggering total of 1,000...

In making the retrac-
tion demand, C. A. Schultz, WMMW presi-
dent, said the controversy was entirely beyond the station's control. Citing the general requirement of the FCC covering the situation, Mr. Schultz said,

"No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any candidate to use its facilities, it shall afford equal opportunity to all other candidates for that office to use such facilities, provided, that such li-

encee shall have no power of cens-
orship over the material broadcast by any such candidate."

ENGINEERS MEET
NAB Plans Repeat Success

Plans already are underway for the AM-FM-TV conference, he said. Questionnaires have been prepared by broadcast engineers and other interested parties to call suggestions on subjects and speakers. Last year, the conference, at which noted radio engineers presented technical papers, was held for the first time ahead of the management conference portion and lasted three days. The same schedule is set for next April, Mr. McNaughten said.

Only Such Meeting

Mr. McNaughten underscored that, as in previous years, the en-
geering conference is the only nation-wide engineering meeting designed solely for and presented by broadcast engineers. He said the attendance year which would reach 1949's figure of 500.

Of additional interest to con-
ferencers, he said, is the last NAB Convention exhibition of transmitters, engineering products and developments. The exhibit, largest of its kind in the world, will be open through the manage-
ment and engineering conference, he said.

KVTT (FM) Opening

OPENING of KVTT (FM) Dallas, non-commercial educational FM outlet, has been announced by Texas Trade School. Dedication ceremonies will be held Thursday (Jan. 26). Owned and operated by Texas Trade School, KVTT is licensed to operate full-time on Channel 306. The station is transmitted on the school campus at 1316 West Commerce in Dallas.

GET IN LINE WITH CHANNEL 9!

WOR-tv, on channel 9, in New York, is one of the most valuable franchises in New York television today.

Why not get in line with such shrewd tv sponsors as Piel Brothers, Petri Wine Co., Flagstaff Foods, United Air Lines, etc., and nail down a period that will give you a lasting and increasingly valuable monopoly on a good time?

There isn’t much time left, so do it today!

Remember — WOR-tv — and only WOR-tv — will bring hundreds of thousands of listeners the famous Brooklyn Dodgers games in New York. That alone makes your time buy double-barreled!

one of America’s
great television stations
DETROITERS have the money now

TEN CONTINUOUS YEARS of full employment for over a million workers have made Detroit America's most prosperous major market. With auto manufacturers planning to EXCEED last year's record production of 6,240,400 cars, the 1950 outlook is exceedingly bright. Looks like another three-billion-dollar year for Detroit's retailers!

WWJ-TV has the audience now

THE 150,000 TV sets now in the Detroit market are concentrated within easy range of WWJ-TV's strong, clear signal. Lion's share of this audience belongs to WWJ-TV, first television station in Michigan . . . two years ahead of Detroit's other two, in TV know-how and programming.

ADVERTISERS are doing the business now

1949 WAS A GOOD YEAR for WWJ-TV advertisers. Naturally, 1950 is proving even bigger. Aggressive advertisers seeking increased sales in this fabulously wealthy market can achieve them through WWJ-TV.
**TV IN SPORTS**

JANUARY the Jan. said iron a amenable investigation. would be amenable to offering financial aid and assistance to the National Collegiate Athletic Assn. for a study of video's effect on sport box office [Broadcasting, Jan. 16].

Ralph Furey, chairman of the Television Committee of the Eastern Collegiate Athletic Conference, said he or some official of the ECAC undoubtedly would ask that the NCAA take advantage of the McConnell offer.

**Facts Needed**

The only way to get the box office facts, Mr. Furey told TELECASTING, is to spend the money required by an adequate national investigation.

The aid of the telecasting industry would be welcomed, in his opinion, in such a nation-wide effort by the NCAA.

It was Mr. Furey, of Columbia U., who caused the NCAA to authorize the setting up of a television committee. That committee, which has yet to be named, is charged with making a thorough investigation of the television problem and with making a report on it to the NCAA executive committee meeting in June.

His recommendation also urged that NCAA members make no telecasting commitments beyond the 1950-51 college year, pending any possible action at the 1951 NCAA convention.

The Furey recommendations were passed unanimously by the NCAA business session which concluded that organization's 44th annual convention Jan. 14 at the Hotel Commodore, N. Y.

The recommendations first were presented the day before at an NCAA round table meeting of the large college and university group at which the topic for discussion was, "Television, and Its Impact on Sports Attendance."

At the latter meeting, Mr. Furey's recommendations were preceded and followed by expressions of opinion from representatives of major colleges. That opinion was mixed, some members believing that television might have hurt attendance, others believing the opposite.

A feature of the meeting was a presentation by Jerry M. Jordan, a student in the graduate school of the U. of Pennsylvania, who made a progress report on an ambitious research study he is conducting on the influence of television on sports attendance.

His study, which is to be completed in April, has thus far shown, subject to change by additional research, that the fear that the telecast of a big college game would hurt small colleges' athletic attendance may be groundless. Mr. Jordan said there is no indication that the telecasting of U. of Pennsylvania games has hurt attendance of the smaller college games in the Philadelphia area.

**Studies Reported**

His studies also indicate, thus far, that the longer television sets are owned by fans, the less likely video receivers will keep them away from the stadium. In fact, he said, once the television novelty has worn off, TV does not hurt attendance and may even increase it.

He conceded, however, that although college football gates turned in remarkable records in the past year, colleges in TV areas have not fared as well as those in non-TV areas.

Mr. McConnell followed Mr. Jordan, and it was then that Mr. McConnell made his offer of aid for study of the television football problem.

He told the university and college athletic executives that until the facts are all in it would not be wise to blame television for gate declines.

Mr. McConnell cited figures to show that perhaps other factors might be involved in a falling gate. He said that last year attendance of intercollegiate football went up 4% while telecasts were on a wide-open basis whereas pro-football attendance was down 9% in spite of efforts to save its gate by generally denying games to the home viewing audience.

**Talent Proposals Made for SAG-TVA Partnership**

**Screen Actors Guild** has sent the Television Authority proposals for a partnership but at the same time gave notice that TVA's proposals to iron out differences between the two organizations are unacceptable. John Dales Jr., SAG executive secretary, said Friday:

TVA wanted to solve the differences between it and SAG by having the SAG and its sister organization, Screen Extras Guild, send a committee from the West Coast to New York or to use mediation machinery. Further, TVA proposed that both partners meet jointly for discussion and action on such matters as strikes [TELECASTING, Jan. 16].

The latter proposal, it was emphasized in the Dales announcement, was one the Screen Guilds could not swallow.

The guild, in a letter to the TVA board, made it clear that it will not agree to any form of joint membership meeting at which film actors could be "forced to strike or be prevented from striking by other actors who do not work in the motion picture field."

Said the guild letter:

"We feel obligated to make it clear that if you are unable to accept this basic principle, further exploration of partnership would appear to be a waste of time."

And on the same point, the letter stated:

"It is a basic principle of the Screen Actors Guild that on all important matters such as calling of strikes and approval of contracts, our entire membership—not just those who may attend a membership meeting—has the democratic right and must be given the utmost opportunity of voting. On important issues the guild polls its entire membership by mail referendum; therefore your proposal of joint meetings with power to call strikes and approve or disapprove contracts is essentially undemocratic as far as the Guild membership is concerned."

Despite the vehemence of the SAG words, it nevertheless told TVA that it believed that negotiations between them should not be broken off.

**Continuation Desired**

SAG then proposed that neither it nor TVA conclude collective bargaining contracts without advising the other during the partnership discussions. It also proposed that negotiations be conducted either by TVA sending a delegation to the West Coast to meet with SAG or by exchanging letters.

Major SAG proposals for the partnership included:

Negotiations by the partners to be conducted jointly and all contracts to be subject to approval of both SAG and TVA. Contract for live and film video to be separate.

TVA will have as its area of responsibility and will take the lead in negotiations and administration in:

1. Live telecasts.
2. Simultaneous kinescope of live telecasts for supplementary coverage.
3. Closed circuit kinescope made in the same manner as a live telecast or designed as a substitute for an existing live telecast.
4. Film inserts which are a subordinate part of a live telecast in which only persons appearing in the live telecast appear.
5. SAG will have as its area of responsibility and will take the lead in negotiations and administration in:
   a. All motion picture films made for exhibition on television other than as specified.
   b. Films made by means of closed circuit Kinescope or allied devices in the motion picture manner, i.e., involving cutting, editing, etc., or designed as a substitute for film.
6. Filmed commercial spot an- (Continued on Telecasting 11)

CBS' NEW YORK STATION COMBINES

NETWORK AND LOCAL OPERATIONS

first aid course and other wartime series. On June 1, 1942, to conserve scarce tubes and manpower, WCWB cut its schedule from 15 to four hours a week, all films.

Live programming, resumed in May 1944 and gradually accelerated toward today's full-scale operation, continued the prewar experiments in TV presentation of all types of programs, from dance to drama, quizzes to commentaries, fashions to sports. In June 1945, WCWB made its facilities available to advertisers on a "working partnership" basis for testing, developing and broadcasting commercial TV programs. On Nov. 1, 1946, when the station changed to its present call, WCBS-TV, it began full commercial operation charging clients for time as well as for program expenses. WCBS-TV now operates on Channel 2 (54-62 mc) with 6.8 kw aural, 13.7 kw visual.

TODAY, WCBS-TV broadcasts something over 50 hours of program service a week, running from midafternoon until after 11 p.m. Analysis of a typical recent week's operations shows a total of 53 hours of program time, divided into 39 hours and 14 minutes of network service and 13 hours and 35 minutes of local programming. Time devoted to various types of programs breaks down as follows:

<table>
<thead>
<tr>
<th>Type</th>
<th>Hrs. &amp; Min.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Films</td>
<td>11:00</td>
</tr>
<tr>
<td>Musical Shows</td>

<td><strong>39:25</strong></td>
<td><strong>53:00</strong></td>
</tr>
</tbody>
</table>

The division between local and...
network time is anything but equal, however. Nearly seven-eighths of the sponsored time on WCBS-TV is used by network programs (65%) and network shows account for almost as much (84%) of the station's sustaining hours. Only in participating shows do local programs get more time hours (59%) than network shows.

The emphasis on network programming is no accident. J. L. Van Volkenburg, newly appointed CBS vice president in charge of network sales (AM and TV alike) and formerly director of all CBS TV operations, told Broadcasting: "For the past few years, as TV stations were first appearing in many cities and as facilities for connecting them into networks were being developed, we of CBS television have operated on the theory that our first responsibility was to direct our main efforts to programming of a type that not only was good local broadcasting but that would provide programming for our affiliates as well.

"This phase is now coming to an end," Mr. Van Volkenburg stated. "We expect in the not too distant future to adopt for TV the pattern which has been so successful in AM and to set up a local operation for WCBS-TV distinct from that of the CBS-TV network, comparable to the autonomous operation of WCBS, New York key station of the Columbia radio network."

CBS TV technical facilities in New York, without trying to separate what is network, what station, comprise a transmitting plant atop the Chrysler Bldg., main studios (five) across the street in the Grand Central Terminal Bldg., four more in Liederkranz Hall and three theatres. With rehearsal halls, staff offices, carpenter, painting and maintenance shops, storage space, etc., the facilities occupy some 200,000 square feet (4.6 acres) of floor space, roughly one-third of the entire CBS New York operation.

These TV technical facilities include:

9 Live talent studios.
2 Telecine studios.
6 Announce studios (audio).
7 Rehearsal halls (in addition, AM studios are sometimes used for this purpose).
34 Camera chains (representing an investment of approximately $510,000).
7 Film camera chains (five at Grand Central, two at Liederkranz).
12 Projectors (three 35mm, five 16mm, and four Teloptican projectors). (Investment—$72,000).
3 Type 5820 image orthicon tubes in cameras, plus 34 spares. (Investment—$56,400).
7 Iconoscope tubes in cameras, plus seven spares.
6000 Electron tubes in the overall audio-video and video sync, plus CBS TV.
135 Video isolation amplifiers (sections of distribution amplifiers) over 100 of which are located in TV Master Control at Grand Central.
125 Microphones, including unidirectional, bi-directional and non-directional types.
170 Regulated video equipment

power supply units, 110 of which are located at Master Control.
90 Video monitors, 50 of which are located at the Grand Central Studios. 11 Video (camera) control consoles. 12 Audio control consoles.
12 Program and switching consoles. 700 Video selector relays at Master Control.
170 Camera lenses (Investment on this item in excess of $50,000).
83 Rack of audio and terminal audio-video equipment, 47 of which are located at Master Control.
11 Sync. generators.
3 Radio relay equipments.
205 Fluorescent light fixtures.
665 Incandescent light fixtures.
660,000 ft. of scenery and backdrops plus 1,500 bulk pieces of scenery and props.
At least $50,000 worth of test and measuring equipment.

The CBS video operation in New York requires the services of some 580 employees, including 175 technicians, cameramen, etc.; 78 program personnel; 126 engaged in executive, production, sales and general operations; 120 in building, theatre and shop operations.

* * *

Unlike NBC, which has segregated its video operations into an autonomous division, CBS maintains a close integration of AM and TV at the top executive level. Frank Stanton, CBS president; Adrian Murphy, vice president and general executive; Hubbell Robinson Jr., vice president in charge of network programs; J. L. Van Volkenburg, vice president in charge of network sales; Frank Falknor, vice president in charge of program operations; William B. Lodge, vice president in charge of general engineering, are all responsible for TV as well as radio. Edmund Chester, director of news, and Red Barber, director of sports, also supervise video as well as audio coverage of those fields.

CBS executives concerned with only TV include: David Sutton, TV sales manager; Worthington Miner, manager of TV program development; Richard Redmond, director of general TV operations; Paul Whiting, manager of TV technical operations; Arthur Duram, TV sales promotion manager; Robert Wood, TV traffic manager; John DeMott, TV production manager.

Concentration on network programming has given CBS-TV and WCBS-TV a number of video's top shows, such as Arthur Godfrey's

WITH the WCBS-TV operation so closely aligned with that of the network, the combined studio facilities of both are constantly kept busy.

TOP PHOTO—Lilli Palmer and Frederic March rehearse a lively scene for Ford Theatre as Miss Palmer's husband, Rex Harrison, observes from the sidelines.

By JANE PINKERTON

FIRST IN TELEVISION' is no idle claim of the Admiral Corp., Chicago, for it was one of the first major TV manufacturers to underwrite the struggling infant of the entertainment industry. Realizing TV costs trends toward either fast or slowly with support, Admiral officials have plowed some $1,700,000 into quality TV fare since 1946. This definitely places it among the top television investors.

In 1949 alone, Admiral spent about $500,000 on video shows—$350,000 on Stop the Music and $120,000 on Lights Out. Continued subsidy of TV has paid off handsomely, for the firm which few, even in television, had heard of before 1948. Admiral has reaped public and industry prestige, national good will and—consulting to stockholders—an impressive and astounding sales return.

Admiral, which claims growth from $2d to first place in the electronics industry in 15 years, grossed $112 million last year; $2 million more than expected six months ago. Between 65 and 70% of this return will be from the sale of television sets. One receiver comes off its production line (reportedly the longest single one in the industry) every 10 seconds.

President andFounder Ross D. Siragusa is no mere guiding spirit behind the firm which he started in 1934 with $3,400. He's an all-too-real protagonist in a highly competitive field, and is known by reputation, if not personally, for his uncanny ability to sense production and consumer trends before straws in the wind are blown on his desk. Other manufacturers attribute his firm's phenomenal growth to the 45-year-old Mr. Siragusa's seventh sense in calling the shots. His mass production techniques on radio ("Build up a large volume by giving good quality at the lowest possible prices") were transferred to television. Although Admiral didn't start its production of TV sets until February 1948, it is now considered one of the nation's top three manufacturers.

Its sudden and flamboyant entry was precluded by a cautious testing campaign which cost the firm $1 million for surveys and equipment. In this period, Mr. Siragusa found the know-how of applying his mass production and pricing policies to the manufacture of video receivers.

Even earlier, his faith in the potentials of television and in the necessity of its subsidy by manufacturers encouraged co-sponsorship of an afternoon variety show on WBKB (TV) Chicago in 1946. Other Chicago set-makers picked up part of the tab in order to have programming available to retailers attempting to sell the "mystery medium" in their showrooms.

Mr. Siragusa's insistence on strictly family consumption for all TV shows has at times complicated programming. Sponsoring the Admiral Movie Theatre of the Air on WBKB, he ordered his special representative to screen carefully all motion picture reissues for suggestiveness and sophistication. Reissues in those days, even the good ones, were often unviewable. Each was inevitably a cloak-and-dagger epic laden with brute romanticism and at least one merry chase through a canyon. After about 20 hours of auditions, one film was usually found suitable to the video screen and Franklyn MacCormack's homespun commentary.

Admiral concentrated its TV sponsorship in Chicago for more than a year, building prestige and establishing a brand name in its home territory. From 1948 into early 1949 it sponsored shows spasmodically on WBKB, with sporting events the most popular.

Always aiming at "firsts," Admiral telecast for the first time Notre Dame home football games in the fall of 1948 via microwave relay from South Bend, Ind., as a feed to the Midwestern network. This is believed to be the first network sporting event, and the four-game series cost the company about $30,000.

The first telecast of a world championship professional football game was sponsored by Admiral also, showing brilliant plays of the Chicago Cardinals and Philadelphia Eagles. This cost $10,000.

CATCHY Admiral commercial is previewed before a Lights Out performance at NBC New York by (t o r) Norman Nash, copy coordinator at the Kudner Agency; Sid Smith, announcer who takes the role of an Admiral dealer; Edwin J. Sherwood, Admiral's television promotion manager, and Peter Finney, Kudner account executive.

And, because the Cardinals had a good season and were packing in loyal Chicagans, Admiral went to Detroit for their game with the Lions, bringing it back to Cardinals home territory.

Chicago-area enthusiasm for these events and the resultant product sales convinced Admiral strategists that the East Coast should be penetrated. Buying an NBC four-station hookup (Washington, New York, Philadelphia, Baltimore), the company put Henry Morgan on television for the first time. The show lasted four weeks, and cost about $10,000.

By this time Admiral had discovered a TV axiom—Everyone likes a snappy variety show. With this in mind, plus an eternal goal of getting quality production to entertain all members of the family, Admiral developed a format for Welcome Aboard. Stressing a natural Admiral and boat theme, the NBC-TV show starred Orchestra Leader Russ Morgan with lively variety acts.

Three of the six weekly shows on the eastern network were headlined by Comedy Hour (Fay and Dick Lewis, making their television debut. The Welcome Aboard format, still unjumbled and incomplete in the minds of firm and Kudner Agency personnel, led to the popular Admiral Broadway Revue, which took the air in January 1949.

Comedian Sid Caesar, who has drawn SRO crowds in movie, personal and TV appearances, started in original musicals woven together with standard Broadway techniques. His humor was foiled and implemented by Mary Martin and Imogene Coca of the regular cast in elaborate plays produced by Max Leibman.

Broadway Revue was the first regular television show to originate before an audience in a theatre (the International on New York's Columbus Circle), and the first to maintain its own stock company with a crew of technicians and administrators. It was telecast on the 14-station East and Midwest cable network after the juncture in January, and in 15 cities by kinescope.

Although it was a vastly expensive production (more than $25,000 weekly), Admiral hoped to keep the show on the air because of its popularity (second only to Milton
ADMIRAL shows, running the gamut from comedy to drama:

Left Photo—BERT PARKS in Stop the Music Thursday nights. Firm's half-hour television segment features the Admiral theme song, "Top of the Evening," with a quintet of singers dressed as admirals or other naval officers. After the first telecast last May, Mr. Parks received 40,000 cards in one week from persons interested in being called during the program.

Center—ELABORATE props characterized a recent presentation of Edgar Allan Poe's "Fall of the House of Usher" on Lights Out. A stage director cues Movie Actor Helmut Dantine (center), during a suspenseful scene. "Name" stars are seldom used on the NBC package, scripts for which are adaptations of former AM Lights Out stories or those in the public domain.

Right—LIFE GUARD's rescue by a modest damsel was enacted in pantomime by Comics Sid Caesar and Imogene Coca when they starred on the Admiral Broadway Revue. The show was first telecast last January, and cost the firm an estimated $900,000 before it went off the air late last spring.

Becile). The time slot was kept open during the hiatus last summer with sponsorship of Hopalong Cassidy. Before the fall season, however, Broadway Revue was dropped because of "astronomical" costs—about $1 million. This total more than doubled original budget estimates, according to Advertising Manager Seymour Mintz.

Soaring Broadway Revue costs established procedure and thinking which have since been followed by the firm in its television advertising. Because costs on any non-package show on TV can skyrocket out of all relationship to money budgeted in advance, Admiral has found the best answer to be purchase of an entire show, including talent, production and scripts, in one unit.

This is the operating theory of Mr. Mintz, who believes the fixed cost, plus specific time charges, adds up to an inflexible total. A package show relieves the company and Kudner of production headaches also. Both of Admiral's current telecasts—Lights Out on NBC-TV and Stop the Music on ABC-TV—are successful results of this theory.

EDWIN J. Sherwood, Admiral's television promotion manager, agrees "the only way to avoid trouble in television programming is to insist on a high-quality package show. Then all we have to do is ride herd on it."

Mr. Sherwood has been coordinator between Admiral and Kudner for a year. Before then, while working on the Admiral account at Cruttenden & Eger, he directed the firm's TV interests for one year. He is a former Army public relations officer on Gen. Dwight Eisenhower's Supreme Headquarters staff in Europe. Mr. Sherwood works with 80 Admiral distributors in planning and producing local shows, develops all local commercials and coordinates all national commercials.

Between 60 and 70% of commercials on Lights Out and Stop the Music are sold for television sets. Although "good entertainment will sell anything, including TV sets in TV homes," the ratio of return is going down, Mr. Sherwood realizes. Number of viewers per set is down considerably since last year, and is reaching the average number of persons in a family.

Lights Out, an NBC package, originates in NBC's 100th St. Studio in New York, but without an audience. Shows used, supernatural and psychological fantasies, are adaptations of Arch Oboler's radio scripts for the original AM Lights Out series on NBC or of stories in the public domain.

GIMMICKS, trick shots and suspenseful action are typical of each show, with four cameras making such a variety possible. Unusual format is strengthened by use of only front and end commercials, and the uninterpreted dramatic story has brought bushels of fan mail from grateful viewers.

Jack LaRue, movie and stage star, is host each week, setting the romantic mood of the show. Some of the gimmicks used the first couple of weeks included a telephone drifting upward and out of sight (by means of an invisible piano wire), people walking through a wall (complex dissolve), candle flame fading slowly on "Lights Out" call (prop man beneath a table pulling the wick down as a film clip of a dwindling flame is superimposed) and a vibrating dagger (wire again).

Telecast Monday, 8-8:30 p.m. CST, the show is produced and directed by NBC's Kingman Moore, who has had Broadway and Hollywood experience. He works with Mr. Sherwood and Peter Finney, Kudner account executive.

The same products are advertised weekly, with Announcer Sid Smith acting as the "Admiral dealer." Products are a 16-inch TV set, radio-phono-TV combination, table model radios, Dual-Temp refrigerator and "Flexo-Heat" electric range. Mr. Smith, who was also seen as the "Admiral dealer" on Broadway Revue, gets many product inquiries in fan mail.

Unusual sound and musical effects include a haunting combination of violin and organ playing the Admiral theme song, "Top of the Evening." This was sung and played on each Broadway Revue, and is owned by the firm. Special offers are created also by a theremin, a musical instrument akin to a plaintive human voice which has been used in several Alfred Hitchcock psychological horror films.

"Top of the Evening" also is the opening theme on Stop the Music, telecast on Thursday, 7-8 p.m. CST. Admiral sponsors the 7:30 to 8 p.m. portion. The song is sung by a quintet of three men and two women dressed as admirals or other naval officers. Another trademark is a yachting cap, worn by Bert Smith.

FROM S2d to first place in the electronics industry in 15 years is the growth of Admiral Corp., whose growth has been directed by Founder-President Ross D. Siragusa. Only 43 years old, Mr. Siragusa started with an investment of $3,400 in 1934. In 1949 the firm grossed $112 million.

Parks at each show opening. This was used also by Sid Caesar in Broadway Revue.

Stop the Music is a package of Louis B. Cowan. Its action is recorded by three cameras, five for special production numbers. Sid Smith, again as the Admiral dealer, appears in semi-dramatic commercials promoting all products. Mr. Parks broadcasts from the Ritz Theatre in New York. Ralph Warren is TV director, and the entire production is supervised by Alfred L. Hollander. The Cowan organization produces the package in association with Mark Goodson.

The cost of the two shows is shared by 80 distributors and 20,000 dealers. Admiral, however, pays the bulk of the expense. It also ships in on local TV programs planned by distributors.

THE 1950 budget is following the TV pattern of '48 and '49. "We'll think about changing sponsorships only when the public starts complaining. So far they, and we, are happy," Mr. Mintz said.

This year the new 22-receiver TV line is being advertised. Admiral, again keeping its long line to all price classes of consumers, introduced its 1950 models at a distributors convention in Chicago's Drake Hotel Jan. 5-7. The current line ranges in price from $175 to about $800, enough variety to adapt to any purse or taste.

More than 95% of Admiral's TV production is centered in its Chicago plant on the city's West side. A few models are made in nearby Harvard. Three thousand of the firm's 5,000 employees in Chicago work fulltime on the TV production line, a single unit about a block and a half long. Thirteen other plants are scattered throughout the country for manufacture of other appliances.

Admiral also foresaw the '50 future when promoting its last year's models to distributors with the motto "It's a gold mine, the Admiral line for '49." Admiral's gold mine, self-discovered and continuing, is beginning to hit dirt for the firm which pioneered heavy investments in both TV programming and equipment.
### Telestatus

**Milwaukee Televiewers’ Habits Studied**

(Report 95)

**Milwaukee Televiewers rank Texas Star Theatre as their favorite show, TV an average of 3.61 hours per home each Sunday after 6 p.m. and can identify Lipton Tea as Arthur Godfrey’s sponsor 97% of the time.**

These facts are revealed in the second study of viewing habits among TV homes in the coverage area of WXMi-TV by the Milwaukee Journal which owns the station. It is the only TV station in Milwaukee and in Wisconsin.

The survey was taken the week of Nov. 27 to Dec. 3 when TV sets in the area totaled above 56,000, more than double the number in use at the time of the first study in August. Fifty-three per cent of the questionnaires mailed to TV homes were returned on the second inquiry, as contrasted with 36.5% for the first study.

Sets-in-use rate as high as 98.7% on Sunday after 6 p.m. The five-day evening and Saturday average is 97.8% and 94.6%. Before 6 p.m., 76.1% of the sets are tuned in during the week; 86.5% on Saturday and 88.5% on Sunday. Number of hours of use also increases in the evening hours and on weekends. Before 6 p.m., the five-day average is 1.91 hours, with 2.26 for Saturday and 2.97 for Sunday. After 6 p.m., the respective totals are 3.55, 3.43 and 3.61.

**WKZO-TV Studies**

**Area Set Installations**

FOLLOWING an extensive survey of the area proposed to be covered by WKZO-TV Kalamazoo, Mich., the station reports there are now 45,000 TV sets in use. In the immediate Kalamazoo-Battle Creek area, 5,169 sets are reported in use although the station has not as yet started operating.

In commenting on this high degree of set penetration, John E. Fetzer, president and general manager of Fetzer Broadcasting Co., WKZO-TV permittee and WKZO Kalamazoo licensee, explained that “this is a critical cover area and set penetration is as high as 97% in the immediate Kalamazoo-Battle Creek area, 5,169 sets are reported in use although the station has not as yet started operating.

Mr. Fetzer also pointed out that many of these sets have been installed under operating conditions which give receipt only two or three days a week. When WKZO-TV starts operating he expects the tempo of set installations to increase.

As a result of the current survey, which included interviews with scores of dealers and distributors in the area plus an extensive campaign of counting TV antennas to verify the findings, WKZO-TV report the following set installations in the primary cities to be covered:

- Kalamazoo-Battle Creek: 5,169
- Grand Rapids: 3,675
- Lansing-Jackson: 6,492
- St. Joseph-Suttons Bay: 3,757
- South Bend-Kenosha: 8,466

**KKTV (TV) Los Angeles To Increase Rates**

REPRESENTING an increase of 50%, KKTV (TV) Los Angeles hourly rate for Class A time will be increased from $300 to $450 effective Feb. 1. Class B time will go from $200 to $450 per hour.

Increase was announced by Frank G. King, sales manager, who stated that the station will give a six-week period of protection to advertisers who place business before the effective date. He pointed out that TV set ownership in the area serviced by KKTV has increased over 40% since the station started telecasting a year ago.

Other time segments on a one-time basis in class A and B times, respectively, under the rate increase are as follows: 40 minutes, $600 and $350; 30 minutes, $450 and $270; 20 minutes, $375 and $225; 15 minutes, $300 and $180; 10 minutes, $250 and $150; 5 minutes, $210 and $110.

Station breaks and service announcements on sound film will be: Class A, $112.50; Class B, $67.50. Minute announcements on sound film will be: Class A, $150; Class B, $90.

BASKETBALL IS BACK!

Again it is the season of hook shots, rebounds, free throws and five-man-weaves . . . and televiewers in America’s “hottest Television market” are treated to a full schedule of court thrills over WMAR-TV. Thursday home games of Baltimore’s Professionals, the Bullets, and Saturday home games of the U.S. Naval Academy’s cagers in historic Dahlgren Hall are regular features of WMAR-TV’s winter season.

Whatever the season, its sports are knitted into a schedule of such year-rounders as wrestling and boxing in a constant menu of thrills for action-loving televiewers of WMARyland . . . and WMARyland reaches from Pennsylvania to the Potomac, from Wilmington to Washington and beyond. It’s the area where Television has made its fastest strides.

Baltimoreans bought 11,250 TV receivers in December, bringing the city area’s total to 123,767 for New Year’s Day. Nowhere in the United States has Television captured as great a slice of the broadcast audience as here. The Hoopers tell our story . . . let us tell yours.

Baltimore Leads The Nation—WMAR-TV Leads In Baltimore

TELEVISION AFFILIATE OF THE COLUMBIA BROADCASTING SYSTEM
POSSIBILITY that a Federal suit under the anti-trust laws may arise out of the present FCC hearings on color television was advanced Thursday by FCC Commissioner Robert F. Jones in an address to the New York Chapter of American Marketing Assn.

Speaking at an AMA luncheon session at New York's Hotel Commodore, Comr. Jones noted that although the Radio Mfrs. Assn. had produced a series of about 30 telegrams during the field hearings, nothing was conducted before any color system is adopted, only the advocates of the systems presented to the Commission—RCA, CBS and Color Television—have made any move to conduct such tests.

"It's strange to me," he declared, "that some of these manufacturers who have made phenomenal profits from black-and-white television have spent little or nothing on color research of their own or in field testing the systems proposed by others. Instead of offering us the results of field tests, we are offered new forms of advisory committees—committees which are but part of a general scheme which frequently reminds me of the interlocking directorates of the public utilities used in the heyday of that industry." He continued:

"No matter where the Commission turns to get help to solve its engineering problems, the same large industry interests are represented in one form or another. These industry advisory committees could serve a wonderful function if they did the job they purport to do. But I am afraid that frequently the record establishes not the advancement of the art but the delay or even the suppression of the art."

I need not remind you that the Justice Dept. has taken steps to use the anti-trust laws where it appeared that an art was being suppressed for the advancement of private interests and to the prejudice of the interests of the American people. Concerted action by these industry groups to delimit the industry interests represented in one form or another may fill the bill. The purpose of the color television might well lead to the same type of action.

No Action Yet

Questioned after the address, Comr. Jones said that no such action has been proposed as yet. He explained that he could not originate such action single-handed and that the other Commissioners would have to join him if the FCC were to ask the Justice Dept. to proceed against the television manufacturing industry.

"I'm not recommending it at this time," he said, "but it could happen."

Reviewing the development of broadcasting in the United States, Comr. Jones told his audience of market researchers that the difference between their conception and that of the Commission is: "You want to reach the masses of men by radio to do a merchandising job; the Commission wants you to vouchsafe to men everywhere radio signals that will be satisfactory and reliable for their education, enjoyment and culture."

He pointed out that the business man's "conception of how private enterprise could use radio for the greatest net return shaped the early history of radio," with the result that "the largest facilities, the clear channels . . . were constructed in cities like New York, Chicago, Pittsburgh, Philadelphia, Detroit and Cincinnati" while "the wide areas in the middle of the U.S. had relatively little or no service."

Sales Potential

Telling his listeners that "Channels in the Sky are to you vehicles of trade and commerce to sell, not as sales potential for the least cost," Comr. Jones noted that "the more 'channels in the sky' you can capture in concentrated population areas, the more avenues are open to you to sell. It is not, therefore, surprising that FM broadcasting does not have the same appeal to private enterprise that it has had to the Commission."

He painted a picture of static-free service for everybody, with full range 15,000-cycle transmission, offered by FM, which attracted more than a thousand licensees to channels which "the Commission carefully allocated to metropolitan, urban and rural areas, with limits on power to insure that every American would have a choice of listening pleasure."

He continued: "The major figures in the industry, particularly the networks, proposed the Commission they would utilize the full capabilities of this wonder of sound."

He said:

The truth is, however, that no network programs are sent over the telephone because they have a greater sound fidelity than just plain old AM broadcasting. Even if it were true that affiliates were not interested in colored radio, the network itself owed the duty of trying to get their own stations in distant cities with 15,000-cycle high fidelity connections.

Some of the government executive who are preaching the amazing promise of FM to the public have failed and become radio executives and practitioners of law and engineering.

The real test will come yesterday, as today's leaders of the radio industry, seemingly have lost the desire to bring to the people the utopia of broadcasting and listening potential.

Not only that, 200 FM licensees have been granted and factories are on the move for their licenses back to the Commission. Although many people wait for reliable radio service, not less is shed by the radio industry, its new or old executives, its new or old practitioners, or by those who use radio to advertise their wares.

Shaky Start

Television, with the same potential and promise, is getting off to a shaky start, Comr. Jones said. Knowing from the beginning that VHF could not provide a nation-wide competitive TV service, the FCC recognized that without the VHF, private enterprise would not have enough funds to launch the VHF. Yet it passed laws to prevent the industry from engaging in VHF. And when the industry did attempt it, it was thwarted or delayed in AM as a result of non-regulation and was happening in television with regulation. The stations are going on air to where the dollar is located."

In conclusion, Comr. Jones said:

When private enterprise seeks out the most profitable market for the installation of FM, those areas and regions in highly congested areas I find no fault with such action. That is the kind of enterprise I have defended all my public and private life. But when private industry attempts to use government processes to accomplish this without the legislation and if I think it attempts to use the Commission to eliminate the forces of competition between established black-and-white and in- fant color, I draw the line. Likewise when the industry tried to use the Commission to thwart or delay reliable television service for towns like Lima, O., that calls for some polls and some infelid action.

NEW weekly series, Burgess' Hobby Parade, started on WGN-TV Chicago Tuesday 6:30 p.m.
EVIDENCE that television has come into its legislative own in Congress was amply demonstrated when President Truman delivered his State of the Union message to a packed house and perching orioles, against a backdrop of TV-suited walls.

Once again, as last year, televiewers saw the President in a theatrical action through NBC-TV's pickup under a pool arrangement. But this time, they got better reception — Congressional chambers had undergone some renovation which took out of script TV's own peculiar requirements.

When David Lynn, capital architect, set out on his remodeling program, he consulted with telecasters and came up with the idea of blue-tapedried, acoustically-treated walls which lend themselves best as background. High-powered floodlights also were installed in the chambers.

NBC-TV technical personnel described it as the best pickup yet of floor proceedings, even though the floodlights were too powerful for panning the galleries. They used two cameras (in the galleries) running conduits up to the attic where the equipment was stationed.

When the renovation is completed this summer, they will be able to feed transmission through wall sockets beside each House or Senate chamber, thus locating their mobile units on the spot. Similar permanent provisions are being made at the White House, also under renovation, where every room of any size will be so equipped, it was learned.

KTLA (TV) Multiscope

INSTALLOPMENT of multiscope equipment, claimed to be the first on the West Coast, has been announced by KTLA (TV) Los Angeles. New equipment makes possible simultaneous projection of title cards, news pictures, news ticker tape, maps, time signals and other elements on the television screen. This is accomplished by a contrivance of lenses, tubes and "cold" lights which project images directly upon the multiscope of the television camera. Through a series of apertures and levers, an operator may thus achieve almost any result desired in multiple picture projection.

Bonafide Renewals

BONAFIDE MILLS, Inc. has renewed, effective Jan. 27, its sponsorship of Bonny Maid Versatile Varieties, telecast Friday, 9-9:30 p.m., on NBC-TV. The one-year contract was signed through Gilbraltar Advertising Agency. Show is produced by Basch Radio and Television Productions, New York.

Tele-Pulse Surveys

SAMPLE size of Tele-Pulse surveys has increased by 14% in all cities. Dr. Sydney Roslow, director of The Pulse Inquiring, has announced. Number of TV families interviewed has risen from 1,400 to 1,600 in New York and in other markets from 1,050 to 1,200.

Eight Million Sets

PREDICTION of more than 82 million in television set sales during 1950 and of more than eight million sets in operation by the end of the year was made four months ago by Louis I. Pokras, chairman of the board of Tele King Corp., New York set manufacturer.
PHONEVISION HIT

E. F. McDonald Jr., president of Zenith Radio Corp., is performing a public service by advocating Phonevision, according to George B. Storer, president of the Port Industry stations. He stated his views in a letter to Comdr. McDonald.

"Periodically I receive a communication from you which indicates that you are mas- terminding the radio industry," Mr. Storer wrote. He recalled that Comdr. McDonald originally was "a great protagonist for the development of FM."

"While we all endorse the advantages of FM from a technical standpoint," Mr. Storer continued, "practically it came too late and has cost our industry vast sums of money, even forcing some broadcasters to sell or reorganize their enterprises.

"Now you come along with an at- tack upon the development of tele- vision and are performing a very great disservice to the American public by again confusing the issue. Only last week I heard of a gentleman who was not buying a television set because he had read some of the 'phonevision' publicity which made him think he would have to pay for the programs received on his television set.

"For your information television is enjoying a healthy growth and in two of our three stations we are currently earning a very modest profit, and anticipating substantially greater earning potential.

"Apparently your idea is that people should not go into television because it is going to cost too much money.

"The development of this great country was solely accomplished by fearless pioneers in all fields and the propagation of the idea that we should not go into television because of its high ultimate cost is utterly fallacious.

"If inexpensive entertainment and educational service through investment in television can be sup- plied to the American public, with the hope of ultimate profit, then such action is the obligation of every good broadcaster and manu- facturer.

"I am reliably informed that the main source of earnings for your good company, which certainly occupies a most outstanding position in the radio manufacturing industry, is currently derived from the manu- facture and sale of television sets. Therefore, it would seem that you are harming the very industry which is currently supporting you."

baseball games on television rather than hear the games or read about them.

Asked what they liked best to do if they couldn't get out to the park, the men answered—watch television, 22%; listen to radio reports, 22.8%; and read news accounts, 4.3%. Less than 1% listed on the questionaire, which was circulated by the researchers department of O'Reilly, Dotty & Sommer, Chicago public relations firm.

The barbers' customers preferred the following radio sportscasters: Bert Wilson, Bob Elson, Bill Stern and Joe Boland. Local TV favorites were Jack Brickhouse, Pat Flannigan, Hal Totten and Joe Wilson.

**Program Costs**

White Urges Budget Cuts

**SMALLER - BUDGETED programs for television were urged by Henry White, president of World Video, New York and vice president of Independent Television Producers Assn., that city, speaking last Tuesday before a regular monthly meeting of Television Producers Assn., in Los Angeles.**

"If television is to survive," Mr. White said, "programs on the $2,000 to $3,000 per show level will have to be considered. Most advertisers cannot afford to pay the $15,000 or more required now for a top flight show."

At a meeting following the speech, TPA membership unanimously passed a resolution to form a National Society of Television Producers with Independent Television Producers of New York, in accordance with principles of resolution forwarded by the New York group.

**RETAILING TIME BUYERS place 92% of the network dollar... and 87% of the national spot dollar.**

BROADCASTING time buyers
PLANS to produce motion picture films for television for national syndication were announced last week by Don Lee Television, Hollywood. William Dieterle, movie producer-director, was named to head up the production operation. Deal followed 90 days of secret negotiations, according to Charles L. Glett, vice president in charge of network television.

Production Plans

Plans include production of half-hour films based on the book Secrets of Secret Service by Capt. Don Willie and other stories by him and his father, the late John Willie, and McMillan Johnson, producer-director. All were formerly associated with David O. Selznick. Films will be released for national syndication by Blair TV Inc.

According to Willet H. Brown, president of Don Lee network, and Mr. Glett, the new enterprise is "only one step" in the projected plans of the network. Under Mr. Glett, who joined the network eight months ago, production operation was moved from Mt. Lee to Don Lee Hollywood studios on Vine St.

PRINCIPALS in production of motion pictures for Don Lee Television are (1 to r): Capt. Don Willie, author, who will supply the stories for the half-hour films; Charles Glett, vice president of Don Lee Television; Cecil Barker, assistant to Mr. Glett and executive producer of the network; William Dieterle, director of the new operation.

Film Report

WPAT-TV FORT WORTH has produced spots for Fisher Mfg. Co. in its film production department to sell new automatic plastic mouse catcher. Station will carry two TV spots weekly on 13-time basis, on item.

Jerry Fairbanks, president, Jerry Fairbanks Productions, Los Angeles, and Frank E. Mullen, chairman, are in New York for several weeks conferences with Russ Johnson, vice president in charge of sales and distribution for firm's New York offices. Talks to be on reorganization of eastern division facilities and expansion. . . . Charles Hutchinson has resigned from copy staff of Erwin Wasey & Co., Los Angeles, to form TV and radio packaging firm with Todd Russell. Firm to bear name Russell-Hutchings Productions, with headquarters in Los Angeles.

Telepix Corp., Hollywood, producing series of six one-minute television commercials for Louis Milani Foods Inc. (salad dressings). Agency: Jordan Co., Los Angeles. Firm also producing three-minute commercial for Scarf-anet and two-minute film for Jiffy Stiticher, both through Walter McCreery Inc., Los Angeles. . . . Hal Roach Studios Inc., Culver City, Calif., has completed one-minute film spots for Pall Mall, American Tobacco Co., Maxwell House Coffee and Procter & Gamble (Title). Langley-Smith Television Productions, 704 S. Spring St., Los Angeles, offering TV stations throughout the country quarter-hour strip, titled Report to Mrs. America. Program gives facts on food and nutrition and household hints. Package, using live local programming, consists of complete script and camera outline for each show and still photographs, which may be re-enacted in local studios or shown themselves in close-ups. Program is offered on five weekly basis for 13 weeks. Currently being telecast on KFI-TV Los Angeles.

DuMont Names Campbell-Ewald as Agency

Winslow H. Case, senior vice president in charge of eastern operations for Campbell-Ewald Co., will be in charge of the account.

KPHO-TV Expands

Group to Buy KCNA

EDWIN R. BORROFF, general manager and part-owner of KPHO-TV Phoenix, announced Thursday that Carl Wester, former head of his own Chicago program production agency, has acquired part interest in KPHO-TV and that negotiations have been opened for purchase of KCNA.

Mr. Borroff resigned two weeks ago as president of Taylor-Borroff, station representative firm, to manage KPHO-TV [CLOSED CIRCUIT, Jan. 4].

He also disclosed that William A. Small, publisher of the Tucson Citizen, which owns KCNA, is interested in buying into KPHO.

The Phoenix station, only video outlet in Arizona, beams to more than 3,000 TV sets within a radius of 125 miles, Mr. Borroff claims. On the air four weeks, it is affiliated with KPHO, 5 kw AM outlet on 910 kc. Late census figures put the Phoenix metropolitan area population at more than 300,000.

Mr. Borroff said.

The former ABC Central Division vice president first became interested in KPHO several years ago, when he set up as a network station. At the time he was associated with NBC Chicago. Like Mr. Borroff, Rex Shapp, president of KPHO and KPHO-TV, formerly worked in the Midwest as general manager of WIRE Indianapolis.

Mr. Wester, a former NBC Chicago salesman, for several years was associated with radio writer Irna Phillips as business manager of such properties as Guiding Light, Road of Life, and Today's Children. He has been engaged similarly in Hollywood in recent years and plans to take an active part in management of KPHO because of its proximity to his present California home.

CBS Detroit Sales

Spadea Now Heads AM, TV

JOSEPH R. SPADEA, Detroit manager of CBS radio network sales, will assume supervision of TV as well as AM sales in that area, effective immediately.

The expanded assignment, according to J. L. Van Volkenburg, CBS vice president in charge of network sales, was due to the need for an on-scene representative in Detroit.

Mr. Spadea joined CBS in February 1945 as an account represen- tative in the city, becoming manager in December of that year. Prior to his 26 months of Army Air Corps service, he was Detroit manager for Scott Howe Bowen, and for Edward Petry Co.
ARAHAMUT

Asks Regular Licenses

ARAMA^UT Pictures Corp. petitioned FCC last week for regular grants of temporary licenses, citing that the heat-trust issues which were disturbing the Commission have now been removed.

ARAMA^UT Pictures Inc. was one of the major motion picture pro-
ergers and others involved in anti-
trust proceedings whose applications have been held up by FCC. In
anting temporary instead of regular
renewals, the Commission has
ented that it be studying the
estion of radio qualifications of
ions involved in anti-trust pro-

aramount Pictures Corp. point-
to FCC last week that since
aramount’s anti-trust consent de-
de the company has been divided
to two separate firms—New Pieres
orps., which handles film oduction and distribution, and
aramount Theatre, which indes exhibition.

Applications currently are pend-
ing requesting FCC consent to
ar transfer of Paramount’s radio and
terest to the new companies
[Broadcasting, Jan. 2, 9].

aramount Theatres would become
ier of the old Paramount com-
et 90% of WBKB and WBK
FM Chicago and its 50% of
SM-AFM New Orleans; New
orcs Corp., would own KTLA
Hollywood and the old Para-
firm’s 29% in Allen B.
ONT Labs.

The petition was filed by Paul A.
orter, former FCC chairman, now
his Washington law firm of
old, Fortas & Porter.

RANDELL NAMED

heads ATAS in San Francisco

AVIS RANDY, director of
udio telemcasts for KGO-TV
san Francisco, Jan. 17 was elected presi-
ent of the newly organized San
 Francisco Branch of the Academy
 Television Arts and Sciences.

resident, Philip G. Lasky, vice
resident and general manager
SFOP-RPIX; treasurer, Pat Graf-
on, program director of KRON-
secretary, Jean LeFevre, pro-
 coordinator of KGO-TV.

Larson Named V. P

1. BENNETT LARSON who a
eight ago was named gen-
aenger of WRX (TV) New
ork, [Telecast-
, Jan. 9], last
week was ap-
ounced vice presi-
dent of WPIX Inc., following a

ing of the
company’s board.

Before joining
PIX, Mr. Larson was vice presi-
dent in charge of television at
CWA-TV Philadelphia.

USA CREDITS

AAA Frown on Practice

ERICAN ASSN. of Advertising
encies last week reaffirmed its
-standing policy against the
se of agency names in advertise-
mments in commenting on the recent
quest of a New York agency for a
credit line on a television show.

Kiesewetter, Wetterau & Baker
st October was unsuccessful in
its request to WNB (TV) New
ork for the running of an agency
credit line in a special Christmas
show sponsored by its client Abra-
ham & Strauss, Brooklyn depart-
ment store [Telecasting, Jan. 9].

Although the agency is not a
member of the AAA, the latter
organization’s operations com-
mittee last week, in response to a
KW&B request for comment, said
the AAA had for years held a
olicy opposing the use of agency
ames in any advertising. The
AAA theory is that such a prac-
ite would put the agency between its
client and its customers.

WRTV PERMIT

Deletion Appears Certain

MCCANN-SRICKSON

Eight More Clients Enter TV

MCCANN-SRICKSON Inc., New
ork advertising agency, has
eight of its clients go into television
within the past few weeks.
This makes 23 clients now com-
ted to the medium—six of whom
ave network shows.

The new network advertisers are:
ongoleum-Nairn, with Gar-
way at Large on NBC-TV; Leln &
& Fink, who will participate on
Cavalcade of Stars and Cavalcade
of Bands for Hinds on DuMont
etwork, and Pharma-Craft, who
will participate on the same Du-
ont network shows.

The new spot TV advertisers are:
ifornia Recording Corp., Columbia
ods; hood Rubber, Ohio Bell Tele-
phone and Southern California Gas Co.
The continuing network advertisers are:
thinghouse, with Studio One on
rt-57; Rollin Derby on ABC-TV, and Bell &
owell, with Action Autographs on ABC-TV.

NEWS

PAULEY

TV Appeal Argued

PEPEL of Edwin W. Pauley’s
levision California from a 1948
uling of FCC to sever the TV
lication of Don Lee Broadcasting
st the San Francisco competitive
ering was argued last Monday in the U. S. Court of
als for the District of Columbia.

The Commission severed the Don
bid from the Bay Area proceeding
Broadcasting, July 5, 1948, and
ued that it must be studied.

FCC, in earlier rulings, had
icated the application was be-
ing retained “in hearing” in view
of the still pending Don Lee net-
practices case. FCC explained
Le’s TV request previously
was set for comparative hearing in
4, which was cancelled when
ropouts of other applicants left
more channels than requests.

levision California’s counsel,
ern Wilkinson, told the court
FCC nevertheless had issued other
orders which indicated the TV
Le’s request was not considered
part of the other bids. He
ed that the Commission further
allowed informal amendments to
be made which would be illegal if
application were “in hearing” as
ated. William Dempsey, Don
ounsel, argued that the Pauley
p was late in voicing its ob-
ions to the Commission’s ac-
d had sat passively on the
lines when it had opportunity to
pose Don Lee’s petition for
ence from the hearing.

Solomon’s Contention

Richard Solomon, arguing for
C, pointed out that applicants
ave no vested rights in procedural
errors made by the Commission.
He said the Commission is clearly
authorized under the Communi-
tion Act to correct such errors
brought to its attention, especially
vhere the failure to do so would
deprive other parties of rights to
which they were entitled under
Act.

There are five applications pend-
ing for the two TV channels
aining in the San Francisco area,
excluding the third channel sought
Don Lee.

City ___________________________ Zone ______ State ________________
**Programs**

**Verbal Battles**
SERIES designed with special purpose of bringing together most staunch opponents on specific public issues currently being aired on WIP Philadelphia. Titled City Hall Spotlight, show is prepared in Philadelphia, N. D. and is directed and produced by News Director Robert Truere and is aimed at emphasizing the happenings and happenings in governing body of particular interest to Philadelphiaans. A Charleston legislator who has made news during the week is interviewed each Sunday.

**Congressional Series**
MICHIGAN congressmen and senators in Washington will report government matters to their constituents in new series of weekly programs entitled *Your Congress on WJR Detroit*. Shows are aired from Washington Friday, 10:30-11:45 p.m., as public service feature. Different Congressmen each week will air his views on happenings and explain his stand on current issues.

**TV Dog Show**
**Follow Up** This is the Zoo show in which animals from Baltimore Zoo are exhibited on WAAM (TV) Baltimore, is new program, *Dog Session*. Program features Mrs. Winnie L. Heckmann, professional handler and breeder of dogs, giving tips on how to select, train and care for dogs. Live dogs are used as models on show.

**Circle Four**
NEW children's series on WNBW (TV) Washington has western angle. Called *Circle Four Ranger Club* features western movie and meeting of special Circle Four Ranger Club each weekday at 4 p.m. Indestructible plastic membership cards are given to interested youngsters for the asking. Four rules of club—play safe, be good, be kind, be fair—should assure popularity of program with children's parents.

**HELPING taxpayers make out income tax returns is job of Aid to Taxpayers, new show on WTAG-AM-FM Worcester, Mass. Three-week public service series started over stations Jan. 15 at 12:15 p.m. Tax experts Francis M. Smith, deputy collector of Internal Revenue for Worcester County, and John A. Steen, vice president of Worcester Chapter, National Assn. of Cost Accountants, are featured. Series is presented with cooperation of NACA.**

**Bible Illustrations**
BIBLICAL tales absorbing children seated around miniature sand stage on new *Bible Story*, which debuted Jan. 15 on WENR-TV Chicago. Kay Morrow, who has starred in many Chicago TV productions, narrates stories while using small figurines on stage to illustrate action. Commentary is backed by 16-voice *children's a cappella choir*. Richard Locke is producer.

**M.C. in Night Club**
EXPANDED Eddie Newman show on WPEN Philadelphia is set in Click night club in that city. New point of origination allows Mr. Newman to feature such things as interviews with acts from local cafes, audience participation gimmicks, amateur show and interviewing of members of audience. Station reports that overflow crowds have jammed night spot since Mr. Newman began working from its stage.

**Weather Facts**
NEW show, *Weather Tele-Facts*, is five-minute signoff studio feature on WAPL Fort Worth, Tex., seven nights weekly. U. S. Weather Bureau employees give latest forecast with aid of big map, describing causes of present weather and predicting what is to be expected in the future. Sponsor is Fair Department Store, Fort Worth.

**Fres Air**
Sesqui Series Aired
CONCERT series of 13 programs, entitled *Freedom Sings* and dedicated to 13 original colonies, will be aired by WASH (FM) Washington, and Continental-FM Network. Programs are made up of guest artists appearing with U.S. Army Band and chorus. Band is regular feature show over station and network on Wednesday evenings. Special series is in honor of annual national celebration of Washington, D. C.

**Tri-Sectioned Show**
NEW locally produced show, designed especially for housewives, premieres today (Jan. 23) on KSD-TV St. Louis. *Homemaking with KSD-TV features food preparation, cooking, menu planning and household hints, and is aired five times weekly, 3-3:30 p.m.* Esther Lee Bride, noted home economics teacher and author, conducts show in three segments—homemaking hints, recipe of the day and kitchen "tricks." Sponsorship is on participating basis.
'King of Hearts'

JACK BENNY, CBS comic, has been chosen "America's King of Hearts for 1956" by the American Heart Assn. He will accept the award in New York on his Sunday night, Feb. 5, Lucky Strike program, which will be dedicated to the 1956 drive for $6 million. Honor is in recognition of the comedian's aid to the Heart Campaign for the past two years.

WVOM Revises Rates

WVOM Boston, 24-hour independent outlet, announces a rate revision effective Feb. 1. The new rates set Class A time from 7 a.m. until 12 midnight, daily and Sunday, and Class B from midnight until 7 a.m. According to Benjamin Bartzoff, vice president and general manager, WVOM made a survey in which the effectiveness of the station spot announcements was studied and found to be equally effective day and night.

WCTS TRANSIT ADS

Two New Accounts, 5 Renewals

TRANSIT RADIO Inc., New York, last week announced two new and five renewed accounts reported by its program WCTS (FM) Cincinnati. New campaigns were begun in that city by the Biedenbender Co., for men's furnishings, and RKO Midwest Theatres Inc., for a new picture promotion. Renewals were by the Home Federal Savings & Loan Assn., Ains & Doeke Department Store, Becker Clothing Co., John Shillito Department Store and Cincinnati Times-Star Co.

'Obscene' Records

SENATE companion bills to legislation introduced in the House by Rep. Emanuel Celler (D-N.Y.), banning transportation of "obscene" records or electrical transmissions in interstate commerce, have been proposed by Sen. Pat McCarran (D-Nev.). Measures (S 2811, 2812) would prohibit not only transportation of certain matters but also their importation in foreign commerce. Any articles "capable of producing sound" would be included.

Walter A. Maier

REV. DR. WALTER A. MAIER, 56, conductor of the Lutheran Radio Hour, died Jan. 11, in St. Louis of a heart attack. Dr. Maier first went on the air in 1927. At the time of his death the Lutheran Hour talks were heard each Sunday over 455 MBS stations and some 765 independents in the U.S. and Canada. The talks were translated into 36 foreign languages.

Wis. League Meet

THE League of Wisconsin Radio Stations will hold its first meeting of the year on Monday, Jan. 30, 11 a.m., at the Plankinton Hotel, Milwaukee. Ben Laird of WDJZ Green Bay is president of the league and Joseph D. Mackin, WMAM Marinette, vice president.

WPAT, N. J., arranges for sign-off announcements on WMTR Morristown when latter completes its broadcast day at 5 p.m. daily.

E. J. GRADY

R & R Executive Died

EVERETT JOHN GRADY, 50, executive vice president and director of Ruthrauff & Ryan, New York, died Jan. 17 in Lenox Hill Hospital, New York, after an illness of two weeks.

Mr. Grady joined Ruthrauff & Ryan in 1920 as a copywriter. He was named copy chief in 1925 and executive vice president in 1942. Surviving are his wife, Mrs. Mary C. Grady; a sister, Miss Helen B. Grady, and a brother, Frank A. Grady.

Dallas Ad Week

RADIO AND TV shows will be included in the Dallas Advertising League's promotion of its local Advertising Week, starting Feb. 10, and designed to sell the Dallas area on advertising's benefits. Theme of the week is "How Advertising Serves." Ernest Loreo, vice president, Tracy-Locke Co., is chairman of Advertising Week Committee.
YORK of Federal Trade Commission's radio and periodical division as outlined by the commission in its 35th annual report to Congress. The report covered a review of radio and television continuities for the fiscal year ended June 30. In radio, the commission cited a new policy, begun last July 1, which provides for sampling of commercial scripts from stations in small cities once yearly: from stations in intermediate-size localities, twice yearly, and those in cities with populations of 200,000 or over, three times a year—all on systematically-staggered basis. National and regional networks have responded continuously every week, while producers of electrical transmissions (open-end) have submitted all records once a month.

During fiscal year 1949-1950, FTC examined 493,528 radio continuities from networks, individual stations and transcription producers, with 3,279 advertising statements set aside for further study.

Reviewing its television procedure, FTC noted script continuities had increased appreciably in volume prior to June 30, 1949, and it had issued requests to 36 TV stations during the first six months of last year. It received 400 continuities from television networks, individual stations and video film producers.

Out of 3,272 scripts, only 121 were marked up for further study as containing possibly "false or misleading" statements, FTC reported. Scripts are examined thrice yearly for sampling per 15-day period each. The four TV networks and film producers have extended their cooperation, the commission added.

All advertisements dealing with alcoholic beverages were subject to special study and set aside for examination by the Alcohol Tax Unit, FTC added. Additionally all advertising was assiduously assembled, processed and studied looking toward docketing of applications for complaint where warranted.

**Technical**

**PAUL E. LEAKE,** former chief engineer of RCA, also joined KROW Oakland in similar capacity. He will supervise technical installation of new transmitter building and tower array.

**JOHN O. VICK,** formerly with technical staff of KSHB Stillwater, Minn., joins WKLK Cloquet, Minn., as chief engineer.

**JOHN PARKER,** formerly chief engineer for now deleted WORL Boston and with OWI as field engineer, appointed in charge of all technical functions of WLBY Lyn, Mass., which he helped build.

**LARRY MILLER,** control operator for WCSC Charleston, S. C., is the father of a girl.

**TUBE DIV.** General Electric Co., announces new three-inch cathode ray tube, believed to be shortest electrostatic cathode ray tube manufactured in U. S., according to firm. Tube is called 3MP1.

**R. C. CHEEL,** central station engineer, Westinghouse Electric Corp., Jan. 30 will receive Eta Kappa Nu plaque in recognition of his being chosen most outstanding young electrical engineer for 1949 by that group.

**INDUSTRIAL DEVICES Inc.,** Edgewater, N. J., producing new model of Mini-Volt Voltmeter with expanded scale centered on common 110 and 220 line voltages. Model is known as 401A and is accurate to within 2 volts at 110 volts AC.

**SUPERIOR ELECTRIC Co.,** Bristol, Conn., announces new design of Powerstat variable transformers, type 116 and 216. Improvements have been made within old standard mounting dimensions to conform to existing panel layouts.

**JIM ALLRED,** engineer at WHOK Lancaster, Ohio, is the father of a girl, Patricia Don.

**MILTON KORF,** member of the WBBM Chicago engineering department, is the father of a girl, Kayleen Margaret, born Jan. S.

EPS to prevent future haggling over radio pickups of State Dept. news items, speaking by a week following meeting of broadcaster and departmental representatives.

As result of the department's bungling of arrangements for the Jan. 10 speech by Secretary Dean Acheson [Broadcasting, Jan. 16], ad casters will submit a set of claim forms covering all situations of this type.

The current effort to work out a lunation culminates years of dissatisfaction with State Dept. handling of radio newsman, marked by a series of incidents that left both parties unhappy.

NAB President Justin Miller leaped into the current controversy with a strong telegram of protest in advance of the Achen crunch, followed by a Jan. 16 letter suggesting creation of an ad hoc committee to find a solution.

The next day, Tuesday, a meet was held at NAB headquarters where the problem was discussed in detail as each group aired its problems. Attending for the ad group were Francis H. Rus, president of group; Bill Wood, public liaison section, representing NAB were Robert K.

Mr. Miller was assigned to at the conference by Jack Shel- WHO Des Moines, NARND, Mr. Shel, who was notified by NAB protests to the State Dept. Judge Miller’s letter follows:

Please let me compliment you upon your significant and historic address which you delivered at the Press Club Thursday, Jan. 12. Next, let me ask you for making possible the assembling of your address for publication. You have brought up a subject of such importance to the radio industry, and not in the public eye: to suggest—now that the repercussions have pretty well died down—they might be worthwhile for representatives of the broadcasters and the news services to get together with representatives of the State Dept. to work out procedures for the future in cases like this.

I understand and appreciate very real the considerations which make desirable to edit carefully either the text or the reporter's rendition of extemporaneous address. On the other hand, we have come to accept with the method of news reporting and dis- dination which puts us under severe measure to make such news quickly and which makes the old filing process largely obsolete.

In this particular case, for example, a editing process which took place

Liquor Ads
(Continued from page 21)

network and spot advertising could be affected. The Langer bill, as presently instituted, broadly prohibits all alcoholic beverage advertising in interstate commerce. It includes a revision which singles out radio stations (and concedes radio's interstate nature), thus in effect outlawing all such advertising by radio. A clause dealing with mail, pamphlets, etc. prohibits such advertising "in any place in any state." Many counties, while in "wet" states, are "dry."

John D. Sullivan, general counsel for Advertising Federation of America, told Sen. Johnson's committee:
"It would absolutely prevent all direct advertising of alcoholic beverages by duly licensed radio stations, no matter how inoffensive the advertising. It is no way of stopping a radio wave at a state line."

That also was the view expressed by Rev. Sam Morris, temperance leader, who conceded that the bill would confer "inoffensive" advantages on states and communities. Where the sale of (such) beverages is legal.
"Thus the bill would be abracadabrac and even more offensive in direction of prohibition, to me and some observers feel.

Local Advertising
One "dry" spokesman—Donald Croward, executive secretary of the Northern Baptist Council on Christian Social Progress—told a committee, however, that the bill would not affect local advertising. He labeled it a sort "states' rights" measure.

Sen. Warren Magnuson (D-Ash.) wanted to know whether the bill, if enacted, would not dis- criminate against 46 of the 48 states who voted "wet" Mississippi and Oklahoma are "wet," though they sell beer), and particularly against states and radio stations crossing state lines. Mr. Croward said there was a matter for individual states to decide, and he foresaw no prohibition on local advertising as the result.

Another aspect of the Langer bill almost certain to evoke opposition from some members of the state Commerce committees, is its previous year's rules against "unconstitutional," or even "inoffensive." This charge was leveled repeatedly during the hearing.
Mr. Sullivan denied that the measure would in effect "punish by statute a lawful industry" by denying a right to advertise by radio and her media—and by denying advertising agencies, radio networks, etc., the right to do business with "a lawful industry." Its purpose plainly is "not to regulate, but to prohibit," he asserted.
Furthermore, Mr. Sullivan continued, FTC has power to protect the public from misleading advertising; the Federal Alcohol Administration Act contains similar prohibitions; and alcoholic beverage advertising is rigidly controlled and regulated in almost every state.

The Advertising Federation of America, whose membership exceeds 25,000, comprises 131 national advertisers, 328 agencies, 59 radio companies, among other groups.

The Internal Revenue Bureau's Alcohol Tax Unit, which supervises the Alcohol Act, threw the matter squarely back at Congress during the hearing. Carroll Mealey, its deputy commissioner, said the Treasury Dept. had "no specific recommendations."

If Sen. Langer's measure should become law the combined radio-television industry would stand to lose an estimated $10 million in overall revenue from alcoholic-ale advertising—projecting the figures to include the local level. About 1% or 2% of radio's national revenue would be affected.

Networks reportedly took in between $1,100,000 and $1,600,000 during 1949 in gross time sales from alcoholic beverage advertising, according to latest estimates. Spot business is expected to approximate up to $5 million in net sales, with the remainder derived from local billings.

Volume of wine advertising over radio and television stations is relatively small, but one advertiser, Fruit Industries Ltd., feels that radio and television have a "perfectly proper place" in their advertising and should not be discriminated against.

In a statement prepared for the hearing and inserted in the Congressional Record by Rep. Leroy Johnson (R-Calif.), Phil Bianco, of Four Rivers, stated:
"...It is perfectly possible for any member of the wine industry to handle radio and television in such a way as to conform to the customs and habits of the people in any particular marketing area."
Broadcasting has close local and selection mechanisms, and advertisers generally adhere to local community regulations with respect to certain advertisers.

He said the yardstick of good taste as provided in the wine industry's advertising code, applies equally to radio and television.

Henry Ship, president of Brand Names Foundations Inc., foresaw a destructive precedent in the Langer bill, citing dangers to the whole American system of trademarks and advertising.

Rep. Joseph Bryson (D-S. C.), author of HR 2428, also appeared briefly before the committee to explain provisions of his bill which is similar to the Langer measure.

WOR Research

Daytime Radio vs. Newspaper

SPONSORS on WOR New York's daytime participating and other programs can reach two to nine times more women per dollar than are reached by advertisements in standard size New York City newspapers, according to a new WOR research study.

On comparing WOR one-minute daytime participations or announcements with ads in five size ranges in standard-size New York City papers, it was found that WOR thereby averaged 820 women per dollar (WPD) while newspapers scored as follows:

<table>
<thead>
<tr>
<th>Size Range</th>
<th>WPD</th>
</tr>
</thead>
<tbody>
<tr>
<td>106 WPD for ads of 140-259 on lines</td>
<td>792</td>
</tr>
<tr>
<td>106 WPD for ads of 260-399 on lines</td>
<td>1150</td>
</tr>
<tr>
<td>112 WPD for ads of 400-999 on lines</td>
<td>1060</td>
</tr>
<tr>
<td>106 WPD for ads of 1000-1499 on lines</td>
<td>79 WPD for full page ads</td>
</tr>
</tbody>
</table>

In announcing the study, Robert M. Hoffman, WOR director of research, made it clear that the newspaper figures were based on open rates and not on contract rates because of the impossibility of adjusting for contract rates without knowing exactly how many advertisers enjoy which rates.

Social Research School

THE New School for Social Research, 66 West 12th St., New York, has announced 14 courses in public relations and publicity for the spring term beginning Feb. 6. The spring curriculum includes five full term courses in "Basic Principles of the Mass Communication Arts," "Editing and Writing for Television," and "International Broadcasting."

At Deadline...

CAPITAL TV SET SALES GOOD DESPITE COLOR TESTS

REVERSAL of earlier trend seen Friday in two separate Washington surveys indicating black-and-white television set sales not greatly affected by CBS' public demonstration of color TV.

Survey by Electric Institute of Washington, which week before had indicated sales were down and attributed it to color showing [CLOSED CIRCUIT], showed in last week's surveys that demonstrations' overall effect is not harmful to set sales and in fact is helping clarify some public confusion on color question, officials reported. Institute voted to take no stand on demonstrations.

Another survey, by American Research Bureau, said it is consensus of large dealers that:

(1) Almost every prospective set buyer sares about color; (2) volume of such questions varies with color publicity; (3) "in the main these questions, while sales obstacles, do not stop sales"; (4) dealers resent color publicity and FCC's approval of color demonstration, but do not stop sales; (5) "in the main these questions, while sales obstacles, do not stop sales...it does raise sales resistance", and "a well-planned, well-executed TV set sales picture is "excellent" and think main factors hurting sales are: (A) lack of inventory and (B) "demonstration of old models at giveaway prices" under impression TV set sales should be made.

PRELIMINARY results of ARB telephone survey of 300 dealers indicated 93 per cent of families said they're waiting for color, while 47 per cent gave finances as reasons; 29 per cent said not interested in colored TV now, and 11% said waiting for clearer pictures.

RAILS REVIEW TV

ADVERTISING managers of 40 American railroads discussed television formally for first time at annual meeting in Chicago Friday and Saturday. Nick Bennett (TV) and A. Curley Walsh (radio-TV contract manager, and Roger O'Connor, transmission engineer, both of Illinois Bell Telephone Co. Members of National Assn. of Railroad Advertising Managers talked of their use and opinion of TV. Only three railroads—Union Pacific, Santa Fe and New York Central—are reported to have used TV spots before first of year. Group's new president is Walter S. Jackson, of Chess & Oak, succeeding H. N. Northcott, of Union Pacific.

UNION TO SPONSOR GEORGE PUTNAM'S Broadway to Hollywood, DuMont TV Network show, to be sponsored by United States Steel, National Broadcasting Co., New York, for Funk & Wagnalls Encyclopedia. Thirteen-week contract for telecasts, Fri., 8:30-9 p.m., placed through Victor Bennett, New York.

UNION'S STRIKE NOTICE

CBS Hollywood's union difficulties mounted with disclosure Friday the Office Employees Union had filed strike notice against network with National Labor Relations Board, OEU, representing 100 at CBS Hollywood, seeking wage increases, reclassification of several jobs, and improved working conditions. Union may join International Brotherhood of Electrical Workers and Radio Writers Guild, both of which have filed strike notices, in action against CBS.

GUILD MEDIATION SEEN

MEDIATION expected to stop back in picture this week in deadlock between Radio & Television Directors Guild and four networks. Parties ended negotiations late Thursday "miles apart" with no further meeting set. New York State mediator offered aid last month on television recognition question and then withdrew on its solution to let parties reach agreement themselves.

ADVERTISING ENHANCES RADIO INTEREST, 44% FIND

ADVERTISING adds to interest of radio in 44% of cases, takes away from interest in 38%, makes no difference in 12%, according to George Gallup, director, American Institute of Public Opinion. Latest Gallup poll shows advertising adds to interest of newspapers in opinion of 73% of those interviewed, takes away from interest of 11%, makes no difference to 11%. Magazine figures in same order are 64%, 18% and 18%.

Women found much more inclined than men to think advertising adds interest to radio or publications; people with college education more strongly to radio commercials.

WPEN OFFERS FACILITIES IN A&P ANTI-TRUST DISPUTE

Station suggested "forum of type of program to air current anti-trust controversy and said it would (1) provide NAB with transcriptions for general station distribution and had (2) advised its listeners of offer in hourly newscasts.

AGENCY'S NEW SERVICE

O'BRIEN & DORRANCE Inc., New York, announced development of new low-cost promotion plan for individual radio and video station. According to William R. Seth, radio-television director of advertising agency, whose department will handle function, it was felt much station promotion is of poor quality, and never reaches agency and advertising executives it is designed to impress.

KWTO BOOST FAVORED

KWTO Springfield, Mo., would receive approval for switch from 5 kw, 1 kw to 5 kw, 5 kw to fulltime, on 560 kc directional, according to recommendations of FCC's Hearing Examiner J. D. Bond, issued Friday. Slight interference would result with KFDM Beaumont, Tex., and KLZ Denver.

'CHICK' KELLY JOINS WPTZ

JOHN J. (Chick) Kelly today joins WPTZ (TV) Philadelphia as director of sales promotion and publicity, Ernest P. Loveman, president and general manager, announces. Mr. Kelly resigns from WCAU same city as publicity director and commercial representative.

SCHAEFER JOINS PHILCO

HAROLD W. SCHAEFER, for 24 years active radio, electronics and television engineer, appointed special assistant to Leslie J. Woods, vice president-director of research and engineering of Philco Corp. Mr. Schaefer will handle special phases of research and engineering for Philco's Television and Radio Div.

27 TAKE 'CRUSADE' RE-RUN

UP TO Friday, 27 ABC-TV stations showing re-run of Crusade in Europe, syndicated film series based on Gen. Eisenhower's book, 11 on commercial basis (local sponsorship) and 16 on sustaining. ABC-TV says new stations signing almost daily.

last week reappeared on Washington scene which he formerly frequented with elaborate pictorial presentation of his new "Radio Plaza," housing his MBS affiliate. His sumptuous and highly functional operation was accompanied with side comments about his recent closure of KOPY (FM) Houston, particularly in light of his drum-beating for FM medium as first president of FMA.

GARRETT & CO. (Virginia Dare wine) through Rutherfand & Rynn, New York, about to prepare spot announcement campaign to start in March.

GENE AUTRY, movie, radio and rodeo star as well as station owner (KOLL Phoenix, plus other minority interests), is about to invade new, artistic field—comic strip newspaper syndicate.

RYAN CANDY CO., New York, preparing "Hopalong Cassidy candy bar" which will be on sale starting in February in eastern area at first. Blaker Ad., New York, its agency planning to use radio spots to introduce candy.

GORHAM SILVER CO., through its agency Kenyon & Eckhardt, New York, will audition on kinoscope TV program featuring Elsa Maxwell. Network probably be CBS-TV.

NETWORKS ARE BEING faced with increasingly difficult problems generating from TV's commercial come-uppance. In one major market, it's reported, an affiliate broke into 55-minute presentation nine times with spot announcements, fading out video and sound to put on spots.

EDWARD MADDEN, former managing director of now defunct American Newspaper Advertising Network, joins NBC Feb. 1 with title of assistant to Joseph H. McConnell, NBC president. Mr. Madden, onetime executive in charge of new business at McCormick-Erickson, New York, believed slated for staff-level NBC vice presidency eventually.

'TEXACO THEATRE' TOPS THREE-CITY TV SURVEY

AMERICAN RESEARCH Bureau report released Friday shows Milton Berle's 'Texaco Theatre' most popular video program in three cities covered—New York, Philadelphia and Baltimore.

Four of Five Scouts reports third place in New York and Philadelphia with his other show, Godfrey and His Friends, second in Baltimore. Report points out that New York new Ken Murray show bare minimal Top Ten with 30.6 for premiere performance Jan. 7.

Top Ten programs in each city reported by American Research Bureau as follows:

NEW YORK: (1) 'Thayattering Theater', 48.9; (2) Top of the Town, 53.6; (3) Talent Scouts, 53.3; (4) Godfrey and His Friends, 49.8; (5) The Goldbergs, 41.7; (6) Top of the Town, 38.4; (7) Studio One, 53.8; (8) Suspense, 32.8; (9) Light's Out, 22.6; (10) Stop! in the Name of Love, 21.3; (11) Jetix, 19.8; (12) Children's Hour, 53.8; (13) Boxing (Fri., Sat.); (14) Top of the Town, 58.6; (15) Talent Scouts, 53.8; (16) Godfrey and His Friends, 48.3; (17) The Amazing Family of Stars, 48.5; (18) Top of the Town, 58.6; (19) Top of the Town, 58.6; (20) Godfrey and His Friends, 68.4; (21) Top of the Town, 58.6; (22) Talent Scouts, 61.8; (23) Murder, 57.2; (24) Cowboy Music, 57.9; (25) Suspense, 49.1; (26) Lone Ranger, 45.8; (27) Big Story, 42.5; (28) Fireside Theater, 40.4.

BROADCASTING Telecastin
Welcome, friends, we take good cheer
To see your names again this year.
And may we note, with modest crowing,
Your goodly number keeps on growing!
It's impossible...

...you can't cover California's Bonanza Beeline without on-the-spot radio

More people than Los Angeles! More buying power than San Francisco and San Diego combined. That's the Bonanza Beeline—California's rich central valleys plus western Nevada.

There's only one way to radio-sell this market. That's with on-the-spot stations... the five BEELINE stations, Beeliners, remember, are islanders. They naturally prefer their own stations to outside stations.

For complete Beeline coverage, use all five stations... at combination rates. Or use the BEELINE stations individually for top coverage of any major Beeline shopping area. For instance...

...here's what you should know about KFBK

The Sacramento Bee Station (50,000 watts - ABC)

Delivers solid coverage of whole 21-county million-dollar Sacramento market, where annual food sales alone top 242 million.

Has lowest cost per listener in its area.

McClythy Broadcasting Company
SACRAMENTO, CALIFORNIA  •  PAUL H. RAYMER CO., National Representative

"Look here, Philip—didn't I see a new wing on that Danbury plant of yours?"

"You did. And if you had spent less time ogling my charming new beauty consultant, you might have noticed I'm breaking ground for another. She's married, by the way."

"Oh, I see. Tell me—how does this completely idiotic business of yours keep on growing?"

"HA! Idiotic, eh? Do I detect a note of ghoulish envy? No matter. WOR is one reason. The only reason as far as advertising is concerned. There wasn't a hare's chance to hounds of my ever making a go of it until I began offering samples on a 15-minute show over WOR."

"Indeed?"

"Yes, my dear fellow. Indeed! Indeed! Indeed! I got a dealer-distributor reception about as warm as a December dawn when I tried to launch it in New York. But WOR took care of that. Sent customers asking, prodding, demanding. Set the town on end, actually. Complete distribution the first year; 100% sales increase the second, same the third year, and still going up."

"Amazing."

"Reticent as ever, aren't you, Robert?"

★ The characters in this brief sketch are fictitious. But the results aren't. They are excerpts from one of WOR's 110 success stories—the greatest collection of success stories ever gathered by any station anywhere.
Why did they write WLS in 1949?

Our listeners in Midwest America wrote us another million letters in 1949 to tell us their radio wants—to get needed information for better living from Feature Foods, Dinner Bell Time, Kitchen Club, Farm Bulletin Board and other service programs—to play “Stumpus” with our Buccaneers and Rangers—to thank us for the Midwest’s most complete weather and market service—to request tunes of their friends who star on the National Barn Dance—to ask WLS editors and stars to talk or entertain at their meetings—to get copies of Dr. Holland’s inspirational messages or School Time scripts—and perhaps most of all to show the interest and confidence they have in the station whose 50,000-watt, clear channel signal is always the “voice of a friend.” That’s why...

1,092,039 letters came to WLS in 1949—more than 21 million letters in 20 years to

Number 1 in a series showing the quantity and quality of response to WLS service and programming.
WOAI's Primary Market has always been a bright spot in the nation's economic picture. Today, day and night, a half-million families who spend over a billion dollars over grocery, drug and other retail counters, have the WOAI listening habit! (Check Hooper or BMB). • Already rich in oil, cotton, cattle and other agricultural products, WOAI's Southwest now is one of the nation's industrial hot spots! (Ask your Banker). • That means more people who make and spend more money on more products! There's no substitute for WOAI's coverage of this ever richer market. • Hooper's latest Listening Area Index shows WOAI with two times as many listening families daytime, three times as many nighttime, as the next most listened to station. For availabilities... (Ask Petry).
Closed Circuit

IT LOOKS like no dice now and reconsideration in Drew Pearson-Robert S. Allen bid for facilities of 50,000 w Hearst-owned WBAL Baltimore. Lineup now stands three to three (Hyde, Sterling, Hennock for WBAL renewal, versus Coy, Walker, Webster for Pearson-Allen). Question: Will seventh member—Jones—who did not participate because of Pearson assault against his confirmation three years ago, now be forced to vote?

STREAMLINED government delegation to Havana for Feb. 1 NARB negotiations with Cuban representatives will consist of FCC Commissioner Rosel Hyde, chairman; D.R. MacQuivey, foreign affairs specialist, State Dept.'s Telecommunications Division; James Barr, FCC's AM Engineering chief; FCC Engineer Underwood Graham, and Ray Harrell, State Dept.'s telecommunications attaché in Havana. They'll consult with Ambassador to Cuba Robert Butler and Counselor of Embassy Harold Tewell.

A.D. (Jesse) WILLARD Jr., erstwhile NAB executive vice president, nominated for NAB medium-station director-at-large. He now heads WGAC Augusta, Ga. Arthur B. Church, KMBC Kansas City, many-time director, among 20-old nominees along with four present board members: Harold E. Fellows, WEEI Boston; Charles C. Caley, WMBD Peoria, Ill., and Henry W. Slavick, WMC Memphis, all district directors, and Kenyon Brown, KWFT Wichita Falls, Tex., incumbent medium-station director.

UNDERSTOOD Harold Wheelahan, WSMB New Orleans, unopposed in NAB District 6 for directorship. Also possibly slated for unopposed election are Cal Smith, KFAC Los Angeles, District 16 (incumbent), and Jack Dodd, KFBI Wichita, District 12.

SPEAKING of elections, NAB board will have to name additional nominees in at least one bracket. Elections thus will be delayed at least week pending board action. Some aspirants to directorships weren't on NAB's eligibility list because they didn't fill out certification forms properly.

POLITICAL horns nest may be stoked by FCC, involving former GOP Presidential nominee, Case is 1956 Candidate Alf Landon's five-month-old application for transfer of his Denver daytimer, KTLO, to General Manager Leonard Coe for $45,000 [BROADCASTING, Aug. 1, 1949]. FCC considering calling hearing. One question: Has transfer already taken place?

EXECUTIVE of motion picture company in New York reportedly hired by NBC as staff-level public relations chief, probably with vice president's rank. Sydney H. Eiges, present NBC vice president in charge of press, will continue on operating level.

MUTUAL BOARD, which meets in Washington next week, undoubtedly will again discuss (Continued on page 86)

Upcoming

(Other Upcomings on page 28)

Bulletins

BRISTOL-MYERS, New York, through Doberthy, Clifford & Shenfield, New York, preparing spot announcement campaign to promote economy size Ipana toothpaste on more than 100 stations in 35 major markets starting in February. In addition, hitchhikes will be used on its two network shows, Mr. District Attorney (NBC) and Break the Bank (ABC). MEDIATION session Friday failed to break deadlock between Radio & Television Directors Guild and radio networks and WOR-TV New York. Neither side budged, union sticking by its $300 video demand and companies offering current $195. Strike deadline tomorrow midnight. Membership meeting of guild scheduled for tonight. New York State Mediator Mabel Leslie holding time open today and tomorrow to try last minute effort to end impasse.

MILLER ISSUES REPLY TO COMR. JONES’ LETTER

BATTLE of words between FCC Commissioner Robert F. Jones and NAB President Justin Miller resumed Friday. Judge Miller issued statement in reply to Commissioner's Jan. 25 answer to his "Dear Bob" letter of Jan. 19 (see exchange of letters page 22). In latest episode, Judge Miller chided Comr. Jones on his "philosophy" as federal official. Statement follows:

"Recently Comr. Jones misconstrued completely what I said in my letter of Jan. 19. I am sorry that he did not understand either the intent or meaning of my words and that he read into them such fantastic implications; but I am happy, nevertheless, that this has p-ovided an occasion for the Commissioner to make even more clear the philosophy which underlies his behavior as a member of a high government body."

BAB FURNITURE ANALYSIS

BAB'S first TV retail information folder, dealing with furniture, mailed to stations Friday. Beginning next month, when banks will be subject, both radio and video editions of folders will be released simultaneously. Two TV bonus issues in near future will deal with laundry and dry cleaners, and jewelry business, subjects already covered in radio releases.

MBS APPOINTS ALLEN

SIDDNEY P. ALLEN, of Mutual sales staff, named assistant to vice president in charge of sales.

Business Briefly

P&G VIDEO • Procter & Gamble Co., Cincinnati, to sponsor Brinkh starting in September on ABC-TV for new product, Agency, Dancer-Fitzgerald-Sample, New York.

MAY BUY • M & C Foods Co., Chicago (Italian specialties), considering radio and TV through newly appointed agency, Morris F. Swaney, Chicago; Howard Medicci, account executive. Firm has used both media.

RMA TUBE PRODUCTION FOR NEW SETS EXPANDS

OUTPUT of receiving tubes for new radio and television sets increased in 1949, Radio Mfrs. Assn. announced Friday. Total tube output down due to drop in replacement needs. Production totalled 196,783,265 tubes in 1949 compared to 204,720,378 in 1948. Of 1949 total, 147,998,450 went into new sets compared to 146,162,214 in 1948. Replacements were 59,662,297 in 1949 compared to 47,056,521 year before. Export production last year was 10,722,845, slightly under 1948, with 1,658,717 for government use which almost doubled 1948 figure.

December tube production well above figure in same month of 1948 and only slightly under that for November 1949.

TWO JOIN NBC SPOT

ROBERT Z. MORRISON Jr. and Bernard H. Pelzer Jr. appointed account executives in NBC's national spot sales department. Mr. Morrison, recently with WINS Philadelphia, was with NBC Recording Division 1945-48. Mr. Pelzer was recently advertising consultant to food and drug concerns and formerly director of radio at Owen & Chappell and network program supervisor at Benton & Bowles.

WINS OFFER PENDING

FORMAL reiteration of offer of International Ladies Garment Workers Union to buy WINS New York from Crosley Broadcasting Corp., had not been acknowledged Friday. Offer renewed in midweek. Pending response from Crosley, union undecided whether to file amended application for WINS facilities to replace one dismissed last week by FCC because of lack of engineering information.

Salem in the heart of the rich, fertile Willamette Valley, is the political hub of Oregon, second city of the State, and geographically almost in the center of KGW's powerful north-south transmitter signal.

Salem's metropolitan population has doubled in the last 10 years ... its greatest growth has come since the close of the war. Dairy and agricultural products and their processing, pulp and paper mills, and lumbering give year-round employment and keep Salem's economic level far above the State's average.

KGW DELIVERS Salem ... as it delivers Comprehensive Coverage of the rest of the fastest-growing market in the nation.
Switch to Escape!

Several million people know that a good way to get away from it all is to flip a radio switch and listen to “Escape.”

For “Escape” is a one-way ticket away from the humdrum. It’s high adventure in far places, as told by the world’s best tellers—in the tradition of Kipling, Conrad, Bierce, Stevenson, Poe.

All this comes tidily wrapped in a CBS Package that’s been steadily snatchin high ratings right out from under the nose of top-Hooper comedy.

Very good for a sponsor who likes to get away from it all—at a profit.

That is if the show is good—and to show you how good WCAU's local programs are, put your finger on Pulse*. WCAU rates all 5 of the top 5 daytime shows. By night WCAU is tops, too, with 3 out of the top 5 nighttime locals.

It's why Philadelphians look upon WCAU as their station. It's why local businessmen look to WCAU for fast dollars-and-sense results. Add the star-studded array of CBS talent and you know why WCAU will outperform Philadelphia competition for you.

Buy time on WCAU, where time's well spent.

*Pulse of Philadelphia
Mr. Harry Hartley

Here are the amazing facts! Mr. Harry Hartley began the Texas Engine Service in March, 1948, soon afterwards buying time on KNZ. In two years consistent use of KNZ’s advertising facilities Mr. Hartley has become one of our major clients, and his organization has become one of the major businesses in the Houston area. Besides the Texas Engine Service Mr. Hartley now owns National Motor Exchange, Beaumont, Texas; International Motor Rebuilding Co., Houston, supplying dealers throughout the Southwest, and United Motor Exchange, Ft. Worth.

Mr. Hartley says this about KNZ’s pulling power: “The success of building my company to a million dollar business in such a short time is directly attributed to the splendid results we’ve enjoyed from the advertising on KNZ. When I bought KNZ it was one of the smartest advertising buys I’ve ever made.”

Let us add your name to our impressive list of satisfied advertisers — let your company’s or client’s success story be a part of the amazing KNZ success story!

**K-nuz SUCCESS STORY!**

**JAMES C. SHELBY,** assumes duties as radio and television director of McCann-Erickson, Chicago, Feb. 15, replacing KENNETH CRAIG, who resigned to become assistant to CBS Central Div. Vice President H. Leslie Allen [Broadcasting, Jan. 8]. Mr. Shelby, former staff announcer for WPRO Rockford Ill., and KFAC Los Angeles, has been with agency since 1941.

**BILL S. BALLINGER,** radio and television producer, joins New York office of Campbell-Ewald Co., as head of new programming department, in addition to his current video operations. For past five years, he has written, directed and produced number of TV shows in Chicago. Among them are Mr. Black and At Our House. Prior to that, he was head of M-K-N Radio Productions.

**HUBERT C. SHERK,** formerly with Maxon Inc., New York, joins Bow Co., as account executive for Lava Soap division of Procter and Gamble.

**JAMES E. HANNA,** recently appointed head of radio and television department of N. W. Ayer & Son, New York and Philadelphia [Broadcasting, Jan. 23], elected to agency’s board of directors.

**JOHN F. LAFARGE,** formerly with Hewitt, Ogilvy, Benson & Mather as vice president, joins copy department of Biow Co., New York. He also worked with Young & Rubicam and N. W. Ayer & Son, Philadelphia.

**BOB KNAPP,** with Schwimmer & Scott Inc., Chicago, for past 10 years, becomes radio and television copy chief.

**L. G. MOSELEY AND NORMAN MORK,** both members of Bow Co. for past year, appointed co-managers of agency’s San Francisco office, succeeding L. J. NELAHAN, resigned.

**NELSON FUQUA,** formerly of Ruthrauff & Ryan, joins copy staff of Henry Hartle, Hurst & McDonald Inc., Chicago.

**CHARLES K. WALDEN,** partner in recently disbanded agency of Boone, Sugg, Tevis & Walden, San Francisco, joins Walter McCready Inc., same city, as account executive.

**ARTHUR MAYER** joins creative and contact staff of Edward A. Grossfeld Agency, Chicago. He previously was at Ollan Adv., same city.

**FRANK FLINT,** radio director of McKim Adv. Ltd., Toronto, appointed director of radio and television. He recently returned to Toronto after extended tour of U. S. TV production centers. JAMES A. BROMLEY, formerly of CFRB Toronto, joins radio production department of McKim.

**FRANK WALSH** joins copy staff at Beaumont & Hohman, Chicago, after working for John W. Shaw Agency, same city.

**HERBERT BRETT,** producer-director at KPIX (TV) San Francisco for a year, joins Malcolm-Holloway Agency, Chicago, as television coordinator. He worked as studio technician at WBBK (TV) Chicago two years and instructed at American Television Institute, also Chicago.

**LEONARD V. STRONG 3d, formerly with Foote, Cone & Belding and Paris & Pearl, New York, joins O’Brien & Dorrance Inc. New York, as member of copy department.

**HARLEY LEETE,** formerly head of agency bearing his name, joins Avery & Bruguiere, San Francisco.

**KENCLIFFE, BRESLICH & Co., Chicago, moves to new and larger offices in LaSalle-Wacker Bldg., 221 N. LaSalle St., on Feb. 1.

**KNIGHT & RUSSELL, Inc., opens offices at 8031 Beverly Blvd., Hollywood. Principals are VICK KNIGHT, radio producer and one-time head of radio department of Biow Co. and vice president of Foote, Cone & Belding; and HENRY RUSSELL, NBC Western Division director of music. CHARLES WALTON acts as industrial consultant; T. B. KNIGHT is legal counsel.

**DUANE JONES,** president of Duane Jones Co., New York, appointed chairman of promotion committee of New York Heart Assn.‘s 1950 campaign to raise $750,000 during month of February.
Feature of the Week

Rehearsing are (l to r) Capt. Christian Engleman, USN; Ted Mack, m.c., and Army Gen. C. L. Ruffner.

THIS year's American Heart Assn. national campaign will get off to a palpitating radio start on Feb. 2, with a TV counterpart on Feb. 7. Ted Mack's Original Amateur Hour for Old Gold cigarettes (P. Lorillard Co.) on ABC this Thursday; 9-9:45 p.m., will be changed for the night to VIP Ama-

teur Hour. Five nights later, a similar show will be presented on Old Gold's 9-10 p.m. NBC-TV slot.

The show is a natural. For the occasion, congressmen and govern-
ment officials have offered to be judged for their talent rather than their politics. Promotion for the

On All Accounts

F great-grandfather Irwin had never fought with George Wash-
ington during the Revolutionary War, who knows what changes there might have been in the life of his namesake, George Washing-
ton Irwin, whose childhood naturally was cluttered with cherry trees and honesty.

George Irwin doesn't seem to have fared too badly, however. For,
though he didn't grow up to be father of his country, George W.
Irwin did become the father of a Beverly Hills (Calif.) advertising agency. Irwin Co. Inc. came into being Jan. 1 of this year after George and his partner Phil D. McHugh dissolved Irwin-McHugh Adv. to set up separate agencies.

Now in business at 239 S. Beverly Drive, George Irwin anticipates billing of over $500,000 this year, half of that to be in radio and television. Currently he is conducting sportscasts and time signals on California stations for California Central Airlines; spots and programming on Los Angeles, New York and Miami stations for Columbia Air Coach System, and local programming and spots for Firestone Tire and Rubber Co., all Los Angeles. For Budget Finance Plan, who recently sponsored James Roosevelt Show on ABC, he is planning a new network show in February. Several of his accounts will go into television in the near future.

No novice in either advertising or radio, George has eight years of advertising agency experience behind him, is vice president of KCMJ Palm Springs, Calif., in which he controls an interest, and is now in his 15th year of radio announcing, currently doing five weekly sportscasts for client Beverly Hills Ford on KMPV Hollywood.

Born April 1, 1914, in Pittsburgh, George was the second of his family to receive the illustrious name. His grandfather was the first.

George's interest in radio started when he received an early Atwater Kent radio set which he listened to religiously. In high school he shared his interest in radio with one for farming. After school hours he was behind a mike acting and announcing on WCAE and KDKA Pittsburgh; on week-ends and summers he was behind a shoveling farming on the family homestead outside of Pittsburgh.

He completed his last year of high school in Los Angeles where the family moved in 1931. Then fol-

RADIO CORPORATION OF AMERICA  RCA Victor Division
120 East 23rd Street, New York 10, N. Y.  Chicago • Hollywood
PARKER PEN Co., Janesville, Wis., appoints Tatham-Laird Inc., Chicago, to handle advertising on new product and its test campaign that cannot be handled by J. Walter Thompson Co., New York, because it has conflicting account. JWT continues to handle all other advertising of Parker Pen Co.

COTT BEVERAGE Corp., New Haven, Conn., appoints John C. Dowd Inc., Boston, to handle plans for extensive sales expansion program throughout New England. Radio and television will be used.

STERLING INSURANCE Co., Chicago, radio user, appoints Reineke, Meyer & Finn to handle advertising.

GENERAL BAKING Co., New York, for Bond Bread, adds WLWC (TV) Columbus for time signals seven days weekly. Company, through BBDO, New York, also renames its three time signals daily, Mon.-Fri., on WNHC-TV New Haven, Conn.

C. A. SWANSON & Sons, Omaha (poultry processor), names Tatham-Laird Chicago, as its agency. Media schedules have not been set. Account executive is Charles Standen.

RCA-VICTOR and six RCA-Victor distributors in Trenton, N. J., area, begin series of cooperative programs over WTTM Trenton. Schedules are for 52 weeks and include Trenton Merry Go Round, Household Hints, Trenton Quiz, The Wishing Well, 920 Mystery Club, Talk of the Town and 920 Mist-Quiz.

Network Accounts...

BOWEY'S Inc., Chicago, for Dari-Rich chocolate flavored milk, will sponsor Stars over Broadway on Mutual Saturday, 5:30-5:45 p.m. in each time zone starting Feb. 15 through Sorenson & Co., also Chicago. Bowey's is basing its 1950 sales effort on show, and local dairies will cooperate in tie-ins. Radio Harris will originate her movie personality commentary in New York.

PABST BREWING Co., Milwaukee, will sponsor boxing from St. Nicholas Arena, New York, on CBS-TV Wednesday nights starting March 1 for nine weeks through Warwick & Legler, New York. Fights will be televised 9 to 10 p.m. CST and are timed to coincide with campaign on sale of bock beer, which firm has not produced since 1940. All other beer and ale products will be advertised also.

EAGLE LION FILMS, Hollywood, beginning early in February, will employ extensive radio campaign over Yankee Network in New England on behalf of "Guilt of Treason," new production.

LIGGETT & MYERS TOBACCO Co. (Chesterfield cigarettes) through Cunningham & Walsh Inc., sponsors Arthur Godfrey Digest, new Saturday evening half-hour program on CBS. Series reviews highlights of morning show, CBS: 10:15-11:30 a.m., Mon.-Fri. Company also sponsors 11-11:30 a.m. portion of morning show and Arthur Godfrey & His Friends on CBS-TV Wed., 6-9 p.m.

Adpeople...

ANDREW L. ROWE, formerly general sales manager of Elgin National Watch Co., Elgin, Ill., appointed vice president in charge of sales, marketing and advertising. He succeeds H. D. SCHAFFER, retired. Mr. Schaeffer will continue as consultant to sales department of company.

SHERMAN ROGERS, formerly with L. C. Cole Co., joins advertising department of Shell Chemical Corp., San Francisco.

HY FREEDMAN, for past three years in sales department of Hunt Foods Inc., Fullerton, Calif., named assistant merchandising manager in charge of publicity and public relations for firm.

Get the entire story from FREE & PETERS
He Rides the Eastern Iowa Range Via WMT

Ridin', ropin' and singin' his triple-threat way into the radio lives of millions, Gene Autry is as much at home with a rope in the saddle as he is before the mike with a western song. His popular "Gene Autry Show" is another in the long list of exclusive CBS programs brought to Eastern Iowa by WMT.

In addition to outstanding CBS entertainment, WMT offers complete news coverage and intensive farm programming to a "city" larger than Washington, D.C., spread out over the richest land in the world. When you've something to sell in this balanced farm and industrial market, use popular WMT. The Katz man has full details.

The Gene Autry Show, sponsored by Wrigley Gum, is heard Saturday nights on WMT.
PUSSY CATS IN BOOTS

It's rare enough to see one puss in boots. To get two pussy cats in two boots is a right neat trick.

There's a neat (and easy) trick to buying radio time in Baltimore. You just spend a little bit of money on W·I·T·H, and then see big things happen!

You see, W·I·T·H delivers more home listeners-per-dollar than any other station in town. And in addition, a survey made under the supervision of the Johns Hopkins University showed that of all radios playing in taverns, 67.3% were tuned to W·I·T·H.

That means that you get big results from small appropriations on W·I·T·H. Call in your Headley-Reed man and get the whole W·I·T·H story today!
HEARINGS ON THREE BILLS

By JOHN OSBON

CONGRESSIONAL hearings on three major radio bills—including a new measure to create a “super FCC,” establish new regulatory sanctions, and assure broadcasters’ immunity from political libel suits—were earmarked by the House Interstate Commerce Communications Subcommittee last Thursday to start around the Feb. 20.

Aside from the new bill (HR 6949), introduced Tuesday by Subcommittee Chairn George Sadowski (D-Mich.), the measures are the Senate-approved FCC reorganization bill (S 1973) written by Sen. Ernest W. McFarland (D-Ariz.), and the bill (H 2410) introduced by Rep. Harry Sheppard (D-Calif.) to divert networks and equipment manufacturers from radio station ownership.

Rep. Sadowski’s measure, covering only a portion of the subjects had outlined in his bill before [BROADCASTING, Jan. 23], may be followed by another bill dealing with additional phases. The Congressmen confirmed that he is having material studied for such a measure, and said “if I like it, I may introduce it.”

Replacement Measure

Such a bill, if introduced, presumably would be intended as a replacement for the McFarland Bill, which deals exclusively with procedural matters. The subject was discussed at Thursday’s meeting of the communications subcommittee, and it was indicated the group will take up the McFarland measure for the during the hearings.

Although he challenged some portions, particularly a restriction on FCC’s anti-trust authority, Rep. Sadowski denied that the McFarland Bill is “dead” or that he is opposed to it in principle. “I still have not given up on the reorganization aspects,” he said.

Meanwhile, his assertion that he introduced his bill as a means of acquainting his subcommittee with “substantive problems” of radio revolved speculation that there would be no concerted drive for enactment. He had said the week before that “we may not press for legislation.”

He said he hoped to complete the three-bill hearings in six weeks—by about the end of March. However, there loomed a possibility that the hearings would not open by the Feb. 20 target date, or at least would not get into swing until later.

The Sadowski Bill would:
- Create an Independent 5-man Frequency Control Board which would have broad powers over the existing FCC and absorb some of its major functions as well as replace the Interdepartmental Radio Advisory Committee (IRAC) as agency for government allocations.
- Give FCC additional administrative sanctions—power of suspension, levying of fines and issuance of cease-and-desist orders—over licensees and permittees.
- Render licensees immune from civil or criminal actions for libelous statements in political broadcasts.
- The proposed Frequency Control Board would apportion frequencies between government and non-government users, make assignments to government stations, and prescribe rules to govern FCC’s assignments to private users.

This “super FCC” also would participate in international agreements, subject to control of the President and assisted by the State Dept. Additionally, it could veto any proposed FCC assignment or renewal which would: (1) cause “harmful interference” to any government user, or (2) violate any prescribed board regulation covering FCC frequency assignments to non-government stations.

However, BBM has on hand full data on the audiences of all non-subscriber stations as well as subscribers. That data BBM has been authorized to release in a limited way, never exactly detailed. Lack of funds and personnel have made any detailed analysis of the full returns impossible to date, but Dr. Baker hoped to be able to develop a few highlights in the over the weekend which he can discuss on Tuesday.

Advance sampling indicates the small stations have gained listeners, partly at the expense of the high-power stations. This is not surprising in view of the postwar licensing policy of the FCC which has resulted in a tremendous increase in the number of stations, largely low-power.

With 625 station subscribers for its second study, BBM mailed out (Continued on page 46)

Dr. Kenneth H. Baker, acting president of BBM and NAB research director on leave, told [BROADCASTING] Thursday the tabulations were near completion and only an unforeseen crisis could hold up the Tuesday mailing.

News Conference Called

A news conference has been called for 3 p.m. tomorrow at BBM headquarters in New York, when Dr. Baker will discuss the reports and their significance. The small number of subscribers to this study—625 stations, less than a third of the AM stations on the air last spring when the study was conducted—make it difficult to draw from the individual station reports any general conclusions applicable to the country at large.

However, what is quite different from the first study, made in 1946, when the great majority of all AM stations then on the air were BBM subscribers.
MADDEN TO NBC
Joins Network on Feb. 1

NBC ANNOUNCED last week that Edward D. Madden, former executive vice president and director of the now defunct American Newspaper Advertising Network, would join the network as assistant to the president [CLOSED CIRCUIT, Jan. 23].

Mr. Madden's precise duties at NBC have not yet been determined, it was said. He goes to NBC Feb. 1.

Mr. Madden is the second executive to be imported from outside the broadcasting field into the top NBC hierarchy in recent weeks. Victor T. Norton, former president of American Home Foods Inc., was hired as vice president for administration a fortnight before [BROADCASTING, Jan. 16].

Yet to be named to the staff level of NBC management is a public relations chief. It was believed that a selection for this position would be made shortly.

Mr. Madden, before joining the newspaper network in May 1946, had been with McCann-Erickson since 1934.

He started at McCann-Erickson as an account executive on Standard Oil; later organized the agency's sales promotion and publicity departments, and then became director of new business.

Before joining the agency he served variously as vice president in charge of creative merchandising of Keiterlinus Lithographic Co., Philadelphia, co-manager of the direct mail merchandising division of Reuben H. Donnelly Corp., and assistant manager of the Chicago office of the American Hard Rubber Co.

WITT RESIGNS
Leaves CBS To Join Kem Co.

HARRY W. WITT, for the past several months executive on special assignment for CBS Hollywood, resigns effective Feb. 1 to become a vice president of Harry H. Kem Co., Beverly Hills, Calif., real estate, property management and insurance firm.

Prior to returning to CBS in November 1949, Mr. Witt was for 18 months general manager of KTTV (TV), Los Angeles Times-CBS owned station.

For four years before that he was assistant general manager of CBS Western Div. and KNX Hollywood, first joining CBS in 1936 as KNX sales manager. Previously, he worked in the same capacity for KJL Los Angeles.

CM&S AGENCY
To Get Eight Smith Clients

CARLOCK, McClintock & Smith Inc., New York, newly established agency [BROADCASTING, Jan. 23], will acquire eight clients of the Paul Smith Advertising Agency, when the latter agency is merged with the former.

AAA MEET SET
Sawyer Keynote Speaker

SECRETARY of Commerce Charles Sawyer, also president of WIZE Springfield and WING Dayton, both Ohio, will be keynote speaker at the annual dinner of the American Assn. of Advertising Agencies meeting March 30-April 1 at the Greenbrier, White Sulphur Springs, W. Va. Secretary Sawyer's March 21 address will mark his first appearance, since the formation of the Commerce Dept.'s new advertising advisory committee, before all segments of the advertising industry.

Theme of the AAAA convention will be "Advertising's Responsibility in an Expanding Economy."

Members of the Assn. of National Advertisers, meeting March 31 at the Homestead in Hot Springs, Va.—near White Sulphur Springs—will be invited to attend AAAA sessions on March 31 and April 1.

The operations committee of the AAAA board of directors, headed by Clarence G. Goehorn, of Benton & Bowles, New York, is planning the convention program.
**GROSS NETWORK SALES** of the four nationwide radio networks during November 1949 totaled $15,855,787, according to data released last week to **Broadcasting** by Publishers Information Bureau. Based on records of individual sponsored programs on the networks, calculated at the one-time rate without discounts, PIB data show the network gross time sales as $17,391,083 for the January-November period. Compared with 1948, the network November gross is down 3.8%, the 11-month figure is down $1,794,871 from the total for the same period of 1948.

CBS was top network in gross time sales in November, but NBC was less than $16,000 behind, making the two practically tied for first place for the month. For the first 11 months of 1949, NBC was the leader, also by a margin so slight as to be insignificant. What is significant is that CBS showed a gain in 1949 over 1948, both for the year and for the 11 months, while all the other networks showed losses for 1949 as compared with 1948 for the month and the 11 months (Table 1).

Procter & Gamble was the leading buyer of network time in November, spending $1,482,804, more than twice as much as Sterling Drug Inc., which ranked second with $674,800 in time purchases. Table II lists the top ten users of network time in November and the gross time purchases of each.

Foods and food products were advertised more extensively than any other group promoted by network advertising in November, using $4,074,456 worth of network time that month. This product class also ranked first for the January-November period, accounting for gross time purchases of $40,970,118.

Toiletries ranked second, both for November and the 11-month period; smoking materials were third in both lists, drugs, furniture and soaps and cleanliness fifth. Automotive advertising ranked sixth for both November and the 11 months. Gasoline and motor oil and other fuels ranked seventh in November, ninth for the January-November period; candles and soft drinks were eighth for the month, seventh for the 11 months; jewelry and allied products ranked ninth in November, 12th for the 11 months; the miscellaneous class, including religion, pet foods, luggage, etc., ranked 10th for November, 11th for the 11-month period.

Full analysis of the combined network gross billings by product groups for November and January-November 1949 and 1948, comprises Table III. Table IV shows the leading advertisers of each product group for the month.

---

**PIB Reports Nov. Near $16 Million**

---

**9’49 SET SALES**

DOLLAR volume of the radio manufacturing industry reached an all-time peak of $850 million in 1949, 13% above the $750 million figure in 1948, according to Raymond C. Cosgrove, president of Radio Mfrs. Assn.

Preliminary RMA estimates are based on total set sales at the manufacturer level. Converted to retail values, the industry’s production exceeded $1.3 billion in 1948, not counting TV installation and service charges.

"Thanks to the high rate of TV set sales, especially during the last quarter, the industry in 1949 did the greatest volume of business in its history," Mr. Cosgrove said. "Television receiver sales, because of their greater value, accounted for more than 65% of the set industry’s gross income or close to $560 million."

The record output of over 2,800,000 TV receivers represented more than $875 million at the retail level, he said. He added that the value of TV receivers manufactured in 1949 was twice that of all TV sets produced between the end of World War II and the close of 1948.

A public investment of over $1,250 million is represented in the retail value of 4 million TV sets produced since the war, Mr. Cosgrove said. He reminded that the 1949 sales were accompanied by substantial cuts in prices of TV receivers as a result of economies achieved through increased output and passed on to the consumer.

**Table Model Cuts**

The average price of a table model TV set, at the factory level, is more than 25% under the 1948 figure and 35% under 1947, he said. Table models comprise 60% of TV set output in 1949.

Mr. Cosgrove observed that TV screens are steadily growing in size.

Radio set sales in 1949 amounted to $290 million at the factory, he said, following a "remarkable recovery" in the fourth quarter. Total production was about 10.5 million units. Sales of auto radios rose to 3.6 million units, an all-time record. He estimated they are now 14.6 million auto sets in use.

The sharp upswing in radio set sales in late 1949 "would seem to belie the prophets of doom who were recently forecasting the early death of radio," he said.

"An increasing number of TV sets are being equipped with radio reception facilities—FM or FM-AM—so that even the television set owners are by no means entirely lost to radio," Mr. Cosgrove said. "Outdoor listening has been widely increased through the heavy sales of both auto and portable radios."

Set industry employment is at a peacetime level, he said, taking its place among foremost industries of the nation.
NAB BOARD HEADACHES

By J. FRANK BEATTY

A BAR'S BOARD OF DIRECTORS will meet next week in Arizona to take stock of the revamped headquarters operation and to make it click despite a shrinking pocketbook.

The board faces interlocking problems of staff operation that stem from structural changes, concentration of power in the president's office, transfer of the budget to an April 1 fiscal-year basis and some symptoms of dissatisfaction with the way things are going in Washington.

On top of that the board must decide whether to stop the current 12½% discount in members' dues and perhaps increase the dues in some of the low-income brackets.

Then there is the proposal of a three-committee group to rework the whole structural chart [Broad- casting, Jan. 16].

With such perennial problems as BMB, Broadcast Advertising Bureau and dwindling membership on its agenda, the Feb. 8-10 gathering at the San Marcos Hotel, Chandler, Ariz., promises to be a spirited session. The board itself has drawn some criticism for selection of the southwestern site.

Final Meeting For 7

Seven directors will be attending their final board meeting because of the new two-term limit on directorships. Eighteen of the 27 directorships are at stake in elections to be completed next month.

The tri-committee plan to change the NAB headquarters structure is understood to have aroused little enthusiasm last week when the board's Structure Committee met in Washington. The committee also held a joint session with the board's Finance Committee.

Having spent more than a year studying and refining the NAB headquarters operation, the Structure Committee is believed to feel there is nothing seriously wrong with its system. The basic charting has been done and the task of making it work is in the hands of President Justin Miller, committee member.

The tri-committee discussions early this month, involving some 25 broadcasters from all segments of the industry plus a half-dozen board members, had brought to the board's face the criticism of NAB's internal affairs, including the functioning of the new Radio and Television Divisions.

Changes Suggested

The three committees had been called together as the result of a board directive last November, the board desiring their ideas on how the two divisions should fit into the headquarters functioning. After voting a strong endorsement of President Miller, the tri-committee group suggested a series of changes in the new structure.

Such changes included splitting of the department chief's job into secretary-field director and a top-level treasurer-general manager; pulling of administrative teeth from the two division heads, and relative independence for Broadcast Advertising Bureau. The Structure Committee didn't buy this package but actual decision is up to the board. Judge Miller was dubious about the proposals.

Last week NAB received both praise and criticism from Ralph N. Weil WOY New York general manager. Mr. Weil read with every word which he stated he was remaining a member of NAB but he blamed some of the industry's problems on internal bickering and extravagance of NAB headquarters (see following).

Mr. Weil is a member of NAB's All-Radio Presentation Committee, which has guided planning and production of the industry's promotion film, "Lightning That Talks," soon to be premiered [Broadcast- ing, Jan. 23].

Second attack was delivered by FCC Comr. Robert F. Jones who charged Judge Miller and NAB with representing "power segments" of the industry (see story this page).

The Finance Committee went over the association's budget problems at length last week. A year ago NAB had envisioned 1949 income of almost $1,000,000 to meet anticipated expenses of $774,273. This would leave an excess of $45,727.

At that time the picture was rosy. Then ensued a flurry of resignations from board membership down from a peak of 2,006 at the end of 1948 to 1,767 last July 1. The late 1948 total included 1,270 AM, 656 FM and 4 TV stations.

By last July there were only 1,132 AM, 548 FM and 6 TV members.

Some of the resignations involved high-bracket stations so NAB set out to acquire new members and presented one newly developed drive centered around the autumn district meetings. By November the membership had been brought up slightly to a total of 1,783, includ- ing 1,152 AM, 518 FM, 36 TV (mostly AM video affiliates).

As of today, the total is 1,768, including 1,154 AM, 501 FM, 37 TV stations. FM Assn. was absorbed at the close of 1949, but FM membership in NAB has declined. Associate membership has ranged between 69 and 76. At present it is 72.

Dues Question Grows

With membership down, the dues question becomes more important. Last July the board cut dues 12½% to meet what was described as a widespread industry demand. At the same time it widened the budgetary instrument and cut the budget nearly $75,000 to a figure of $701,511.

At last November's board meeting it was evident that expenses were running ahead of income. This trend has continued, it is understood, and cancellation of the

(Continued on page 59)

JONES HITS NAB

NAB and its president, Justin Miller, were charged last week by FCC Comr. Robert F. Jones with speaking "for the power segments of the industry."

The charges were made by Comr. Jones in a speech at the board chairman's Jan. 17 speech before the American Marketing Assn. [Broadcasting, Jan. 23].

Comr. Jones' letter took both Judge Miller and NAB apart for speaking only in support of television's development. He accused Judge Miller of "joining forces with those who wish to pick color with nothing," and interpreted his comment as "some confirmation" of charges by small broadcasters that NAB speaks for large broadcasters.

Judge Miller's letter had commented particularly on this paragraph of Comr. Jones' speech:

When private enterprise seeks out the most profitable market for the installation of clear-channels and regions in highly congested areas, I find no fault with such action. That is the kind of enterprise I have always liked. But when private industry attempts to use government processes and conditions to his advantage, I think it is highly improper, or at least not the kind of competition in which we should engage, or when I think it attempts to use the Commission to eliminate the natural forces of competition between established black-and-white and in- fant color, I draw the line. Likewise, when the industry tries to use the Commission to thwart or delay re-liable television service for towns

Answers Miller

before the American Marketing Assn. I am, however, concerned by your intimation that the power of government is being used or there is a threat that it may be used "to force assembly-line production before the laboratory work has been done which is necessary for the development of new industrial procedures."

I am amazed that a former Judge of this court, a lawyer who has spent many years as head of the NAB and who holds himself out as an expert on the Communications Commission, should lend currency to this false shibboleth in the color proceedings. All that is involved in these proceedings is: Shall color be suppressed by keeping the standards exclusively for black-and-white television so that the American public will be deprived of color television? You obviously misunderstood my speech and has purported to speak for a man who has so frequently called attention to the Commission abuses in many fields of broadcasting who has repeatedly stated that the power that the Commission or its staff has never even dreamed of.

Color television would be the last one I would expect to interpret the Commission's rule-making procedure as forcing anybody to manufacture any- thing. There cannot be any misunder- standing between you and me as lawyers on this point. And the industry doesn't misunderstand it either; witness its long record of not producing FM sets to meet the public demand.

With reference to television, there

(Continued on page 59)
WHEN an affiliate station executive is notified that a network star is coming to his town, his first thought is to double the supply of aspirin in his desk drawer. Too often, Mr. Big Name turns out to be Mr. Little Man, bringing with him assorted cases of jitters, recriminations and other troubles.

So, when the perfect guest-star comes to your city he deserves not only a tribute, but for the good of the industry, his methods of operation should be explained to other traveling celebrities.

Jack Benny and his first team were in Houston, to entertain at the Charity Bowl football game, Dec. 17. The network stations radio have brought me into contact with most of the network big names, I had never worked a show with the laugh-master before. When I learned he was coming I doubled my aspirin supply.

Anybody want to buy some aspirin cheap? My supply is still intact.

Let's take a look at the visit, from its inception, and point out the results of the expert handling of his appearance. First, an affiliate is usually notified by his network stations relations that such and such a star will be in his city on such and such a date and will the affiliate please contact him upon arrival. This, of course, gives the station executive no time to plan anything until he has consulted with the Great Man, after his arrival.

In the case of Jack Benny's appearance in Houston to take part in the charity show, this first step was adequately avoided. Several weeks before his arrival I received a letter from Irving Fein, promotion manager of Amusement Enterprises, Mr. Benny's holding company. Irving invited suggestions as to what we would like to do with and for Jack-

log changes, the lack of advance notice, the engineering failure because of lack of time for lines and facilities, the nerve-wracking rush and bustle.

Point number three: No network star can be expected to remember the call letters of every affiliate in every city. Very often, in the past, stars from our network have come to town and have done shows on other stations under the delusion that they were building ratings on their own network station. In this case, Mr. Benny and his people were told to look for our special-events man, Lee Fallon, who was at the station at dawn to meet them, along with mike-men from other stations in town. Result, we got a fine beat interview on their arrival.

Point number four: The traveling team itself usually has at least one officious, bossy individual who tells you what, where, when and how Mr. Big will be seen and interviewed. There were none of these in the Benny entourage.

First, Jack Benny himself is one of the few really important radio people who is calm, affable, friendly and a reliable ad lib artist. Then with him, Phil Harris who, in spite of his standing, seems as appreciative as a puppy for any attention paid him. Mr. Harris is, as an old shoe, easy to work with as Jack Benny himself and gives you a show every time he hits the mike and the same goes for Artie Auerbach, Benny's Mr. Kitzel.

Pleasing Cooperation

John Tackleberry, the writer who came along with Mr. Benny, could have proven the weak-point from our experience with other stars who brought writers along. Instead, he worked with us as smoothly and easily as though he were a writer on our own staff. He turned out material for our shows as good as any Sunday night's script.

Then, Hilliard Marks, producer of the Jack Benny show. Here, too, we were wary. We had had producers come down on us like trip-hammers, trying to do everything but tell us how to tie our shoe laces. Not so Mr. Marks. With quiet, unobtrusive control he handled himself and cast, including some of our own people, with absolute efficiency.

And so with the rest of the Benny party. The point here is, of course, that too many visiting stars bring hectic Hollywood characters with them, who manage to antagonize everyone on the affiliate-station staff, create utter confusion and

JESSE JONES (I), owner of KTRH, welcomes Jack Benny to Houston. At the close of his network broadcast, Mr. Benny quipped, "Mr. Jones appeared through the courtesy of the National Bank of Commerce."  

(Taken on page 52)

THERE is nothing a listener likes more than to have a network star visit his town, but the trouble these "visiting firemen" can cause the local station is an old story to veteran broadcasters. Most of this trouble could be avoided, Monte Kleban believes, by careful planning and cooperation from all concerned. Approaching the problem from the affirmative side, Mr. Kleban outlines the success of Jack Benny's visit to Houston, showing point-by-point how these arrangements can be applied to any local appearance of a name performer. "Many times in the past I have wanted to write an article like this," Mr. Kleban said, "but every time it would have been on the cropping sidelines. At last I had an opportunity to do a job from the affirmative instead of the negative side." Mr. Kleban is on the executive staff of KTRH Houston, with duties as "planning and advisory consultant on all phases of the station's activities." He joined KTRH in March 1949 after serving as program and production manager of WOAI San Antonio.

January 30, 1950  

* * *

PRE-BROADCAST dinner is held to put the audience in a quick-laughing mood. At the head table are (I to r): Ray Herndon, KTRH assistant manager; Glenn McCarthy, owner of KXYZ Houston; Jack Benny; Jesse Jones, KTRH owner and former Secretary of Commerce; Mrs. Jones; Phil Harris. In the foreground at right are Lee Fallon, KTRH special events director, and Polly Boelow, local belle.
ONE OF RADIO'S top salesmen is the director of NAB's Broadcast Advertising Bureau, the industry's answer to "negative" selling tactics of the white space media. The BAB directorship has rested since its organization last spring in the experienced hands of Maurice B. Mitchell, at that time director of NAB's predecessor Dept. of Broadcast Advertising.

For several months "Mitch," as he is universally known, has been addressing broadcaster meetings in every part of the United States. He has given them insights into one-on-one courses in radio selling and how to meet the competition. Then he has given his oft-heard "Mitch's Pitch" at meetings of retailers and other businessmen, spending about as much travel as he has on the podium and in his New York office.

**MITCH'S PITCH**

SALESMANSHIP is the key to obtaining a satisfactory share of the total advertising dollar. And the successful salesman to network media is usually the man who is best informed about all the other media to which his clients may be exposed.

All media are successfully selling their wares in places where effective radio selling can drastically reverse media decisions. This kind of radio selling can best be done by the radio salesman—local or national—who incorporates these facts into his selling story:

- **Radio** does the best job of describing its audience.
- **Radio** gets the most attention.
- Radio's penetration is deepest.
- **Radio** costs less.
- **Radio** gets results.

Radio does the best job of describing its audience. Magazines and newspapers use "net-paid" circulation figures. These are comfortable indices on a space-buyer's desk, handy facts for an advertising manager. But they're really meaningless, as informed buyers of advertising will admit. They don't measure the audience the advertiser really wants to know about. Advertisers want to buy impressions—not just advertising!

Both newspapers and magazines have taken a cautious peek at the real size of the impressions they deliver to an advertiser. The facts were shocking—2% actual readership to a 70-line newspaper ad—a 5% average actual readership to a full-page black and white advertisement in Life. This was a hard story to tell to advertisers who were sold on printed media's favorite laisseez-faire basis, sometimes known as "transportation," most of whom firmly believed they were getting, as readers, the total radio audience.

It was, in fact, too hard a story to tell. Thousands of advertisers, large and small, have yet to hear the facts. Dozens of others are still accepting advertising agency coverage and cost comparisons which match this meaningless "net paid" data against radio's count of actual exposure to advertising.

Yet in the hands of every radio station equipped with a BMB measurement, or even with a diary study, telephone coincidental, or other form of audience measurement, is the best argument of all—a count of the audience to the advertiser's message. No radio salesmen has adequately represented his medium in a competitive situation until he has invited comparison on this basis.

Radio's research bill in its short 30 years of existence far exceeds the combined research investment of all other media since their inception. First really to care about the audience to its advertisers' messages, first to tailor its listener services to the proven likes and dislikes of its audience, radio has been and will apparently continue to be America's most open-faced advertising medium.

An experienced station and network salesman and station manager before he joined NAB, Mr. Mitchell has acquired a varied experience in competitive selling that puts him in a unique industry position. He augments that experience with service on newspaper advertising staffs and knows all the favorite answers of the space media.

At the autumn NAB district meetings he insisted that salesmen learn thoroughly the arguments of competitive media as well as those of network media. In this article, which is an abbreviated report on an article appearing in the 1956 Broadcasting Yearbook, he sums up the competitive situation, with basic information every salesman should have at his finger tips.

---

**Here's How To Beat Media Competition**

---

**Formulas for Computing Media Costs-Per-Thousand**

- **To Compute Radio's Cost-Per-Thousand:** Find the audience (number of people) to a specific radio program. Divide this figure into the time cost. Result: The actual cost of making a thousand advertising impressions on listeners to that program—not to the entire station program schedule.

  - **Formula:**<br>  \[ \text{Time Cost} = \frac{\text{Program Audience} \times \text{impressions}}{\text{Actual Cost-Per-Thousand}} \]

  - **Program Audience impressions**<br>  Translate newspaper "net paid" circulation by multiplying circulation by 2.3 readers per copy (a most generous multiplier). Reduce this readership total to the actual audience of the program of record, advertisements (Newspapers can now furnish this data). So can

  - **Actual Cost-Per-Thousand impressions**<br>  To Compute Magazines' Cost-Per-Thousand: The same formulas used to compute newspaper cost will work on magazines.

---

**83 million radios in 39,280,000 homes**

---

**52 million newspapers combined daily net paid**

---

**24 million magazine homes (eight leading)**

---

**There are no skeletons, no "reducible factors" in radio's standard measurement totals.**

**Radio gets the most attention.**

In the average radio family, listening averages 5 hours 53 minutes daily. Newspapers' best claim, made by the defunct ANAN, reached 3 hours, 18 minutes per family per day but few papers care to try to document these figures.

**Statistics on Reading**

A recent diary study in a major market showed an average reading time of 56 minutes per day per adult—only 7 minutes of newspaper reading per day for those under 18. Magazines just don't belong in this league. A recent Saturday Evening Post survey, triumphantly disseminated by that periodical, claimed top readership among magazines with 2 hours 54 minutes of total reading per weekly issue.

Of all these attention measurements, only BMB's radio data seems to have been produced in the regular research channels by a continuing research arm of the industry. When other media get into this kind of self-examination, they do it in the manner of a woman with a "new look" short haircut—can't wait for it to grow long again.

The People Look at Radio, Radio Listening in America (both of them NORC studies available through NAB's Research Dept.), and the March 1949 Fortune study of radio listening, are good readings for the salesman who wants full (Continued on page 51)
**OVERTIME PAY**

**McComb Issues New Regulation**

OVERTIME pay need not be based on special talent fees in addition to regular pay, under a regulation issued Thursday by William R. McComb, administrator of Wage & Hour Division, Labor Dept.

The regulation was handed down under amendments to the Fair Labor Standards Act of 1938. These amendments were enacted by Congress last year.

Issuance of the regulation culminates a long fight by Richard F. Doherty, director of the NAB Employee-Employer Relations Dept., to eradicate a freak situation peculiar to the broadcasting-television industry.

**Unique Situation**

Under terms of the original law, broadcasters were required to include special commercial fees and some sustaining fees in the weekly pay figure on which overtime calculations were based in the case of announcers, actors, and others.

Mr. Doherty appeared before a House Labor subcommittee last March to protest the inequities in the law and their unfair hardship to broadcasters. As a result the House favorable amendments was included in the committee print of the 1938 law amendments and it was duly enacted by Congress. Since enactment, Mr. Doherty has conferred frequently with Federal officials in connection with drafting of the regulations.

The new overtime principle conforms to the general policy in AFRA contracts and AFRA did not contest the revision of the 1938 law.

The amendments include a general nationwide increase in minimum wages from 40 to 75 cents an hour. First requirement of the new rule of interest to broadcasters is that the extra payment affects "an employee having regular duties as a talent performer" who participates in a program or sustaining program or series of programs. Commercial spot announcements are included.

Second requirement specifies that the extra payment be made under an employment contract or understanding or a collective bargaining agreement, in a specific amount agreed on in advance of the performance.

**Extra Payment**

As defined by the administrator, extra payment means specific payment supplementing the straight-time and overtime compensation the individual earns for his ordinary duties.

Covered by the regulation are actors, singers, dancers, musicians, comedians "or any person who entertains ... and who actively participates in such capacity in the actual presentation of a radio or television program," but does not include script writers, standing directors, engineers, electricians or stage hands.

Not yet clear is the status of fees outside of stretch in lieu of original networks of the old law have been relatively few.

Overtime compensation applies to work in excess of 40 hours a week.

**Jelke Appoints BBDO**

JOHN F. JELKE Co., Chicago, a Lever Bros. division, has appointed BBDO, New York, to handle its advertising.

The company former-wise was handled by Tatham-Laird & Co., a Chicago agency which resigned the account when Lever Brothers moved its headquarters to New York. The company is said to be a more than a million-dollar account.

**McPhillips Named**

ARTHUR McPHILLIPS, traffic manager of WJR Detroit, has been named assistant sales manager by Harry Wismer, general manager and assistant to the president. A member of the WJR staff for 20 years, Mr. McPhillips has been in sales and sales management during the extended illness of Sales Director Arch Shawd. He will work under Mr. Shawd when the latter returns.

---

**ALL-RADIO FILM**

**Release Set for March 1**

GENERAL release date of the all-radio promotion film, "Lightning That Talks," was set last week as March 1 by the All-Radio Presentation Committee.

The film will be available to subscribers for local presentation on or after that date. The committee said it would begin confirming presentation dates to subscribers by Feb. 10.

Meanwhile it was announced that 25 new subscribers had been added to the list, representing an increase in total receipts to $125,900.

The committee, meeting Thursday at Broadcast Advertising Bureau headquarters in New York, pointed out that subscriptions would be closed to newcomers effective with the date of the local showing in each community.

Members of the committee last week were busy organizing an invitation list for the premiere of the film in New York March 1. A thousand leaders in radio and advertising will be invited.

---

**'RADIO BIBLE'**

**'50 Yearbook' Streamlined**

THE 1950 BROADCASTING - TELECASTING YEARBOOK, containing 544 pages of information pertinent to radio, television, advertising and allied fields, now is in the mails.

For the first time, the 1950 Yearbook merges all radio and TV stations into a single state-by-state list. In this improved form it is possible to see at a glance all the stations located in a city or state.

For the 2,257 AM, 790 FM and 111 TV stations authorized as of Jan. 1, 1950, this carefully compiled listing gives the call letters, date of establishment, facilities, name of owner, with business address and phone number, network, national representative, names of key personnel and such other information as transcription service, news service, and transmitters used by each station—alphabetized by state, city and call letters.

**Other Listings**

A similar listing is included for the U.S. possessions and territories—Alaska, Hawaii, Puerto Rico and the Virgin Islands—and Canada.

For quick reference other lists include: U.S. AM, FM and TV stations by call letters; U.S. stations by frequencies; Canadian stations by call letters and frequencies; stations under NARBA; Canadian and U.S. international stations; European stations; non-commercial FM outlets, and TV applications pending.

A complete analysis of 1949 radio-TV advertising expenditures (included in the Yearbook in Chapter 23). An informative article by Maurice B. Mitchell, director of Broadcast Advertising Bureau, compares radio results with those of other media and another feature piece covers the all important question of program ratings—in both radio and TV. A regular YEARBOOK feature, "How To Apply for a Radio Station," again is included, plus a summary of FCC rules and regulations.

In all, the 1950 YEARBOOK in cludes over 55 directories, providing data for all segments of the radio, television and advertising industry. Included among them are: Radio and TV station representatives of the U.S. and Canada; consulting radio and TV engineers; representatives of the U.S.; advertising agencies handling radio and video accounts, U.S. and Canada; national and regional radio and TV advertisers, including agencies of over 500 firms offering such services as transcription and film libraries, recording and script writing service, talent, production and syndicated programs; AM, FM and TV equipment manufacturers, including items that range from transmitters to cutting needles; stations identified with newspaper ownership; radio and TV reference books; major awards and citations; state broadcasters associations; stations under group ownership; professional and technical schools for radio and TV; frequency measuring services, and numerous other services related to the business of broadcasting.

**Advertiser Information**

A large section is devoted to the networks, giving lists of executive personnel with titles. Also included is a listing of advertisers for each network—AM and TV—plus a map showing the location of affiliated stations.

Radio and television highlights of 1849 are covered in chronological order. Other sections of the 1950 YEARBOOK are devoted to members of the radio correspondents galleries of Congress, the National TBA and other radio and television groups, and unions active in the radio-TV fields.

Copies of the 1950 BROADCASTING TELECASTING YEARBOOK now are in the mails to BROADCASTING subscribers. Additional copies are available at $5 each from Washington headquarters, 870 National Press Bldg.
FCC's POWERS?

Anti-Trust' Hearing Set

ON THE HEELS of a court decision affirming its right to pass upon a newspaper applicant's alleged monopolistic practices, FCC last week took an oral argument for the first time on a petition to suppress all violations of any U. S. law unrelated to radio.

Upon the outcome will depend FCC's action on some 30 or 12 applications currently being held up because of the application of its policy toward violations of any U. S. law unrelated to radio.

FCC's order suggested that parties to any oral argument cover "at least" the following points:

1. The authority of the Commission to consider in its licensing of broadcast applications an applicant's violation of the antitrust laws has been found to have violated U. S. laws on monopoly, restraint of trade, unfair competition and the like.

FCC's order suggested that parties to any oral argument cover "at least" the following points:

1. The authority of the Commission to consider in its licensing of broadcast applications an applicant's violation of the antitrust laws has been found to have violated U. S. laws, other than the Communications Act of 1934 as amended. If the Commission was without authority for any basis in policy for not considering such violations.

2. The Commission has such authority, and there should be a difference in procedure or result in any of the following types of situations. In this connection, consideration should be given to the situations involving both comparative hearings and non-comparative hearings:

(a) Whether the finding of the violation is in a civil or criminal case; (b) whether the finding of violation is by the U. S. Supreme Court or by a lower federal court; (c) where, after the finding of violation, a decree is entered by the court which results in the elimination of the practice which was a violation of federal law; (d) there where there has been no finding of violation but a suit has been filed alleging a violation; (e) where there has been no finding of violation but a suit has been brought, the Commission is in possession of information which shows that there has been a violation of a federal law.

Persons wishing to participate in the argument, FCC said, must file a notice accompanied by a brief or memorandum by Feb. 6. They will be permitted to "address themselves to any and all points they deem relevant."

Anti-Trust Laws

The study stems from a 1948 Supreme Court decision holding the major motion picture producers to be in violation of the anti-trust laws, (Broadcasting, Oct. 19, 1948). FCC made plain shortly afterward that it was considering the question of whether a violation of anti-trust laws is qualified to operate as a basis for a broadcasting license.

Among those whose applications have been held up or acted upon conditionally pending a decision on the policy question are Paramount Pictures, which has now petitioned for regular license, and a number of other applicants of compliance with its decree in the anti-trust case; Allen B. DuMont Labs., because FCC has tentatively held that Paramount's 29% interest amounts to control of the company; Schine Chain Theatres, which owns WPTR Albany; 20th Century-Fox Film Corp.; Westinghouse Electric Corp., and General Electric Corp.

FCC's order came Thursday, just three days after the U. S. Court of Appeals for the District of Columbia upheld its right to deny a newspaper's radio application on grounds of monopolistic practices, whether the specific practices are forbidden by law or not.

The court said Monday in a unanimous decision affirming the denial of AM and FM applications of the commonly owned Mansfield Journal and Lorain Journal in Ohio [Broadcasting, July 19, 1948]:

"We hold...that it was fully within the Commission's jurisdiction to hear evidence on the alleged monopolistic practices of the applicant, and if such practices were specifically forbidden by statute, and to deny the licenses upon its finding that such practices had in fact taken place and were continued into the operation of the radio station."

FCC had ruled that the Mansfield Journal, only newspaper in Mansfield, attempted to coerce advertising contracts and to refrain from using the rival WMAN Mansfield. The Commission also held that the Journal showed hostility toward WMN by refusing to carry its program logs and by failing to print anything favorable about the station.

The purpose, FCC said, was to suppress competition and secure a monopoly.

Denial Theory

The Lorain Journal application was denied on the theory that its owners, if they could not be entrusted with a station at Mansfield, should not be allowed to operate one at Lorain. Both newspapers are owned by Isadore and S. A. Horvitz. Spokesmen said there has been no decision on whether to seek Supreme Court review of the appeal.

The Lorain Journal meanwhile is awaiting court trial in Ohio on a Justice Dept. charge of violating anti-trust laws via alleged monopoly practices affecting WEOL Elyria-Lorain [Broadcasting, Dec. 12, Nov. 21, Sept. 26, 1948]. The Justice Dept. lost its bid for a pre-liminary injunction against the newspaper pending trial of this case.

In the FCC case the court's opinion, written by Judge George T. Woodbridge, relied on Judges Wilbur K. Miller and David L. Bazelon concurring, rejected the newspapers' claim that FCC had violated the rights of a free press. Said the court:

"...The Commission did not deny the license merely because the newspaper refused to print certain items for its station, to serve competing advertisers, but rather because the Commission concluded that those practices, when considered for the purpose of suppressing competition, would be likely to restrain trade and to monopolize news and information in the community. Similarly, it would appear that Mansfield was not denied a license because it used its position as sole newspaper in the community to achieve a monopoly in such advertising. Such a denial does not constitute a violation of the First Amendment.

"...Surely...the way the newspapers are competing, not only with the usual media of announcement, but with other media of communication, is material. The Commission did not attempt to censor the editorial policy of the newspapers, but merely its order does not require Mansfield to cease from any of the practices enjoined, but seeks the purpose of forbidding those practices. The Commission's findings was to determine the appellant's qualifications to become a license holder, not whether they implied no right of the appellant.

Nor did the court agree with the newspapers' view that FCC went beyond its authority with respect to the anti-trust laws, or that the decision was not intended to find the papers guilty of a crime without a trial by jury.

Cite Congression

"The fact that a policy against monopoly has been made the subject of criminal sanction by Congress as to certain activities does not preclude an administrative agency charged with furthering the public interest in holding the general policy of Congress to be a good reason for not permitting the Commission to impose this policy and on it to discharge its duties," the court said. Further:

"Monopoly in the mass communication of news and advertising is contrary to the public interest, even if not in terms prescribed by the anti-trust laws."

FCC's decision in the case was reached on a 3-2 vote, Comrs. Jones and Webster and Hennock not participating. The Mansfield Journal was applying for a 250 w daytime grant on 1510 kc and also for an FM station, while the Lorain newspaper, applying for a 250 w daytime on 1140 kc.

The case was argued in December [Broadcasting, Dec. 19, 1949], with Comrs. Randan, Goldman, and Cott, acting as a constant of counsel in charge of litigation, and Richard A. Solomon, chief of the litigation branch, argued for FCC. George O. Sutton and William Convson argued for the newspapers, and William A. Porter appeared on behalf of Fostoria (Ohio) Broadcasting Co., which has a pending application for the facilities which the Mansfield Journal was seeking.
NAB CONVENTION

THREE-DAY Management and three-day Engineering Conferences, along with half-day FM and full-day independent station sessions, will top the week-long NAB convention to be held April 12-19 in the Stevens Hotel, Chicago.

The special FM meeting will be held 9:30-10 noon, Monday, April 17, with the formal gavel-pounding scheduled at the noon luncheon. As was the case last year, independent stations will have their own meeting Sunday the 16th, with special registration.

Schedule of events for the 28th annual convention was drawn up by the Chicago, chairman; Charles C. Feeney, WTMJ, Milwaukee, Wis., and James D. Shouse, WLW Cincinnati.

Sitting with the committee were NAB staff officials including C. E. Arney Jr., secretary-treasurer; Robert R. Rich, director, public affairs; Neal McNaughton, engineering director; Everett Dillard, KOZY Kansas City, a board member, attended the portion of the meeting at which FM was discussed.

The week opens with registration Wednesday, April 12, for the Engineering Conference. Business meetings will be held Thursday, Friday and Saturday. Only Sunday event, aside from registration for the Management Conference and the customary side meetings, is the independent session.

Management Sessions

After the Monday morning FM meetings, management sessions will be held through Wednesday morning. The Wednesday meeting, adjoining at 1 p.m., will be devoted to television. The annual banquet will be held Tuesday evening.

Space is being allotted under direction of Arthur C. Stringer, NAB special services director, for the annual exhibition of equipment in the basement lobby of the Stevens. Later space will be assigned on the fifth floor for light equipment exhibits of transcription firms and other associate members.

In its discussion of plans for the FM meeting the NAB board committee rejected a proposal for an all-day session on Saturday, the 16th. The committee agreed many of the FM station executives who planned to attend the management sessions might not be able to arrive in time for Saturday discussions.

Instead of Saturday the committee picked Monday morning, with the understanding the FM meeting must break up before the opening luncheon. Besides, a Saturday meeting would have required an extra registration fee.

Interest in the FM meeting is expected to be high in view of the recent merging of FM Assn. into NAB. Among topics slated for the agenda are Storecasting, transit and functional (leased receiver) services, with many FM station managers now receive substantial income.

The question of AM-FM duplication will be taken up along with methods of promoting FM locally. Possible participants in the program will be representatives of Radio Mfrs. Assn. who would be able to discuss the present problem, and agency executives. Audience studies and mail-pull techniques are other suggested subjects.

Last year the first "Independent Dealers Day" drew a heavy registration. The day-long meeting was well attended and a long list of speakers covered a wide range of topics. Plans for the meeting will be taken up at a meeting of the NAB Unaffiliated Stations Committee, slated Feb. 23. Committee chairman is Ted Cott, WNEW New York.

WBT BLAST TRY

Police Hold IBEW Member

POLICE in Charlotte, N. C., early Monday morning charged Sterling L. Hicks, business manager of the IBEW local in that city, with conspiracy in the attempted dynamiting of WBT Charlotte's 429-foot radio tower Jan. 22.

Acting on a tip, police investigators uncovered five sticks of dynamite planted at the tower's base. After removing detonators, they waited for Chesley M. Lovell who, unaware of their presence, reportedly lit the fuses. Mr. Lovell, a Columbia, S. C., house-painter, said by police to have "a long criminal record," admitted Tuesday that he had been "hired" to dynamite the tower.

According to reports last Thursday, Mr. Lovell, upon further police questioning, had revealed additional information leading to the arrest early that morning of Mr. Hicks. WBT said Mr. Hicks was one of the technicians involved in a feud between the station and the IBEW culminating last fall in charges and counter-charges [Broadcasting, Oct. 17, 31, 1949].

Police said the questioning of Mr. Lovell had led to the arrest first of a nephew, Burris Boyd, also of Columbia, who, according to the reports, would be charged with introducing Mr. Lovell to Mr. Hicks.

Police Chief Stanhope Lineberry, of Mecklenburg County, disclosed two complaints had been placed against Mr. Hicks, charging conspiracy with Mr. Lovell to damage WBT property in gaining access to the tower, and in obtaining dynamite in an attempted use of explosives to damage another's property.
Howell is President Of New CBA

**REPRESENTATIVES** of 26 Colorado stations attended an organizational meeting of the Colorado Broadcasters Assn., held at the Broadmoor Hotel in Colorado Springs last Tuesday. Officers elected were: Rex Howell, KFJX Grand Junction, president; Robert D. Ellis, KGKH Pueblo, vice president; and Al Meyer, KMYR Denver, secretary-treasurer.

Business included naming a board of directors and approval in general of terms of by-laws drawn up by a committee consisting of Messrs. Howell, Ellis and Meyer and James Russell, KVOR Colorado Springs.

The groundwork for last week's session was laid during a meeting of station executives from Colorado at the NAB district convention held at Salt Lake City in December.

Active membership will be limited to licensed broadcast stations or those holding construction permits in the state of Colorado. Persons or organizations engaged in activities allied with radio broadcasting are eligible for associate memberships, without the voting privilege, it was stated.

The objective as outlined in the non-profit organization's by-laws, includes: "To promote cooperation and understanding among its members; to foster and promote the development of the art of radio broadcasting; to encourage and promote customs and practices which will be for the best interest of the public and the radio broadcasting industry."

The state is divided into five districts and one director is chosen from each for a two-year term. There are six stations in each district, except for District 2, which numbers seven. At last week's meeting the following board of directors was named:

**District 1:** (stations West of the Continental Divide) Mr. Howell District 2: (cities North of Denver) Doug Kahle, KCOL Fort Collins District 3: (Denver) Mr. Meyer District 4: (Colorado Springs, Pueblo, and Canon City) Mr. Ellis District 5: (other Southeastern Colorado stations) Ed L. Allen, KGW Alamosa.

In addition to those previously listed, the following attended the session:

Floyd Baskette, U. of Colorado; Raymond M. Beckett and Raymond M. Beckett, Jr., KLW Canon City; Frank Bishop, KFJX Denver; Justin B. Bradshaw, KLKR Lamar; John L. Buchanan, KYIN Denver; Dee B. Crouch, KDZA Pueblo; George Cory, KBUC Montrose; Jack P. Dubberstein, KLMO Longmont; C. L. Dynes, KGIF Alamosa; Con Hecker, KVOD Denver; Jack Hillchick, KCOL Fort Collins; Vic M. James, KVRR Salida; Elwood Meyer, KYOU Greeley; Dick Miner, KRAI Craig; Pat O'Brien, KIUP Durango; Bob Pye, KVOO Denver; Joseph H. Rohrer, KRDO Colorado Springs; Dale Scott, KCSJ Pueblo; Russell Shaffer, KBQL Boulder; Frank Schiff, KLAC Denver; Victor Singer, North Stepp. U. of Colorado; Hugh B. Terry, KZL Denver.

**NEW YORK FM Pool To Boost Medium**

FOUR independent New York FM stations have decided to pool resources to boost the FM medium by better programming, and Zenith Electronics, New York, has agreed to underwrite expenses of their first venture—a basketball series.

The series was announced last week by August A. Rickert, program director of WFUV-FM, Fordham U.'s station. The other stations, WGHR (FM) WFDW (FM) WQNY-FM, will carry the series and be permitted to find sponsors for the games as well.

Initial games in the series will be Cornell-Fordham, Feb. 1, from Wee Burn, Fordham College, Syracuse; Feb. 2, from Syracuse.

**KYA SALE**

**Signing Seen This Week**

PURCHASE of KYA San Francisco for approximately $200,000 was made by J. Elroy McCleary. The sale is reported by Mrs. Dorothy Schiff, publisher of the New York Post [Broadcasting, Jan. 23], was expected to be completed early this week with signing of legal papers to occur in New York. Sale is subject to FCC approval and Price includes $105,000 plus net quick assets.

Mr. McCaw is owner of KELA Centralia and with Mr. Keating, Westcoat station representative, is a shareholder in KPOA Honolulu and KLZ Denver. Mr. McCaw also is a stockholder in KMNL Kansas City; KBGC Bellevue, KYI Kansas City; KVOR Colorado Springs, Col., and KALE under construction in Richland, Wash.

Operating on 1260 kc with 5 kw day and 1 kw night, KYA moved to new studios in the Fairmont Hotel Bldg. Station was purchased by Mrs. Schiff in 1945 at a reported price of $400,000. At one time owned by KLAC and KLAC-TV Hollywood for $1,045,000. Shortly after Warner Bros. withdrew as purchasers of the package late last year, Mrs. Schiff announced the Hollywood stations were not for sale and withdrew them from the market. Don Feddersen is general manager of KLAC and KLAC-TV, and KYA recently active vice president in charge of Mrs. Schiff's radio property.

When transfer of ownership is made, it is understood that J. G. Gillard, President of KLAC, will continue as KYA general manager. Wilt Gunzenhoffer, general manager of KROW Oakland for the past four years, who joined KYA as commercial manager two weeks ago, is expected to continue in that capacity.

**Upcoming**

Feb. 4: Radio Correspondents Assn., annual dinner, Statler Hotel, Washington D.C.
Feb. 4, 5: TV Institute and Industry Trade Show, Terrace Club, New York.
Feb. 4-6: CAB board of directors, King Edward Hotel, Toronto.
Feb. 6, 7: CAB board of governors meeting, Ottawa.
Feb. 10-11: CBC board of governors meeting, Royal York Hotel, Toronto.
Feb. 16-17: Oregon State Broadcasters, Eugene, Ore.

**NAB GUESTS**

Canadians Study FCC Role

MEMBERS of a Canadian radio group observing the operation of U.S. radio stations have submitted to members of the FCC were among guests of NAB President Justin Miller at a stag dinner held last Monday at the Mayflower Hotel in Washington.

The Canadian guests, who will submit a report on radio regulation to the Royal Commission on Arts, Letters & Sciences, were Guy F. Herbert, member of the executive committee; Freda Johnson, Director of Operated Stations; Duncan K. MacTavish, attorney; Clifford Sifton, attorney and past owner of CKRC Winnipeg, the Winnipeg Free Press and other radio newspaper interests.

The dinner was described as a goodwill gesture designed to promote cooperation between Canadian and American broadcasters. Report on their findings will be submitted to the Royal Commission in April.

Guests at Judge Miller's dinner, besides the Canadian trio, were: FCC Chairman Wayne C. Combs. Paul Walker, Rosel Hyde, E. M. Schurman, Ed Greisinger; John L. Caldwell, attorney; Frank Bov, formerly counsel to the old Harvey Committee to investigate FCC; Clarence H. Lee, Transport Assn. of America; Col. J. Hale Steinman, the Steinman Stations; Philip G. Loucks, attorney; Kenneth Clark, Motion Picture Assn. of America; Sol Teinhofen, Broadcasting; Sen. Edwin Fostin- don (D-Col), chairman, Committee on Interstate & Foreign Commerce; Rep. Joseph P. O'Hara (R-Minn.); Robert Cresser Jr., administrative assistant to Rep. Robert Cresser (D-Ohio); Judge Oliver H. Hirt, Court of Appeals, D. C.; Judge Bolitha J. Laws, U. S. District Court, D. C.; Paul W. Morency, WITC Hartford.

NAB directors: Eugene S. Thomas, WOIC (TV) Washington; John S. Dillard, WAGL (PM); E. T. Byers, Jr., WAGL (PM); Mike, W. W. Rembert, KRLD Dallas, Harold E. Fellow, WEEL Boston; Clair R. McCollough, WGAL (PM); Howard T. Lillard, WASH (FM) Washington; Campbell Arnoux, WTAZ Norfolk, Va.

From the NAB headquarters staff: Neal McNaughton, engineering director; Forney A. Rankin, government relations director; Jack Hardy, Radio Division; George E. Markham, Television Division; Robert C. Richards, public affairs director; Don Petty, general counsel; C. E. Arney Jr., secretary-treasurer.

**Woods & Colton Change**

THE STATION representative firm of Helen Wood & Colton, New York, has changed its name to Lionel Colton, following the resignation of Miss Wood. The company remains at 551 Fifth Ave.

*Trade Mark
said, Columbus a improving KSEK nartnership vice KVAK sale the TIDE cisco.

Mr. Deal said, "Columbus basketball season this year, we said, over a total of 32 prominent independent stations plus the Intermountain Network of Idaho and Utah. The company has signed for exclusive broadcasting rights to the games of 17 leading colleges and universities in seven states. Remarkably on the commercial value of its sportscasts, Mr. Deal said, "We are aware of the large and interested audience we serve with these sportscasts and have made a special effort to increase the effectiveness of our commercial messages. We are using a new sales twist. In addition to the long familiar slogan, "Play Ball With Associated," we are using the new slogan, "You don't have to buy to be welcome." With this approach we call attention to both the quality of the dealers Flying 'A' service, and the willingness with which it is given.

SDG MEETING
Re-elect Glenn President

RE-ELECTION of Jack Glenn as president of Screen Directors Guild was announced following the organization's fifth annual convention in New York on Jan. 21. Mr. Glenn said the Guild's television research committee, headed by John Flory, will investigate the problem of improving television pictures.

In addition, a Guild meeting with eastern film producers will discuss the raising of picture standards, including television films. The Guild's public film forums will be held four times a year instead of two, and one will be dedicated entirely to television films. The Guild also will give an award to the best television film directed by one of its 125 members.

Others elected:
Dana Noyes, first vice president; Cullen Landis, second vice president; Leslie Noyez, recording secretary; John Flory, corresponding secretary; Warren Munson, treasurer; Joseph Hencher, Gene Martel, William Reinick, Herbert Kerckow, and Mel Shuler, members; and William Alley, Broder Peterson and Samuel Datlowe, auditing committee.

KVAK SALE
Transfer Is Completed

CONSUMMATION of sale of KVAK Atchison, Kan., to S. H. Patterson for $45,000 to Griffith-Brosnan Broadcasting Co. was effected Jan. 22. KVAK reported last week. Transfer was approved by FCC in early January. [BROADCASTING, Jan. 16.]

Mr. Patterson, was required to sell KVAK because of overlap with his KJAY Topola. New licensee of KVAK is a partnership of James M. Griffith, former manager of KSEE Pittsburgh, Kan., and Paul H. Buehning, ex-manager of WBBZ Ponca City, Okla. Mr. Griffith becomes KVAK general manager with Mr. Buehning as station manager. Peter Poast, program director and Lowden Gains is chief engineer. KVAK is assigned 1 kw on 1470 kc.

California Meet

CALIFORNIA STATE Broadcasters Assn., will hold its annual business meeting Feb. 17 at Roosevelt Hotel, Hollywood. Speakers will include Maurice B. Mitchell, director of the advertising bureau, New York; Richard Doherty, NAB director of employer-employe relation. Arthur Westlund, KRE Berkeley, will preside.

L. M. POAST
Joins Consulting Firm

EXPANSION of the Washington radio consulting engineering firm of Craven, Lohnes & Culver to include Laverne Poast as a partner was announced by the firm last week. The firm name is unchanged.

In the consulting engineering field for almost 15 years, Mr. Poast received his degree in electrical engineering from the U. of Wisconsin in June 1935. He was with Jansky & Bailey, Washington, from 1935 to 1941, except for nine months' postgraduate work in communications engineering at Ohio State U. in 1939-40. From 1941-44 he was in the radio section of the National Bureau of Standards.

He joined the consulting office of Worthington C. Lent in Washington in 1944, leaving in 1945 to serve with Columbus U. Division of War Research.

He received a certificate of appreciation from the War and Navy departments for "outstanding service" to the Office of Scientific Research and Development during the war years.

In 1946 he rejoined Mr. Lent as a partner in Lent & Poast. In April 1948, after dissolution of that firm, he joined Lohnes & Culver, which became Craven, Lohnes & Culver in January 1949 when former FCC Commissioner T. A. M. Craven joined the original partners, George M. Lohnes and Ronald H. Culver. Offices are in the Munsey Bldg.

WAYNE COY
To Address Oklahoma U. Meet

WAYNE COY, FCC chairman, has accepted an invitation to be principal speaker at the fifth Oklahoma U. radio conference, March 12-14.

"Broadcasting in a Competitive Democratic Nation" will be the theme of this year's conference, according to Dr. Sherman F. Lawton, dean of the Oklahoma U. School of Journalism and coordinator of radio instruction at Oklahoma U. Students from regional colleges and universities will share the conference with professional radio listeners and station personnel, Dr. Lawton said.

AP Officers Re-elected

ALL incumbent officers of the Pennsylvania-Delaware Associated Press Radio Assn. have been re-elected, the AP announced last week. They are Joseph E. Baudino of KDKA Pittsburgh, president; George Coleman, WGBI Scranton, vice president; Ed Orlist, WPEN Philadelphia, secretary; Jack Hooper, WHGB Harrisburg, 3d vice president, and Joseph Snyder, chief of the Pennsylvania AP bureau, secretary.
all this...

Baltimore

and Maryland too*

why buy 2 or more...
do one big job on "Radio Baltimore"

* WBAL covers the rich Baltimore area, Maryland, and sizable chunks of Virginia, Delaware and Pennsylvania — an area with over 4,225,000 people who spend more than $3,290,000,000 annually in retail sales.

Represented nationally by Edward Petry Co., Inc.
Feature
(Continued from page 12)
show also is unusual—advance billing for the program has been given in the somber Senate chamber and written into the Congressional Record. And the P. Lorillard Co., which will relinquish announcements for the two shows, is paying all expenses as a gesture to enrich the heart drive’s fund.

In its sundry talent the program will have Vice President Alben W. Barkley and probably Mrs. Barkley. Producers at deadline were counting on the nation’s famous newlyweds to render a duet of “Wagon Wheels.” Both Democrats and Republicans will forget this is an election year and promote their musical abilities; the military’s high brass will be unified on the harmony issue.

Mr. Mack told Broadcasting the VIPs are certainly “a fine bunch” with which to work. Cooperation, he said, is 100%. However, as the men set dates during the three weeks of rehearsals in Washington’s Hotel Willard will attest, sometimes Congressional committee hearings can stampede schedules.

List of headlines on the show reads more like a page out of the Congressional Directory than a theatre’s cast. House Speaker Sam Rayburn (D-Tex.) will sit beside Ted Mack to ring the gong. Barbershop quartets consist of Democratic Reps. Oren Harris (Ark.), Tobey Morris (Okla.), J. Frank Wilson (Tex.), House Whip Percy Priest (Tenn.), leader; Republican Reps. Harry L. Towe, Millet Hand (both N. J.), Frank Fellows (Me.), Minority Whip Leslie C. Arends (Ill.), leader. Director of both teams is Secretary of the Interior Oscar L. Chapman.

A Navy trio, featuring an admiral and captain at the piano and Capt. W. Gordon (Slim) Beecher Jr., USN, composer of “Of Old Hawaii,” on the guitar, makes up a specialty act. Advance notices are enthusiastic. As Lou Goldberg, producer, puts it, “There’s been a lot of necessary pushing around. But the VIPs don’t mind it a bit. They’re cooperative and helpful—real diplomats.” Working with Mr. Goldberg is Director Lloyd Marx.

Special Train Planned
The entire program will be about 2½ hours with 45 minutes devoted to actual broadcast. Mr. Mack said the format conforms to his regular show with telephone numbers given for voting, the usual interview and then the acts in sequence. The Feb. 2 show will be held at Washington’s Constitution Hall. The TV program will originate in New York at the International Theatre at Columbus Circle.

THE SOUTH BEND MARKET MUST BE COVERED...AND ONLY WSBT COVERS IT!

WSBT completely covers this market—and what a market! Its heart is South Bend and Mishawaka, two adjoining cities with a combined population of 157,000. The total population of the South Bend market is over half-a-million, while 1948 retail sales totaled more than half-a-billion dollars!

In addition to its complete coverage of the South Bend market, WSBT’s primary area includes another million people who spent 911 million dollars in retail purchases in 1948!

The South Bend market is one of America’s biggest and best. It must be covered! It is covered by one station—and only one. No other station, Chicago or elsewhere, even comes close.

WMCA Spans Atlantic
PORTSMOUTH, England, recently was reported in the listening range of WMCA New York. The station received a letter from R. T. Coales of Portsmouth, who congratulated WMCA on “putting such a nice signal into Portsmouth.”

Two special train cars and an airplane are reserved for Feb. 7 to transport VIPs who will appear via video. There will be an “aftershow” that night as well. Proceeds from both shows will go to the heart fund.

A highlight of the broadcast is the Celebrity Symphony featuring tubas, washboards, buzz fiddles, harmonicas, mandolins, etc. High ranking officers of all services, including Gen. Carl (Toey) Speatz, former Air Force chief, will participate. Rep. Louis C. Rabaut (D-Mich.), a tenor who sang his way to Congress in 1934, will be soloist. In the group is Paul Porter, former OPA Administrator, one-time FCC Chairman, and now an attorney practicing before the FCC. He will “thump a tub.” Theme is a Washington parody on “Camptown Races” led by Sen. Estes Kefauver (Tenn.), wearing the coonskin cap with which he campaigned for his Democratic seat in the Senate.

A “Capital Chorus,” made up of Senators and House members, includes Sens. Robert A. Taft (R-Ohio) and Claude Pepper (D-Fla.) and both barbershop quartets. Also on the agenda is an imitation of Winston Churchill by Rep. Dewey Short, Missouri Republican. Rep. and Mrs. Daniel J. Flood (D-Pa.) will present the “budget scene” from “Life With Father.” Rep. Reva Beeck Bosone (D-Utah) will sing. Rep. Frances P. Bolton (R-Ohio) will sing “Brahm’s Lullaby.” Finale will be an onslaught of voices of some 150 persons.

Repeats for Video
Among other personalities listed are Gen. Anthony (Nuts) MacAuliffe, of Bastogne fame; Mme. Henri Bonnet, wife of the French Ambassador, who will model a “sassy” fashion hat shipped special from Paris; Beverly Farrington, daughter of Joseph Rider Farrington, Hawaiian delegate to the U.S., who will do an original hula-hula. Many of the more pictorial acts will be in the radio show’s after-schedule while some may be shown over TV.

Rehearsals turned Capitol Hill and some embassies a bit closer to Tin Pan Alley and most likely a “first” was registered in Secretary of the Senate Leslie Biffle’s office in the Capitol last week when a group of Democratic Senators went over a number for the radio show.

In the Congressional Record, Sen. Alexander Wiley (R-Wis.) announced the broadcast, date, place and time and commended both Ted Mack’s organization and Old Gold cigarettes for their efforts.
RCA Remote Amplifier
Type BN2A
— with self-contained battery kit

Now— this remote amplifier
✓ operates from a self-contained battery
✓ operates from an a-c line

Here it is— RCA’s Portable Remote Amplifier type BN2A, with the new self-contained battery kit. It is the same in every respect as the standard BN2A amplifier, but it provides instant selection of a-c or battery operation—with everything in one package, batteries and all.

The new self-contained battery kit is actually a top cover which replaces the one on the standard amplifier. The kit includes: a-c receptacle, ac-dc selector switch, battery holder, new cover, and handle—yet the assembly is so compact that it adds only ½-inch to the overall height of the original amplifier.

NEW LOW PRICES* Type BN2A
- With standard cover . . . $425.00 (less tubes)
- With self-contained battery kit . . . $462.00 (less tubes and batteries)

Take advantage of the best buy in remote amplifiers . . . at new low prices. Order your BN2A Remote Amplifier . . . either the standard or the self-contained battery model . . . from your RCA Broadcast Sales Engineer. Or order from Dept. 19AE, RCA Engineering Products, Camden, N. J.

NEW REDUCED PRICES
- Look below—and compare!

SPECIAL! New Battery Cover Kit—
— for owners of the standard BN2A Remote Amplifier
✓ Remove present cover
✓ Slip new kit cover into place
✓ No tools needed

PRICES*
Battery Cover Kit (less batteries), MI-11279 . . . . $37.00
Standby Battery Kit, MI-11281 . . . . . . . $7.66
*Prices apply only within continental U. S. A.
Howard To Amend
ROYAL V. HOWARD, consulting engineer and ex-director of NAB's Engineering Dept., last week petitioned FCC to amend his application for a new station in Honolulu so as to request 860 kc in lieu of presently specified 580 kc, with 250 w fulltime, and to remove the bid from hearing with record of request from Island Broadcasting Co. for 850 kc at Hilo. In early January Mr. Howard received a grant of his bid but FCC later withdrew the authorization when it learned of the Island Broadcasting request, designating the two for hearing.

Dear Time Buyer:

In 1949 more advertisers used WCKY (346 to be exact) than at any time in our 20 years of service. There is only one reason for this large increase in advertisers. They have found that they reach more people for less money.

FIFTY THOUSAND WATTS OF SELLING POWER
**Editorial**

The Rich, Full Life

ONLY ONE conclusion can be reached in reading Life's announcement that in 1949, for the second successive year, the magazine's gross advertising bill was bigger than those of any other single medium—$12 million more than the runner-up, NBC.

The conclusion is that Life is priced too high; plainly its numerous advertisers must not think so. The conclusion can only be that radio is too cheap.

In 1949's first nine top billing media, based on authoritative Publishers Information Bureau figures, the national weekly, and five magazines. Life leads everyone. Life and the Saturday Evening Post lead ABC and Mutual. Life, Saturday Evening Post, Time, The Ladies' Home Journal and the American Weekly.

The vexing conundrum of this situation is why a national radio network should be led by anyone at all. Compare the products:

Once a week Life delivers 5,200,000 copies of a magazine that runs more than 300 pages. Every day a nationwide radio network delivers around 18 hours of programming—available to a majority of 42,000,000 radio homes. Precise statistics on network listenership are not available, but one can estimate the devastating CBS estimate of last year that its aggregate weekly audience was 99 million.

It is doubtful that the most imaginative Life researcher could multiply that magazine's readership to an aggregate of 18 hours a day to figure that the most modest network can claim.

Yet Life's total gross billing in 1949 was $76,346,727. NBC's was $64,031,296 and CBS's $61,064,585.

The Saturday Evening Post, a weekly with a circulation of slightly more than 4 million, had gross billings of $59,259,119. ABC's were $42,542,854.

Other magazines also were ahead of Mutual in 1949. Time, with a weekly circulation of little more than 1.5 million, billed $25,771,532. The Ladies' Home Journal, a monthly of just under 4.5 million circulation, billed $22,745,926. The American Weekly, claiming more than 9.8 million circulation, billed $18,369,671. Mutual billed $18,078,696.

It is not necessary to inquire more deeply into a comparison between radio and magazines to conclude that a network that distributes 18 hours of programming every day to untold millions of Americans is priced at bargain basement shopper. It is acting with no regard for realism if it fixes its rates as though its appeal were so confined.

**Stiletto Out; Machete In**

RADIODOM didn't have long to wait.

Last Tuesday, Rep. Sadowski (D-Mich.) dropped into the hopper his bill (HR 6949) to amend the Communications Act of 1934. This would put the House to a measure that distributes 18 hours of programming every day to untold millions of Americans is priced at boom basement shopper. It is acting with no regard for realism if it fixes its rates as though its appeal were so confined.

It unfortunately is true also that the very presence of this kind of bill can kill good legislation like the McFarland Bill.
CONFLUENCE*

where the CONFIDENCE
of millions meets the
INFLUENCE that sells!

The wholehearted CONFIDENCE of the world's richest and largest Italian market and the INFLUENCE of the station that has been part of the fabric of their lives for so many years form one great potent force that results in sales.

True enough, you speak to over 2,100,000 listeners with active buying power. But far beyond these statistics is the greater strength that makes your sales message a compelling force. It is the trust, the respect and the deep affection of these families for WOV.

It is all this CONFIDENCE plus WOV's great INFLUENCE that gives you CONFLUENCE — the plus delivered only by WOV.

* Act of flowing together... the meeting
or junction of two or more streams...

Respects
(Continued from page 38)
later to the day, Mr. Hanna was named manager of WGY WGF and WRGB.

His first real introduction to radio had come during the hey-day of the Bowles. Mr. Hanna, in conjunction with G. Emerson Markham, former manager of GE’s Schenectady station and now head of NAB’s Television Division, devised a series of community talent contests. Touring upstate New York, the two contacted various GE dealers throughout the area, arranging the amateur talent series. This series culminated with a broadcast in Schenectady with district talent winners participating. From then on, Bob Hanna gave a little more thought to the idea of entering radio.

Guiding the three GE stations takes more than a share of Mr. Hanna’s time. He manages, however, to serve as a vestryman at St. George’s Episcopal Church, a member of the Chamber of Commerce, a member of the Better Business Bureau’s board of directors, and he is a past president of the Lions Club.

Mr. and Mrs. Hanna—she is the former Elizabeth Anderson of Toledo, Ohio—were married in 1930. They have three children. Fourteen-year-old Judith is musically inclined. Bill 16, devotes much of his energy to high school sports, especially track and baseball. The eldest, Robert III, 18, is a student at Clarkson College of Technology where he is majoring in mechanical engineering.

An admirer of the outdoors, Mr. Hanna puts the emphasis on golfing, gardening and flowers. Nowadays, he admits, fishing in some Adirondack lakes cuts into his golfing time.

Bob Hanna’s philosophy of station operation was outlined clearly and with simplicity in his statement upon assuming the management-ship of WGY WGF and WRGB. He said: “There will be no fundamental change in the philosophy of the General Electric stations. We will continue to serve you as we have for the past 27 years, the kind of entertainment information or programs, that you wish to have. We realize that we are coming into your homes at your invitation. We appreciate that privilege and hope to leave you with the desire to invite us in again and again.”

WKTY to ABC
WKTY La Crosse, Wis., will become an ABC affiliate May 7, replacing WLCX. La Crosse, a 250 watt station, the network announced last week. WKTY operates fulltime with 1 kw on 580 kc and is managed by Verl Bratton.

What Population Figures Do Agencies Use?
A survey by the Metropolitan Group found that 21 out of 22 leading advertising agencies use population figures from—

SALES MANAGEMENT’S “Survey of Buying Power.”

(1950 issue May 10; Reservations Close Feb. 17; Copy March 10)

**WLIB EDITORIALS**

Reports FEPC Stand Praised

WLIB New York reports a heavy response to its three-day editorial series on behalf of a national Fair Employment Practices Commission. Station says it has received hundreds of letters praising the campaign for civil rights [Broadcasting, Jan. 23].

In broadcasting its editorial position on FEPC and civil rights, WLIB claims it is one of the first stations in New York to take advantage of the FCC’s relaxation last June of the Mayflower rule, which now permits broadcasters to editorialize.

**WCCO Transmitter**

NEGOTIATIONS covering purchase of a new Western Electric 50 kw AM transmitter by WCCO Minneapolis-St. Paul, CBS outlet, are nearly completed, Wendell B. Campbell, WCCO general manager, has announced. Installation of equipment is expected to begin soon, with new facilities to be used sometime this summer. Transmitter will be installed in the present WCCO building at Anoka, Minn. Replaced Western Electric equipment will be used as an auxiliary transmitter, according to present plans. Station also plans to use present tower-type antenna system and install a new transmission line.

**GROcer BOY...**

DULUTH, MINN.—"I deliver the goods in America’s 51st Food Market," says Otto Mattick from his radio rocket cruiser. He's right. With KDAL’s dominance of the audience in the Duluth-Superior Market (see Hooper, any report) KDAL is the outstanding medium to sell food products in this heavy eating area. With KDAL’s Certified Promotion back of your radio campaign, your sales per radio dollar will amaze you. Got a food product you’d like us to sell for you?

**Lew Walker**, announcer and continuity writer, KBFB Great Falls, Mont., named program director succeeding W. J. Towner, who continues as assistant manager of station.

**Mrs. Bee Reed**, formerly traffic manager at WKNB New Britain, Conn., joins WTVM St. Johnsburg, Vt., as traffic manager. She replaces Rose Varner, resigned.

**Lou Tinney** joins WCBS Amsterdam, N. Y., as fulltime staff announcer. He formerly was with WGN Glens Falls, N. Y.

**Art Thorsen**, former script editor at Footle, Cone & Belden, Chicago, joins continuity staff at WBBM Chicago. He now writes The Billy Leach Shows, Show Time Tune, Music Please, Rhyme Does Pay and The Meadow-Larks Show.

**Harold Cohen**, drama critic for Pittsburgh Post-Gazette, will do show, Critic’s Column, Sunday, 6:45 p.m., on KDKA Pittsburgh.

**Ben Park**, producer of national award winning Chicago documentaries, It’s Your Life and Report Uncensored, joins program staff of WNBQ (TV) Chicago Feb. 1 as producer. He will create and develop all new NBC TV and radio program.

**Dan Petrie**, who joined staff three weeks ago, is Mr. Park’s assistant. He formerly was assistant professor of speech at Creighton U. and educational director, of WOW and WOW-TV Omaha.

**Fred Pemberton**, formerly sports and special events commentator for BBC in Manchester, England, and with commercial staff of CKSF Cornwall, Ont., since Dec. 5, appointed program director for CKSF.

**Dorothy Folsom**, new to radio, joins WPAY-AM-FM Portsmouth, Ohio, as continuity writer.

**Robert L. McKee** joins WGN Chicago announcing staff. He formerly was with WCAE Pittsburgh.

**Ross R. Rowlands**, formerly of CKCW Moncton, N. B., and later with CKDO Oshawa, Ont., returns to CKCW as program director.

**Preston Stone**, director of special events at WPTZ (TV) Philadelphia, appointed manager of program operations for station.

**Joby Reynolds**, formerly of Joby and Swong show on WOL Washington, becomes star of Joby Reynolds Show on WTO in that city; 10:35-11 p.m., Sunday.

**Lee Carmichael**, formerly of KWDM Des Moines, Iowa, joins WKK St. Louis announcing staff, replacing Lee Cavanagh, resigned to enter his own business.

**Frank Butler**, formerly of KFAM St. Cloud and KSTP Minneapolis, Minn., joins WCCO Minneapolis as announcer. He formerly was with WCCO, but left in 1949 to attend to business.

**Jerry Crocker**, formerly operations manager of WIS A Butler, Pa., named head announcer and featured disc jockey of WCUE Akron, Ohio.

**Herb McFarland**, formerly of WPNC Fayetteville, N. C., joins announcing staff of WKIX Columbia, S. C.

**Norm Fisher**, formerly of announcing staff of KBFF Great Falls, Mont., and before that publicity director of CJOC Lethbridge, Alta., resigns from KBFB to join KGEL Kalispell, Mont., as program director.

**Bill Browne, Jackson Weaver** and **Gill Hodges**, producer, announcer and writer respectively on The Navy Hour. Saturday, 11 a.m., over ABC and WMAL Washington, awarded citations by Navy. All are staff members of WMAL.

**Doug Setterberg**, producer-announcer for KOMO Seattle, has penned "He’s a Scandinavian Hot-Shot" and "Sewed Up in My Winter Underwear," of novelty songs. Numbers have been recorded.

**George Fischer**, of Columbia Pacific Network news writing staff, is the father of a girl.
This is it in a nutshell!...

Graybar recommends the sensational
21B microphone

...because it combines unparalleled technical qualities plus the advantages of inconspicuousness. It doesn't obscure the performer's countenance. Suspended over a radio or TV stage, it blends into the background. It can be hidden easily in stage props. Yet with all these advantages of the Altec 21B's minute size, you not only don't sacrifice technical quality—you actually gain a new order of perfection in performer-freedom, in fidelity, and in frequency response. Moreover, this miniature masterpiece is blast-proof, shock-proof, omnidirectional ... and, well, let your Graybar Representative tell you the rest!

For uses where the cardioid type of mike is desired, Graybar has the long-preferred Western Electric 639A and 639B. And the well known dynamic type 633A will continue to be made available through Graybar by Altec.

Graybar has everything you need in broadcast equipment ... PLUS everything for wiring, ventilating, signaling, and lighting for your entire station and grounds! Whatever your requirements—to get the most suitable items most quickly, call your nearest Graybar Broadcast Equipment Representative. Graybar Electric Company, Inc. Executive offices: Graybar Building, New York 17, New York.
JOHN F. HOGAN, recently manager of Newell-Emmett's industrial department, establishes his own consulting service on industrial and trade advertising. Service, located at 545 East 77 St., New York, is offered to both agencies and industrial companies—latter on basis strictly non-competitive with agencies.

ELECTROVOX Co., East Orange, N. J., announces production of new shape phonograph needle tip which will play both microgroove and standard record grooves with equal fidelity, firm claims.

LEE McCANNE, vice president of Stromberg-Carlson Co., Rochester, N. Y., elected president of Rochester Chamber of Commerce.

ALLIED RADIO Corp., Chicago, announces release of new, low-priced magnetic tape recorder. Unit is light and compact and has list price of $99.50.

BARGAINS'

Close Scrutiny Planned

CLOSE SCRUTINY of radio commercials offering sensational "bargains" is being planned by the Better Business Bureau of New York City, according to Hugh R. Jackson, president, in the BBB's monthly memo.

Mr. Jackson noted that a recent radio commercial offering "sensational five giant inflated toy animals" for a dollar brought the Bureau a flood of complaints. Such listener reaction has inspired the "close scrutiny" policy, he indicated.
HERE's hats off to the press and radio!

The newspapers and radio stations of America did an outstanding job of helping their readers save their lives and property from the devastating effects of needless fires in 1949.

The press and radio have campaigned for better fire departments, better water supplies, and greater public consciousness of the danger of fire.

To honor those newspapers and radio stations whose public service efforts in this field have been most outstanding, the National Board of Fire Underwriters again in 1950 will make its Gold Medal Awards.

A Gold Medal or $500 in cash will be awarded to the daily newspaper, weekly newspaper and the radio station which, in the opinion of impartial judges, has contributed most to the betterment of its own community through public service in fire prevention.

Newspapers and radio stations which conducted public service campaigns in fire prevention during 1949 are invited to submit exhibits. Exhibits should be in scrap book form and mailed before Feb. 28, 1950. Exhibits should cover the calendar year 1949.

A nomination blank is being mailed to all newspapers and radio stations. If you do not receive one, or wish further information, address Gold Medal Awards, National Board of Fire Underwriters, 85 John Street, New York 7.

Hearing on 3 Bills
(Continued from page 19)
and staff have spent a substantial amount of time on general frequency allocations problems and international negotiations, and observed:

"It is my hope that my proposal to create a Frequency Control Board will so solve the wrongheadedness of the Commission that the backlog can be eliminated and that the Commission can become current in its work."

Rep. Sadowski said he had no criticism of present operation involving the relationship of FCC and IRAC, and thought they should be congratulated for having operated "this inadequate machinery so long without a serious breakdown."

Charges Recalled
But he called attention to charges that private applicants have "come out second best," and that FCC has been given for distribution involving the relationship of FCC and IRAC, and thought they should be congratulated for having operated "this inadequate machinery so long without a serious breakdown."

He said his proposal was in line with a recent House Select Committee, under Chairman Clarence Lea in 1945, which felt that before power to make assignments to government stations is delegated to an independent body, Congress should review the whole question.

Regarding sanction provisions in his bill, Rep. Sadowski noted that the only present punishment for violation of FCC rules is revocation, and cited the Commission's recent Don Lee decision in which it voted for license renewal for want of a penalty less severe than a "death sentence" [Broadcasting, Jan. 2].

The Sadowski Bill would authorize FCC to revoke licenses or permits, or to suspend licenses for a period up to 90 days for false statements knowingly made to the FCC; conditions which would have warranted denial of an original application; wilful or repeated failure to conform to license requirements or FCC rules, and for violation or failure to observe cease-and-desist orders.

Revocation or suspension proceedings could also be instituted against station licensees, permittees or networks tending to "induce or coerce" other licensees or permittees to violate FCC rules and regulations, or to follow a "course of action" which would justify denial of license or permit.

Forfeitures up to $500 per day for any offense could be demanded by the Commission in lieu of suspensions or revocations, and in cease-and-desist actions could be levied in addition to such orders. Cease-and-desist orders and revocation or suspension must be preceded by a show-cause order and opportunity for hearing.

Rep. Sadowski made plain, with respect to FCC Chain Broadcasting Regulations, that he wants informers to come from owners of networks, broadcasters, and the Justice Dept. on allayed monopolistic practices of networks.

Some Provisions Opposed
Additionally, he made clear that he opposes provisions of the McFarland bill which he contends might "loosen up" anti-trust restraints.

Under the McFarland bill, FCC would be divested of revocation power over licensees whom the courts have found guilty of anti-trust violations (though the courts could revoke as an additional penalty, and FCC consideration of a licensee's qualifications to the FCC would not be impaired), and thus eliminate one phase of the "double jeopardy" which broadcasters have long opposed.

Rep. Sadowski's proposal to render licensees immune from any political libel action in any court—local, state or federal—seeks to eliminate the conflict between state libel laws and federal law against censorship, as envisioned in FCC's proposed Port Huron decision. The licensee would remain civilly and criminally liable, however, for any statements made by him or anyone under his control.

Sec. 315 of the Communications Act would remain unchanged in that licensees, once having agreed to permit use of their stations, may not alter for the committee real or potential material, nor could they refuse equal time to opponents.

The decision to hold hearings was confirmed after the executive meeting. While members generally felt hearings were desirable, in view of the Michigan Democrat's new bill, it was understood there was a move to have the subcommittee act solely on the McFarland measure.

Rep. Sadowski, in his statement Tuesday accompanying the bill, said he noted "a great deal of pressure emanating from various quarters" that his subcommittee should concentrate on the Senate-passed FCC procedural bill.

But, he stated:

"The Committee on Interstate and Foreign Commerce now has an opportunity to study these substantive problems since it held its last comprehensive hearing last year and presented a report to the Communications Act in the summer of 1942. Since then, many new problems, I need mention only television, have arisen, and many new members have joined the Committee who have never had occasion to study the problems connected with the various aspects of radio and radio communications. I believe it would be unreasonable to expect this committee to do, in connection with the consideration of S. 73, the kind of job which it is accustomed to do unless the committee first gains a clear understanding of the substantive problems involved. Therefore, it is my purpose to introduce this bill and to take some of the most important substantive problems connected with radio and to do that in the most concrete form possible, namely, that of placing before the committee appropriate amendments to the Communications Act in the field of radio. That is the real reason for my introducing this bill at the present time."

Rep. Sadowski cited possibility of continuous session as not impossible, but authorities thought it more likely they would be held in "take," each lasting from seven to ten days and spaced apart because some communications subcommittee members also serve on other groups.

In addition to questions of net work regulations, political liability, spectrum space and administrative sanctions, Rep. Sadowski's subcommittee will also elicit views on TV broadcasters, networks, and FCC on color television and channel allocations, radio fraud provisions, FILMA allocations,-appelation and other changes contained in the McFarland bill [Broadcasting, Jan. 23].

Objections, some of them shared by the Commission, are sure to be aired during the hearings. These include questions involving deadline on FCC actions and assignments—removal of the Commission's power of revocation over licensees cited in anti-trust violations; role of special services and safety functions in FCC operation; interpretation of "parties in interest" concerning intervenors in license cases, and others.

Authorities have indicated, also, that certain sections in the McFarland bill may be amended—chiefly those covering anti-trust; singling out FCC Commissioners for salary raises to $15,000 (where now they receive $10,000 through legislation passed last session), and stipulating that each Commissioner shall have a legal assistant. There is feeling that any such legislation should be handled by all independent agencies, not just one—whereas civil service is concerned.

MASON MURDER
Smithwick Given Life Term

VERDICT of guilty was returned last Wednesday night against Sam Smithwick, Jim Wells County ex-deputy sheriff, charged with murder in the fatal shooting of J. H. Mason, KBKI Alice, Tex., newscaster, last July 29 [Broadcasting, Aug. 1, 8].

Sentence of life imprisonment was imposed by the court at Belton, Tex. The prosecution had sought the death penalty.

The BLACK DAYS of 1949

Here is the 6-day work-week calendar followed last year by the coal industry. The shaded days were "mining holidays." The BLACK DAYS were days when most of the coal miners were called off their jobs by the dictates of a UNION MONOPOLY.

For most American workers, and for most American businesses, 1949 was a "good year."

For most of the nation's 400,000 coal miners — and for the coal business — 1949 was a very black year.

That was because a powerful union monopoly "blacked out" 110 of the permissible 298 working days — called miners off their jobs — and denied the operators the use of their own property and facilities!

Those 110 BLACK DAYS cost the individual coal miner an average loss of about one-third of a year's pay in 1949. What good does it do the miner to get the highest rate of pay in any major industry if he can work only on such days as the UNION says he is "able and willing?"

Those 110 BLACK DAYS cost the miners' Welfare Fund many millions of dollars — for how can a royalty tax be paid on coal that isn't mined?

Those 110 BLACK DAYS cost the coal business, the railroads, and local communities that are largely dependent on coal, hundreds of millions of dollars in loss of income.

Those 110 BLACK DAYS cost the American people millions of tons of coal needed for home-heating, and for the production of goods which the public needs.

Those 110 BLACK DAYS are the price all America has been forced to pay — in just one year — because just one industry has been dominated by the monopoly control of just one union. If it can happen in the coal industry, can it not also happen in other major American industries such as the steel, rubber, railroad, and automobile industries?

There can be no true security for the American worker, no steady progress for American industry, as long as UNION MONOPOLY can dictate when a man shall work and when industry shall produce. There can be no sure protection for the American public as long as UNION MONOPOLY is free to shake its fist in the face of all!

The Coal Operators Are Eager for a Working Contract with their Employees

NATIONAL COAL ASSOCIATION

WASHINGTON, D. C.
appointed by the President, by and with the advice and consent of the Senate. The persons nominated for appointment as members shall be selected solely on the basis of established records of distinguished service in the fields of (1) radio and the civilian or military use thereof, or (2) public affairs. The President shall designate one member as Chairman of the Board.

"FUNCTIONS OF THE BOARD"

"SEC. 372. (a) The Board is authorized and directed to formulate such plans and policies with respect to the utilization of the radio spectrum, with particular reference to the apportionment of frequencies between Government and non-Government use, as it deems necessary for the accomplishment of the purposes declared in section 1 of this Act.

(b) For the purpose of effectuating the plans and policies formulated pursuant to subsection (a), the Board is authorized and directed to—

(1) allocate frequencies and bands of frequencies and cancel or modify any such assignments; and

(2) assign frequencies to Government stations and cancel or modify any such assignments; and

(3) prescribe regulations to govern the assignment, by the Commission, of frequencies to non-Government stations.

(c) The Board shall disapprove the proposed assignment or renewal of the assignment, by the Commission, of any frequencies to the Armed Forces if, in the Board’s judgment, such assignment would cause harmful interference to any Government use of radio or would violate any regulations prescribed under paragraph (3) of subsection (b).

"ORGANIZATION OF FREQUENCY CONTROL BOARD"

"SEC. 373. (a) The term of office of each member of the Frequency Control Board shall be ten years, except that (1) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and (2) the terms of office of the members first taking office after the date of enactment of this Act shall expire, as designated by the President at the time of appointment, one at the end of two years, one at the end of four years, one at the end of six years, one at the end of eight years, and one at the end of ten years, after the date of enactment of this part. Three members shall constitute a quorum of the Board. Each member shall receive compensation at the rate of $15,000 per annum. Each member of the Board shall be a citizen of the United States. No member of the Board shall engage in any other business, vocation, or employment than that of serving as a member of the Board.

(b) The Board shall appoint and fix the compensation of such personnel as may be necessary to carry out the provisions of this title. Such appointments shall be made and such compensation shall be fixed in accordance with the provisions of the civil-service laws and regulations and the Classification Act of 1940, as amended: Provided, That the Board may employ such technical and professional personnel and fix their compensation without regard to such laws as it may deem necessary for the discharge of the responsibilities of the Board under this title. Officers and employees of any other department or agency of the Government may, with the consent of the head of such department or agency, be assigned to assist the Board in carrying out its functions. The Board may fix their compensation without regard to such laws as it may deem necessary for the discharge of the responsibilities of the Board under this title.

(c) Officers and employees of any other department or agency of the Government, utilize the facilities and services of such department or agency in carrying out the functions of the Board. The Board shall be authorized to accept and utilize the services of voluntary and uncompensated personnel and to provide transportation and assistance as authorized by section 5 of the Act of August 2, 1946 (5 U.S. C. 7362), for persons serving without compensation.

"MILITARY LIASON COMMITTEE"

"SEC. 374. There shall be a Military Liaison Committee consisting of representatives of the National Military Establishment, one of whom shall, without additional compensation, be the Secretary of Defense, in such number as he may determine. The Board shall advise and consult with the committee on the allocation or assignment of radio frequencies required for the purpose of national defense. If the committee at any time concludes that any action, proposed action, or failure to act of the Board with respect to the allocation or assignment of radio frequencies for the purpose of national defense, is adverse to the responsibilities of the National Military Establishment, derived from the Constitution, laws and treaties, the committee may refer such action, proposed action, or failure to act to the Secretary of Defense. If the Secretary concurs, he may refer the matter to the President whose decision shall be final.

"ADVISORY COMMITTEE"

"SEC. 375. The Board is authorized to appoint such advisory committees as it deems necessary to advise the Board on any matters arising in connection with the administration of this part.

The members of any such advisory committee shall receive compensation at the rate of $25 for each day engaged in the business of the Board pursuant to authorization of the Board, and shall be allowed travel expenses as authorized by section 5 of the Act of August 2, 1946 (5 U. S. C. 752).

(c) Persons holding other offices or positions in the executive branch of the Federal Government may serve as members of any such advisory committee, but they shall not receive remuneration for their services as such. Such members during any period for which they received compensation for their services in such other offices, or positions.

"ANNUAL REPORT"

"SEC. 376. The Board shall render an annual report to the President for submission on or before the 15th day of January of each year to the Congress, summarizing the activities of the Board and making such recommendations as it may deem appropriate. Minority views and recommendations, if any, of members of the Board shall be included in such report.

"SECURITY"

"SEC. 377. The Board, after consulta- tion with the Military Liaison Committee, shall establish regulations and procedures for the security classification of Information related to the work of the Board and for the proper safeguarding of any information so classified.

"INTERNATIONAL AGREEMENTS"

"SEC. 378. Agreements with foreign governments which affect the allocation of frequencies between the United States and such governments shall be negotiated and concluded by the Board, acting in accordance with the directions and subject to the control of the President. The Secretary of State shall assist the Board in the arrangements for and conduct of such negotiations.

"APPROPRIATIONS"

"SEC. 379. To enable the Board to carry out its powers and duties, there is hereby authorized to be appropriated annually such sums as may be necessary. Such sums may be expended and utilized in the Treasury not otherwise appropriated, such sums as may be necessary."

"PURPOSES OF ACT; CREATION OF FEDERAL COMMUNICATIONS COMMISSION"

"SECTION 1. (a) It is the purpose of this Act to provide for regulating interstate and foreign commerce in communication by wire and radio so as to make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and fully effective radio and telephone communication service adequate facilities at reasonable charges; to promote the national defense; to protect the life and property of the use of wire and radio communication.

(b) The term 'Federal Communications Commission' is hereby defined to be the Commission created under the Communications Act of 1934, as amended, is amended by adding after paragraph (aa) the following:

(bb) The term 'Government', when used with reference to radio, means the grants, contributions, or any agency or instrumentality thereof.

(cc) The term 'allocation', when used with reference to frequencies, means the distribution of specified bands or frequencies or bands of frequencies to services and classes of stations involved.

(dd) The term 'assignment', when used with reference to frequencies, means the grants, subject to conditions and limitations, of frequencies or bands of frequencies to services and classes of stations involved.

(ee) The term "enforcement" means any action or any investigation which disables the functioning of a radio service or of a safety service or obstructs or repeatedly interrupts any radio service."

"SEC. 4 (a) Paragraph (c) of section 305 of the Communications Act of 1934, as amended, is amended by striking the word "President" and inserting in lieu there-
FATHER OF THE GROOM

ON BEHALF of a client, Washington Attorney Paul M. Segal petitioned FCC last week for permission to broadcast a wedding in which he is slated to appear Feb. 14, giving this explanation: "The oldest son [Paul F.] of Paul M. Segal is to marry Miss Annifer Black at Denver, Colo., on Feb. 19 and Paul M. Segal has entered into extensive commitments with regard to the festivities customarily preceding such an event. The violation of any of those commitments would result in domestic and community distresses and other embarrassments."

"Frequency Control Board".

Sec. 6. Notwithstanding the amendments made by this title, allocations and assignments heretofore made under the authority of section 305 (c) or section 305 (a) of the Communications Act of 1934 may continue in effect according to their terms unless and until canceled or modified in accordance with law.

The provisions of this section and of sections 371, 372 (a), 372 (b), and 373 through 379 of part III of title III of the Communications Act of 1934, as amended, shall take effect on the date of the enactment of this Act. The remainder of this Act and such part III shall take effect six months after the date on which three members of the Frequency Control Board have been appointed and have taken office.

TITLE II—MISCELLANEOUS PROVISIONS

Sec. 201. Section 312 of the Communications Act of 1934, as amended, is hereby amended to read as follows:

"ADMINISTRATIVE SANCTIONS"

"Sec. 312. (a) Any station license shall be revoked or suspended for a period of not more than ninety days, and any construction permit may be revoked, suspended, canceled or modified by the Commission:"

"(1) for false statements knowingly made either in the application or in any statement of fact which may be required in connection with the application;"

"(2) for conditions coming to the attention of the Commission which would warrant it in refusing to grant a license or permit on an original application;"

"(3) for willful or repeated failure to operate substantially as set forth in the license;"

"(4) for willful or repeated violation of any rule, regulation or order of the Commission which, in the judgment of the Commission, would warrant it in refusing to grant a license or permit to such other licensee or permittee;"

"(5) for violation of or failure to observe any cease and desist order issued by the Commission under this section;"

"(6) where any person (1) has failed to operate substantially as set forth in the license, or (2) has violated or has failed to observe any of the provisions of this Act or (3) has violated or failed to observe any regulation of the Commission authorized by this Act or by a treaty ratified by the United States, the Commission may order such person to cease and desist from such action.

"(c) Before revoking or suspending a station license, or revoking or suspending a permit pursuant to this section or issuing a cease and desist order pursuant to subsection (b), the Commission shall serve the licensee, permittee, or person involved an order to show cause why an order of revocation or suspension or a cease and desist order should not be issued. Any such order to show cause shall contain a statement of the matters with respect to which the Commission is of the opinion that the alleged violation has occurred, or failure to appear before the Commission at a hearing on the order, or in event less than thirty days after the receipt of such order, and give the date and time and place of such hearing on the order and the hearing required by the order;

"(d) In any case where the Commission is authorized pursuant to this section to suspend or revoke a license, or to cancel or suspend a permit, or to issue a cease and desist order, the Commission, after the hearing required by subsection (c) of this section, by order revoking or suspending a license, or revoking a permit, or issuing a cease and desist order, or in addition to its other powers, may, for good cause, order the licensee or permittee to forfeit to the United States the sum of $500 for each day during which the Commission finds that any offense set forth in the order to show cause issued pursuant to subsection (c) occurred, or such lesser sum as the Commission may find appropriate in the light of all the facts and circumstances of the case, and if an order is issued by the Commission declaring such person or permittee shall be deemed revoked and shall be surrendered forthwith unless within such time the licensee or permittee, as the case may be, shall give the Commission a statement in writing of his intention to surrender the license, or permit, and shall deliver it to the Commission, or any other licensee or permittee (A) to violate or fail to observe any of the provisions of this Act or any rule or regulation of the Commission, or (B) to engage in any course of conduct which, under any rule or regulation of the Commission, would warrant the Commission in refusing to grant a license, or permit to such other licensee or permittee;"

"(e) The Commission shall make rules and regulations to carry out the provisions of this section.

"(f) Except to the extent expressly provided in subsection (a), nothing in this section shall impose upon any licensee any obligation to allow the use of his broadcasting station by any person.

CBST REPORT

Stanton Reviews Progress

IN A LETTER sent last week to advertisers, agencies and stations, Frank-Eating B. CBS president, said CBS in 1949 became the "unquestioned leader in network radio.

Summarizing progress made by CBS in both radio and television operations, Mr. Stanton claimed CBS radio had the largest average audience four nights of every seven and, omitting the 20 most popular all-network shows, had an average audience 12% bigger than that of any other network.

The Nielsen Radio Index shows CBS has 14 of the top 29 evening programs.

Mr. Stanton said CBS affiliated stations had a bigger share of listening than those of any other network—22.5% in the Nielsen's October 1949 report on 'Share of Total Minutes of Listening to Each Network Station Group.'

In television, CBS has a sponsored network where the audience ratings are up 29.6% in the Nielsen's October 1949 report on "Share of Total Minutes of Listening to Each Network Station Group.

In 1949 CBS-TV network advertisers increased from seven to 30, and CBS-CB network sales in 1949 were 20 times bigger than those of 1948.

Mr. Stanton said that "CBS is bringing advertisers bigger values—in both radio and television—and that is the reason that the audience ratings in radio and television are the highest in the United States.

"Columbia's position of leadership," he said, "is not an impression created by promotion or publicity, but is a solid fact rooted in cold arithmetic.

WGRD Grand Rapids, Michigan
Radio's Audience

(Continued from page 19)

650,000 ballots in March and April, getting back about 55% of usable returns. Tabulations began June 1, transferring the information from the ballots to some 5.5 million IBM punch cards. The completed reports will go out this week to all station subscribers, each receiving the details on its own coverage. Copies of these station reports, also will be sent to members of the Assn. of National Advertisers and the American Assn. of Advertising Agencies requesting them.

Chief difference between the first and second surveys, as the 1946 study asked what stations the respondent listened to at least once a week, day and night. The 1949 ballot asked what stations were listened to six or seven days (or nights) weekly, what ones were heard three to five days weekly, and which were listened to one or two days a week.

New Information Added

This new "composition of audience" information was added to the study with the expectation it would refine the BMB measurement of station audience to provide a more efficient tool for the buying and selling of time. It also was expected to eliminate many of the complaints that followed the release of the first study reports.

Three years ago BMB followed publication of the individual station reports with an area report book giving details of day and night audience for each subscriber station serving every city and major city in the country. The relatively small proportion of station subscribers to the second BMB study would make an area report for the second study of little value unless non-subscriber data were also included. For this reason and because of the expense entailed, it is doubtful that such a report will be issued this time.

BMB Undecided

Future of BMB, following completion of the current study, is unresolved. The ANA and AAAA, as well as many individual advertisers and agencies, have wholeheartedly endorsed the BMB type of audience measurement and urged that it be continued. But the broadcasters as a group seem unwilling to assume responsibility for its upkeep beyond the current study. Proposals that BMB be reorganized as a stock company along the lines of BMI have aroused only mild interest. Perhaps next week's NAB board meeting will produce a more likely-looking formula for keeping BMB alive.

NAME MULLEN

For Radio Pioneers Head

FRANK E. MULLEN, chairman of the board of Jerry Fairbanks Inc., film producer, and formerly NBC executive vice president, has been nominated president of the Radio Pioneers, to succeed William S. Hedges, NBC, whose term expires April 4. O. H. Caldwell, who served during the past year as vice president and treasurer, was nominated first vice president. Others nominated: Arthur Church, KMBC Kansas City, Mo., 2id vice president; Paul W. Morency, WTIC Hartford, vice president and secretary; Carl Haverlin, president of BMI, vice president and treasurer; J. R. Poppele, WOR New York, vice president, and Martin Campbell, WFAA Dallas, vice president.

Gray Eyes UNC Post

SECRETARY of the Army Gordon Gray, owner of WSJS Winston-Salem and WMIT (FM) Charlotte, N. C., and publisher of the Winston-Salem Journal and Sentinel, has indicated his willingness to be considered for the post of university's alma mater, it was reported last week. Gov. Kerr Scott stated the nominating committee has suggested Mr. Gray for the post to the executive committee of the university's board of trustees.

Elbrock Joins Mogul

RAE ELBROCK, formerly radio timebuyer for the Bruck Agency, New York, has joined Emil Mogul Co., New York, as radio and television timebuyer.

EVICION SUIT

WILM Wilmington, Del., and the Delaware Broadcasting Co. have petitioned a city court to enjoin WDEL from operating a transmitter site owned by the latter and used by both stations. WDEL operates on 1 150 kc with 5 kw, WILM on 1 1500 kc with 250 kw, and the suit is from months to a year, at least, before the latter's use of the transmitter site and equipment can be terminated.

Both stations have been occupying the same transmitter site on the 35th St. off Governor Printz Blvd. WILM uses one tower, while WDEL utilizes all four. The suit alleges that when WILM was sold in 1944 to Alfred G. Hill, former stockholder in Delaware Broadcasting Co., an agreement to share the transmitter site and towers stipulated termination only after 30 days' notice on the part of WILM or a year on the part of WDEL, of which Clair R. McCollough is vice president and general manager.

After negotiations failed in December 1949 for purchase of the WDEL transmitter site, according to the suit, WDEL served notice WILM could continue operating there if it paid a monthly rental fee of $1,000, which the plaintiffs charged was exorbitant and unreasonable.

No Rent

The original agreement provided that WILM would not have to pay rent to WDEL and that, in fact, no rent has ever been "demanded by the defendant corporation," the suit alleges.

In the summer of 1948, Mr. Hill and other stockholders of Delaware Broadcasting Co. sold their interests to the Hawkins Broadcasting Co. and Mr. Hawkins, co-plaintiffs in the suit. James H. Steimann and John F. Steinman, original WILM owners and now majority stockholders in WDEL Inc., have been named as co-defendants in the suit. The Steinmans had to dispose of WILM in accordance with FCC's ruling against multiple station ownership.

WILM Asks Injunction Against WDEL

RE-ENTRY of Louis Wasmier into Spokane, Wash., station operation was reported proposed last week with announcement he has purchased KFIO Spokane for $30,000 subject to FCC approval. Transfer papers were to be filed Friday.

Mr. Wasmier, who sold KGA Spokane (1 150 kc, 50 kw) for $425,000 last summer to Gonzaga U. [Broadcasting, Aug. 29, 1949], acquired KFIO from its sole owner, Arthur L. Smith, who told FCC he wished to sell his interest, which he holds against Spokane Broadcasting Corp., KFIO licensee, if the sale to Mr. Wasmier is approved.

Mr. Wasmier holds 40% interest in KOL Seattle and 22% in KKKK Missoula, Mont. He also is applicant for 1 kw fulltime on 960 kc at Pasco, Wash., which bid has been designated for hearing with request of Cascade Broadcasting Co. Inc. for same assignment at Richland, Wash.

FBI Network

A SPECIAL emergency radio communications system is maintained by the Federal Bureau of Investigation to link its field offices in all parts of the U. S. in event normal communications are broken by war, sabotage, flood, or earthquake. FBI Director J. Edgar Hoover, who revealed the existence of the FBI network in Congressional testimony released last week, said it is independent of commercial media of communications and also is independent of radio and ground communications networks of the armed forces.
Radio's penetration is deepest. Radio offers figures, again produced by an established, continuing industry source, to document this penetration; figures produced by the SMPB database have joint efforts of broadcasters, agencies and advertisers alike—show 36,000,000 radio homes in 39,280,000 American homes—or 94.2% of all American homes.

Newspapers, with a 1% circulation increase in 1949 over 1948, show a total aggregate daily net paid circulation of over $2,000,000. That this penetration is much shall that radio's is borne out by examination of the facts in individual cities, as well as by the obvious 30,000,000 difference between sets and newspapers.

In one major eastern city, 25% of the total population, when asked by the newspapers, reported that they saw no newspapers at all.

Magazines can be dismissed as that only seriously after the circulation. As even the Bureau of Advertising of ANPA has pointed out, the great circulation leaders among American magazines can deliver a lower percentage of the audience of only 24,000,000 homes. And even if an advertiser bought all 45 of the top magazines, he'd be missing 17.5% of the homes—that gets no magazines at all.

NBC's Promotion

This comparison of the penetration of major media will prove out in practically any market you select. Note the way NBC nails the point home in its promotion for two areas in which it operates stations:

New York Area
Radio—total WNBC audience—daytime (508,140–1948) 3,071,190
Magazines—total circulation in area (nation's largest magazine) 1,301,673
Newspapers—total circulation in area (New York's largest newspaper) 2,320,466

Washington, D. C. Area
Radio—total WRC audience—daytime (BMI–1949) 316,380
Magazines—total circulation in area (nation's largest magazine) 156,421
Newspapers—total circulation in area (Washington's largest newspaper) 245,246

This difference in radio's penetration as compared with other major media becomes even more pronounced in less urban areas, where newspaper circulation thins out quickly outside of the city zone, and where individual magazine circulations are negligible factors in covering the whole market.

Circulation measurements are more than a definition of the size of an advertising medium. A manufacturer, for example, should look at circulation figures to prove to himself that he is spending his advertising dollars for impressions made where his products are sold—just in the areas where the newspaper or magazine is sold.

Will his advertising work for all his dealers, for all his company salesmen? Radio will pass this and other tests with a far higher score than printed media.

Retailers, too, are becoming increasingly disturbed by the failure of local newspapers to follow the spreading outlines of their trading areas. Newspaper space costs astonishingly when it becomes necessary to buttress the local paper's coverage by buying a flock of community papers in outlying areas. Big city advertisers, in particular, are turning to radio in increasing numbers to solve this problem.

Fallacy About Cost

The very "bigness" of the radio coverage picture—and it keeps growing all the time—makes some customers think of radio as an expensive medium. Yet, despite its high impact and deep penetration, radio is the least expensive of all major media.

Radio is an expense. It costs less no matter how you figure it, but if you toss aside the concept of cost that printed media have been peddling for these many years, and measure the cost of the goods delivered to the buyer, then the cost picture in favor of radio is astounding. When the advertiser begins to measure what he is really getting for his money, a genuine economy becomes dramatically apparent.

Here is one of dozens of illustrations that might be worked out to demonstrate radio's low cost as compared with other major media. Let's take St. Louis, as a large, fairly typical, centrally-located market. A leading St. Louis radio station is reported by BMI (1946) as reaching 616,080 radio homes in the 77 Illinois and Missouri counties comprising the St. Louis area. Using this as a base, how does Life magazine—for the nation's largest circulation? Of circulation in these same 77 counties is 59,083. Radio (one station) reaches 10 St. Louis homes to every Life copy sold.

Projection Used

But Life claims a total "audience" far greater than its circulation. It uses a 5.1 multiplier to project its total readership. Let's project Life's 59,083 copies into "audience." Result: 301,170 readers. How about the radio audience? Using the normally-accepted figure of people per family, radio reaches a total of 1,786,632 people in this same area. In terms of people reached in this area, one radio station outreaches Life, six to one.

Now how does a newspaper advertiser fare in St. Louis? His cost of buying line advertising in a leading St. Louis newspaper would total $315, for which he could expect 5,209 readers to his advertisement. Cost per thousand—$5.83. A little more spent in radio—$337.50 on a leading station, to be exact—would bring him 470,771 listening impressions. Cost per thousand impressions: 726.

Omitted from these formulae are the costs of preparing the advertising itself. Some day radio's selling force will sit down with advertisers and persuade them to compare the soaring costs of simply preparing printed advertising with that of getting radio advertising on the air.

Wasted Dollars

In the nation's dry goods emporiums alone, literally millions of dollars charged against advertising in newspapers are wasted away. A specialized help in the preparation of copy that is read far more lightly than most graphic advertising experts dare to dream. The same plots apply to local advertisers and equally well to the regional, the national spot, and the truly national advertiser.

Results. Every medium has its catalogue of astonishing success stories. The fact that all media men make such a fuss over good results is a pretty good indication of their concern with the possibility that there will be no results. This fear rarely stems from a lack of confidence in the medium; rather, it arises from a lack of confidence in their ability to use the medium correctly.

Newspapers have been selling advertising in this country for 245 years—magazines even longer. Yet neither are known for their contribution to the techniques of successful advertising. It's a fact that printed media men leave this function to the agency, the advertiser's own staff, the mat or "idea" service.

Merely an Instrument

They are content (and this only at the local level) to translate the advertiser's message into the tired, long-used stereotyped type forms characteristic of their media. Beyond this, the printed media go only as far as offering—at a premium price—to deliver a clumsy association between editorial matter and advertising known as "position." When an advertiser has paid an additional 25% for the privilege of placing his soap advertisement on a "corner," he has squeezed the last ounce of technique available to him from the newspaper end of his contract.

When you compare this to radio, where the advertiser assumes that the selection of position, time, audience composition, editorial content, mood—all of a dozen other factors is a natural part of his service from the medium, you begin to see why radio and results are terms in common. The advertiser who prefers his advertising contract with considerations like these is drawing upon a vast store of techniques created by broadcasters with the improvement of their art in mind. He is thinking about results, trying to control or dictate results. And he gets results.

It is common practice for advertisers, local and national, to depend upon radio and only radio for the selection of those factors that can best produce results for them. That is why radio is sold, much in the manner of a custom-tailored suit fitted to the individual buyer, while printed media are bought.

"What are your availabilities?" is a question peculiar to radio. In what other medium does the seller of his product preface his purchase with a question inviting basic advice on how best to place his advertising? It doesn't do to reply that others work regardless of where or how they're used. They don't.

Radio results follow the basic media rule: They increase in direct proportion to the effectiveness with which the medium is used. Possessed of an overwhelming advantage over other major media in every department, radio has not failed to produce staggering results wherever it has been used properly.
When Mr. Star

(Continued from page 23)

nated, inviting the city’s V. I. P. top-layer. Through this, we secured up a

Point number six: Jack Benny, John Tackebery, Hilliard Marks, Phil Harris, Artie Auerbach and the entire cast of our now-regional show, put out as much time and effort into the writing, rehearsing and producing of the program as though it were a TC origin.

When the show hit the air, it was network calibre, the kind of pro-

gram the several million listeners in Texas expect to hear from a man

dated, this is probably the most important point of all.

Most of the stars who come our way should have stayed home in the

first place, as far as helping themselves, their shows and their sponsors are concerned. Nothing will lose ratings faster for a per-

former than to hit a town and disappoint the local and regional listeners with a careless, loose, dull show. I have seen Hoopers fail after appearances by stars in local markets. Jack Benny is due for a rise in Texas.

Point number seven: Too few stars realize that the affiliate sta-

tion which carries their program is composed of people. If these people are well-disposed toward them, their programs surely have a better chance than if they aren’t. The Benny troupe made friends of every one on the staff. I have seen other stars convert former friends into detractors. Even though we are local radio people, we are hu-

man and have our weakness.

In a Nutshell

Here, then, is the net result of the Benny visit to Houston from the affiliate-station personnel standpoint. Our promotion people, when they allocate spot announcements, newspaper ads and stories promoting our shows will hit the

Benny show more often than they did. Our commercial and public-

service departments will somehow find ways to keep demands for

radio stations, etc., and force radio stations to make these things.

As a gray-beard of local radio who has handled these people and seen the tangible results over a period of years I’d say that the best in-

surance a radio-star can have for lasting popularity and high ratings is to get out and around the country, especially for charity pur-

poses as Jack Benny does. The

Top names, Hope, Crosby, Benny

seem always on the move. They

go where the people are, the people

who are called for ratings and who buy the products they advertise.

For a concrete example of appear-

ance-importance, look at the life span of the Dr. J. Q. show against the hundreds of other shows which have come and
gone. There is nothing a listener likes more than to have his star visit his town.

But, and this is a very big but, the appearances can do more harm than good if not handled properly. Everyone can’t be a Jack Benny or a Phil Harris, with their charm, modesty and ability. But every network “name” can work carefully to make his appearance smooth and successful. Instead of taking in laundry to supplement his income, Jack Benny might well give a course of in-

struction to radio celebrities on how to get along with the public on tours.

K & E EXPANDS

Adds to S. F. Staff

JOHN WILEY, manager of the newly expanded office of Kenyon & Eckhardt Inc., San Francisco, last week announced initial additions to his staff.

New staff members include: Dick Hovis, formerly freelance artist, art director; Patrick Warfield, formerly with Donahue & Co., New

York, copy chief; Ralph Grady, formerly with ABC and

WABC & Staff, production manager, and Beatrice Baker, formerly with J. Walter Thompson Co., San Francisco, media assistant. Virginia Stigge continues as office manager. William B. Lewis, vice president and general
c

nance, and Davis C. Stewart, secretary, are in San Francisco to assist Mr. Wiley in the expansion program.

MORE than one first-class letter in every 1,012 which arrives at the Che-
cago post office goes to WLS, that city, station reports. Postal survey showed total of 1940 incoming letters to be 1,709,461,287. WLS’ share was 1,092,030.

WHOM New York, which claims to air more foreign language pro-

grams than any other station in the area, last week petitioned FCC for leave to intervene in the Fed. 6 case. The

competitive bids of five other groups [BROADCASTING, Nov. 7, 1949]. The foreign-language pro-

posal of one of the latter applic-

ants drew the comment of the examiner that such programs tend to prevent assimilation of minor groups into the national unity.

WHOM told the Commission in its brief in the public interest and that the potential foreign language audience in the U. S. is between 15 million and 20 million. The station said "large numbers of these people "depend almost exclusively on foreign lan-

guage broadcasting for information, education and entertainment” and that these minorities have "well-orders for access to media of communication.

THEME of the Ohio State Adver-

tising and Sales Promotion Con-

ference on Feb. 12-24, which will fea-

ture a telecasting seminar. The

on the first day, is “How to Make Advertising More Effective.” It will be held at Ohio State U. in Columbus.

The TV-radio session will con-

side the position of the media in

front of its present day advertising from the viewpoint of the advertisers. Also discussed will be the use of research techniques in media reactions and other related problems.

Overall conference will study the following topics: The advertising agencies, public relations, analysis and selection of advertising opportunities, how to choose the right advertising appeal, application of research to today’s advertising problems, packaging, point of purchase promotions and radio advertising.

On the second day, clinics will be held at the work-shop level or both industrial and newspaper ad-

vertising and selling seminar.

A joint session that night

with the Columbus Advertising

Club will close the conference.

For the meetings the university has

and cooperation of all advertising clubs in Ohio, industrial advertising chaps, local agencies, printing associ-

ations and the Ohio Assn. of Broad-

casting. In addition, the professor of business organization at Ohio State, is general conference chairman.

A GROUP of FM broadcasters are FM to listeners in an attempt to push the medium to the fore in the Carolinas, this Wednesday, February 1, a three-month promotion campaign, enlisting broadcasters' and set dealers' support, gets underway.

If the drive, sponsored by the North Carolina FM Assn., proves successful, Ray A. Furr, WIST-WFMY and chairman of the FM promotion committee, says a follow up program for the summer will be forthcoming. Mr. Furr has petitioned all FM broadcasters in both North and South Carolina to join in the campaign. Other members of the committee are J. Frank Jarman, WDFC-FM Durham, and E. Z. Jones, WBBB-FM Burlington.

Plans for the drive were formulated at last Dec. 3 at a Pinehurst, N. C., meeting by some 40 FM owners and operators. Mr. Furr told the broadcasters that while some "inadequacies" may be in the proposed program, "it does represent, at least, an effort to protect an invest-for-the-future dollar in Carolina FM facilities."

The FM campaigning have set a 10 point program. Zenith already has offered preparation of several thousand mailing cards for local stations to put call letter imprints plus programming highlights, frequencies, etc., which will be distributed by dealers, Mr. Furr said.

Promotion Asked

Every station has been asked to use 20 spots per week for FM promotion, using discs supplied by the association. FM radio distributors were urged to make awards to dealers in their areas who show the largest percentage of increase in FM set orders during the campaign as compared with any three-month period last year. A $50 prize to the Carolina station whose FM promotion is judged the best will be presented by the association.

In addition, each station has been requested to hold a community FM clinic, cooperating with other willing FM outlets in the same community, and have a salesman contact every FM dealer in the area. The governors of North and South Carolina will be asked to proclaim February as "FM Month," with local stations securing similar proclamations for their communities from their mayors.

Beginning Jan. 21, Mr. Furr says, a progress bulletin is being sent to all participating stations once each week for the three months.

ARKANSAS GROUP

Annual Session Is Feb. 10

THE ARKANSAS Broadcasters Assn., comprised of 24 member stations, will hold its annual meeting on Feb. 10 at the Hotel Marion in Little Rock.

Ed Zimmerman, manager of KARK Little Rock, is president of the association, Sam Anderson, manager of KFFA Holena, I. A., vice president, and Ted Rand, general manager of KDRS Paragould is secretary-treasurer.

Joins Pearson Agency

EDWARD H. PEARSON, formerly vice president of J. M. Hickerson Inc., New York, has joined the staff of Pearson Advertising Agency Inc., New York, as an account executive. Mr. Pearson is no relation of the head of the Pearson agency.

Daughter to Nelsons

MRS. ELLA NELSON, secretary to C. E. Arney Jr., NAB secretary-treasurer, is the mother of a girl weighing 6 pounds 1 ounce, born last Monday at Garfield Hospital, Washington. Mrs. Nelson left the hospital Friday for her home at St. Cloud, Minn., with the staff of Pearson Advertising Agency Inc. in New York, as an account executive. Mr. Pearson is no relation of the head of the Pearson agency.

Retailers Agree with WOXR

Radio dealers and retail outlets have agreed with the arguments put forth by Mr. WOXR. Paul Furr, station manager, in his recent address. The dealers agree with the statements that: (1) that TV is not for everyone; (2) that TV is expensive; (3) that TV is more a sales tool than a medium for entertainment; and (4) that TV is not a viable medium in the smaller communities.

Mr. Furr also stated that the dealers are looking to TV as a means of promoting their business and that they are willing to pay for this promotional tool. The dealers also agreed that TV is not a medium for local advertising and that it is not a medium for small advertisers.

The dealers also agreed that TV is not a medium that can be used to sell products and that it is not a medium that can be used to sell services. The dealers also agreed that TV is not a medium that can be used to sell ideas and that it is not a medium that can be used to sell emotions.

The dealers also agreed that TV is not a medium that can be used to sell values and that it is not a medium that can be used to sell ideals. The dealers also agreed that TV is not a medium that can be used to sell history and that it is not a medium that can be used to sell tradition.

The dealers also agreed that TV is not a medium that can be used to sell religion and that it is not a medium that can be used to sell spirituality. The dealers also agreed that TV is not a medium that can be used to sell politics and that it is not a medium that can be used to sell economics.

The dealers also agreed that TV is not a medium that can be used to sell education and that it is not a medium that can be used to sell science. The dealers also agreed that TV is not a medium that can be used to sell art and that it is not a medium that can be used to sell culture.

The dealers also agreed that TV is not a medium that can be used to sell music and that it is not a medium that can be used to sell entertainment. The dealers also agreed that TV is not a medium that can be used to sell sports and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell games and that it is not a medium that can be used to sell hobbies. The dealers also agreed that TV is not a medium that can be used to sell pastimes and that it is not a medium that can be used to sell interests.

The dealers also agreed that TV is not a medium that can be used to sell hobbies and that it is not a medium that can be used to sell leisure.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation. The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.

The dealers also agreed that TV is not a medium that can be used to sell recreation and that it is not a medium that can be used to sell leisure. The dealers also agreed that TV is not a medium that can be used to sell leisure and that it is not a medium that can be used to sell recreation.
FREQUENCY USE

U. S. Must Coordinate, Says Webster

IF THE U. S. is to meet adequately its responsibilities in the "telecommunications world of the future," the nation must first generate an "aggressive, unified drive toward maximum use of our frequency resources." This was asserted by M. Webster speaking before the New York Chapter of the Armed Forces Communications Assn. at a dinner meeting held at New York’s Fraunces Tavern.

Comr. Webster explained that in order to get better use out of our limited national frequency resources, a framework or structure will have to be established to coordinate the efforts of all frequency users. This need for "cleaning house at home" before attempting to help or influence other nations was given as the keynote to successful international communications negotiations in the future.

New Competitors

He pointed out that since the end of the war all nations have become competitors for frequencies. In the past, Comr. Webster said, nations were not competitors and had only to work out assignments to eliminate electrical interference situations, which made such conferences examples of harmonious international cooperation. Today’s meetings must consider economic, social and political problems over and above the purely technical matters, he said.

A major policy decision must be made whether "we as a nation want to seek as many individual frequencies as possible without a plan which sets forth priority of use," Comr. Webster said, or whether "we want to plan our frequency needs in terms of the actual volume of radio communications that will best serve the United States requirements without resorting to grabbing baselines and femail our requirements." Until such a decision is made, he said, "we must rely on voluntary cooperation among all users to protect the best interests of all.

In addition, he emphasized, new national policies will have to be found regarding certain specific aspects of communication. Some of the problems demanding policy answers were cited as follows:

1. Shall the government operate communications systems for the purpose of carrying the communications? 2. Shall the military agencies operate communications systems in peacetime which can be expanded to meet their needs in wartime? 3. Shall the military agencies look to the commercial communications systems for the other time for the communications needs in wartime?

4. Can we find a method to finance VHF (line of sight) throughout the Armed Forces Communications system so as to release high frequencies (long distance) for vital communications needs? 5. Can we find a method to finance a "stratovision" relay system for the relay of general communications which will enable us to relive the strain of existing high frequency radio circuits? 6. Shall we have competitive private overseas communications systems or shall we have a regulated monopoly?

RED'S GAMES

WCPO-AM-TV 5-Year Pact

EXCLUSIVE radio and television rights for five years to the Cincinnati Reds baseball games were negotiated last week by WCPO and WCPO-TV Cincinnati. In addition, Burger Brewing Co., Cincinnati, will sponsor the games, according to station officials. Midland Ad. Agency, Cincinnati, is handling the deal.

WLWT (TV) Cincinnati broke off negotiations last week for telecasts of the Reds games. Robert E. Dunville, Crosley Broadcasting Corp. president, said the action was taken because the five-year contract demanded "was against the best interests" of the station.

WCPO will shuffle all network and off-network games which will be carried on a 27-station hookup in adjacent portions of four states.

Mr. Dunville said WLWT would have been willing to negotiate a contract for "a reasonable period of time." An example, he said, was the negotiation of plans for baseball telecasts by Crosley in Dayton WLWD (TV) for this year only with no commitments beyond the one year made.

While small telecasts could be incorporated in the WLWT schedule this year, Mr. Dunville said, a five year period could very well necessitate a disruption of network and local sponsored time.

WHERE DOES BMB get its basic figures?

Number of radio families in specific counties is determined by applying the BMB per cent of radio ownership to the total number of families as shown by—

SALES MANAGEMENT’S “Survey of Buying Power.”

(1950 Issue May 10; Reservations Close Feb. 17; Copy March 10)

FM AMENDMENTS

Finalized by FCC

AMENDMENTS proposed by FCC last November to its revised tentative allocation plan for Class B FM stations was made final by the Commission last week in most respects. Several controversial cases are still under consideration [BROADCASTING, Nov. 21, 1949].

Purpose of the changes is to increase frequency separation and "generally to improve the FM allocation pattern," FCC said. Still under consideration are proposed changes for Wilmington, Del., Baltimore and Philadelphia. The Commission in these changes proposes to switch WAMS-FM Wilmington from Channel 241 to 243 to reduce interference with WFLN (FM) Philadelphia on 236, and to switch WDEL-FM Wilmington from 229 to 279 to reduce conflict with WIP-FM Philadelphia on 227.

The Commission had proposed to change WBFL (FM) Wilmington Va., from Channel 223 to 236, but has retained 223 in the amendment even though adding 236 to that area. WRFL is seeking to change to Channel 269. Following are the changes made final:

GREENE Elected V. P.

KENNETH F. R. GREENE, who has been with Kastor, Farrell, Chesley & Clifford, New York, for the past two and a half years, has been elected a vice president.

In Altoona, Pa., It’s ROY F. THOMPSON and WRTA

A prize radio combination in the rich industrial market of Central Pennsylvania. Represented by ROBERT MEKER ASSOCIATES.

Du Mont's Newest

SHoppers' Matinee

An afternoon in an imaginary department store with
delightful segments on food, fashions, glamour, homemaking,
photography, song and entertainment.
What's New in Television? Take a Look at WPTZ!

Based on the December survey of the American Research Bureau, WPTZ's hour-long Western feature, "Frontier Playhouse" is the highest rated local program on any station in any city! The December survey shows that it pulls down a whopping average rating of 49.7.

Translating this rating into terms of people and homes based on Philadelphia's current set census of 350,000 receivers, "Frontier Playhouse" each evening reaches 644,000 people. And lest some scoffers say, 'Yeah, but it's a kid audience—we hasten to point out that the A.R.B. survey indicates that of the total audience, 364,000 are adults.'

What's the secret of "Frontier Playhouse" success? Frankly, we're not too sure ourselves. Certainly, it isn't because Philadelphians are starved for Western features. There are at least two or three on the air each day, sometimes more.

Can WPTZ's Westerns be that much better? We're inclined to doubt it even though we screen and select them with considerable care.

Somehow we suspect that the success of "Frontier Playhouse" goes right back to the preference Philadelphia's television audience consistently shows for WPTZ...a preference that has grown up through years of careful programming, superior technical skill and professional presentation that can come only with years of television broadcasting experience.

If you're considering television time to reach the Nation's second largest television audience...if you would like to join the 133 advertisers who are currently buying time on WPTZ to tell their story—give us a call or see your nearest NBC Spot Sales Representative.

WPTZ FIRST IN TELEVISION IN PHILADELPHIA NBC TV-AFFILIATE
TELEVISION CLINIC

EXECUTIVES of television stations, networks, advertising agencies and program packaging firms will participate in the annual television clinic of Television Broadcasters Assn. Feb. 8 in New York. The list of speakers for the one-day sessions, to be held at the Waldorf-Astoria Hotel, was released last week by Charles C. Barry, ABC vice president and chairman of the clinic.

The sessions will start at 11 a.m., continuing through luncheon and the afternoon. At the morning session, over which Mr. Barry will preside, programming, buying and selling and interconnected vs. non-interconnected stations will be discussed.

William Gillette, vice president in charge of television at Young & Rubicam, New York, will speak on "Program Production Problems—Agency Style." Klaus Landsberg, general manager of KTLA (TV) Los Angeles, will discuss 'Local Station Production Problems.'

Sales to Be Covered
In the buying and selling sessions, Kenneth W. Stovman, television sales manager of WFIL-TV Philadelphia, and Linnea Nelson, radio and television timebuyer of WABC, will speak. Walter Thompson Co., New York, will speak.

The program problems of interconnected and non-interconnected stations will be discussed by Paul Adiantis, general manager of WHEN (TV) Syracuse, and Jack Boyle, studio production manager of WAVE-TV Louisville. A question and answer period will follow the morning sessions.

At luncheon, Milton Berle will perform, and a special adaptation of "Stop the Music" featuring Bert Parks will be presented. J. R. Poppele, TBA president, will preside at the luncheon.

The afternoon sessions will be divided into five sections: Profitable affiliated stations, local television packages, the jurisdictional problems of television, the future of sports in TV and a roundtable discussion.

Edward Lamb, president of WICU (TV) Erie, Pa., and WTVN (TV) Columbus, Ohio, will talk about profitable affiliated stations.

Local television packages will be treated by Russ Johnston, vice president of Jerry Fairbanks Inc.; Ralph Cohn, manager of the TV department of Screen Gems Inc., and Maurice Rifkin, executive of Frederic W. Ziv Television Programs Inc.

Ernest de la Osa, NBC director of personnel and labor relations, will talk on the jurisdictional problems of television. Ned Irish, vice president of the Madison Square Garden Corp., New York, will discuss the future of sports in TV.

Mowrey To Participate
Participating in the roundtable discussion will be Paul Mowrey, ABC national director of television programming, as moderator, and representatives of television networks.

The annual meeting of TBA members will precede the clinic sessions.

Mr. Poppele will make his annual report and directors will be elected. Directors whose terms expire are Paul Raibour, vice president of Paramount Pictures; Frank M. Russell, NBC vice president, and Ernest B. Loveman, vice president and general manager of WPTZ (TV) Philadelphia. Two vacancies on the board also will be filled, one left by the resignation of G. Emerson Markham, who before recently joining NAB was general manager of WPTZ (TV) Philadelphia. The other by the resignation of Robert E. Kintner, ABC president. Mr. Kintner's place on the TBA board has temporarily been filled by Joseph A. McDonald, ABC vice president.

KBTB (TV) SALE

APPLICATION for FCC approval of the $575,000-plus acquisition of KBTB (TV) Dallas by the Dallas Morning News, owner of 50 kw WFAA, was filed with the Commission last Thursday [Closed Circuit, Jan. 23].

In addition to the $575,000 cash purchase price, the sales contract provides for the News to pay KBTB's net operating losses, up to $35,000 a month, from last Jan. 1 to the date of transfer.

The sale was announced by E. M. (Ted) Dealey, News president. The station, on the air since last Sept. 17, was built at a cost of $487,053 by Tom Potter, multimillionaire oil man who told FCC he wishes to sell because of the pressure of other business interests. He would serve the new management as an advisor.

Martin B. Campbell, general manager of WFAA, would also have supervision over the television operation, upon FCC approval of the transfer. FCC was told that an "integrated operation" is anticipated and that it is expected that KBTB's present staff of about 50 persons will be absorbed in the overall operation.

KBTB, on Channel 8 (180-186 mc) with effective radiated power of 27.1 kw video and 13.5 kw audio, will use kinescope recordings of the network and local programs. It will be operated by DuMont television networks pending completion of the coaxial cable for direct connection. FCC was told.

"We will also devote much time to local programming," Mr. Dealey said, asserting that "talents of the WFAA forces will be combined with those already trained to television at KBTB." The station now uses DuMont and Paramount film shows.

WFAA has a pending television application which will be withdrawn upon approval of its acquisition of KBTB.

Mr. Potter has operated the station in the name of Potter Television Broadcasting Co. His son, Jack I., is president and Curtis Sanford is vice president and general manager. Larry DuPont is production manager and Morris G. Barton is chief engineer.

With Mr. Dealey's announcement of the sale, Mr. Potter said he had "long felt that the welfare and destiny of KBTB could be secured best by experienced radio hands." He said, "Mr. Dealey has invited me to continue my participation as best friend and severest critic, and I am happy to think this the KBTB and I will be together for a long time."

Operating Losses
From the time it went on the air in mid-September until Dec. 31, according to data filed with FCC, operating and other costs of KBTB totaled $155,790 while income amounted to $27,770, leaving an overall net loss of $128,020 for that period.

The transfer application was filed with FCC by the Washington law firms of Loucks, Zins, Young & Jansky, representing A. H. Belo Corp., owner of WFAA and the News, and Welch, Mott & Morgan, representing the Potter interests.

The transaction was handled through Dallas Rupe & Son, underwriters.

TBA Meet Set for Feb. 8 in New York

Dallas 'News' Applies
Telefile:

WDTV (TV) MARKS FIRST BIRTHDAY SHOWING A MONTHLY PROFIT

Only a short year ago the two-million-plus dwellers in the rugged tri-state area around industrial Pittsburgh were patiently awaiting the advent of this new-fangled television business they had been hearing and reading about.

The relatively high-spending inhabitants of the area, dwelling in houses perched on hillsides and in rolling valleys, wondered if they would be denied visual broadcasting because of the tricks nature had played on the terrain. After all, this was the hallowed radio city that had spawned the pioneer KDKA.

For two centuries the area has been taking advantage of Mother Nature's whims to build up the vast system of factories, mines, farms and commercial enterprises reaching out from the Golden Triangle.

Now the tri-state populace is a well-developed television area despite its relative TV infancy. Just last week civic and industrial leaders gathered in Pittsburgh's historic Duquesne Club to salute the founders of WDTV (TV)—Dr. Allen B. DuMont, pioneer TV inventor and developer, and Comdr. Mortimer W. Loewi, director of the DuMont Television Network.

Ocasion of the celebration was WDTV's first birthday. Those who took part looked around this young enterprise, Pittsburgh's only TV outlet, and what they saw was good. They looked at that relative rarity in modern business—a television station that is making money, perhaps as much as $7,000 or $8,000 a month after operating overhead and depreciation.

And most unusual of all, they observed a station that has made money almost from the moment it entered the commercial air of the nation's eighth ranking market. Today the area has 65,000 TV sets and there are scarcely any blind spots in the tumbling terrain.

Many years before television became an industry, Dr. DuMont had figured Pittsburgh as a good city. After the war he'd felt that way and was one of the first to apply for a Pittsburgh TV permit.

When the time came for action, Julian Armstrong, then director of planning and licenses, coordinated the operation while Rodney D. Chipp, DuMont network director of engineering, supervised technical activities with Raymond W. Rodgers, then and now station engineer.

On Nov. 27, 1948—10:57 p.m.—WDTV sent out its first signal—a picture of its "test pattern." On Jan. 11, 1949, Pittsburgh's "Window on the World" was formally inaugurated with the linking of the East-West coaxial cable. On Jan. 12 it began its first commercial operation. Nine days after East-West television made its first appearance on the new station, the inauguration of President Truman was offered—the first of many special events that WDTV was to bring to the Pittsburgh area.

As WDTV headed into its second year, Comdr. Loewi could look with satisfaction upon the outcome of the policy he had laid down for the DuMont-owned-and-operated station.

"We felt that in view of the fact that WDTV was the only station in one of the country's major cities, we must break with the past, if we were to assure its viewers the very best in programming and the business world the utmost our facilities could provide in reaching an excellent market.

"For that reason we granted WDTV's management virtual autonomy and encouraged it to pick and choose among all programs on the air. As a result Pittsburgh viewers see not only the best programs that DuMont has to offer but the best on all other networks as well. In fact they enjoy nine of the top 10 television programs on the air today.

"That is an established policy that we intend to maintain because WDTV—on account of the freeze—will likely remain Pittsburgh's only station for some time to come.

"At the present time the station broadcasts on the average of 54 hours per week. Approximately two-thirds of its programs are picked off the coaxial cable; the other third is produced locally on film, slides and balopticon.

During December, the station had 103 hours, 50 minutes of air-time sponsored by 43 network advertisers, 60 hours and 44 seconds sponsored by 40 regional and national advertisers, and 3 hours, 40 minutes and 20 seconds sponsored by local retail advertisers. Between 70 and 80% of the station's income was derived from local sales.

At WDTV they like to talk about

ATTENDING the celebration of WDTV's first anniversary are (l to r): Dr. Allen B. DuMont, founder and head of Allen B. DuMont Labs.; Donald Stewart, WDTV general manager, and Comdr. Mortimer W. Loewi, director of the DuMont Television Network.

their success stories, a phenomenon not uncommon in the electronics arts. There's the story of Frigidinner, for example. Frigidinner makes a frozen dinner packaged in a disposable aluminum tray. The product had never been advertised in the Pittsburgh area when the manufacturer decided to crack the market.

Through Rothman & Gibbons Agency, Frigidinner bought a WDTV half-hour ahead of the Oct. 1 Pitt-Northwestern football game. For programming the firm used film highlights of a local high school game that had been played the previous afternoon. At the end of the commercial, the Frigidinner phone number was flashed on the screen five seconds and announced just once.

And what happened?—fifty phone calls came through the Frigidinner board during the football game followed by another 250 after the game.

"Hmmm!" said Frigidinner executives, wondering how long this sort of thing had been going on. They promptly signed for a one-minute spot Monday through Friday, later since, they have averaged more than 150 calls per announcement. Sometimes the number has passed 300.

Calls are fine, of course, but Frigidinner wanted sales. So the snapper in this success story is the fact that a high percentage of these calls result in actual Frigidinner sales.

Though enjoying a link into the cross-county coaxial cable, WDTV set out to establish local character. One of the first results was a daily newsmade program. As civic-minded as a chamber of commerce, the station filmed leading local events and donated generous program time to civic, charitable and religious causes as well as defense recruiting drives, March of Dimes and related projects.

The film idea caught hold. At the same time WDTV took the air there were two industrial film companies in the city—one 35mm and one 16mm. Arrival of television in the city has brought five more 16mm companies into operation.
The early newsreel was titled "Pitt Parade," featuring film highlights of local events and presented six days a week. Producer is Packaged Programs Inc., also filming a daily 15-minute show for housewives, Home Is Happiness. While "Pitt Parade" was getting a foothold in the tri-state area, one of Pittsburgh's largest retailers, Jerome Donahoe, began to envision TV's advertising potential. He is president of the Donahoe's Food Stores, a Pittsburgh institution favorably known to the oldest inhabitants.

Mr. Donahoe decided to put some of his advertising budget in the brand new medium, using the strictly practical approach of the successful retailer. TV could prove itself as an effective medium, he figured, if it could stimulate overhead-counter sales in Donahoe stores. The way to do this, he decided, was to make a show concerned with items of interest to Pittsburghers since he chain is concentrated in the city. He recalled the greater reader appeal of local newspaper items over national news in newspapers. The answer was "Pitt Parade." Now, how about commercial treatment? Mr. Donahoe decided to look briefly in a pharmacy item of merchandise, advertise it in no other medium, put a time limit on response, and thereby appraise TV's effectiveness.

**THE DONAHOE CAMPAIGN PROVIDED PITTSBURGH'S FIRST TELEVISION SUCCESS STORY.** It worked like this: a story board was prepared on a cheddar cheese selling for 95¢ a pound. The manager of Donahoe's cheese department was shown cutting a slice of cheese from a large wheel, tossing it, and inviting viewers to come in to any Donahoe's Food Store within 24 hours. A lure was offered in the form of a pound of Donahoe's My-Te-Good macaroni to anyone who asked for the television special. The next day 80 customers responded, sending the cheese sales curve soaring. Encouraged, Mr. Donahoe tried a pound box of Fifth Avenue Candies the next week. The gift with each 95¢ purchase was a half-pound box of bon bons. Again the offer was advertised in no other medium and again the time limit was 24 hours. The response doubled as 153 persons went to Donahoe's stores for the TV special. No price reduction was made on the special.

Remember, this was still the first month of WDTV's operation and there were no earlier TV stations in the city to stimulate set sales. Third offer of six bottles of ketchup for $1 with a free can of tomatoes brought 213 customers and the fourth sold over 600 pounds of coffee.

The "Parade" has built up a wide following. Among sponsors are a group of cooperative trucking companies and a group of auto dealers.

Duquesne Brewing Co. sponsors a local and national sports newsreel plus news events on the lighter side. It's called "Quiz" and features Ple Traynor, ex-major league baseball player, and Ken Hildebrand.

George Drake Bakery buys the Al Morgan Monday evening program off the DuMont network cable. When the pianist brought his show to Pittsburgh recently, the Copa night club where he appeared broke all records and he's coming back in March.

WDTV pays particular attention to children, education and outstanding sports events. The Pittsburgh area saw telecast baseball for the first time when the station brought in the 1949 All-Star baseball game and carried the 1949 World Series.

Home coverage of the Pirates baseball club was snapped by the club's refusal to permit telecasting of its games—the only major league ball club to take this view. But refusing to take "no" for an answer when the Pittsburgh Steellers, the local professional football team, refused to have its games telecast "live," WDTV won approval to record them by film, and in this manner, succeeded in bringing the grid games to the TV screen. WDTV was instrumental in the rebirth of wrestling and boxing in its area. The Zivic Arena, managed by one-time Welterweight Champion Fritzie Zivic, was opened with a full schedule of wrestling and boxing with credit for their appeal given to WDTV's presentation of wrestling.

In discussing the region's acceptance of television, WDTV General Manager Don Stewart remarked: "In Pittsburgh, television is becoming an ever increasing factor in both everyday life and in the entertainment and advertising world. WDTV desires to serve the needs of the community from the standpoint of offering its facilities to educational, religious, civic, business and industrial groups."

Reviewing the year, he stated: "From the outset of operation the station has shown a steady growth. With the upward trend in 1949, I look for even greater results in 1950. "Advertisers in the Pittsburgh area have shown a favorable attitude toward television and are most cooperative; they are helpful in planning their needs and the trend is toward greater use of television as a medium for selling."

With the start of DuMont's daytime programming last month, WDTV advanced its going-on-air time to 12 noon Monday through Friday, running until approximately midnight.

Saturday and Sunday programing had been instituted long before at the specific request of viewers unable to get their fill of television during the week. On Saturday the station goes on the air at 2 p.m., and on Sunday at 4:30 p.m., remaining on until about midnight on both nights.

The station never hesitates to break its regular program schedule to bring Pittsburgh any event of major importance, and its decision to interrupt regular schedules often results in additional success stories. Such an occasion was its telecast of the Walcott-Charles heavyweight boxing championship.

On the day of the title fight, six special announcements and a 15-minute program telling viewers of the title bout telecast were made on behalf of KCP's Electric Co., distributor in the Pittsburgh area for KCP's home and industrial products. A prize was announced for the largest number of viewers per set.

The promotion brought in 19,000 responses from Pennsylvania, Ohio, West Virginia and New York. Letters included names and addresses of viewers. Many submitted photographs. Viewing audiences ranged up to 200 persons.

WDTV's staff includes some 30 employees with 15 in administrative work, seven engineers, two salesmen and two announcers. Station offices are located in the Clark Blvd., in the heart of the Golden Triangle. The transmitter is at 1410 Grissela St., on the Northside, highest point in Allegheny County.

The station transmits on Channel 3 with a 5 kw DuMont transmitter delivering 16.6 kw visual and 8.3 kw aural power. The antenna is 550 feet high, 818 feet above average terrain.

Film equipment includes two 16mm projectors, a haloscope, one flying spot scanner which will accommodate standard slides, and other material.

Basic Class A rates for one hour are $350; basic Class B rates $175.

Headed by General Manager Stewart, top personnel at WDTV includes Leslie Arries Jr., in charge of program operations; Larry Israel as sales director; John J. (Continued on Telecasting 12)
CONTROVERSY surrounding sports telecasts could be settled—or at least would subside somewhat—if the flow of objective reports on gate receipts is maintained. That is the opinion of N. W. Ayer & Son Inc., Philadelphia advertising agency, which last week released preliminary findings of a report by Jerry N. Jordan, 21-year-old U. of Pennsylvania graduate student [TELECASTING, Jan. 25].

N. W. Ayer said it made the findings public to clear up "garbled reports" about the survey’s sponsor- sorship. Although Mr. Jordan is the son of Clifton L. Jordan, executive vice president of the Ayer firm, the agency claims no sponsorship credit for the work. N. W. Ayer is one of the many organizations furnishing information but, the agency emphasized, that fact does not alter the “complete” objectivity of the study carried on by young Jordan with both sports organizations and university authorities.

Jerry Jordan’s preliminary findings indicate that while TV has hurt sports attendance in some cases, the effect may increase gate receipts in the long run. Partial results of the study have been distributed to leaders in college football and professional baseball. Ayer said. These have been instrumental in helping maintain the sports TV status quo for at least another year, when final results of this and other studies are available, the agency pointed out. The Ayer announcement traced the danger to the enjoyment of millions of new TV sports fans posed by dipping sports attendance figures during the summer and subsequent moves for a “partial blackout” of sports telecasts in 1950. It cited sentiment among certain segments of the sports world to ban TV at their events although most big ball clubs and the National Collegiate Athletic Assn. decided to stand pat until final research findings point the way for a decision in 1951.

The points arrived at in the preliminary findings by Mr. Jordan are:

The longer a person owns a TV set, the more interested he becomes in buying tickets to attend sports events.

Baseball does not seem to be as sensitive to TV as football. Set owners of less than a year attended about as frequently as non-owners and owners of two or more years attend more frequently. Samples show a higher percentage of TV owners present than non-owners.

Among other factors influencing attendance, apparently management, personal income and team performance are much more important than TV.

Football college games did not fare so well in TV areas in comparison to those in non TV-areas. However, there have been signs in some instances of colleges in TV areas of high saturation that showed an increase.

Small college football did not appear to be hurt by TV in the same degree as large colleges in their area.

Mr. Jordan in his survey included a breakdown of set owners sampled in a 50-mile radius of Philadelphia through personal in- 

*LANCASTER and contiguous areas. 

Editord's Note: Sources of set estimates are listed for each city as available and since most are compiled monthly some may remain unchanged in successive summaries. Total sets in all cities surveyed is necessarily approximate since two areas may overlap. To offset this there are many scattered sets in areas not included in the survey.

United Press, television and sports publications, 88 TV stations, the Atlantic Refining Co., N. W. Ayer & Son Inc. and a large number of colleges and universities, including NCAA members.

ARB Report

For Washington

FOLLOWING the lead of New York, Philadelphia and Baltimore, Milton Berle’s Texaco Star Theatre also headed the TV rating list in Washington, according to the latest American Research Bureau report [BROADCASTING, Jan. 28].

Strong competition also resulted from the Top 10 listing was Arthur Godfrey’s Talent Scouts. This strange turn of events—the program having been in third place for December—was caused, according to ARB, by a comparatively new full-length feature film series, Mystery Theatre, on another station.

Competition was also extended to lower the rating of other programs. Fred Waring, for instance, lowered Philco Playhouse, while wrestling and boxing telecasts hurt Studio One, The Goldberg’s and Break the Bank. Suspense was kept down by competition from Life of Riley, according to American Research Bureau.

The firm reports that as a result of this highly competitive evening (Continued on Telecasting 18)

atop the Transit Tower, San Antonio, Texas
NBC TOLD FCC last Thursday that it was preparing new plans to replace the projected 2½-hour Saturday night television series which had prompted Allen B. DuMont Labs to call for an FCC investigation [TELECASTING, Jan. 9].

Gustav B. Margraf, NBC vice president and general attorney, wrote FCC: 

"... NBC is withdrawing the order which it placed by telegram dated Dec. 28, 1948, with its inter-connected television affiliates for 8:10-30 p.m. (NYT) Saturdays for 13 weeks commencing Feb. 4, 1950. A new plan has been formulated which we expect to offer to the stations within the next few days."

Earlier, in response to FCC's request for information as a result of the DuMont protest, Mr. Margraf had told the Commission that for the present it would withhold "affirmative action" on its original 2½-hour plan. He gave this assurance in conjunction with a request for "an additional reasonable period of time" in which to submit "further considerations" with respect to the 2½-hour plan.

NBC had stipulated that at least 15 affiliates must accept the 2½-hour, 12-week series. There was no official indication of how many did accept, but some authorities said it was fewer than the required number.

DuMont, operator of a rival TV network, had charged NBC was trying to "freeze out" competition.

NBC contended in reply to FCC that its offer to take 2½ hours of affiliation time on a Saturday night was intended to be subject to the terms of affiliation contracts (or other arrangements, where formal affiliation contracts had not been signed).

Thus, Mr. Margraf wrote, "it was the intent of the telegram, and it is believed that it was so understood by the stations," that program material offered by NBC would be subject to the station's right to refuse, reject and substitute for any program which they considered unsatisfactory, unsuitable, or not in public interest.

Denial Made

The letter denied that NBC's telegram to DuMont Network Director Mortimer Loewi was an offer for NBC use of the entire DuMont network. The offer was directed only to DuMont's WDVT (TV) Pittsburgh, "with respect to which NBC has arrangements for broadcasting NBC network programs," Mr. Margraf asserted, adding that this was "the only reasonable interpretation which could be placed upon the telegram." He also denied that NBC's offer involved payment of each station's "full half-hour rate." He said:

"... the telegram stated that the station would be paid regular compensation based upon its half-hour rate. It was the intent of that proposal, and it is believed that it was so understood by the stations, that the compensation would be the percent stated in the network's agreement with the station of the half-hour network rate specified in the agreement."

NBC's plan anticipated that several advertisers would sponsor the Saturday night series. Their commercials were to be telecast on a rotating basis. Each half-hour period was to contain three one-minute commercials, followed by a 30-second station break. The sponsors were not identified.

CTI COLOR

FIRST public demonstration of color TV in the West was staged last Thursday and Friday by Color Television Inc., San Francisco, participant with CBS and RCA in the current FCC color hearings.

The public showing was staged in the auditorium of San Francisco's Emporium department store. There were strong protests to the demonstrations by Northern California TV distributors and dealers who feared the showings would hurt sales in the area.

The show, a half-hour talent production featuring Del Courtney, disc jockey on KPIX TV, San Francisco, and Eileen Christopherson, singer, was microwaved from CTI laboratories at 30 Sterling St. to KPIX studios in the Mark Hopkins Hotel and retransmitted by KPIX on its Channel 5.

CTI projection type color receivers were set up in the Emporium auditorium to receive the color telecast. Home receivers in the area received the show in black-and-white.

Arthur Matthews, president of CTI, said the colorcasts achieved a picture definition of approximately 350 lines.

On the color receivers, reception was steady and true with no break-up of color, even during fast motion such as waving of flags and brightly colored scarfs. Definition of the picture was clear.

The public showing last week was preceded by a series of private color circuit showings for manufacturers' representatives, industry people and newsmen [TELECASTING, Jan. 16]. FCC officials, who had earlier planned to visit San Francisco for the test showings, were unable to make the trip.

CTI is scheduled to demonstrate its system before the FCC Feb. 20, to be followed by comparative tests with the CBS and RCA systems.

CBS COLOR SHOWING

Congressional Group Given Demonstration

CBS' COLOR TV crusade was taken to Capitol Hill last week with a special showing of its system to Senators and members of the House of Representatives. Senators and wives were guests of CBS at a demonstration in Washington's Walker Bldg. last Monday [BROADCASTING, Jan. 16].

The network, which has been showing its system to the public since Jan. 12 (the same show was presented to Congressmen), registered the following comments from legislators who viewed the showing:

Sen. Charles W. Tobey (R-N.H.) was quoted to be fascinated by color, saying: "This is tops in television entertainment. It's the ultimate." Iowa's Sen. Guy M. Gillette, a Democrat, said: "It's astonishing what has been developed in color television. My only criticism is that the color is almost too vivid. However, it is a marked advance over black-and-white."

Mrs. Herbert H. Lehman, wife of newly-elected Democratic Senator from New York, thought the showing "very exciting" because "color always has meant very much to me." Sen. Edward J. Thye (R-Minn.) who attended the demonstration with Mrs. Thye, said the color was excellent and that they liked the showing since "these pictures are more natural in color and clearer than black-and-white."

Sen. John J. Williams (R-Del.) who said he and his wife did not own a black-and-white set, had but this to say, according to CBS: "This is wonderful."

The demonstration was presented for House members Wednesday and Thursday (Jan. 25-26). Also on the invitation list were members of the President's Cabinet. While only a few Senators appeared at the Monday showing, they had many emissaries in the attendance of their wives, assistants and other Capitol Hill personnel. Today, CBS has scheduled reviews for top echelon from the Pentagon and other major government departments. Supreme Court and other judicial members of the federal courts in Washington will be guests of CBS at a later date in the week.
to demonstrate the use of the product in the home, has great possibilities to promote the sale of food and household products.

The Brooklyn Union Gas Co. has been using the show Market Melodies. The firm has participated in radio occasionally in the past, but feels that television really can do a better job for it. The company's food demonstrations are on Market Melodies every Thursday. They give cooking hints and show how an appetizing dinner can be prepared in their half-hour period. The cooking is done in the Market Melodies kitchen, beautifully equipped with modern automatic gas appliances—a Servel refrigerator and a Roper automatic clock controlled gas range. This big utility company feels there is a great deal of interest in being able to show its appliances in use.

Salesmen Enthusiastic

One of the most enthusiastic sponsors is the maker of "Minwax"—a furniture polish. The firm has a 15-minute demonstration one day a week showing how to finish furniture. William Mackey, the sales manager of the company, said they were convinced by their own salesmen that they should buy time on Market Melodies. Said Mr. Mackey:

"The salesmen were sold on the show because, you know, salesmen are naturally lazy, and they could see this would be a really easy way to sell our product." The "Minwax" people feel that on television they can do something educational as well as sell. Refinishing from their company tell the audience how to refinish everything from a bureau top to a chair top and with their new pieces. One day they brought in some boys from a manual training school to do the refinishing—that day there was no commercial.

The "Minwax" people also do a lot of television advertising on some of the spots they have used some spots on the best daytime radio programs. But they are convinced Market Melodies is for them. They have some interesting figures on costs. On cost per inquiry basis they figure $4.50 per inquiry on newspaper, contrasted with only $1 per inquiry on Market Melodies. They're planning some advertising for other cities—and you guessed it—they're using television.

Among the regular sponsors on Market Melodies is Stahl-Meyer for "Stahl-Meyer Stock Cropped" frozen orange juice, and Hills Brothers Dried makeshifts. The fact that they have used Market Melodies without interruption on a full schedule ever since it first went on the air last May certainly shows that they are satisfied. Con- tinental Bakers bought time for "Wonder Bread" shortly after the one is used, Market Melodies has a

direct sales record to show. They received 284 orders from one announcement for a $18 reconditioned vacuum cleaner, $800 worth of sales from a series of announcements for a $2.95 Jiffy Stitcher, 700 sales from five announcements for a $2.95 set of plastic Christmas three ornaments, and 300 sales from one announcement for a $1 set of toy balloons. These figures represent substantial profits for sponsors when you consider that one-minute announcements cost $120 (per).

The future for Market Melodies, Ermeece Anne Russell and Walter Herlihy, Producer and Owner Arthur B. Modell, Associate Producer Charles A. Harbruck and staff looks increasingly more interesting. They're all young, quick to catch what's going on, and well equipped with a tongue-in-cheek attitude to withstand the gaff of a two-hour daily show. There has never been a script for the show. Anne and Walter remember everything, including commercials. And if you think television sponsors aren't imaginative about what they want included in their commercials, you haven't heard Market Melodies.

Planning Sequel

At the moment Modell-Harbruck Inc. are working on the idea of an additional show that will be similar to the Holiday Hints that Anne and Walter did for them right before Christmas. Holiday Hints proved itself a money-maker and boosted among its sponsors the rarely heard from advertisers, F. W. Woolworth and John David Stores. Market Melodies has all the earmarks of a show that's geared to grow synchronously with TV.
The MAGIC is built-in

There are two pictures on this page: the one you are looking at; and the one they are looking at (which you can't see).

To you the important picture is the people in front of the television screen. It is a picture of the special impact achieved only by this medium, yet which goes far beyond the novelty of television.

But we are equally concerned with the picture on the screen. For it is the result of creative programming which alone can sustain this kind of impact...building into every program the magic that holds the largest audiences week in and week out.

It is now clear that CBS is the richest source of such programming in television today; that CBS consistently has more of the most popular programs than any other network; and that most of these programs have been created or produced by the Columbia Broadcasting System.

This picture of television's impact is a picture any advertiser can create—but he needs the magic of CBS to hold it.

CBS TELEVISION
Teletile

(Continued from Telecasting 5)

Cole as sales service manager; Harry Munson, film director, and Chief Engineer Rodgers. In charge of public relations is Theodore A. Olson.

When the station signs off each evening, there falls to the announcer a bit of an extra chore. His final task is reading the announcement: "The program schedule of WDTV can be found in the following newspapers . . ." and there follows a list of the names of 25 district newspapers.

The newspapers on the list are from the tri-state area of Pennsylvania, Ohio and West Virginia. Those listed include the three Pittsburgh dailies, plus the Courier and the American Jewish Outlook; and one or more papers in each of the following cities where WDTV has a large audience: Homestead, McKeesport, Greensburg, Latrobe, Jeannette, Tarentum, Aliquippa, New Castle, Beaver Falls, Butler, Uniontown, Point Marion, Johnstown, and Altoona, Pa.; Steubenville, Youngstown and East Liverpool, Ohio; and Wheeling, W. Va.

When television started in Pittsburgh, there were no more than a handful of TV sets in the coverage area. As of Jan. 1 WDTV claimed an audience of at least 325,000 viewers—and dealers were running 60 to 90 days behind in filling orders.

Another FIRST for KDYL-TV

Afternoon programming aimed at women (naturally) marks another important "first" for Salt Lake's first TV station.

Availabilities during this 3 to 5 p.m. period are unusually attractive.

IRVING MACK

THERE'S A REASON why Filmack Trailer Co.'s sales letters pack a wallop.

Letter-writing is the boss's hobby.

In fact, Irving Mack, who founded the Chicago film trailer firm 30 years ago, has little truck with any diversion that fails to contribute to Filmack's prosperity. He went to college only after he realized Northwestern U. had a few courses that would aid him in his business. And his friends note with amusement that, although for five years he claimed he had raised seven sons to be soldiers, he now has them exactly where he always planned they should be—at Filmack.

Son of a Centerville, Iowa, grocer, Mr. Mack moved to Chicago at the age of 13. He attended Wendell Phillips High School in the city, and later it became famous as an all-Negro institution. Still in his mid-teens, he became assistant public relations director of sprawling White City Amusement Park, on Chicago's north side, and joined the Jones, Linick & Schafer film exchange. Five years later, Universal Film Co. named him exploitation manager for its Chicago territory, and in 1919, at the age of 24, he organized Filmack.

His first accounts were the Midwest, Terminal, and Pickadilly theaters, but he soon added Asher Ess, Lubliner & Tanenfeld, Pictures, Metro Goldwyn (prior to formation of M-G-M), and others to a roster of film exhibitors that now stretches across the nation.

"If you've been in a movie the-

FCC FREEZE

Dr. DuMont Urges Action In WDTV (TV) Talk

LIFTING of the FCC freeze on TV to permit development of a "truly competitive television transmission system" on a nationwide basis was advocated by Dr. Allen B. DuMont in an address Tuesday at the first Pittsburgh (see TELECAST, page 4).

Dr. DuMont was principal speaker at the dinner. Comdr. Mortimer W. Loewi, director of DuMont Television Network, welcomed dinner guests on behalf of the network, and Donald A. Stewart, WDTV general manager, on behalf of the station. Larry Israel, sales director, introduced speakers, including Herb Akerberg, CBS vice president in charge of station relations, and Sol Taishoff, editor and publisher of BROADCASTING-TELECAST.

The first and most important TV problem, Dr. DuMont said, is to provide more channels for black-and-white television so all major markets will be properly served. He cited Pittsburgh as "a prime example of the extreme necessity of setting quickly this problem of allo-

Another news conference Dr. DuMont predicted 75% of homes will have TV receivers within five or six years. He said WDTV hopes to have programs originating from local studies by autumn. The station will welcome TV competition in the city, he explained, because it will stimulate set sales and business.

Mr. Mack

* * *

ARE ANYWHERE in the country within

in the past 30 years, you've seen a Filmack trailer," he boasts.

With the advent of TV, Irving Mack figured his backlog of experience qualified him to make titles for TV shows, as well as complete commercials. He launched a promotional campaign in the TV trade press and unleashed a barrage of his best sales letters.

One of his first TV accounts was KoolVent Awnings. He animated a series of still photographs of KoolVent's manufacturing process for its TV show over WKBK TV. The animation gave a feeling of action and motion to the stills by means of a special film process which he developed in his own laboratories. A one-minute commercial was produced for $45.

Using his efficient film trailer "assembly line," which operates during the night, he made a "sellout" of 52 names and show titles for the opening and closing of a half-hour TV show for $25. A one-minute sound movie was produced for $150.

The list of TV producers using Filmack is growing as agencies and stations learn that Irving Mack's rapid techniques make it possible for them to buy his tricky film productions for less money than they can produce static cards or slides. Mr. Mack emphasizes, however, that he never tackle "big" TV productions.

Policy explained

"We're not Cecil B. DeMilles, We're not Walt Disney," he insists. "All we offer are high quality-low budget productions with extra quick service."

Mr. Mack and Belle Harris of Chicago were married 32 years ago. Their three sons—Joseph, 29; Bernard, 27; Donald, 23—saw action in World War II, and each was decorated with the Order of the Purple Heart. Each pursued different courses at college (Joseph at Loyola; Bernard and Donald at Northwestern) to prepare them for separate and distinct duties at the Filmack shop, where, their Dad hopes, they will one day "take over."

Mr. Mack, who represented Film Daily in Chicago for some time, is a familiar figure on Chicago's Wabash Ave. "film row," where he has established in the heart of his business career. He is a national representative of the Variety Club and holds memberships in the Tub Thumpers, Covenant Club of Chicago, Prudence Lodge of the A.F.A.M., and B'nai B'rith.

PACKARD TV

Places Hortons on ABC

PACKARD MOTOR CAR Co., De-

troit, through Young & Rubicam, New York, will announce, Edward Everett Horton in a half-hour TV show on ABC-TV starting March 23. This marks Packard's first use of television.

The production, as yet untitled, will have a mythical hotel for its setting. Rights have been acquired to all of Gordon Jenkins' compositions, including an operatic version of "White Tights," which will form a musical basis for the weekly telecasts. Mr. Horton will play the role of Hotel Manager. Monte Presler will be in charge of production.
ABC FILM PACE

"Crusade" To Show Profit

ABC's $400,000 film series Crusade in Europe, based on Gen. Dwight D. Eisenhower's book, may turn out to be a profitable venture for the network if it can continue to market the 26-week series at the present pace.

The series, first sponsored by Time magazine on its initial run, is now in its second run on a syndicated basis. More than 30 stations have bought it, 15 of which are running it sponsored. It is expected that the second run income will add $130,000 to ABC coffers.

ABC will have the right to a third run of the series. If it can duplicate the income of the present series, it was acknowledged by Ludwig Simmel, in charge of ABC cooperative sales, ABC will show a profit on this venture, which was regarded last May as the most ambitious film series made to date for television.

The film is being released to stations on a sustaining basis at 25% of their network rates and on a commercial basis at 50% of their national evening rates. The latter, depending on location, ranges anywhere from a low of $75 to a high of $1,000.

Mr. Simmel said that when Crusade was first offered as a syndicated series in December, sales were slow. Most purchases of the series came in during the past three weeks and are still coming in, he said.

TV PACKAGERS

Face Talent Problem

ONE of the biggest problems advertising agencies have experienced in dealing with television packagers is that the shows presented too frequently depend on talent that can't be delivered, Sylvan Tapping of Kenyon & Eckhardt, last week told a meeting of the Television Writers Group in New York.

He cautioned writers against planning shows that depended on stage or screen stars whose contracts make television appearances impossible.

At the same time, he emphasized, a show idea without talent is seldom good enough to clinch a sale for an independent packager.

Because of the talent problem, he said, agencies prefer to deal with established package firms and the networks rather than with individual packages. However, a person with an exceptional idea who can not deliver the talent may sometimes sell his idea to an agency on a royalty basis, he said.

Irvin Paul Sulds, president of Irvin Paul Sulds Inc. and president of National Society of Television Producers, said that television is currently in an era of low-budget shows because of inadequate circulation to justify a sponsor's spending more. He looked to the lifting of the FCC freeze before circulation would expand.

NEW TV STUDIO

To Animate Video Films

BILL STURM Studios has been organized to produce art work and animation for television, commercial and educational motion pictures and slide films. It also will produce live action pictures.

The firm is comprised of Bill Sturm, Crestes Calpini and Albert D. Hecht. Office will be at 53 East 9th St., New York.

Mr. Sturm has worked at Max Fleischer Studios, Walt Disney, Fletcher Smith Studios and Laucks & Norling. Mr. Calpini, a former president of Screen Cartoonists Guild, worked at Famous Studios.

Mr. Hecht, a member of the production committee of the National Television Film Council, has been an account executive for such TV accounts as Botany Mills, Lucky Strikes, Sheffield Dairies and others.

Well! Well! Well!

LOOK WHO'S HERE! THE MOST-WELCOME GUEST HAS ARRIVED! THE PARTY CAN GET GOING NOW.

He's not a big high-pressure tycoon (50,000 W.), nor is he a loud-shouter (250 W.). He's just a guy everyone knows—and likes tremendously.

He's WKRC, dominating the evening field in Cincinnati.

**OWNING** and operating its own TV studio, with programs to be transmitted by WSYR-TV Syracuse, Syracuse U. is entering the field of television. Chancellor William P. Tolley announced Saturday. Studio construction is slated to begin shortly on the Syracuse U. campus.

Syracuse U., Chancellor Tolley pointed out, becomes the first institution of higher learning to embark on a full-scale cooperative venture in television training and programming. He said the university is making extensive plans for the development of TV in the fields of adult education and public service programming, training of personnel and research.

Planned 10 Years

Chancellor Tolley said that TV at Syracuse U. planned for 10 years, has been made possible through funds held in reserve for the purpose by the university for many years and through WSYR-TV which has offered its transmitter for telecasting university programs. About four years ago, he stated, WSYR-TV granted funds to the university for television research. The station also will finance the link to its transmitter and will defray a portion of the costs of studio operation.

Citing the cooperation between a commercial television station and a large urban university, Dean Bartlett of Syracuse U. said: "We believe that the plans that have been drawn for television at Syracuse U. are among the most significant developments of what promises to be the most vital area of mass communication."

Programs of the university will originate in its present studio "A" and will go by coaxial cable and relay to the WSYR-TV transmitter at Sentinel Heights. Beginning March 1, Prof. Kenneth G. Bartlett, director of the radio-television center, expects to broadcast a minimum of three hours of live talent programs each week from the studios.

Commenting on the school's plans, Col. Harry C. Wilder, president of WSYR-AM-FM-TV, said: "For many years the support of WSYR for the AM and FM educational broadcasting of the radio center at Syracuse U. has been recognized in industry and educational circles as a pioneering example of the mutual benefits commercial broadcasters and educational institutions can and should gain by close and friendly association."

"Just as we have taken pride in our small part in the development of Syracuse U. radio center under Chancellor Tolley and Dean Bartlett into the outstanding educational radio center in the nation, so we are glad to move on into this great, new field of television with so progressive and vigorous an educational institution."

Facilities will include a three-camera chain and film camera although use of film will be chiefly incidental to the live programs. Arrangements also are being made for the pick-up of remote events from various strategic campus locations such as the stadium and lecture and concert auditoriums.

**PROGRAM TAGS**

**Asks FCC To Require Notice** FCC WAS ASKED last week to require television stations to announce at the beginning of each program whether it is (a) live, (b) film, or (c) kinescope recording. The request came in a letter from Charles W. Curran of New York, who said he was not employed in television but was writing as a "television viewer."

He said the quality of each type of originations varies, with "kinescoping being about one-third as satisfactory as live programming."

If viewers were told in advance what type each program would be, then needless adjustment of sets might be reduced, he said. The change he requested would involve amendment of Sec. 3.688 of FCC's Rules, dealing with "mechanical reproductions."

WOR-TV Weather Aids

WOR-TV, New York, which has installed a thermistor and wind velocity indicator on its 810-foot tower in North Bergen, N. J., at a point 1,000 feet above the Hudson River, has started furnishing weather information to the New York Weather Bureau. The WOR-TV location is the highest point from which the New York Weather Bureau will receive regular official reports.

RELAY LICENSES

Renewals to Crosley, Philco

EXTENSION of licenses to April 1 was given by FCC last week to two experimental TV relays used by Crosley Broadcasting Corp. and 10 similar relays used by Philco Television Broadcasting Corp. But both firms were informed that in the future they will have to prove common carrier facilities are inadequate.

Crosley uses the relays to interconnect its WLWT (TV) Cincinnati, WLWC (TV) Columbus and WLWD (TV) Dayton, Ohio, while Philco uses its relays between New York and Philadelphia in connection with its WPTZ (TV) in the latter city.

FCC pointed out that this policy was consistent with that announced in the overall television interconnection and rates proceeding which has been underway for more than a year. The Commission ruled in late December that AT&T by March 1 must allow interconnection of its inter-city TV relay facilities with those of private telecasters until the FCC finds that the common carriers have ample facilities to fill this need (Teletcasting, Dec. 26, 1949).

Denies Three Others

Meanwhile, last week FCC denied license renewal to three other experimental TV stations owned by Philco because they are operating in the commercial TV band on 204-210 m.c. and Philco "has had ample time to apply for frequencies allocated for TV auxiliary broadcast stations." The Commission also denied further temporary extension of license beyond March 1 to Don Lee Broadcasting System for its experimental TV station KM2XBA (formerly W0XDU) Los Angeles because Don Lee, "despite notifications, has not sought removal to a properly allocated band from its present frequency 310-315 mc."

Regarding its policy on experimental television relays, FCC told Crosley and Philco:

As you may be aware, in its report of Feb. 26, 1949, in Docket 663, the Commission announced its policy of authorizing inter-station television relaying, films and microwave relay for operation by television broadcasters only until such time as common carriers have adequate intercity television relay facilities available to meet the needs of broadcasters for intercity television transmission services. This policy was recently restated by the Commission in its report issued on Dec. 23, 1949, in Docket 8965 "** * **. In the latter report the Commission stated that it would maintain a continuing review of such authorizations with a view to termination thereof upon the availability of common carrier facilities. It was noted in this regard that consideration would be given to the opportunity of broadcasters may have had to plan properly for the use of their investment in such facilities.

In order that the Commission may be able to act as quickly as possible it is necessary for all applicants for authorization to operate intercity television relay stations and for renewal of such authorizations to obtain and furnish the Commission full information with respect to the ability of common carriers in the area involved to meet the requirements for the operation of television relay stations with transmission services which the operation of the television relay stations in question would be designed to meet. Such requirements should be presented to the applicant by common carrier writing together with a request for a statement with respect to the ability of such common carriers to provide the required service. Copies of all such correspondence, including the replies received from the common carriers and any comments which the applicant may wish to make in the matter should be forwarded to the Commission at the earliest practicable date.

‘PETRY SET’

WHAT LOOKS LIKE a custom-made TV set in the recently opened television clients’ room at Edward Petry & Co. Chicago office is not a set at all. The blonde mahogany cabinet, with "built-in" speaker, is a device for advertising and promotion.

Hidden in a small room adjacent to Petry’s plush television lounge, in the Wrigley Bldg., is a Bell & Howell 16mm sound motion picture projector which flashes its pictures on the special rear projection screen of the "TV set" through use of a mirror in a small porthole in the separating wall.

The novel way of presenting TV advertising to agencies and prospects was developed by Chicago executives of the radio and television station representative firm after they discovered that advertisers have difficulty in visualizing TV programs and announcements, and that the company itself has trouble in presenting a clear enough description to push through sales.

Heretofore, the only way an advertiser was able to see in advance what film programs or announcements he was buying — as they would look when actually telecasting — was to arrange a viewing at a TV station or the monitor line at a time when the station was not on the air.

Several Chicago agencies already have brought clients to the Petry viewing room, and the company is urging all those interested in commercial TV to make use of this so-called "simulated television" as a spur to sales.

Equipment Explained

In addition to the projector, equipment behind the "Petry set" includes a speaker, 16-inch turntable, microphone, slide projector, and tape recorder, thus enabling the company to simulate any type of telecasting—live voice behind film or slide, wax behind film or slide, etc. The "joke" assembly also permits ad-lib interpolations through the loud speaker while a film is being shown.

The Petry firm plans to have a similar installation in its new headquarters on the top floor of 488 Madison Ave., New York, expected to be ready in March, and eventually identical set-ups in all of its eight offices.

BASEBALL TV

Eastside Buys in West

LOS ANGELES Brewig Co., Los Angeles (Eastside Beer), through Lockwood-Shackelford Adv., that city, will sponsor half this season’s telecasts of both the Los Angeles Angels and Hollywood All-Stars home baseball games on KPI-TV and KLAC-TV, respectively. Both are Los Angeles stations.

Sponsorship cost for the alternating games on KLAC-TV is $60,000, with KPI-TV price reported as between $40,000, 50,000.

Langendorf United Bakers, San Francisco, through Blow Co., that city, is paying $42,500 to sponsor half the AM broadcasts on an alternating games basis on KLAC starting March 28.

THEATRE VIDEO

Planning Unit Underway

NATHAN L. HALPERN, television consultant to Fabian Theatres, and Robert H. O’Brien, secretary-treasurer of United Paramount Theatres in charge of television activities, have been named co-chairmen of the theatre television planning committee of the Theatre Owners of America.

In their new posts, Messrs. Halpern and O’Brien will direct and coordinate the preparations among film exhibitors for the forthcoming theatre television channel hearings before the FCC. Marcus Cohn, TOA television council, will work closely with the two co-chairmen.

Best Buy In Booming TV Market...

With eight TV stations in the three-city market of Cincinnati, Dayton and Columbus . . . the three WLW-Television stations (WLW-T, Cincinnati; WLW-D, Dayton; WLW-C, Columbus) receive 44% of all viewing from 11:00 a.m. to 11:00 p.m., Sunday through Saturday.

While WLW-TV rates remain unchanged, the number of sets continues to skyrocket—97,600 on Dec. 1, 1949, to 132,200 by Jan. 1, 1950, in this three-city market.
PHONEVISION

McDonald Answers Storer

THE public is willing to pay for “good movies on television,” Comdr. E. F. McDonald, Jr., president of the Zenith Radio Corp., last week wrote to George B. Storer, president of the Fort Storer industries. Mr. Storer was performing a disservice to TV profit. Congratulations! FCC reports that last year television broadcasters lost $15,000,000, and it is no secret that losses from television have in many cases sharply reduced or erased entirely the profits from highly successful AM operations.

"The fact is that nobody, until very recently, had thought to make a study of what television is actually going to cost. I am indebted to Senator Wheeler for sending me a copy of the first study of this type I have seen. It is titled ‘Television’ and was prepared by the Faught Co. of New York. If you wish, I shall gladly send you a copy."

Comdr. McDonald said Phonevision would provide revenue TV broadcasters badly need—a return “always greater than the sale of the same amount of time to advertisers.” It would provide means to expand TV into areas that can’t support stations today, he said.

Support Factor

"You know as well as I that the public will pay for anything that it wants, and you also know that if television is to depend entirely upon advertisers for support it can never present first-run movies and many other high-cost entertainment features.

"You also know that the public wants to see good movies on television, and you should know, if you don’t, that in survey after survey the public has indicated its willingness—nay, eagerness—to pay for seeing them.

"You say that your television stations are earning a modest

Howdy Doody Patent

HOWDY DOODY, freckle-faced puppet star of the NBC Television Network, is now No. 156,887 in the U. S. Patent Office—one of the first video characters to be patented. According to the patent, he is designed by Robert Y. Allen, Pacific Palisades, Calif., and Melvin Shaw, Beverly Hills, Calif., assignors of the patent to NBC.

WORLD MARKET

RMA To Show American Units

FIRST U. S. effort to gain an international market for TV sets and equipment was taken last week when Radio Mfrs. Assn., at State Dept. request, named industry committees to arrange a demonstration of American TV between March 27 and April 2.

RMA will conduct the demonstration for a group of European experts comprising Study Group 11 of the International Radio Consultative Committee (CCIR). This committee met last July in Zurich, Switzerland, to consider international television standards. RMA and several U. S. manufacturers were represented. The State Dept. asked Group 11 to inspect U. S. television in operation.

Nations in the group are: Austria, Belgium, Czechoslovakia, Denmark, France, Hungary, Italy, The Netherlands, Sweden, Switzerland, United Kingdom, Yugoslavia and United States. French and Dutch demonstrations will be held April 20-25 in Paris and Eindhoven, with a British demonstration April 27-M.A. in London.

RMA last week recommended membership of a host committee and administrative subcommittee, to be named by the State Dept. It appointed a technical subcommittee under R. R. G. Burger, General Electric Co. and RMA Engineering Dept. director. The technical group will meet tomorrow (Tuesday) at IRE headquarters in New York.

Willard L. Thorp, Assistant Secretary of State, said in a letter to RMA President Raymond C. Cosgrove that certain foreign nations are trying to obtain approval of TV standards developed materially from the U. S. standards. “It is hoped by the contemplated tests,” he said, “to demonstrate the effectiveness of U. S. standards. Certainly, the formalization of standards which are not compatible with U. S. standards, even if subject should be designed for the European region only, would produce a most unfortunate influence in Latin America and might cause considerable delay in the establishment of satisfactory international standards for the Western Hemisphere.”

HITS FREEZE

Hollywood Group Asks Action

PROTESTING further continuance of FCC's television freeze as “definitely not in the public interest,” the Society of Television Engineers, Hollywood, called on FCC Chairman Wayne Coy for action.

Written by Cameron Pierce, STE president and technical operations supervisor of KXCA-TV Hollywood, the communication, dated Jan. 19, cited six major reasons for a thaw:

1. The original intent of the freeze was to allow time to re-examine the VHF allocation problem. Ample time has already elapsed for this study, and we believe that Commission now has in its possession adequate facts to readily permit this reallocation of the VHF band.

2. The UHF band can be allocated immediately or later but the VHF channels can be allocated now with due regard to reception conditions. Our group feels that insofar as possible VHF and UHF channels should be allocated now for the same service area. It is recognized that this ideal cannot be realized completely. Again, however, there are enough facts to establish immediately the VHF allocation.

3. The public interest is being directly and seriously affected because many people who want TV now cannot obtain this excellent and educational entertainment medium. Many areas if not all in the country do not obtain it as long ago for the West where serious allocation difficulties do not exist.

4. A freeze is preventing the establishment of true television networks both on an interconnected and non-interconnected basis. Networks need to be established to bring better programs and to improve their service to the public.

5. An article limitation on the growth of television artificially limits the production of television receivers in the country and consequently slows down in design which higher and higher production automatically contributes to a product such as a television receiver. Not only are improvements in design held back, but price reductions dependent on high productivities are retarded. This is definitely against the public interest.

6. The color problem has really been made a part of the allocation study, and it is, in our opinion, wrong to continue the intermingling of these two problems. It is agreed that a compatible color television system is needed. Therefore, color should be made up to its proper progress of black and white television by the artificial retarding effect of the freeze. The public is being confused and not helped by the sales releases which are continually emanating from Washington on color. This confusion and sales releases should not be allowed to extend the “freeze” when the latter was originally intended because of technical considerations, but for very different reasons. As pointed out previously, the information needed to settle the original problems of the “freeze” is now available and definitely should be used.
EMPIRE STATE

TELEVISION will add another 199 feet to the world's tallest building, the Empire State Bldg. in New York, when a multiple-use video tower is installed later this year. The structure will provide New York telecasters with the highest telecasting transmission point along the Atlantic Seaboard.

Announcement of the alteration in New York's skyline was made last Monday by Joseph H. McConnell, president of NBC, and Lt. Gen. Hugh A. Drum, president of Empire State Inc.

Gen. Drum's organization will finance the addition, which, at a cost estimated at half a million dol-

ars, will be the first major alteration to the building since it was opened in 1931.

The tower will be an integral part of the building's structural frame and bring the height of the Empire State to 1,499 feet above sea level or 1,449 feet above the street.

It will afford space for simultaneous transmission by NBC, ABC and such other telecasters who wish to lease facilities from Empire State. WJZ-TV, ABC's New York station, the first new tenant, will move into the new location from its present Hotel Pierre site in a matter of days, it was announced by Mark Woods, vice chairman of the ABC board. WPIX (TV) and WARD (TV) are negotiating to join WJZ-TV as new tenants.

WNBT (TV), NBC's New York station, will continue at the location.

Use of the building as a video transmission point started in 1951, when the late Gov. Alfred E. Smith, then president of the building, and Gen. David Sarnoff, RCA board chairman, concluded an arrangement enabling NBC to have an exclusive lease for TV transmission from the site.

NBC's Franchise

NBC continued to enjoy that exclusive franchise until expiration of the lease last year. Consideration was then given to opening the site as a common transmission point for several stations on a share-the-cost basis.

Main advantages spoken for the common location are its height and centralized character. The height is a vital factor in clarity and range of television vision. Centralization of transmitters of several telecasters at one site is regarded as important because it will make it possible for all local video receivers to be oriented to one location for all stations using the tower.

Actual construction is expected to take seven to eight months, including dismantling of the present 61-foot antenna used by WNBT since 1946. WNBT service will not be interrupted in the interim as it has installed a temporary antenna.

Design of the new structure and antenna will be supervised by a committee consisting of O. B. Hanson, vice president and chief engineer for NBC, and Dr. Frank G. Kear, of the engineering firm of Kear & Kennedy, Washington, D. C., which represents Empire State. Consultants to the committee will be the firm of Shreve, Lamb & Harmon, architects who designed the building, and Starratt Bros. & Eken who constructed it.

ABC meanwhile announced that the 26-block move from its Hotel Pierre transmission point to Empire State will require little or no changes or adjustments of receiving set antennae.

Its WJZ-TV will begin operations with a single element super-turnstile antenna from the building until a new specially designed antenna is delivered. The new job will have a diameter of 14 feet and will consist of a number of individually connected antenna segments.

ABC also has leased 3,200 square feet of space on the 85th floor of Empire State, where the network engineers already have completed the necessary wiring, duct work and transmission line installations, so when the temporary transmitter makes its mile-and-a-quarter journey it will be ready for connection.

REED NAMED
To NBC-TV Sales Post

FRANK J. REED, with NBC since 1934 except for war service, has been named manager of the network's recently created television sales department.

Under Mr. Reed will be three units: Special service, headed by Mary Alcornbach; traffic, headed by Hamish McIntosh, and financial, headed by John J. Weir.

WHAS-TV Gets GE Unit

GENERAL ELECTRIC Co. has shipped a 12-day superturnstile television antenna to WHAS-TV Louisville, the company has announced. This is the second such giant antenna to be manufactured by GE within the past few months, KRLD-TV Dallas, GE said, recently installed one of the largest low-band antenna ever built—a six-ray GE unit. Other GE equipment supplied the station includes a 5 kw channel transmitter, two film channels, two 16mm projectors and miscellaneous studio equipment.
COLOR SYSTEMS
AIEE, IRE Hear Goldmark

TECHNICAL, detailed description of the three principal systems proposed for color television was given last Tuesday in Washington by Dr. Peter C. Goldmark, inventor of CBS' field sequential system, before a joint meeting of local chapters of the Institute of Radio Engineers and the American Institute of Electrical Engineers. Audience of 1,500 packed the Commerce Dept. Auditorium where FCC's color TV hearing has been conducted.

Following the lecture, CBS demonstrated its color TV to the group with a special showing at the Walker Bldg., site of Columbia's public demonstrations the following day, in another half hour [TELECASTING, Jan. 16]. Dr. Goldmark explained differences between the CBS system and those of RCA and Telefunken Inc. He was introduced by Dixon Lowery, chairman of the Washington AIEE chapter, and Harry Wells, chairman of the Washington IRE chapter.

WANTS 'TRUTH'
Cohen Ad Seeks Color Facts

The TELEVISION industry was asked last week by I. T. Cohen Advertising Agency, Washington, to 'tell the public the truth' about color television. The appeal was contained in advertisements appearing in the capital city's daily newspapers.

Entitled "Color Television . . . When?", the two-column wide and 1½-inch deep advertisement urged the creation of an "unbiased board" including in its membership "all major television manufacturers and a representation of leading distributors and retailers, as well as telecasters themselves" to tell the "truth" about color TV.

The ad, which the agency claimed was published in the "interest of the television industry," explained the "truth" about color TV to be:

That color will some day come to home television screens, just as it came to movie screens; that general transmission of color television will come sooner or later, but is something for the future; that, until color does come, viewers may enjoy black-and-white television with ever-increasing enjoyment; and that, when color television seems near, the people will receive ample notice and all the facts.

Mr. Cohen told TELECASTING that the advertisements' expense was borne by the agency as "our contribution to the television industry." He said placement of the ads was the agency's "own idea" and in the interest and "protection" of those who have invested money in video set owners who have purchased black-and-white receivers. Mr. Cohen said that since the agency handles accounts within the industry, it decided "as a statement should be made to the people on whether color TV is here. The public is entitled to true facts." Part of the agency's campaign, Mr. Cohen said, will be to correspond with manufacturers "to see if the ads have any effect." Other advertisements dealing with television will be placed from time to time, he said.

EVENING course in principles and procedures of television will be offered by St. Louis U., St. Louis, beginning Feb. 8.

MEDIA ASSOCIATIONS AGREE on what standard measuring stick for local market potentials?

The Bureau of Advertising, A.N.P.A., the National Association of Broadcasters, Broadcast Measurement Bureau, Magazine Advertising Bureau, National Association of Transportation Advertisers, and the Traffic Audit Bureau all get their basic figures on local markets from the same marketing guide—

SALES MANAGEMENT'S "Survey of Buying Power."

Help Wanted

EXPERIENCED RADIO MEN! YOU CAN OWN YOUR OWN STATION

A small-town, network kiosk in a good competitive growing community has openings for men in all departments who are seeking opportunity. Station building constantly higher-quality—new facilities for staff of experienced, ambitious men who want some day to own all or a substantial part of their own station.

Since early days of radio this management has directly helped 3 men become station-owners and indirectly aided twice as many.

It provides for unusual people—with at least 5 years experience—salaries equal to comparable stations, plus profit-sharing NOW, plus a definite plan to add future financing of stations to be owned by staff members, in whole or in part.

Opportunities exist now and should always.

Applications will be held in confidence.

Send full data—where employed, present salary, experience, education, picture, anything you think helpful. You sell us. There's no hurry.

No money needed. No stock to buy.

Station seeks greater man-hour production thru team-work with above-average team of experience, intelligence, integrity, industry, ambition. Good people are needed to make a good station which can do a bigger share of advertising than ever. Good people want opportunity with good pay and good future.

WANTED BY

Radio Syndicate

One of the largest producers of commercially syndicated radio programs offers a top position to a properly qualified merchandise man. The man we seek is at present employed by one of the networks, by a large agency or by a prize merchandise organization. He has a wide acquaintance among manufacturers and an intimate knowledge of the problems of the radio awards promotion. His job with us will be to effect promotional arrangements with major manufacturers securing their participation on one of the country’s best known syndicated give-away programs. Present employment in similar work is an essential qualification. Write fully giving previous experience, present connections and money wanted. All inquiries will be held in strictest confidence. Our employees know of this ad.

BOX 980D, BROADCASTING

JOSEPH IRWIN, on news staff of CKCW Moncton, N. B., and Frances Higgins have announced their marriage.

Susanna Irion

TWO-MONTH old daughter of FCC Attorney H. Gifford Irion, Susanna, was found dead by her parents Jan. 21. The child apparently suffocated under blankets in her crib, it was reported. The Irions have one other child, Chris- topher, age 8. Mr. Irion is with the Commission's transfer branch of the Law Bureau.

On All Accounts

(Continued from page 12)

Beverly Hills Chamber of Commerce.

In 1939 George climaxed a nine-year courtship when he married Eleanor Smith to whom he had announced intentions of marriage on their first date. His hobbies include Janet Lee, 5, and George W. (for Wallace in this case), 12.

The Irwins make their home at present in the San Fernando Val- ley, with future plans for building in Northridge, where George plans happily to take up farming again.

Radio MFRs.

Mid-Winter Meet Feb. 15-17

PROMOTION problems facing radio and television as the TV manu- facturing industry enters its biggest year will be discussed at the annual mid-winter meeting of Radio Mfrs. Assn. to be held Feb. 15-17 at the Stevens Hotel, Chi- cago.

Sessions of the RMA board, divi- sions and committees are included. RMA President Ramond C. Cosgrove will preside at the industry division sessions, which come just prior to the Feb. 20 resumption of FCC's color television hearings. Presi- dent Cosgrove will appear at the hearings to urge an early end of the FCC's TV freeze on new VHF stations and opening of the UHF frequencies.

Baker Heads Committee

Organization of the all-industry National Television System Committee will be pressed forward. The committee is headed by W. R. G. Baker, General Electric Co. vice president and director of the RMA Engineering Dept. [BROADCASTING, Jan. 25].

The session was authorized by the RMA Television Committee under Chairman Max F. Balem, Syl- via Electric Products Corp.

RMA will consider proposed ac- tion on the 10% radio excise tax in connection with proposals to repeal or reduce the tax. The prob- lem comes before the Excise Tax Committee, headed by Joseph Gerl, Sonora Radio & Television Corp.

Plans for the 1950 National Radio & Television Week project, handling jointly with NAB, will be dis- cussed as well as plans for the Feb. 22 awards luncheon of the Voice of Democracy contest.

The “Town Meetings” Committee, an industry project for training of television dealers, will discuss plans for further meetings. Other divi- sions and committees will meet. The sessions will open Feb. 17 with a meeting of the RMA board.

Radio GOA, only commercial station for India-Pakistan, starts 11-hour daily schedule, Pan American Broadcasting Co., station's exclusive commercial re- presentative, announced last week. Al- most all station's programming is either packaged shows or disk jockey periods.
WARREN MIDDLETON resigns as sales promotion manager of KMOX-St. Louis to return to his former position as assistant sales manager for John C. DRAKE, director of sales promotion and publicity, at WLS Chicago.

J. L. McINERNEY, who resigned from WZ Denver in 1942 after 10 years on announcing staff, returns to station Feb. 1 as publicity director.

Mr. McInerney reported first “man-on-the-street” broadcast in Denver, having done this in 1915.

WILLIAM G. GRAHAM appointed promotion manager of CHVC Niagara Falls, Ont.

MARY ELAINE CHERRY added to public relations staff at WGN Chicago after working in variety department of Chicago Tribune, owner of station.

Salesmen’s Hats

“PROMOTION” of Frederic W. Ziv pack, “Cisco Kid,” currently aired over WOR Parkersburg, W. Va., began its large dinner. Salesmen on routes of F. A. Greiner’s Bakery, local sponsor of show, were guests. Each received a “Cisco Kid” Mexican sombrero which he will wear on his route to promote show.

WLAW Cook Books

“COPIES” of cook book compiled from edibles submitted in WLAW Lawrence, Mass., contest last year, are being sent in station to some 20,000 housewives. Book is toned in sepia, green, blue and black. Covers feature microphotographs of station’s call letters, dial position and ABC affiliation prominently posted. Words, “Cook Book,” are formed of kitchen utensils, and drawing of Polly Huse, home economics counsellor who staged contest and won her entry W7A Polly show, complete cover. Fifty-two prize-winning recipes are included.

Mid-South Promotion

FIRST of promotion bulletins issued by Mid-South Network is map showing primary coverage areas of WROX Clarksdale, WNAG Grenada, WLO Tupelo, WROB West Point, WCBJ Columbus and WMOX-AM-FM Meridian, all Miss., stations comprising network. In addition to map, bulletins promoting individually WROB West Point’s mail pull of 3,800 cards and letters in six months for one show and Housewives’ Jackpot on WMOX-AM-FM Meridian were sent to trade.

25th Brings Silver

SILVER cards printed in blue were stuck under windshield wipers of cars which had exceeded their parking limits in Scranton, Pa. Cards read, “Your meter showed red... but today, Jan. 12, is WGBI’s Silver Anniversary... so we took the liberty of dropping a nickel in your meter... the next hour is our treat... and incidentally, you are always sure of a good treat if you keep tuned to WGBI...” Call letters, dial position and dates of station were included on card. Additional Silver Jubilee promotion was awarding of 25 silver dollars to listeners who observed their 25th birthday on same day as station.

Music Festival

SYLLABUS for 1950 Moncton Musical Festival released by CKCW Moncton, sponsor and operator of annual musical event. Festival, from May 15, is community service offered by station. Scholarships are available to successful competitors. Complete rules for interested contestants are given in syllabus.

Announcement Inspires

PROMOTIONAL announcement on free enterprise aired by WNMP Evansville, Ind., was heard by Cartoonist Don G. Moore of Daily Courier-News in nearby Elgin. Impressed by “effectiveness” of spot, Mr. Moore sent station an editorial cartoon contrasting British socialism and American democracy which was suggested by radio message. Copy of cartoon, with duplicates of promotion copy, being mailed by station to advertisers and clients in Chicago area.

Pie’s Pulse

DRAWING of chef holding large pie, cut and marked according to share of audience percentages in Washington, sent to trade by WWDC Washington. Figures were based on Pulse November and December survey. WWDC’s share is 10%. Rhyme beneath pie is, “Little Jack Horner sat in a corner, the latest Pulse survey to see. He worked out this pie, compared rates and said, ‘My! The best buy is WWDC.’”

Coloring Contest

OUTLINED pictures of “Gus the Gopher,” new feature on Mercury Chicago, were sent to Mercury dealers in Boston area for children wishing to take part in new contest. Contest is sponsored by Let’s Have Fun show on WQOP Boston, which is emceed by 9-year-old Betsy King. Stoger toy was warded to top three children who color picture, with giant fire patrol car as first prize. Let’s Have Fun is aired Sunday, 9-10 a.m., and features children’s stories and music.

Trips to Hollywood

TWO WMAQ Chicago listeners will win all-expense trips to Hollywood for listing their reasons for hearing NBC Chicago shows. Offer, which runs daily Six-Thirty Special, extended to persons 21 years or older who submit letters of 25 words or less before Feb. 1. Winners will fly to Hollywood Feb. 9, be guests on NBC’s Double or Nothing, visit numerous glamorous spots and tour movie studios. Entries will be judged on originality, aptness and sincerity.

More for Mutual

LATEST in series of promotions sent to trade by MBS is tear sheet reprinted from trade magazine. Page is made up of stories concerning placing of shows on network. Large plus sign is made by space between stories and carries caption, “The Plus difference is Mutual!”

Barker Barks

CROWD gathered in Philadelphia’s City Hall courtyard recently to receive bags of peanuts distributed free from portable stand operated by man dressed as carnival Barker. Promotion was on behalf of Ford Theatre’s presentation of “Back to Bed.” WCAU-TV’s Delaware carried show and furnished peanuts which carried name of show, time and station on bag.

Back-To-Bed Club

NOVEL promotion surrounds new show of CFCE Montreal, Ont. Morning Man Stan Harrison conducts disc spinning program from show window of local restaurant. Mr. Harrison interviews members of “Back-to-Bed Club” clad in club’s official uniform, nightgown, nightcap and candlestick. Show cards in “studio” window announce times of top shows heard over CFCE. Card featuring picture of Sleepy Mr. Harrison carries club’s by-laws and is sent to members.

WHBY Appleton, Wis., set new all time high in its airing of sports broadcasts during 1949, station reports.

MEDIA BROKERS
GEORGIA ASSN.

LARGEST attendance in the history of the Georgia Assn. of Broadcasters was reported at the Jan. 17-18 meeting held in the Hotel Dempsey, Macon, Ga. The meeting was arranged by WLAG LaGrange and WSAC Columbus, GAB representing 31 Georgia stations, *payments by stations to SESAC, payments for rights to broadcast high school football games and a proposed bill to be introduced in the Georgia Legislature to exempt stations from reporting their news sources of information. The GAB decided against taking any action on the proposed bill this year but planned to introduce such a bill in its 1974 session. Station hosts were WMBL WBBM WMaz WNWX, all in Macon. Mayor of the city, Lewis B. Wilson, entertained the broadcasters with a light magic show at a banquet which followed a cocktail party opening the meeting the night of Jan. 17. GAB adopted a resolution protesting a channel group* by Cunningham's son, also to conduct the annual election of officers by mail. Current terms of officers expire June 30.

Kilocycle's Mayor CARTOGRAPHERS take notice! There’s now a Kilocycle, Ga., and it already has a mayor. He is Lewis B. Wilson, Macon, Ga. (Macon, Ga.) The Georgia Assn. of Broadcasters named Mayor Wilson to that office in appreciation of his courtesies to the GAB which he has entertained with a magic show at the group’s Jan. 18 meeting in Macon. Action was taken, GAB resolved, because he “has demonstrated to over 75 radio men that he can do anything from boiling eggs to pulling rabbits out of the hat.” His domain extends from Macon to the south Georgia broadcast band and to make it media-legal also includes every FM and TV channel in the state.

WABB INCIDENT Three More are Arrested THREE more men, one of them a local labor leader, were arrested Jan. 21 on conspiracy charges in connection with an assault, earlier this month on Dean M. Durham, radio engineer at the transmitter of WABB Mobile [Broadcasting, Jan. 26], according to a story appearing in the Mobile Press Register, owner of the station. The arrests, which brought to five the total number of persons docketed at the Mobile jail, assured early detention was Jan. 20 by a Mobile County grand jury. Union engineers of WABB went on strike several months ago. On Oct. 25, 1970, a $400 reward was offered by the Press Register for information leading to the arrest or conviction of the person or persons pouring potassium acid through cable holes. Telephone and WABB-AM-FM lines were knocked out temporarily. [Broadcasting, Oct. 31., 1949].

Record Appearance At Macon Meet

(Continued from page 76)

Decisions Cont.: KVTX Dallas, Tex.—Granted mod. CP application changing ant. system WELR Roanoke, Va.—Granted mod. CP application to change studio location and change type of trans. ACTION ON MOTIONS (By Commissioner Hyde) Both Radio and Television Stations Inc., Grand Rapids, Mich.—Granted petition for dismissal without prejudice of their petition to change Commission’s own motion application for change of call letters WRIA Memphis, Tenn.—Granted petition for extension to Feb. 18 to file exceptions to initial decision. WIBC Indianapolis—Dismissed as most petition requesting waiver of Commission’s rules and grant of license for station without prejudice of their petition. WJFL New Orleans, La.—Granted petition for dismissal without prejudice of application. WGGN Beverly Hills, Calif.—Granted petition for dismissal of application without prejudice of application (for FM CP). FCC General Counsel—Granted petition for extension of time to file prejudice of petition filed in proceeding re application of St. Louis, Mo., for CP. [By Examiner Lavin] Howard M. Loeb, Phoenix, Ariz.—Dismissed as most petition requesting that hearing scheduled Jan. 23 in Washington, D.C., be continued for 60 days.
**Canadian Fees**

**Board Reserves Decision**

DECISION on 1500 fees for the Compsoors, Authors and Publishers of Canada (CAPAC), Canada's ASCAP, was reserved on Jan. 21 at Ottawa by the Canadian Copyright Appeal Board. CAPAC said it had lost 115 in fees from broadcasting stations, $20,000 more than last year.

Sum is based on 14c per licensed radio receiver. Half the fee is to be paid by privately-owned stations, and paid by Canadian Broadcasting Corporation. CBC protested the fee before the board on the ground that it only has 18 stations where there are 126 privately-owned stations. Justice J. T. Thorson, chairman of the board, stated that anyone satisfied with the fee could contest the matter in the courts.

**Canadian Independent Broadcasters**

**Government Cuts**

The government has cut the Canadian Independent Broadcasters (CIB) by $3,000 from its $15,000. The CIB has been trying to get the $15,000 for the past two years. The government said it was cutting the CIB because it was not doing its job properly.

**Radio Licenses**

The government has granted radio licenses to 100 stations in the Canadian Independent Broadcasters (CIB) for the next two years. The CIB has been trying to get the $15,000 for the past two years. The government said it was cutting the CIB because it was not doing its job properly.

**Radio Licenses**

The government has granted radio licenses to 100 stations in the Canadian Independent Broadcasters (CIB) for the next two years. The CIB has been trying to get the $15,000 for the past two years. The government said it was cutting the CIB because it was not doing its job properly.
Docket Actions...

REVISED HANDBOOK

Amateur's Volume Issue

The 1950 edition of The Rad Amateur's Handbook, compiled the staff of the Amateur Radio Relay League, Inc., with a careful revision of basic data to incorporate new developments in the field of communication. The new work, written in a concise but emphatic style is well illustrated and sections on methods to reduce interference to TV reception.

The handbook, as in previous years, tells amateurs about manufacturers from around the world and their products. It also contains many illustrations and diagrams. This handbook presents the important features of equipment for beginners. For advanced radio enthusiasts, the handbook contains an extensive section on methods to reduce interference to TV reception.
IMPS Stressed

EDITOR, BROADCASTING:
First, let me thank you for the excellent coverage you gave our film, "Lightning Truck," in the Jan. 22 issue of BROADCASTING. Also, I should like you to know how much we appreciate your favorable editorial comments regarding the production.

However, there was one thing which displeased us greatly in this spread—and that was the incorrect credits you gave in identifying our organization. Most people know us as IMPS—and few people will associate us with the various names you have given us. They are specifically:

1. Independent Motion Picture Producers Society.
2. International Movie Production Service.
3. Though we were correctly identified in the editorial as the International Movie Producers' Service, we like to have that title preceded by "IMPS—International Movie Producers' Service."

We would appreciate your printing a correction to this effect in your next issue.

Thank you very much for your cooperation.

Ben Gradus
IMPS-International Movie Producers' Service
New York

Cites Pearson DB

EDITOR, BROADCASTING:
Everybody is taking a crack at you on the Drew Pearson DB. Top this one: we are probably the only station in the country doing a rebroadcast the following day at noon, of Drew Pearson since Nov. 7, 1949.

This is in keeping with our campaign, as reported in BROADCASTING, to rebroadcast night time network shows that are missed because of TV. Maybe the sponsors will wake up to the agencies and networks.

Lou Poller
Pres.
WPWA Chester, Pa.

Lauds Magazine

EDITOR, BROADCASTING:
I have been a subscriber to BROADCASTING magazine for nearly eight years and still think it's the greatest thing in print next to the Bible. . . .

KFDF Wichita Falls, Tex.

LEE ESTATE
Hearing Held in Los Angeles

FIRST financial accounting of the estate of the late Thomas S. Lee showed an exact valuation of $9,410,492.12, according to documents submitted to the Los Angeles Superior Court last week. Mr. Lee fell or jumped to his death from a Los Angeles office building Jan. 13 [BROADCASTING, Jan. 23, 16].

The evaluation was brought out last Tuesday at the court when Judge Newcomb Condee approved the first financial accounting submitted by Lewis Allen Weiss and Willet H. Brown, chairman of the board and president, respectively, of Don Lee Broadcasting System, as guardians of Mr. Lee’s estate. Judge Condee at this hearing formally discharged Mrs. Nora S. Patee, his aunt, as guardian of Mr. Lee’s person. The guardians were appointed Sept. 8, 1948, shortly after Mr. Lee had been declared mentally incompetent to handle his own affairs.

Five voluminous reports concerning management of the radio-television and automotive enterprises of the estate were also ordered sealed for at least three years by Judge Condee. He held the volumes contained “business secrets” which should not be available to the public.

ABC GIVEAWAY
Sterling, Trimount Buy Parts

STERLING DRUG INC. and Trimount Clothing Co. each have purchased quarter-hours of ABC’s Sunday evening giveaway, Stop the Music. Gross time billings for the two accounts amount to $20,000 a week.

Effective March 5, Sterling Drug for Ionized Yeast and Double Dan derine will sponsor the 8-8:15 p.m. segment of the 8-9 p.m. show. Dancer-Fitzgerald-Sampole Inc., New York, is the agency. Trimount Clothing, through William H. Weintraub & Co., New York, begins sponsoring the 8:15-8:30 p.m. segment effective March 26.

50,000 WATTS OF SELLING POWER

January 30, 1950 • Page 85
PARAMOUNT ON VERGE OF SELLING DUMONT STOCK

PARAMOUNT Pictures reported last week to be on verge of selling its stock interest in Allen B. DuMont Labs for price said to be in $10 million range. Identity of prospective buyers, strictly guarded secret, has reportedly been General Electric, IT&T, Emerson Radio Corp., and Westinghouse Corp.

Dr. Allen B. DuMont, president of laboratories and TV network, said he regarded reports that Paramount was planning to sell DuMont and Paramount were opposing this rule. As owner of all Class B shares, Paramount is entitled to name three of DuMont's eight directors.

Interest is not lucrative, but financial sources estimate present market value at about $7.5 million for total Paramount holding. It was believed Paramount would not relinquish stock for appreciably less than $10 million.

AMENDMENT ACCEPTED IN BIRMINGHAM CASE

FCC MAJORITY Friday accepted amendment by N. P. Baker, Jr., of Alabama, that would allow licensee of WTBN Birmingham, Ala., to correct defective verification of application to switch from 250 w on 1490 kc to 1 kw night, 5 kw day on 850 kc, grant of which was appealed by Johnston Broadcasting Co., which wanted to use 1490 kc, and to begin untangling of long-pending legal snarl. FCC majority further authorized Pilot Broadcasting Corp., present WTBN licensee in which Mr. Beach is 60% owner and Texas broadcaster, Roy Hofheinz, is 40% owner, to file amendment within 30 days to show it is now applicant for change of assignment in dispute. Order is subject to appeal and such appeal would be set for further hearing with Johnston.

Legality of majority ruling was hit in dissent by Commr. R. L. Rauschenberg, who said FCC could correct defects by amendment if the court ruled it could. He added that, if the court ruled it could, it should have been done in the first instance. As further hearing is set for September of original grant to WTBN and subsequent transfer.

SACKETT ADDS NEWSPAPER

SIEFFTON E. SACKETT, West Coast broadcaster and publisher, who has bought KRSC Seattle, Washington, to FCC approval [BROADCASTING, Dec. 26, 1949], Friday was reported buying proposed successor, Seattle Star, for newspaper to be called Seattle World. Purchase, from Publishers David and Tommy Stern, reportedly entailed $150,000 and handled through Henry Broderick Inc. Mr. Sackett's pending purchase of this newspaper was announced to the stockholders at annual meeting for $112,000, with sellers retaining cash on hand and accounts receivable.

AT&T HEARING RESCINDED

HEARING on whether AT&T should be required to interconnect its intercity TV facilities with the Western United States, rescinded Friday to March 6 by FCC Hearing Examiner J. Fred Johnson Jr. after preliminary, only two intervenors, Television Broadcasters Assn. and Philco Television Broadcasting Corp.

NBC REVISES SATURDAY NIGHT TV PROJECT

IN REVISED plan for proposed Saturday night television program—first version of which caused protests to FCC—NBC-TV has added affiliates in markets having three or more affiliations, instead of two, but those in markets of only one or two stations may accept any part of proposed show, BROADCASTING learned Friday.

In NBC's original offer, all affiliates asked to run show 9:30-10:30 p.m. show, on that order withdrawn and replaced by one wired to 28 interconnections last week (see story page 62).

Wire signed by Sylvester L. (Pat) Weaver Jr., NBC vice president in charge of television, said stations would be paid regular network rates, that they would be advised in advance of scheduled Feb. 25 premiere of advertisers on program. Show is variety type, with first hour originating in Chicago and other hour-and-half in New York.

Comdr. Mortimer W. Locwe, executive director of DuMont Network, issued this statement: "For complaint based on NBC's wire of Dec. 28, 1949, is now in hands of the FCC and awaits its disposition, we believe that while NBC's original offer contained a violation of the Act, it has been modified in accordance with the copy of Weaver's wire of Jan. 8, our basic objection—the right of a network to purchase time on its own behalf under a contract of network affiliation from stations in one-station markets without limitation—constitutes an act which would tend to free competition in such markets among the major networks now operating.

ZUGSMITH, SMITH DAVIS INVOLVED IN LITIGATION

ALBERT ZUGSMITH and radio station-newspaper brokerage firm of Smith Davis emulated in Federal court action in New York. Mr. Zugsmit sued Smith Davis and others for $2,600,000, charging breach of contract. Mr. Davis will file cross-complaint charging Mr. Zugsmith with misappropriation of funds of Smith Davis Corp., which Mr. Davis asserts is in process of liquidation.

Mr. Zugsmith's business was broker for stations and newspapers in association with Vincent Mann and Howard Stark, but not as corporation. In his suit Mr. Zugsmith, who was joined as plaintiff by his wife, Ruth, alleged that he and Smith Davis Corp. of which he was officer and director, interfered with his negotiations with clients, and he claimed numerous breaches of contract. In cross complaint Mr. Davis will charge Mr. Zugsmith with misconduct as director and officer of corporation and with misappropriating company funds for personal use. Notice of these charges was given Mr. Zugsmith in letter from Mr. Davis Oct. 11, although no court action then instituted, cross complaint will assert.

ABC PROMOTES VAN DAM

DREW VAN DAM, employment manager of ABC, promoted to personnel director following resignation of Frederick Lynch Jr., Mr. Lynch, with ABC since 1942, appointed personnel director of Central National Bank of Cleveland.

WWOK SILENCE EXTENDED

WWOK Flint, Mich., 1 kw output on 1470 kc, granted additional 30 days' authority by FCC Friday to remain silent pending negotiations for sale to Ann Arbor prospect. WWOK off air since Dec. 24.

still-pending plan of M-G-M to originate minimum of 50 hours per week of new program to be called "Black Dragon Detective Circuit." Although nothing has jelled beyond conversation stage, discussions have been continued, a presumably deal still could be closed.

FOOTE, CONE & BELLING, New York, preparing spot announcement radio campaign run early in February for new Ingrid Bergman picture "Stromboli."

FALSTAFF BEER through Dancer-Figerald-Sample, New York, preparing spot announcement campaign.

CHICAGO CITY Council project to petti FCC to reopen TV licensing in Chicago, because of unfairly competitive situation with New York and Los Angeles TV centers, has stimulated nationwide interest and several other large metropolitan areas understood to be considering similar projects.

SHORTLY to be announced will be election of Richard A. Borel, general manager of WB, Columbus, Ohio, as director of Directors of Columbia Dispatch and to board of Ohio National Bar which, along with station, are Wolfe enterprises.

SEVERAL AGENCIES making presentation to Speidel Corp., Providence, (watchband radio and television advertiser, whose courage agency is Cecil & Preabrey. Decision to be made in New York last weekend to arrange closing date, probable Feb. 1. No changes in staff or policy operations of New York independent are contemplated (story page 25).

HOLLYWOOD ACADEMY ANNOUNCES AWARDS

AWARDS for "best live" and "best kinescoped" TV shows received Friday by CBS-T Ed Wynn Show and NBC-TV Texas Star. The 10th annual Academy of Televison Arts and Sciences second annual award dinner, Ambassador Hotel, Los Angeles.

Teamed for SERVICE

PHIL EVANS  KEN PARSONS  BOB RILEY

The KMBC-KFRM Team fulfills a vital daily need in thousands of rural homes in Missouri, Kansas and surrounding states.

The Team maintains a full-time Farm Service department, under the direction of Phil Evans, nationally known expert. Innumerable experiments and developmental projects conducted on the thousand-acre KMBC-KFRM Service Farms, are passed on to rural listeners.

Evans is ably assisted by Ken Parsons, well known agronomist. Together, these two experts, with their up-to-the minute daily reports, keep rural listeners informed on latest developments in this important business of farming and agriculture.

Third member of this trio is Bob Riley, full-time market caster, who spends his entire working day at the Stockyards. He presents the market news several times each day direct from the Kansas City Livestock Exchange.

Other program features are presented by The Team specifically for the farm audience. As a result, The KMBC-KFRM Team is a welcome guest in the homes of those who live in the great Kansas City Trade territory.

The Team has the largest and finest group of artists ever developed by any Midwestern radio station. Pictured here is Hiram Higby, master of ceremonies and entertainment star, heard on the nationally famous Brush Creek Follies, Dinnerbell and Western Roundup...just a few of the top-notch entertainment programs that are a daily feature of The KMBC-KFRM Team.

The KMBC-KFRM Team Serves 3,659,828* People

Business Briefly

NEW SPONSOR o Nineteen Hundred Corp., St. Joseph, Mich. (Kenmore washing machines, etc.), using radio and TV first time in release of 50 written and recorded AM spots and three TV film commercials to dealers and distributors nationally for cooperative sponsorship. Agency, Bonomet & Holman, Chicago.

ARROWHEAD APPOINTS o Arrowhead Network (Wisc., Minn.) names Ral-Tel Representatives as national spot representative, according to Marlin E. Smythe, national sales manager of network.

RESIGNS ACCOUNT o Weiss & Geller, Chicago, resigns Elgin-American (compacts) account, replacing it with accounts totaling $1,200,000, according to Marvin L. Mann, radio and TV director. Elgin-American spent $800,000 on radio and TV last year, plans over $1 million this year. Ruthrauff & Ryan and Russel M. Seeds mentioned among agencies likely to land Elgin-American account.

SNABBING OF RADIO BY MILITARY PROTESTED

DISCLOSURE that Grant Advertising agency for U. S. Army and Air Force recruiting, had no funds allocated to buy radio time although $1 million earmarked for space buying in first half of 1950, has provoked widespread protests by stations.

Encouraged by some national representatives and by BAB, stations have written Congressmen objecting to short changing of radio—celebrated as donor of free time to recruiting and other public service causes.

License fees grow into general revolts against long practice by government agencies of paying for space in magazines and newspapers while seeking free time for same campaigns from radio (see story, page 15).

At least two temporary Court Station reported to have cancelled number of Army programs and commercials it had been broadcasting free.

RADIO, GOVERNMENT LEADERS AT CORRESPONDENTS DINNER

PRESIDENT TRUMAN, government and broadcasting officials participated in annual dinner of Radio Correspondents Assn., held Saturday at Statler Hotel, Washington. Dot Hope was m. c. Elmer Davis, ABC is association president.

Talent, provided by networks with NBC as coordinator, included Who Said That? with Bob Trout, H. V. Kaltenborn, Vice President Alpine Barkley, Oscar Levant and John Cameron Swayze; Russ Swan; Mindy Carson; Dennis Day; NBC orchestra under Norm Clossier. President Truman was given television table made from White House furniture. Who Said That? telecast by NBC-TV network.

List of head table guests follows:

President Truman; Vice President Barkley; Hunt Baldwin; UNC Secretary Justice Hugo Black

Neilsen's survey, published in Broadcasting Magazine, shows conclusively 10 out of 10 highest rated programs in the nation are CBS presentations... ALL ON KRLD!

Neilsen's survey also reveals that 14 out of the first 15 highest rated programs on the air are CBS shows... ALL ON KRLD! That means AUDIENCE... AND SALES RESULTS!

That's why KRLD AM is FIRST—MORNING 8:00 to 12 Noon, EVENING 6 to 10:30 p.m. and SUNDAY AFTERNOON 12 Noon to 6:00 p.m. 3 out of 5 against all stations in the Dallas-Fort Worth area. (Hooper for Dallas—October and November).

that's why KRLD-KRLD-TV Are The BIG TOPS In Texas and the Great Southwest Market

This is why KRLD Is Your Best Buy
Example #22

A new advertiser, without previous radio experience, bought a participation on WIP's "Dawn Patrol" (1:00 A.M. to 6:30 A.M.) ... and six weeks later he wrote his agency ...

"Our service department has picked up considerably and last week we sold four of the five cars we advertised ... we would like you to examine the possibility of ADDITIONAL RADIO TIME."

Yes, WIP is ... LIGHTNING THAT TALKS—profit!
The three tubes illustrated are striking examples of RCA's pioneering in modern tube development... the kind of engineering leadership that adds value beyond price to the RCA tubes you buy.

The RCA-8D21 employs advanced principles of screening, cooling, and electron optics as revolutionary as television itself. The RCA-5592, with its "metal header" construction, requires no neutralization in grounded-grid circuits. The high-power tube RCA-5671 successfully employs a thoriated-tungsten filament that draws 60% less filament power than similar tungsten-filament types. This tube is establishing exceptional records of life performance.

RCA's unparalleled research facilities, engineering background, and manufacturing experience contribute to the quality, dependability, and operating economy of every RCA tube you buy. This unusual combination of research, engineering, and manufacturing leadership explains why RCA tubes are accepted as the Standard of Comparison in broadcasting.

The complete line of RCA tubes is available from your local RCA tube distributor, or direct from RCA.

The world's most modern tube plant...

RCA, LANCASTER, PA.

THE FOUNTAINHEAD OF MODERN TUBE DEVELOPMENT IS RCA

RADIO CORPORATION of AMERICA

HARRISON, N.J.
Radio broadcasting certainly is different on the Pacific Coast. Thousands of mountain ranges (5,000 to 14,495 feet high), great distances between markets and low ground conductivity all put the Indian sign on long-range broadcasting.

It is necessary to use local network stations located in the important markets to reach all of the people all of the time.

Only Don Lee is especially designed for the Pacific Coast. Only Don Lee has a local network station in each of 45 important markets (the three other networks combined have only 48 stations).

Only Don Lee has the flexibility to offer a local network station in the Pacific Coast markets where you have distribution.

LEWIS ALLEN WEISS, Chairman of the Board • WILLET H. BROWN, President • WARD D. INGRIM, Vice-President in Charge of Sales
1313 NORTH VINE STREET, HOLLYWOOD 28, CALIFORNIA • Represented Nationally by JOHN BLAIR & COMPANY

Of 45 Major Pacific Coast Cities

</table>
It's the most logical, the most economical coverage you can get on the Pacific Coast. You buy only what you need, and you get what you buy every time.

That's why only Don Lee regularly broadcasts as many—or more—regionally sponsored programs as the other three networks combined.

**Don Lee Stations on Parade: KPUG—BELLINGHAM, WASHINGTON**

It is nearly 100 miles from Seattle to the Canadian border, yet Don Lee is the only network that has a station between these two points. Within 30 miles of Bellingham live 117,000 people who annually spend well over 100 million dollars in retail sales. When your program is on the Don Lee Network you get LOCALIZED coverage of this market with the 1000 watts of KPUG—one of the 45 stations used by Don Lee to cover the Coast.

The Nation's Greatest Regional Network
CANNERS LEAGUE OF FLORIDA begins series of 10 or more half-hour shows on three Florida stations, WFLA Tampa, WDBO Orlando and WONN Lakeland. Series is titled Golden Harvest of Melody.

WALGREEN DRUG Co., Chicago, to sponsor Cavalcade of Bands, ABC-TV series, for expected 52 weeks on WTCN-TV Minneapolis and WAVE-TV Louisville, supplementing WENR-TV Chicago sponsorship. Firm buys Cavalcade of Stars, DuMont co-op, on WGN-TV Chicago. Agency: Schwimmer & Scott, Chicago.

NATIONAL SELECTED PRODUCTS Inc., New York (7-Minit muffin mix, pie crust mixes, 6 O’clock pudding, etc.), names Geare-Marston, New York, as agency. Test campaigns planned.

TENNESSEE BISCUIT Co., Nashville, Tenn., appoints L. W. Roush Co., that city, to handle its advertising. Radio will be used. Dandridge W. Caldwell is account executive.

UNICORN PRESS, New York, through Victor A. Bennett, also New York, purchases Friday night edition of Headline News, 8:30-9 p.m., for 13 weeks on three DuMont TV Network stations, WABD (TV) New York, WAAM (TV) Baltimore and WTTG (TV) Washington.

CROCKERY DEN, Wilmington, Del. (glass ware), appoints Kates-Haas Adv., same city, to handle 10-month campaign. Television will be used. Alan Goff is account executive.

ILLINOIS PACKING Co., Chicago (Illinois brand fresh meat), will expand its Chicago TV schedule to all four city stations about Feb. 10 for 52 weeks with possible exception of Thanksgiving through Christmas period. Firm now uses spots on WNBQ (TV) and WBBK (TV) and will add 20-second film series to WGN-TV and WENR-TV all in Class A time, if plans are concluded. Agency: Phil Gordon, Chicago.

COLGATE-PALMOLIVE-PEET (Palmolive soap), adds C. P. MacGregor transcribed show, King Cole Court to its schedule over Lawrence Marques Radio, South Africa, bringing to five, number of its weekly shows over the station. Agency: Grant Adv., South Africa.

TELCO TELEVISION Inc., New York, appoints Lew Kashk & Son Adv. Co., same city, to handle its advertising. Television will be used.

SOUTHERN CALIFORNIA CITRUS FOODS, Redlands, Calif., (Real Gold Quick Frozen orange juice), Feb. 15 starts six week radio and television test campaign on as yet undetermined Seattle stations. Spots and participations will be used on AM; spots on TV. Agency: J. Walter Thompson Co., Los Angeles.

JOHN R. CHRISTIE, formerly account executive with Dan B. Miner Co., Los Angeles, joins advertising and sales promotion department of Myttinger & Casselberry Inc., distributor of Nutrilite food supplement, Long Beach, Calif.

LEE H. BRISTOL, president of Bristol-Myers Co., appointed chairman of advertising committee for Brotherhood Week.
When a city more than doubles its size in five years the implications are far-reaching. In the case of prosperous Albany such a population growth has meant more demand for goods of all kinds ... more money spent for food, housing, clothing, luxuries ... a bigger, more lucrative market for YOU to tap through KGW's COMPREHENSIVE COVERAGE.

Oregon's population growth in the last nine years has been the largest in the nation. The relatively untapped resources of the Northwest ... water-power, timber, agricultural and manufacturing opportunities ... are bringing the modern pioneer West to settle in just such solid, vital communities as Albany.

KGW DELIVERS Albany ... as it delivers Comprehensive Coverage of the fastest-growing market in the nation.
FRANK LINDER, manager of the McCann-Erickson office in Bogota, Columbia, for three years, transferred to agency’s foreign department in New York as service supervisor on several international clients. They are: Standard Oil Co., Leh & Fink, Pharma-Craft, Tampa and Coca-Cola Export Sales Co. JAIME GARZON, assistant manager, succeeds Mr. Linder in Bogota.

PAT SWEENEY, public relations and promotion director of Dancer-Fitzgerald-Sample, New York, resigns to establish own firm to service agencies with public relations counsel. Temporary offices at 349 East 14th St., New York.

RUTH GOREN, formerly assistant director of television department of Kenyon & Eckhardt, New York, elected vice president of Loise Mark & Assoc., Milwaukee. She will head radio-television department of agency.

ROBERT (BUCK) BUCHANAN, former director and moderator of Northwestern U. Reviewing Stand on Mutual, joins Young & Rubicam, Chicago, as radio supervisor in radio and television department, which is headed by PHIL ROWAN. Mr. Buchanan is former radio public relations director at Northwestern.

PAUL MICHELSON, formerly with Foutte, Cone & Belding, San Francisco, joins copy department of Guild, Bascom & Bondgill, same city.

PRICE, ROBINSON & FRANK Inc., Chicago, elected to membership in American Assn. of Advertising Agencies. Firm formed from split of C. J. LaRoche & Co. into two separate agencies.

MORT DUFF Agency, Phoenix, Ariz., sells Omaha office to HAROLD E. ROLL, manager of office since last May. Office becomes Harold Roll Agency, and will service new accounts as well as those formerly handled by Mort Duff Agency in that area.

WILLIAM M. WALL, former copywriter at Cities Service, joins copy staff of BBDO, New York.

MAURICE C. COLEMAN, for past year manager of WATL Atlanta, resigns to return to his advertising agency, Maurice C. Coleman & Assoc., Atlanta.

POINT of PURCHASE Advertising Institute Inc. affiliates with Advertising Federation of America. JOHN M. PALMER is president of POPAI.

JAMES L. FALLOn, formerly vice president of Davis & Co., Los Angeles, joins Erwin, Wasey & Co., same city to work on contract and creative staffs.

ALBERT M. CROPP, formerly assistant advertising manager of Acme Aluminum Alloys, Dayton, Ohio, joins Griswold-Ehleman Co., Cleveland, as assistant account executive.

W. H. FLEISCHMAN appointed manager of Toronto office of Benton & Bowles Inc. He joined Toronto office two years ago as account executive, after working at McKim Adv. Ltd., Montreal.

HARRY W. MORRIS, formerly with KGO San Francisco sales staff, joins Vernor Advertising Agency as account executive.

ROSS GARDNER & WHITE, Los Angeles, moves to new quarters at 2326 West Eighth St. Phone is Dunkirk 7-7211.

McGUIRE ADV. Ltd., Windsor, Ont., opens branch at 822 Sherbrooke St. East, Montreal, with Lionel J. St. Jean as manager.

BRISACHER, WHEELER & STAFF, San Francisco, announces construction on its new $300,000 office building will begin about March 1. Building will be located on Bush St., between Franklin and Gough.
Builds Results at Low Cost

Because...
The Riding Audience...
Is the Buying Audience

*In Baltimore, one of the nation’s largest markets, another advertising medium is making its sales impact felt because...

Transit Radio Reaches an Audience in Transit:
Riders are close to points of sale, actually in position to act now in response to your advertising.

Transit Radio Reaches a Counted, Guaranteed Audience:
The advertiser knows how large an audience he is reaching. The rate he pays is based essentially on the actual count of paid passenger fares.

Transit Radio Reaches a Selected Audience:
Different occupational groups, age-groups and income-classes ride the buses during the various time periods of the day. Since this audience composition is known, the advertiser can select his most logical customers by selecting the hours when they ride.

Transit Radio Provides Pleasant Programming—
Music, news, weather reports, time signals, sports scores, special features.

MORE spot business was broadcast in January than in any other month to date in all radio history, in the opinion of leading station representatives.

Actual dollar spot expenditures computed and tabulated and will not be for some weeks, but according to the men who sold the time, January appears to have hit an all-time high in the use of spot radio.

An influx of automotive business announcing the 1950 models was the most frequent explanation given for the peak billings in January, a month that usually lags behind December in the volume of spot radio advertising. Some representatives also noted that radio advertising of cold cures and other remedies, particularly the new anti-histamine products, was unusually heavy during January.

The representatives remarked that the makers of foods, cigarettes, soaps and other users of spot radio maintained normal or better than normal campaigns during the month.

Lewis H. Avery, president, Avery-Knodel, told Broadcasting: "This will be our best January. It will also be the best month since we started in business."

'Best Month Yet'

George W. Bolling, president, The Bolling Co., said: "There's no question about January 1950 being the best month in the history of the business." And he added that from all indications 1950 ought to turn out to be the best year his firm has ever had.

Joseph F. Timlin, New York manager of The Branham Co.'s radio division, said that although final figures for January are not yet available, he is sure that it will be the best month to date. Like the others he credited the all-time high billings to automotive and anti-histamine advertising.

Frank Headley, president, Headley-Reed Co., reported that "without question, January will be the best month in our business," although, he, too, said that he would not have actual dollar figures for some weeks. Conversations with managers of stations represented by his firm indicated, Mr. Headley said, that the week of Jan. 9 was probably the best week in their history, due to a concentration of

**FREE TIME ABUSE**

By J. FRANK BEATTY

ABUSES of radio's generosity in offering free time are increasing and the NAB Unaffiliated Stations Committee proposes to stop these abuses as well as to turn some of the time applicants into customers.

The committee came up with several specific suggestions at a Thursday-Friday meeting at NAB headquarters, Ted Cott, WNEW New York, presided. In addition the committee drew up plans for the "Independents' Day" meeting at the Chicago NAB Convention, Sunday, April 16, as well as a foreign language meeting the following morning.

Basic device to impress on the countless thousands of free-time applicants that radio time is valuable and that stations are anxious to cooperate in worthy causes will be the use of a dramatic billing technique.

This plan is simple. When a government, civic, religious, welfare or similar agency asks for free time, the committee recommends that the station send the applicant a bill for the time. This bill would be marked "paid."

**PROBLEMS of independent stations occupied the two-day session of NAB Unaffiliated Stations Committee. L to r: Lee W. Jacobs, KBKR Baker, Ore.; Robert Maynard, WSVS Grove, Va.; Ted Cott, WNEW New York, chairman; Patt McDonald, WHHM Memphis; Melvin Drake, WDGY Minneapolis; Ben Stout, WWDC Washington.**

Ford Dealers, through J. Walter Thompson Co., advertised 1950 Fords on more than 200 stations in a campaign which began in the fall and which, at its peak, included more than 1,000 stations.

Hudson Motor Car Co. advertised its new models on some 700 stations in a campaign placed by Brooke, Smith, French & Dorrance. Packard Motor Co., through Young & Rubicam, also sponsored a spot campaign, using jingles for the new Packards.

Chrysler Corp. utilized extensive spot campaigns for its new cars during January, advertising Plymouths (through N. W. Ayer & Son) in 240 markets, Dodges (Ruthrauff & Ryan) in more than 1,000 markets and a widespread campaign for DeSotos (BBDO). These spot schedules have been (Continued on page 102)
Mutual part WWDC September Venard decade owned Murray continuing Northwest.

The WWDC-WOL interchange of facilities was approved by the FCC Jan. 26.

WEAM is owned by Harold H. Thoms, also interested in a group of stations in the Southeast. Two of the outlets—WAYS Charlotte and WSSB Durham, N. C.—are MBS affiliates. Negotiations were handled for MBS by E. M. Johnson, station relations vice president.

Mr. Thoms said WEAM is working on plans to open Washington station. He added that WEAM's 5 kw transmitter is located just four miles from the heart of downtown Washington business district. WEAM took the air 2½ years ago as a 1 kw daytime outlet, increasing to 5 kw full time directional on 1390 kc last March.

MBS plans to retain, for the time being at least, its Washington office and newscast at 1627 K St. Southwest. A. A. Schechter, MBS vice president in charge of news and special events, will continue to supervise the Washington news operation with Hollis Snowey continuing as head of the MBS capital office.

When the change-around becomes effective WWDC will move from 1000 Connecticut Ave. N.W. to 1627 K St. present WOL headquarters, and WOL, under Peoples Broadcasting, will over the Connecticut Ave. offices of WWDC.

Mr. A. Palmer, manager of the new WOL and WOL-FM for Peoples Broadcasting, notified advertisers and agencies Friday that the firm "will follow the general operating policy of WOL as a 24-year-old station." He has temporary offices at the Raleigh Hotel, along with Edgar Parsons, assistant manager and program director. Peoples Broadcasting owns WBFF, Worthington, Ohio, Columbus suburb. Mr. Parsons had been its manager.

Harold Reed, present WOL chief engineer, will retain the post under the new owners. The technical setup includes a main 250 w AM transmitter in Washington with synchronized 250 w booster in nearby Silver Spring. The 20 kw FM transmitter is at the Silver Spring site.

Farm Bureau Mutual is described as the fourth largest insurer of automobiles in the nation. President Murray Lincoln who controls other farm and insurance interests.

Mr. Palmer said the new WOL was purchased as an investment and will serve no special interests, making time available to all legitimate advertisers and giving equal time to both sides in controversial questions. He said the overall programming will be "homey" and "down-to-earth."

WWDC is planning an extensive promotion campaign for the Feb. 20 shift. Already on the air are announcements by radio and screen stars. Post cards will be dropped from airplanes, some entitling the finders to $12.60. Transcriptions have been cut by local officials and civic leaders prior to inaugural ceremonies. Sandwich men with radios will patrol downtown Washington.

Ben Strouse, vice president and general manager, remains in charge of WWDC. Continuing in their posts will be Herman N. Paris, commercial manager, and Norman Reed, program director. Art Brown, WOL disc jockey, moves to WWDC along with Bert Libben, salesman. Ross Beville, WWDC chief engineer, continues in his post as do Dennis Sartain, head of the WWDC news bureau, and Irving Liechtenstein, public relations and sales promotion director. WWDC will take over the present WOL Voice of Washington news program with Les Higbe. Fred Fiske joins WWDC's announcing staff.

The station will carry all games of the Washington Senators baseball team.

CBS AFFILIATE SUIT

Network Asks Dismissal

CBS, representing KOOL Phoenix and KOPO Tucson, has filed a motion for dismissal of the suit brought Nov. 17 by Salt River Valley Broadcasting Co., for KOY Phoenix and KTUC Tucson, in Chicago's Federal District Court. Late Friday it was reported that if the move is successful, the case will not continue in court today (Monday) as scheduled. CBS contends that an oral agreement between the network and the Salt River stations was not formal and therefore not approved by the F. A. Plaintiff, through Damon, Hayes, White & Hoban, Chicago, contends that the KOY-KTUC suit is based on the original written contract and not on the oral agreement. CBS switched its affiliation to KOPO and KOOL Jan. 1.

WEBSTER-CHICAGO Tests

WEBSTER-CHICAGO Corp., is promoting use of its wire recorders as teaching aids with a two-month radio test campaign in Madison, Wis., and Peoria and Rockford, Ill. Approximately 15 spot tests begin in Memphis in March. Results of the $12,000 campaign will determine whether a national spot schedule will be used. Agency is Faller, Smith & Ross, Chicago. Paul Brickman is account executive.

**NEW MBS OUTLET for Washington will be WEAM Arlington, Va. Affiliation pact was drawn up Thursday in the capital. Present at negotiations were (l to r): Seated—Harold M. Thoms, WEAM president, and E. M. Johnson, MBS station relations vice president; standing, Howard Stanley, WEAM general manager, and Bob Carpenter, MBS eastern manager of station relations.**
AGENCIES and advertisers have an improved weapon for use in spending advertising dollars, according to a second Broadcast Measurement Bureau study.

Though few buyers of radio time have had a chance to study the reports in detail, they expressed enthusiasm for the new fund of facts covering the audience that broadcasters reach.

The second BMB data will "contribute largely to the medium's acceptance by those who support it financially," declared Paul B. West, president of the Assn. of National Advertisers.

Frederic R. Gamble, president, American Assn. of Advertising Agencies, declared the reports "will be welcomed and used by advertising agencies from coast to coast."

Linnea Nelson, chief time buyer of J. Walter Thompson Co., New York, called the data a "definite improvement" and added, "We can't get the reports fast enough."

Justin Miller, NAB president, said the figures "will help the buyers of time immeasurably in selecting broadcasting as a medium."

Their detailed comments follow:

**Miss Nelson**—"While I have not yet received the completed station reports of the second nationwide BMB survey, as a board member I am generally familiar with the nature of the study and I believe it presents a definite improvement over the first one made in 1946.

"We can't get these reports into our hands fast enough, as too many stations are still using the 1946 BMB material which is outdated, to say the least. It is interesting that while a lot of broadcasters have grumbled about the first BMB study, the real majority haven't produced anything else in the interim.

"If we could depend on a completely intelligent and unbiased reaction, there would unquestionably be a permanent and continuing BMB."

Mr. West—"Broadcasters always have been alert in recognizing the

---

**NEW STUDY OUT**

**Mr. West**

"A LOUD squeal is going to go up when station subscribers to BMB's second study take their first look at their 1949 coverage maps," Dr. Kenneth H. Baker, NAB research director and acting president of BMB, said Tuesday in announcing the completion of the study at BMB headquarters in New York [Broadcasting, Jan. 30].

Individual station audience reports, taken directly from the tabulating machines and examined by Dr. Baker, were mailed that day to the 629 BMB subscribers, marking the completion of an 11-month undertaking that began last March when more than 650,000 ballots were mailed to radio families in every county in the nation. These reports will be followed within a week or two by printed forms containing not only the audience statistics but also maps showing each station's day and night effective coverage areas.

**2,100 Stations**

Noting that the 1949 study tabulated 2,100 stations in place of the 900 tabulated in 1946, Dr. Baker said that the addition of 1,200 new stations inevitably had "poked some holes and clipped off some edges" from the coverage areas of the old established stations.

On the other hand, he pointed out, power increases, network affiliations, better frequencies and better programming since the first BMB study was made gave hundreds of stations increased audiences in 1949 over 1946.

"Assuming that the average hours of family listening—which are not measured by BMB—remained the same for the second study as for the first, the addition of 35 stations in North Carolina, 65 in California, cannot help but cause more dial tuning, more switching from station to station," Dr. Baker said.

He pointed out that the total weekly audience figures reported for any station in the 1949 study are directly comparable with the figures on that station. The maps are also directly comparable, he said, all being drawn to exactly the same scale for both years.

**New Data**

What is new about the 1949 study is the "Composition of Total Weekly Audience," comprising three tables which were not included in the 1946 reports. These give the number of families reporting listening to the stations six or seven days or nights a week, three to five days or nights a week and one or two days or nights a week. Both day and night figures are given for each county and city under each of these headings, as well as for the total weekly audience. The report also shows the total number of radio families for each area and the percentage of the figures which the station can claim under each listening category.

These data were designed to meet the numerous complaints which greeted the first study, Dr. Baker said. He recalled that at that time many stations complained that the BMB study made no distinction between a local station whose listeners tune it in regularly each day and a distant station which may be tuned in once a week for a special network program.

As long as each of these two stations was reported as heard at least once a week by any family, it received equal credit in the BMB report for that family.

The "Composition of Total Weekly Audience" figures give the 1949 BMB study a new flexibility, Dr. Baker pointed out. He noted that "it will be interesting to see what will happen to these three columns," adding that "a great deal of floundering around" may be expected. He warned against any immediate establishment of rigid rules by either the sellers or buyers of time, urging that six months or a year of use of the 1940 reports precede any standard setting.

**Loyalty of Listeners**

The ratio between a station's six-day, seven-day audience and its total weekly audience might be considered as an index of station loyalty, Dr. Baker pointed out. "The station with a loyalty index of 90% has a different story to tell than one whose loyalty index is only 50%," he explained.

BMB declared. "This would be considered a 'good loyalty index figure,' " he replied that he does not know now.

**R. D. MERRILL** (center), Seattle lumberman and heir to the Don Lee Network, gets together with Lewis Allen Weiss (I), chairman of the Don Lee board of directors, and Willet H. Brown, network president. Mr. Merrill was named sole heir to the $9 million estate of his nephew, Thomas S. Lee, who died Jan. 13 [Broadcasting, Jan. 23, 16].
In the belief that instruction on healthful living practices is a public service much more important than its policy-selling . . .

Metropolitan’s Radio

By HERMAN BRANDSCHAIN

METROPOLITAN Life Insurance Co. has concentrated its entire radio effort not in selling insurance but in selling health.

For it is partly by selling longevity, as well as by selling policies, that this company can remain the biggest non-governmental financial institution in the United States (assets: $91½ billions).

The longer it keeps its 33 million policyholders living, the longer they will be paying premiums. The company has a direct interest in the health and well being of more people than any other business organization on earth.

It therefore has good reason to concentrate its entire radio effort on getting people to live longer.

The result has been an adventure in public service for which Metropolitan can be proud. And indeed, praise and goodwill have attended the company’s effort.

It has used radio—ne’work and local—to advise on health, caution on safety and to boost all health and welfare organizations such as the Red Cross and National Safety Council.

And it uses radio as one means of inviting the public to write in for its health and welfare books—pamphlets on subjects ranging from diet to safe driving, from accident prevention to cancer. These booklets are the spearpoint of a big public health program as has ever been conducted by a non-governmental organization.

The size of its pamphleteering for health may be gauged by an almost incredible statistic—that the Metropolitan has given away one booklet a second ever since 1909.

Just how many booklets radio is responsible for distributing would be hard to assess. A listener may hear of a certain booklet on a broadcast but then obtain it by a personal call on a Metropolitan local agent. Radio should get the credit for such distribution but it wouldn’t show in any records.

Yet, there are statistics that do show radio’s pull in this direction. For, since June 17, 1946, ½ million of listeners have written to stations or network (CBS) directly requesting booklets after hearing them offered on broadcasts.

The company, however, has other reasons for spending almost half its $2 million advertising budget on radio. Its top management, from President Leroy A. Lincoln down through Second Vice President James L. Madden, in charge of advertising, is convinced of the value of radio and it is budgeted for accordingly.

Metropolitan reasons that a greater percentage of its policyholders are concentrated in large cities and where radio can reach them. So, Metropolitan’s air effort is primarily a city campaign. It uses 363 programs a week in 47 cities in the United States and Canada.

MOSTLY these programs are local 15-minute newscasts or participation programs. Newscaster Eric Sevareid, however, also is used on 15 key CBS stations Monday through Friday from 6 to 6:15 p.m. in the East while newscaster Dave Vallee is used on seven CBS stations on the Pacific Coast Monday through Friday from 8:15 to 8:30 s.m. (PST).

That mixture of network and local programming gives coverage at more different hours, the company reasons. But in addition, it provides something even more valuable—the local touch. It means that Metropolitan can engage a popular local announcer who has a good following and it means that Metropolitan can cooperate with local health agencies and thus make itself felt as part of the local community.

Metropolitan is unique, too, in the fact that its basic radio philosophy has never really changed. It started in radio on the health and welfare theme back in 1925. In those days the company sponsored Arthur Bagley in a daily program of setting up exercises which was broadcast from Metropolitan’s own famous tower in New York via WEAF and an eastern regional network. Countless thousands from 1925 to 1936 started the day off right by following Mr. Bagley’s exhortations to action from 6:45 to 7:45 a.m. Monday through Friday.

Its present radio series began in 1946 and a phrase it uses—“Good Hints for Good Health.” Accompanying the programs are announcements on diseases that are leading causes of death, on safety problems and on general health subjects, such as summer hazards (sunburn, etc.), safe driving, etc.

Announcements themselves are planned with the Metropolitan agency, Young & Rubicam, to fit in with seasonal factors and with campaigns by health agencies. Thus announcements on tuberculosis and the offer of a pamphlet on tuberculosis are pre-Christmas subjects, coinciding with the Tuberculosis Seal. Home safety and holiday safety are announcement topics right at the Yuletide, with appropriate booklets on these subjects being offered.

The announcements also complement a similar effort made via

* * *

METROPOLITAN LIFE started its radio broadcasting on a "health and welfare" theme and has never deviated from it. Here is physical culturist Arthur Bagley (center) who used to put radio listeners through setting up exercises every morning from a studio in Metropolitan’s own New York tower back in the 20’s. The program was carried over WEAF, now WNBC New York and on East Coast network. With Mr. Bagley are the late Ray Fiske (l), former president of Metropolitan, and the late Robert Lynn Cox, vice president, strong backers of the health and welfare campaign.

Page 18 • February 6, 1950
Stresses Better Living

magazines. Radio, however, which is not on the monthly basis of so many magazines, lends itself to more flexibility and during any month's period more than one subject will be treated over the air. It also is felt that the effort to keep the radio announcements tied to one subject for a month, merely to keep in step with the magazine tempo, would overtax the listener. So the radio announcements vary either on a weekly or fortnightly basis.

Many radio personalities know from personal experience that the announcements and the pamphlets are based on the soundest medical opinion available. It is not hard for radio personnel working on Metropolitan shows to become sold on the company's health program.

Mary Margaret McBride, for example, whose following over WNBC New York has made her a figure of national proportions, found that her figure also was growing by pounds as well as by repute. She took the necessary action after reading the “Overweight and Underweight” pamphlet of her sponsor. Several months later, when she underwent an operation, her physician told her that her condition might have been very much more serious had she not reduced in time.

Incidentally, the “Overweight and Underweight” booklet has won the biggest response of all Metropolitan books from the U. S. radio audience since 1946—about 260,000 requests for it having come in. Since it was announced on 18 different weeks, that means about 14,500 requests for it came in for each week it was announced.

THAT booklet, however, is not the “best-seller” in the Metropolitan health library from the standpoint of radio mail-pull. A cook book is first with an average of 26,040 requests per week; a pamphlet on rheumatism is second with an average of 17,338; one on allergies is third with 14,281. The “Overweight and Underweight” booklet is next.

All this effort has won the company another kind of mail pull, too.

here's an example of the way a local station got in back of Metropolitan's "Good Hints for Good Health" campaign. KDKA Pittsburgh promotion department produced these posters to boost the Metropolitan show and attended to distribution of the placards.

*p * *

--praise for its public service work. Laudatory messages have come from listeners, ranging from persons benefited directly to Government officials, from individual physicians to medical organizations.

In Canada, as well as the United States, public authorities have praised the Metropolitan's pamphleteering via radio.

A few samples from some of the letters indicate the importance the Metropolitan has assumed through its radio health program. The New York Chapter of the American Red Cross wrote, after the Metropolitan had plugged Red Cross home nursing classes:

You are our greatest implement for success. You are not only giving us encouragement but making a great contribution to the prevention of sickness and to the health of New York City.

Even as generous praise was sent by the Detroit Chapter:

This is the best response that we have ever had to radio publicity. We received enough enrollments to organize two extra classes.

Similar messages have been sent by the top officers of such organizations as National Safety Council, American Diabetes Assn., American Hospital Assn., and many others.

The Metropolitan effort could hardly escape the scrutiny of prize-awarding. In 1948 Advertising Age awarded Metropolitan a prize for its “Good Hints for Good Health” campaign.

Metropolitan also makes a most creditable effort to advertise its radio programming.

In its New York headquarters, it has created a focal point for propagandizing radio policies. There, the office of advertising promotion manager has been created, a post occupied by Jerry Crowley, a man with an impressive background in radio, promotion and advertising. It is his job to explain the company's advertising policies—to the public, to policyholders, to employees.

Under Mr. Crowley's direction, 600,000 leaflets go out four times a year to Metropolitan's agents to publicize the local broadcasts. These leaflets are then distributed by the local agents to people in the community. The leaflets call attention to Metropolitan's “Good Hints for Good Health” broadcasts and to the fact that booklets offered can be obtained either through the local station or the local company agent. The call letters of the local station and the time of its Metropolitan programming are imprinted on the leaflets.

Thus, by this promotion ma-

(Continued on page 107)

THESE are a few of the booklets which are given away as part of Metropolitan's Health and Welfare radio campaign.
EDGAR BILL RETIRES
Replaced by Caley As WMBD Mgr.

EDGAR L. BILL is stepping down from the helm as one of radio's pioneers after nearly 26 years in broadcasting operations. His decision to retire as president and general manager of WMBD Peoria, Ill., a post he has held for the past 18 years, was announced last week.

Mr. Bill's executive position at WMBD will be assumed by Charles C. Caley, station's executive vice president for the past four years, who has acquired 25% of Mr. Bill's WMBD holdings. Remainder of the shares have been retired by the company.

The career of 57-year-old Edgar Bill encompasses a quarter-century of broadcasting endeavor, high-marked by his purchase in 1931 of WMBD and the building of the station through the years as a leader in the radio field.

Before acquiring the Peoria station, Mr. Bill managed WLS Chicago for seven years. He also aided in the organization of NAB, serving as a director for six years.

In announcing his retirement decision, Mr. Bill said: "Radio has made remarkable progress in its first 25 years and I have enjoyed the part I played in its growth. I foresee even greater progress in the next 25 years—the future appears

to hold great possibilities. Charlie Caley I consider one of the young, aggressive leaders, thoroughly familiar with radio's mission, and well-qualified to help in bringing these possibilities to an early realization."

With WMBD Since 1934

Mr. Caley has been associated with WMBD since 1934 and is a well-known figure in the industry. He is serving his second term as a director of the NAB, and also is president of WDZ DeCATUR, III.

While relinquishing direct participation in WMBD's operations, Mr. Bill, who is recovering from a recent heart condition, has let it be known that he is not dropping out of the radio field entirely. He plans to remain active, although to a lesser degree, in other Peoria and radio business interests to which he will devote some of his time.

In assuming his new post at WMBD, Mr. Caley said: "I welcome this opportunity to be of greater service to the broadcast industry. We have some worthy goals toward which to strive—we will do our utmost to reach them."

Under the executive realignment, Harry P. Slane has been named WMBD president and Carl P. Slane retains his position as chairman of the board of directors.

SHURICK TO CBS
Counsel on Market Research

EDWARD SHURICK, former promotion manager and director of research for Free & Peters, station representative, has been named market research counsel for CBS effective March 1. The announcement was made last week by J. L. Van Volkenburg, network vice president in charge of network sales.

Mr. Shurick was sales promotion manager for KMBK Kansas City, Mo., before joining Free & Peters, and prior to that was sales manager for the Intermountain Network. He also is the author of a book The First Quarter Century of American Broadcasting.
First meeting of the U. S.-Cuban conference was held Wednesday at the insistence of Mr. Maristany, over the protest of FCC Comr. Rosell H. Hyde, head of the U. S. delegation. It was a general meeting devoted to general speeches. The first business meeting was slated for Saturday (Feb. 4).

The U. S. delegation, including FCC and State Dept. representatives as well as the industry advisory group, knew nothing of Mr. Illas’ resignation when they reached Havana early last week.

Conference Set

The conference was set up when the NARBA sessions at Montreal became stalemated last December by Cuba’s channel demands and the U. S. delegation’s refusal to accede to them [BROADCASTING, Dec. 13-14, 1948]. The meeting is designed to reconcile the two nations’ differences with respect to proposed channel assignments, after which the full NARBA session could resume in this country at the call of the U. S. sometime between April 1 and Aug. 1.

Resignation of Mr. Illas came less than a month after he had issued a statement, at the direction of Cuban President Carlos Prio Socarras, subscribing to the “status quo” policy adopted by other NARBA signatories with respect to new assignments pending negotiation of a new treaty [BROADCASTING, Jan. 2].

Members of the U. S. official delegation to Havana are: Chairman Hyde, D. R. MacQuivey of State Dept.’s Telecommunications Division, and FCC Engineers James Barr and Underwood Graham, along with Ray Harrell, State Dept’s. telecommunications attache in Havana.

Industry representatives include Edmund A. Chester, no. director, and James D. Parker, engineer, for CBS; William S. Hedges, vice president in charge of planning and development, and Raymond F. Guy, manager of radio and allocations engineering, for NBC; Andrew G. Haley, Washington attorney for ABC; John A. DeWitt Jr. of WSM Nashville, engineering director of the Clear Channel Broadcasting Service; Neal McNaghten, NAB engineering director; J. G. Rountree of the consulting engineering firm of A. Earl Cullum Jr., Dallas, and William E. Beers Jr., Washington consulting engineer.

Requests Hearing

HEARING on FCC’s order to revoke the license of KPAB Laredo, Tex., was requested by the station for a hearing in Washington, D.C., on Mar. 29 to determine the station’s future. The Commission re- voked KPAB’s license in early Jan. 1947, a few months after the station had been transferred without FCC approval from Mark Perkins to Allen K. Tish, William Prescott Allen and others [BROADCASTING, Jan. 9].

ABC APPOINTS

Trevarthen Is Technical Head

WILLIAM H. TREVARTHEN last week was appointed ABC director of technical operations, succeeding George O. Mihle, who died Jan. 28 (see earlier story, page 90).

Mr. Trevarthen has been engineering operations supervisor of the network since 1947. Coincident with his elevation, George F. Fisher Jr., former engineering maintenance supervisor, was appointed engineering operations supervisor.

Mr. Trevarthen joined ABC as a staff engineer in 1945 after service during the war as a research associate at the underwater sound laboratories of Harvard U. Before the war he was equipment engineer for Western Electric, field engineer for General Electric, and technical and maintenance engineer for NBC.

Mr. Fisher entered radio as a studio engineer for NBC in 1941 and a year later transferred to the ABC staff engineering group. After war service as a radio-radar officer in the Navy, he returned to ABC as a maintenance engineer and became engineering maintenance supervisor in December 1948.

FCC Actions

FINAL decisions to grant four new AM stations reported by FCC last week, including new outlet on 740 kc at Dallas with 10 kw day, 5 kw night, to Texas broadcasters Roy Heflin and W. N. Hooper, WARM Scranton, Pa., granted change from 250 w to 1400 kc to 5 kw on 590 kc. Initial decisions for approval of two AM outlets reported in addition to regular grants for six AM stations. Details of these and other FCC actions may be found in FCC Roundup on page 120 and Actions of the FCC beginning on page 114.

It may be sun bathing, but it’s also a business meeting in the patio of KTUC Tucson. Carleton Coveney (I), of John Blair Co.’s Los Angeles office, and Lee Little, manager of KTUC, discuss program and promotion details in connection with KTUC’s recent switch to Don Lee-MBS. John Blair Co. is national representative KTUC.

NARBA SNARL

Delayed by Cuba Minister Shuffle

SURPRISE RESIGNATION of the Cuban minister of communications delayed the scheduled opening of U. S.-Cuban conferences on new NARBA terms that would have dampened U. S. broadcasters’ hopes of early success in the negotiations.

Carlos Maristany, head of the Cuban delegation which won substantial concessions in 1941, resigned late last year, naming acting minister upon the resignation of Arturo Illas, whose more temperate attitude had encouraged hopes of U. S.-Cuban accord.

Appointment of the permanent successor to Minister Illas is expected within the next few weeks. His resignation, announced Jan. 27, was one of several among the Cuban cabinet, all attributed to political factors unrelated to radio.

Whether Mr. Maristany will get the post of minister was a matter of speculation. One Cuban authority thought the appointment might go to Dr. Jose R. Gutierrez, head of the Cuban delegation at the Montreal phase of the NARBA negotiations last fall.

WESTINGHOUSE

Campbell to New Sales Post

CREATION of a national sales coordinator in New York for all radio and television properties was announced today by J. B. Conley, general manager. Mr. Conley announced that Eldon Campbell, KEX Portland, Ore., sales manager, has assumed the new position.

Mr. Campbell, who will begin his duties Feb. 15, joined Westinghouse in 1948 at WOWO Fort Wayne. He is a native of Alert, Ind. When Westinghouse acquired KEX Portland in 1945, Mr. Campbell went there as sales manager, and subsequently took charge of all station sales. During his stay, KEX increased its power from 5 kw to 50 kw, completed new studios and under Mr. Campbell’s personal direction realized a sharp increase in local time sales, Mr. Conley said.

As national sales coordinator, Mr. Campbell will be responsible for all radio and TV contracts for Westinghouse in the Gotham area. Mr. Conley said the work, “which is becoming increasingly important,” will include close liaison with both Free & Peters and NBC Spot Sales. Westinghouse’s representatives for radio and TV, respectively, and with advertisers through agencies is Robert H. Prigmore, of KEX’s sales staff, succeeds Mr. Campbell as station’s sales manager.

‘LIGHTNING’ FILM

Special Preview Held in N.Y.

A SELECTED group of radio industry leaders and newsmen was struck by lightning, the kind that talks, at a preview in New York last week of the All-Radio Presentation promotional movie. Although the bolt did not leave its preview audience dazzled, it at least made noticeably the least convincing performance in the film. It may be that the{:continue}
INTRODUCTION of a new advertising method always incurs the opposition of established media sooner or later. Transit Radio is now going through that period in the opinion of C. L. (Chet) Thomas, president of Transit Radio. In this article Mr. Thomas, general manager of KXOK-AM-FM St. Louis, TR franchise-holder, sums up main arguments for musically soothed rides. He points out that Transit Radio advertising really is "no different" from other types—they all command attention—adding there is no such thing as "privacy" in public vehicles. He says the end result of establishing Transit Radio will be more business for all radio without cutting Transit AM, FM budgets. A recent pilot survey by Edward G. Doody & Co. showed 85.6% of St. Louis residents unopposed—continuing the trend established in other polls in St. Louis, Washington, Baltimore and Kansas City. The present discussion on Transit Radio has been particularly bitter in St. Louis and Washington where newspapers have prominently displayed opposition testimony and editorialized against the innovation. The FCC has shown interest on a staff level in forming a policy on the new medium. Mr. Thomas, a radio veteran of 22 years, started at WLW-WSAI Cincinnati, where he was named station activities manager. Subsequently he became assistant manager of WINS New York, manager of WCAE Pittsburgh, and sales manager of KST St. Louis. Later he joined KFRC Columbus, Mo., then a St. Louis Star-Times station, as general manager, switching in 1944 to Star-Times-owned KXOK where he rose from program director to his present post. Mr. Thomas is also president of the St. Louis Advertising Club.

is the summary of the results of five surveys made in St. Louis, Washington, D. C., Baltimore and Kansas City by Edward G. Doody & Co. during 1948-49:

"Eight out of 10 riders favor Transit Radio as a part of regular service. Less than one out of 10 object. The rest don't care or are undecided. However, even among those who say they object, there is a substantial group which would not object, if the majority favored permanent installations. Thus, only a fractional group of active objectors remains, opposed even against majority will."

II. Transit Radio helps the transit companies provide sound, efficient and economical service.

Insofar as Transit Radio provides public transit companies with a source of income in addition to their fares, it helps make possible good public transportation at minimum cost.

III. Transit Radio is a main support of FM aural radio.

How high were the hopes of the American people for FM aural radio at the end of World War II? Some people saw it as a rich opportunity for broader expression of opinion.

The fans of FM aural radio pointed to its freedom from static, its fidelity of tone, the relative cheapness of its transmitting equipment, etc. But most enthusiastically they pointed to the fact that it made room for many more radio stations. Under the present AM system there are only about 2,000 stations. Under the FM system between 3,000 and 5,000 new stations are possible.

On Nov. 15, 1948, the FM Assn. released a survey showing that FM had grown 109-fold from a $10 million business in 1940 to a $1 billion industry. It was then called the "fastest growing industry in America."

Foundation for FM

But what happened? The number of FM aural radio stations in operation by Dec. 31, 1948, was 700. The number on Dec. 31, 1949, was 733—a net gain of only 33 in a whole year. During this year 217 FM authorizations were surrendered, 45 of which had been in actual operation.

Over 99% of the 733 FM stations, which are the components of this billion-dollar industry are operating at a loss. They will continue to do so until a solid financial foundation is built under FM. Transit Radio is such a foundation. Transit Radio can benefit, not merely one, but several FM radio stations in a community. In St. Louis, KXOK-FM sponsors Transit Radio; in East St. Louis arrangement for Transit Radio are being negotiated by an East St. Louis station. In Washington, D. C., Transit Radio is sponsored by WWDC-FM; in Bradbury Heights, Md., a suburb of Washington, another station sponsors Transit Radio. Similar arrangements are being made elsewhere.

The advance of Transit Radio is certain to be the advance of Frequency Modulation radio—a type admittedly finer technically than amplified modulation radio. Most of the FM aural radio stations that offer a program fare different from that on associated AM stations are those sponsoring Transit Radio.

Reaches Other Points

Transit riders are not the only persons served by Transit Radio. These fine programs are broadcast to the entire community. They are designed to please listeners in homes, hotel lobbies, banks and countless other places. Many listeners leave their radios on for hours tuned into the FM station sponsoring Transit Radio in preference to all the other programs available.

Transit Radio makes possible a wider and better radio service to an entire community, not merely the riders on buses and streetcars, but everybody within range who tunes in.

IV. Transit Radio makes it possible for the drivers of buses and streetcars to meet emergencies.

In this regard, Transit Radio has already shown its capabilities. Because of newscasts received over Transit Radio, bus and streetcar drivers in Washington, D. C., and St. Louis have known how to avoid areas blocked off by fires. Because of newscasts over Transit Radio, drivers in Houston, Tex., did their jobs better during a hurricane. These instances are portents of vastly more important uses.

The American people are just beginning to look full in the face the job of reducing their vulnerability to atomic attack. The need

Spot Radio Does Cost Less Today—
Startling Comparisons Prove That WHO Costs 52% Less Than In 1944!

By every standard that means anything whatsoever to forward-looking advertisers, advertising on WHO costs less today than in 1944.

Comparing figures from the 1944 and the 1949 Editions of the Iowa Radio Audience Survey,* you find that in 1949 Iowa radio homes had increased to the point where WHO cost 10.6% less per thousand radio HOMES than in 1944.

Even more startling, you find that in 1949, multiple-set homes had increased to the point where WHO cost 52% less per thousand radio home SETS than in 1944— and modern research has proved that the increased number of home SETS is even more important than the increase in radio homes. (Junior listens to his favorite serial program while Dad hears the evening news — Mother listens to a dramatic program while Sister is tuned to popular music — or the whole family listens to the same program, but in different parts of the house. Thus it is no longer correct to speak of “radio homes” —SETS make today’s audiences!)

By applying the Iowa Surveys' percentages of one-set radio families and multiple-set radio families, against population estimates,** you find that Iowa had 769,200 radio homes in 1949, against only 596,000 in 1944. Whereas there were only 904,000 sets in Iowa homes five years ago, this number had sky-rocketed to 2,140,000 in 1949! Yet this 136% increase in radio sets is for homes alone; it omits the hundreds of thousands of sets in Iowa cars, offices, barns, stores, trucks, restaurants, etc.

The phenomenal increase in the number of Iowa's radio homes and radio sets—and the decrease in costs—boils down to this:

WHO — CLASS C — 1/4-HOUR MAXIMUM DISCOUNT†

†The 1/4-hour rate is indicative of all other time segments since WHO's cost is figured on a ratio basis. Class C time is shown because it changed very little during the last five years—that is, Class C has remained primarily Daytime...from 8 to 12 mornings and from 1 to 6 afternoons.

Note that all these figures are based only on extra sets in Iowa homes. The figures do not include hundreds of thousands of "non-home" Iowa sets, plus millions of sets in WHO's BMB secondary night-time counties—these are the reasons why WHO is today a “better buy” than ever. For additional facts about WHO's great audience-potential, write to WHO or ask Free & Peters.

*The 1949 Iowa Radio Audience Survey is the twelfth annual study of radio listening habits in Iowa. It was made by Dr. F. L. Whan of Wichita University—is based on personal interviews with over 9,000 Iowa families, scientifically selected from cities, towns, villages and farms all over the State.

As a service to the sales, advertising, marketing and research professions, WHO will gladly send a copy of the 1949 Survey to anyone interested in the subjects covered.

**Sales Management's Surveys of Buying Power.
Most "commodities" cost more today than in 1943 or '46. But time on these stations costs less, in that they give you more radio families per dollar! Want the data?

*CP
The complaint alleges William Meade, Republican city chairman, speaking on behalf of local GOP candidates during the city's municipal election campaign, referred to the Americans for Democratic Action as a "Communist-infested" group. Mr. Felix is a member of ADA, which reportedly also filed suit against Mr. Meade in a state court.

Series Rebroadcast

Mr. Felix's suits ask $50,000 in damages from each of the stations. The Meade broadcast, 15-minutes long, originated from KYW on Oct. 24 and subsequently was rebroadcast over the other stations.

In its brief, KYW has filed a preliminary motion for dismissal contending there is no liability on the stations under Section 315 of the Federal Communications Act of 1934 which prohibits federal censorship of a political speech. The other stations are taking a similar position. KYW, whose case will be argued first, has filed admission that the speech was made but will argue on the question of its permissibility.

In the celebrated Port Huron decision, the FCC held that a station may not censor a political broadcast even if it contains libel. It also indicated that the FCC believes the federal law's ban on censorship would supersede state laws against libel.

Walter Saul and Allen S. Olmsted, of the law firm of Saul, Ewing, Remick and Saul, Philadelphia, are preparing the case for KYW. It is understood that the other stations will stand fast until KYW's argument is presented. Mr. Felix is a practicing attorney in Philadelphia.

KSFO-KCBS CASE

FCC Denies Both Extensions

THE ONE-TIME proposed exchange of frequencies between KSFO San Francisco and KCBS (formerly KQW) San Jose closed last week as FCC denied extensions of completion date to both outlets and declared the KSFO permit for the switch to be automatically forfeited.

The stations decided not to make the change last fall, proposing instead that KCBS assume KSFO's permit for 50 kw on 740 kc there [BROADCASTING, Oct. 31, 1949]. While not allowing transfer of the permit, FCC left the way open for KCBS to file for reinstatement of its original bid for that assignment.

1948 Authorization

Under the exchange granted by FCC in 1948 after eight years of proceedings, KSFO had proposed to change from 5 kw day, 1 kw night on 560 kc to 50 kw fulltime on 740 kc, directional. KCBS, now wholly-owned by CBS, was to switch from 5 kw on 740 kc to 560 kc with the same power, using KSFO's site in San Francisco. KSFO, licensed to Associated Broadcasters Inc. which also owns KPIX (TV) San Francisco, decided last fall to drop the plan and "concentrate more fully upon development of television broadcasting." FCC denied extension to KSFO "because completion of construction has not been prevented by causes beyond control of the permittee." Considering that KCBS' failure to complete the exchange "was due to causes beyond your control, and specifically because of the failure of Associated Broadcasters to meet its commitments under its construction permit upon which yours was contingent, the Commission, in denying extension to you, does so without prejudice to your filing a petition to reinstate" KCBS' application for 50 kw on 740 kc.

Hart Takes Leave

LEE HART, Broadcast Advertising Bureau's retail specialist, will take an extended leave of absence, it was announced last week by Maurice B. Mitchell, BAB director. Miss Hart has returned to her home in Washington, D. C., where she plans to devote some time to analytical studies and prepare campaign radio and television advertising techniques while on leave from BAB.
To the PRESS and RADIO:

Subject: SAVING NINE BILLION DOLLARS A YEAR

More than 60 per cent of the operating cost of producing rail transportation is in wages; another 30 per cent in the cost of the fuel, materials and supplies which railroads buy and use.

Since 1921, the first year after the return of the railroads from government operation during the first World War, railroad wage rates have gone up two and one-half times and the level of prices of fuel, materials and supplies has almost doubled. The same amount of labor, fuel and supplies for which they paid $1.00 in 1921 now costs the railroads an average of $2.25.

But labor and materials are combined and used so much more efficiently that the average unit of service, freight and passenger combined, which the railroads produced in 1921 for an operating cost of $1.00 is now produced for $1.03 -- and, it should be added, the service is sold to the public at charges which, on the average, have increased since 1921 no more than this same three per cent.

Behind such tremendous gains in efficiency, there is a little-noted but very real story of progress and improvement. Partly, it is a story of new products and devices unknown in 1921 -- diesel electric locomotives, centralized traffic control, electro-pneumatic car retarders in major freight yards, to name but a few. Partly it is a story of improvements in more familiar things -- a 50 per cent gain in the pulling power of the average steam locomotive -- an even greater gain in its ability to keep heavier loads moving at higher sustained speeds -- the tripled life of the average crosstie.

Partly it is a story of increased use of the railroads, partly a story of better methods in using improved plant and equipment -- but it all adds up to such results as a virtually doubled average daily transportation output of freight cars, a more-than-doubled daily output of locomotives, an increase of more than 150 per cent in the average hourly service of freight trains, and achievement of the safest operation in transportation history.

To make all this possible, the railroads have spent on additions and improvements since 1921 almost 17 billion dollars. But the saving in operating cost, as compared with what it would have been if railroads were using materials and manpower at present prices and wages but with the efficiency of 1921, amounted in 1949 alone to more than nine billion dollars -- a saving which has been passed on to the public.

The best part of the story is that it is still going on. The same skill, ingenuity and determination which have saved these billions of dollars a year in the cost of producing transportation are still at work on the railroads -- for now and for the future.

Sincerely yours,

William T. Faricy
GEN. GEORGE C. MARSHALL, wartime Chief of Staff and now president of the American Red Cross, will address the youth of the world Feb. 27 by radio when the four national winners of the Voice of Democracy broadcast essay contest [BROADCASTING, Jan. 16] appear in the historic House of Bishops at Williamsburg, Va. Host to the four high school winners will be John D. Rockefeller III.

Gen. Marshall and Mr. Rockefeller will address a group of distinguished guests from the spot in which Patrick Henry delivered his famed "if this be treason, make the most of it" speech. The addresses will be heard at 2 p.m. and carried by delayed broadcast on CBS 5-5:30 p.m. Voice of America's globe-circling transmitters also will carry the talk.

Robert K. Richards, chairman of the Voice of Democracy Committee and NAB public affairs director, said the event will close a week of awards and entertainment for the four students. The radio script contest is sponsored annually by NAB, U. S. Junior Chamber of Commerce and Radio Mfrs. Assn., with endorsement by the U. S. Office of Education.

The four student winners will repeat their broadcasts before high school students in Williamsburg. During the preceding week they were presented with 

scholarship awards at a Washington luncheon, visit President Truman at the White House and call on Congress, Cabinet members and the U. S. Supreme Court.

Winning students are Richard L. Chapman, 17, Brookings, S. D.; Gloria Chomiak, 17, Wilmington, Del.; Anne Pinkney, 17, Trinidad, Colo., and Robert Shanks, 17, Lebanon, Ind. The contest was held as feature of National Radio & Television Week, with nearly a million students writing and voicing five-minute scripts on the topic, "I Speak for Democracy."

BERT HORSWELL

Rites for MacGregor Mgr.

FUNERAL services for Bert Horswell, 42, Dallas manager of C. P. MacGregor Co., Hollywood, were held at the Wee Kirk of the Heather in Forest Lawn Memorial Park, Glendale, Calif., last Tuesday. Crema
tion followed.

Mr. Horswell died on Jan. 28 from pneumonia which developed following severe injuries sustained in an automobile accident near Lufkin, Tex., three days before. Besides his wife Beverly, surviving are two small daughters.

TRANSIT ASSN.
Spaulding Is Riders' Counsel

Hector G. Spaulding, of the Washington law firm of Spaulding & Reiter, has been named legal counsel for the Transit Riders' Assn. to aid in its fight against radio-equipped vehicles in the District, it was announced last week.

Mr. Spaulding, a professor at George Washington U. law school and formerly practicing attorney in New York, Illinois and Minnesota, stated in accepting the TRA invitation that "transit radio is a direct intentional attack" on the "freedom of attention" and quoted Supreme Court Justice Felix Frankfurter as saying:

"Modern devices for amplifying the voice or its recording afford too easy opportunities for auditory aggression. If uncontrolled, the result is intrusion into cherished privacy. The refreshment of mere silence, or meditation, or quiet conversation, may be disturbed or precluded by noise beyond one's personal control."

The transit association and two Washington attorneys—Guy Martin and Franklyn Pollak—are awaiting a decision on their appeal for a rehearing before the Public Utilities Commission which has ruled that transit radio is not "inconsistent with public convenience, comfort and safety."

Mr. Martin and TRA spokesmen said again last week that if the commission refuses to reopen the case, they will take the issue to the Federal District Court.

TRANSIT STAND

Miller Asks NAB Board

NAB President Justin Miller has informed the Washington Transit Riders' Assn., which opposes FM-equipped vehicles, that he has asked NAB's board of directors whether it wished to take a stand on transit radio.

In his reply to a letter from Claude N. Palmer, President of TRA which claims some 450 members, Judge Miller noted that the request, "so far as I can recall ... is the first suggestion that it should take such a position." Mr. Palmer had contended that "forced listening" is inconsistent with NAB's insistence upon "freedom of the air."

The association pointed out that NAB has condemned the "evils practiced in less enlightened countries and has urged the American public to support and defend the American principle of free radio."

Referring to contentions that FM "is not catching on" and that the "captive audience is its only means to success," Mr. Palmer predicted "much harder going" for the radio industry if FM is made to depend on transit radio. He cited cessation of broadcasts in New York's Grand Central Terminal and Muzak Corp.'s "withdrawal" of its service from stations where TR contracts exist.
These men spend their time in your interests

These men are your Collins sales engineers.
They spend all their time selling Collins broadcasting equipment.
Each one has a successful background in broadcasting. They all know and appreciate good equipment.
This undivided interest gives them a thorough knowledge of broadcasting problems.

They encounter every kind of situation. They know how to give you the best recommendations because they have successfully solved many problems similar to yours.
They and the Collins Radio Company feel that the preference shown for Collins products merits the finest type of sales service to all broadcasters at all times.
These men provide that service.

MUTUAL SYSTEM

Adam J. Young, Jr., Inc. National Rep.

THE broadcasting skies have broken clear and bright for Francis Davis, WFIL-AM-FM-TV Philadelphia weatherman. Barometer is the 52-week renewal for sponsorship of his daily radio program by Cities Service Oil Co.

Mr. Davis by his manifold activities, the station reports, negates the popular conception of the weatherman who spends hour on hour concocting weather prospectuses. Instead, the agile Mr. Davis has worked out a formula for keeping sponsors and listeners pleased with his work before both microphone and camera while doubling as a professor, a student, a member of the Air National Guard, and speaker for service and church clubs.

Secret of Mr. Davis’ success is a hard-driving routine which takes in studio and classroom in a one-day stint. First weather man to be employed fulltime by a Philadelphia station, Mr. Davis joined the WFIL staff in October 1947, after serving as a wartime weather officer in the Air Force.

His program schedule consists of two five-minute radio shows daily, 6:55 p.m. and 11:10 p.m., and a TV program at 7:30 p.m. Mr. Davis’ early evening radio broadcast has been sponsored continuously by Cities Service and the Petrol Corp. since October 1948.

He begins his WFIL work at 3 p.m. laboring diligently with charts and instruments until he has completed his AM shows and the telescast. The 11:10 p.m. program is recorded early in the evening. But

... (Continued on page 98)

On All Accounts

THE partnership of Rockett-Lauritzen, Los Angeles, claims the unusual distinction of having been spawned by a trailer house. This unique formation occurred five years ago when Donald Christie Lauritzen, now president of the advertising agency, bought a new trailer.

Proud of his purchase, he invited a neighbor, Robert R. Rockett, over to see it one night. Seeing led to talking, and before the evening was over, talk resulted in the birth of Rockett-Lauritzen, art and production service.

The way the art and production service turned into an advertising agency the following year was just as accidental. It all happened when Don redesigned a boat for a man who wanted to go into boat manufacturing. The man was so appreciative of the job done that when the following year Franklin Research Co., Philadelphia (wax emulsions), was looking for someone to handle their advertising, he led the firm’s representative into the offices of Rockett-Lauritzen. Since that first account, they have been an advertising agency.

It is no accident however, that in the five years since then the agency has developed into a healthy radio-active firm and one of the largest buyers of television on the West Coast.

At the present time Don handles for the agency all radio and television for Ross Food Co., Los Angeles (Dr. Ross Dog and Cat Food, Skippy Dog Food), and TV for Arizona Canning Co., Phoenix (Sun Vista Products), and supervises several other accounts.

Radiowise, Ross currently is sponsoring, for Dr. Ross Dog and Cat Food, Hopalong Cassidy on the full Don Leo network in addition to newscasts and spot shows on several West Coast stations. In television Ross has the Ruggles Show on KECA-TV Los Angeles, KING-TV Seattle, KPHO-TV Phoenix, KFMB-TV San Diego, and KGO-TV San Francisco; five-weekly, five-weekly Dog of the Hour on KPIX and KLAC-TV Los Angeles; plus spots on several other California stations. For Skippy Dog Food the firm has Pets Unlimited on KRKN-TV San Francisco.

Arizona Canning Co. is sponsoring Just For Fun on KPHI-TV Los Angeles.

DON

Mr. Davis studies instruments and a weather map at WFIL studios.

BROADCAST MEASUREMENT BUREAU

and many local stations
BMB at Deadline

LAST WEEK BMB began mailing out reports of the day and night audiences of 629 subscribing stations, accompanied by saying in BMB's second nationwide study of station audiences, final step in a Herculean task of distributing and tabulating 357,000 ballots that represents one of the most comprehensive media-impact analyses ever attempted.

Will it be the final step for BMB as well as for the second study? That's the question of the day in advertising circles. And it's a question whose answer is perhaps even more eagerly awaited by the sales and research executives of competitive media—particularly newspapers—than by the broadcasters themselves.

Advertisers and agencies have repeatedly given an ear to as to BMB's value to them in evaluating not only individual stations in relation to each other but radio in relation to other media. BMB is the first and only radio measurement of circulation on a parity basis to the Audit Bureau of Newspapers and magazines and to the Traffic Audit Bureau figures for outdoor advertising. "We want BMB continued," the buyers of advertising insist.

But the broadcast audience is the broad one. It's hard to be certain when you're the one to pay all the bills, as the broadcasters do for BMB. Without belittling the value of comparative and competitive media circulation statistics, many station operators believe that program audience measurements provide them with a more effective sales tool. Perhaps the answer to BMB's future is a new type of organization with an expanded scope which would bring in revenue to at least partially off its expenses. The BMB function certainly should not be abandoned until every possible means of continuance has been thoroughly explored.

But whatever the future holds for BMB, the thanks of radio and of radio's customers should be extended to Acting President Kenneth H. Baker and his stripped crew of associates for saving BMB from the ignominious fate which confronted it a few short months ago.

No Bull, John

THE BBC is going commercial! Don't fall off your side-saddle, old boy. It isn't really going to the American Plan of free competitive operation.

The story was tucked away in the London Mirror a few days ago. It recites that in its bid to sell BBC America out of which the BBC has formed a team of experts to plan a "Buy British" series. It is for broadcast on the General Overseas Service with recordings to be flown to stations all over the world. Whether the BBC will have time in the U. S., or seek it on a "public service" basis, wasn't revealed.

"The drive is being aimed particularly at the North American markets," says the dispatch. "The series will concentrate on showing how British industries have learned the lessons of production and distribution.

"More power to you, John Bull. But why not go all the way and admit a subsidized monopoly like BBC is wrong and that the American Plan of free competitive enterprise is right? You have spent years sitting a Government Commission to determine whether the State monopoly system should be continued after 1952.

The answer is evident. When BBC wants American dollars it uses the American way.

Anti-Trust Busters

THERE May be legal skeptics who will find fault with the U. S. Court of Appeals' opinion holding that freedom of the press is not violated by denial of a radio license to a newspaper which seeks to monopolize advertising in its market through alleged coercion. Generally, however, we believe there will be few in radio who will disagree with the opinion sustaining the FCC's prosecution of two California papers. Ronald and Lorain Journal should be denied grants for AM and FM because of alleged monopolistic practices.

While that may be so, it also is evident that abuses can develop if the FCC follows the court's judgment without wisdom or balance. Within a week of the court's opinion, the FCC called an oral argument for Feb. 13 (now postponed to April 10) on proposed policy regarding licensing of stations which violate any U. S. laws, unrelated to radio.

Never in all of radio's tumultuous regulatory experience has there been a proposition as drastic or farreaching. If invited, it would constitute a drag-net into which could be drawn for revocation any licensee who violated any law or ordinance. Expectorating on the side-walk, divorce or driving while inebriated presumably would constitute offenses.

It's equally obvious that what the law's are shooting for is anti-trust, and that they hope to compromise on that aspect. The balance is too preposterous to take seriously.

The springboard for this proposed policy, then, obviously is the anti-trust aspect. It doesn't stem primarily from the Horvitz case upheld by the Court of Appeals although that ruling would appear to buttress the FCC's position. It had its origin in a 1948 Supreme Court decision holding major motion picture producers to be in violation of the anti-trust laws. Shortly thereafter the FCC served notice that it was considering the question whether an anti-trust violator is qualified to operate a station.

As a consequence, a dozen motion picture producers or exhibitors, and several companies in the manufacturing and appliance fields have been placed under the stigma of temporary licensing.

None of those holding temporary licenses has been adjudged guilty of monopoly in radio or communications. Should the FCC continue to disqualify them, and should the courts uphold the Commission, it would mean the biggest upheaval in radio and TV since the art began.

Conceivably, every AP radio station service would be culpable, since AP was adjudged an anti-trust violator several years ago.

To deny newspapers, the motion picture people, or equipment manufacturers or any other legitimate class of the right to hold radio licenses is to make of them second-class citizens, forever stigmatized in the public gaze. Radio could not have built to its present stature of leadership among media without the participate in these.

This new inquiry has all the earmarks of the newspaper ownership threat of the FCC in the early days of the FDR era. Many newspapers would not list competitive station logs. We opined the newspaper divergence, discriminatory. There are fewer abuses now.

We hope the FCC will move warily in weighing what its lawyers may regard as newly discovered authority. If the courts wanted the anti-trust laws to be 적용 blacklist laws other than competitive interference or other criminal and civil statutes, it would have so specified. Certainly that wasn't intended, since the FCC is an expert agency created by Congress to perform the manifest functions of the law-making body in the specialized fields of radio and communications.

Our Respects To—

LOWRY HYER CRITICS

ONLY hangover for Lowry Hyer Crites from a southern exposure in Texas is a hand-made metal and leather belt and a penchant for people with a direct and natural business approach. As administrative assistant at General Mills to Samuel C. Gale, vice president in charge of advertising and public services, Mr. Crites smooths the muddled paths trod by a battalion of GM executives and key men from the firm's four advertising agencies. He insists on a straightforward yet casual clearance of business detail, usually foreign to a corporation the size of General Mills.

The fancy belt stands out as a unique holdover from Texas despite Mr. Crites' many years of habitation there. He was born in what was to become Lawton, Okla., on July 21, 1906. The land was Indian territory at the time and was not chartered as a state until a year later. His parents and he, an only child, lived there in the heart of the brompt corn industry where his father manufactured sweeping brooms from the corn.

When he was two years old, the family moved to Wichita Falls, Tex., where he attended high school and junior college. Bored with the academic rigors of higher education, and intrigued with the prospect of being a successful businessman, young Crites quit classes to begin a cotton-growing venture with another young entrepreneur. A third friend, with dubious inclinations toward generosity, offered the pair 300 acres of land rent free for their cotton-growing project.

"On paper, we figured we'd get at least a bale an acre and in five years would be rich," Mr. Crites says. But when they went out to survey the land, they found it loaded with mesquite, a high, rugged and brambly bush which "would have taken 500 Mexicans 10 years to clear. We had the 10 years, but couldn't find enough Mexicans who would work for nothing."

Practicality won out for the time being, and Lowry Crites returned to college and Oklahoma U. in Norman. Surrounded by oil fields and 10-gallon-hatted millionaires, he decided to become a geologist and work for large oil concerns. Between school terms (and occasionally, during them when he was disinclined to burrow into the books), he took off for the hinterland to do some practical engineering in determining elevations on wells. The depression, however, put a fast stop to oil exploitation and young Crites' dreams. Forced again to be practical, he studied business administration.

From college he returned to the heat of Wichita Falls, the directness of the Texas (Continued on page 96)
On the occasion of its Twenty-fifth Anniversary Station WTIC extends warm greetings to the many artists, agencies and advertisers with whom it has been associated over the years.
FRED L. BERNSTEIN, WTTM
Trenton, N. J., sales manager for two years, and former general manager of WFAK Charleston, S. C., appointed assistant general manager of WTTM.

WILLIAM PHILLIPSON, formerly counsel to Rockefeller Committee on Inter-American Affairs and Dept. of State counsel for International Broadcasting Div. Joins legal department of ABC.

JACK COALSTON appointed manager of CKMH Newcastle, N. B. He was manager of special services for British United Press, Toronto, and prior to that manager of CJNB North Battleford, Sask.

JOHN W. ELWOOD, general manager of KNBC San Francisco, elected for four-year term on advisory board of San Francisco State College.

FRANK STANTON, CBS president, will serve as national chairman of the radio-television committee for Brotherhood Week, Feb. 19-26, which is sponsored by National Conference of Christians and Jews. His committee includes 40 persons, stations and network executives, union leaders, actors and writers. JOHN AKERMAN, new assistant manager of WBBM (CBS) Chicago, is Chicago radio chairman.

B. MAIN MORRIS, assistant manager of KLZ Denver, named a director of Wohlurst Skeet Club, group made up of local business and professional leaders.

HARRY ACKERMAN, CBS vice president and director of network and television programs, Hollywood, is in New York for two weeks conferences.

Philip Morris Sales

SALES by Philip Morris & Co. Ltd. for the nine months ending Dec. 31, 1949 were $192,639,200, a 12% increase over the record of the corresponding period in 1948, the company announced last week. The tobacco firm, a heavy radio and television advertiser, reported estimated net earnings of $5.49 per common share in the last three quarters of 1949, compared with $4.42 for the same period the year before.

GUY C. HAMILTON
Succumbs to Heart Ailment

FUNERAL services for Guy Clarence Hamilton, 71, former vice president and general manager of the McClatchy newspapers and broadcasting interests (KFBK KERN KJMJ KGW KOH), were held in Sacramento, Calif., Jan. 31.

Mr. Hamilton

In failing health for the past two years, Mr. Hamilton died at his home in Sacramento Jan. 27 following a heart attack. He had retired from the McClatchy organization in 1942.

Born in Richland Center, Wis., March 3, 1879, he helped pioneer Pacific Coast radio [BROADCASTING, May 1, 1940]. Mr. Hamilton was a pioneer in the field of facsimile. During the late thirties he secured permission from the FCC to use the regular wave channels of KFBK Sacramento and KMJ Fresno for facsimile broadcasts.

Upon the death of C. K. McClatchy, editor and owner, Mr. Hamilton, on April 27, 1936, was named general manager of the McClatchy newspapers and broadcasting interests, continuing in that capacity until his retirement.

Besides his widow Elizabeth, surviving are four children, Paul, Clarence, and Helen Hamilton and Mrs. Margaret Kerins.

S. H. CAMPBELL JR.
WSPB Board Chairman Dies

FUNERAL services were held last week for S. H. Campbell, chairman of the board of directors of WSPB Sarasota, Fla., and interest holder in WJHL, Johnson City, Tenn., and WDUK Durham, N. C. He died at his Sarasota winter home Jan. 29.

Mr. Campbell also was president and owner of the Campbell Oil Co., Chattanooga, head of the Chattanooga Baking Co. and a director of the city's Hamilton National Bank. He also held interests in other enterprises, including the Peerless Woolen Mills, Rossville, Ga.

Rothman Appointment

E. E. ROTHMAN, assistant general manager and vice president of Campbell-Ewald Co., New York and Philadelphia, has been appointed general manager of the agency. In addition to being in charge of the Detroit office, Mr. Rothman will supervise the New York, Chicago, Los Angeles and San Francisco offices.

ADVERTISERS: Now, you can buy Hollywood-produced, audience-tested, high-Hooperated TV shows on a spot basis at prices you can afford!

One of Paramount’s TRANSCRIBED SHOWS: 50- to 70-minute matches, once a week. Film-recorded as broadcast over KTLA, Los Angeles; open-ended for commercials. Syndicated throughout U.S.... with some good markets still open.

FORMAT: Spectacular wrestling matches as only Hollywood showmen can stage them. Red-blooded MAIN EVENTS from the Olympic Auditorium, Los Angeles. Nationally-known mat stars in bone-crushing action and Gargantuan hilarity — perfumed Gorgeous George, World Champion Enrique Torres, Primo Carnera, Woody Strode; Jim Mitchell, the butting Black Panther; Lord Blears; the Davis and Becker brothers; the Garibaldis, father and son team; the dirty Duseks, Ernie and Emil. Exciting, skillful camera direction! At the arena microphone: veteran movie actor Dick Lane, recently voted the West Coast’s most popular TV sports announcer!

Paramount transcribed programs offer a wide range of tested top-rated popular entertainment: An unusual mystery thriller, charade quiz for movie stars, several big name bands, puppets, children’s variety and others... at a fraction of initial production costs. Programs are available to advertisers in one or all TV markets on a spot basis. Also available to TV stations with privilege of resale to local advertisers.
During one week

NBC Television programs attract more than
20,000,000 individual viewers—the largest audience
in sight-and-sound.

That’s something to think about—the next time
you’re thinking of mass media.

NBC America’s No. 1 Television Network
Worth Shouting about!

- Seldom do you have an opportunity to make a true test of station popularity...a test involving all stations carrying the same program at the same time. The 1949 World Series finally provided the opportunity for this comparison. Check WGN-TV’s ratings on the World Series telecasts against the other three stations in Chicago, and you’ll see why we believe the results are worth shouting about:

Jay & Graham Videodex, Oct., 1949

Here’s overwhelming proof that WGN-TV is the favorite television station with Chicago viewers...conclusive evidence why more and more advertisers are joining the trend to WGN-TV... Channel 9 in Chicago.
Barometer Reading on the Freeze

By RUFUS CRATER

This READING of the industry mind is just as apt today as when it was phrased 14 months ago, two months after the freeze was invoked, and the answers seem no less elusive.

In the meantime the FCC has embarked upon a television hearing—or a series of hearings—which is only one of the most complex and inclusive FCC proceedings since the original allocations of 1928 or the general allocations hearing some 16 years later.

Now, with a series of bad guesses behind the FCC, and the Commission authorities are reluctant to speculate on the probable date when they can wind up the proceedings and lift the freeze. When the freeze was formally invoked, on Sept. 30, 1948, they expected it to last six to nine months. A year later the first round of hearings was just getting under way, and the end is not yet in sight.

The boldest observers, however, while guaranteeing nothing, will venture on the basis of the current outlook that:

- It’s unlikely FCC will complete all the processes it has set in motion, get out its decisions, and be in a position to lift the freeze before late this year—and it may take much longer.
- FCC will be “forced” to open the UHF channels along lines already indicated, for want of enough channels anywhere else, but a few years probably will pass before this upstairs region in is extensive use.
- The split over color is so wide, with forces of such potency on each side, that some compromise may have to be devised to recognize the imminence of color while still leaving the door open for further development before rigid standards are adopted.

It seems generally accepted that the freeze will last “two years plus,” from the time it is imposed. And any estimate of a fall “thaw” is predicated on FCC’s meeting what seems to be the minimum time requirements for the various steps it has outlined.

Citing the complexities and complications involved, plus the demands of other Commission business, more pessimistic observers hold little hope for a return to normal licensing before 1951. In support they note that the color phase, Part I of the hearing, for which three weeks were set aside when it started last Sept. 26, is still uncompleted and apparently has several additional weeks to run.

FCC recognized the delays that have occurred and are still in store when, last week, it extended until in three sections, starting with color.

That phase, which commenced Sept. 26 and recessed in December, resumes Feb. 20 in Washington with the first official demonstration of the color system of Color Television Inc. Comparative showings of the three competing systems—one of CTI, CBS, and RCA—will be held Feb. 23. Direct testimony then resumes Feb. 27, to be followed by cross-examination.

Chronology of the Freeze...

May 6, 1948: Broadcast and non-broadcast sharing of TV channels abolished; Channel 1 deleted; new allocation plan proposed.
June-July 1948: Hearing on new allocation plan, raising questions as to tropospheric interference and related problems.
Aug. 27, 1948: Because of these questions, FCC called FCC industry conference on desirability of revising engineering standards.
Sept. 13-14, 1948: FCC industry conference held, setting up technical sessions for November-December looking to revision of standards.
May 26, 1949: Preliminary plans for far-reaching VHF-UHF hearing announced with color among subjects to be considered.
July 11, 1949: Formal proposals for hearing announced, along with proposed VHF-UHF allocation plan envisioning use of 42 UHF channels with present 12 VHF channels.
Sept. 26, 1949: First phase of hearing opens, restricted to color.
Nov. 22, 1949: Color sessions recess; FCC issues field test notice.
Feb. 20, 1950: Color sessions to resume with demonstrations followed by further direct testimony starting Feb. 27.

March 24 the deadline for comments (or amendments of previously filed comments) on the specific city-by-city VHF-UHF allocations. Time for filing oppositions to those comments or amended comments was extended to April 7. The deadlines previously had been last Aug. 26 and Sept. 26, respectively.

The hearing is being handled in 16 sessions, starting with color. Authorities see little chance that all this can be completed before the end of March and expect that it may easily extend into April if the pace exhibited up to now is continued.

Both the CTI showing and the comparative demonstrations will be held at FCC’s Laurel (Md.) laboratories, where “there will be...”

(Continued on Telecasting 52)
DuMont Laboratories (DuMont Labs) claimed last week that NBC's revised plans for a 2½-hour Saturday night television series do not modify the "basic occasion" of DuMont's complaint [Telecasting, Jan. 9, 30], though they do correct some of the "specific matters of complaint."

DuMont had asked for an FCC investigation of alleged monopolistic aspects of NBC's proposal, which involved the offer of a 13-week series of 2½-hour Saturday night programs to NBC television affiliates. NBC subsequently withdrew the plan and offered a new one in which affiliates in markets having three or more stations were asked to take the entire 2½-hour program, whereas those in markets with only one or two stations may accept only part of the proposed show.

On the heels of NBC's changes, William A. Roberts of the Washington law firm of Roberts & McInnis, DuMont counsel, wrote FCC last Wednesday:

... As DuMont has advised the management of NBC, the basic means of establishing monopoly is the general purchase of bulk time by a network, with assurance of payment without specified clients or programs, thus excluding competition of other networks with the clients in servicing stations and restricting the freedom of the independent broadcaster in his choice of network programs.

The extension of this system of operation would initiate competition among the networks for the bulk purchase of the facilities of independent broadcasters to the exclusion of the interests of both the advertiser and the individual broadcaster. It is particularly objectionable at present when a number of stations and the intermitting facilities are so inadequate as to permit exclusive control in many instances when coupled with affiliation agreements providing little or no compensation to affiliates for the initial substantial block of time, and progressive increases in compensation as the network acquires control of substantially all of the useful time of the affiliate. Some of the provisions of the agreements ostensibly permitting rejection by individual stations of a portion of the bulk order, are not impressive.

The relationship of the basic substance of this complaint with the national sweep of the hearing case in this aspect is apparent. Since the authorization and construction of adequate practical television stations to serve competitive networks in the principal markets seem far removed, the necessity for emergency control of network methods is urgent.

DuMont attached a copy of a telegram which it said was received from Sylvester L. (Pat) Weaver Jr., NBC vice president in charge of television, outlining the new offer which consists of affiliations in single-station markets.

The telegram said the offer is dependent upon acceptance by "a sufficient number of affiliates to justify our proceeding."

UHF SUCCESS

By RICHARD W. DAVIS

THE old saw that “television will mean ruin for the small broadcaster” has taken a bit of tempering lately, but it has still left many an AM manager looking at the future with sawdust in his knees. In Connecticut, however, we have watched the growth and progress of a new television which will open vast areas of entertainment, public service and profit to present AM broadcasters.

This new television is Ultra High Frequency — UHF — and it shows great promise for the future.

On appropriately named Success Hill in Bridgeport, NBC and RCA have constructed their experimental UHF television station. The eyes of the radio and television industries have been on it, but we have been there with our hands, hearts and hopes as well.

From the time the FCC granted the construction permit on May 4, 1949, the progress of the new station has been closely followed by us, and through us, by the people of New Haven. Our personnel have made almost daily visits to the modern, compact and efficient transmitter building with its 225-foot antenna overlooking the Bridgeport area, and when the station began retransmitting the test patterns and programs of WNBT (TV) New York, one of the first adapted receivers was made available to us for tests in homes and in our mobile unit. At this point we are convinced that UHF television is a fact and the Bridgeport station is proving the feasibility of telecasting in the upper reaches of the spectrum.

Success Seen

Though this UHF station has been labeled “experimental,” those who have worked with it so far believe, as do our engineers, that it has come a long distance from the experimental stage. It is considered to be in the operational level; the only testing being done is a thorough analysis of reception characteristics.

The equipment is comprised of two-thirds standard VHF transmitting units, and the rest has been working economically and efficiently. As for reception, our tests have shown it to be superior to the New York and New Haven VHF signals in Bridgeport when a side-by-side comparison is made.

The equipment is compactly housed in a small Cape Cod building, the units arranged on two sides of a master control board. None of the tubes in the picture or aural transmission systems is expensive, the highest cost of tubes in the final amplification stage is approximately $48.00. All are cooled by forced air, not water.

Two significant facts have emerged from our reception tests. One is that UHF is practically free from man-made distortion. Automobile ignition and neon sign interference that tears a VHF picture apart disappears with UHF. The other fact is that UHF signals can be received over much longer distances than were first thought possible. The Bridgeport signal is being clearly picked up in Port Jefferson, Long Island, 20 miles away. An antenna on the RCA Building in New York City, 50 miles away, is also receiving the station.

In the latter case, the antenna height is the answer to the reception, but the clarity demonstrates a lack of rumored ghosts and variances supposedly associated with UHF. In any case, the average community is seldom more than 10 square miles in area, thus UHF provides the answer to community television — perfect reception in the primary area.

Since UHF will be more of a community project than a local one, there is a need for great goodwill and greater sponsor identification and support. The proximity of other UHF stations

(FContinued on Telecasting 47)

FURNITURE DEALERS are apt to be more receptive to television as an advertising medium than most retailers, BAB’s first television Retail Information Folder told video station sales forces. The folder was mailed to stations fortight ago [Broadcasting, Jan. 30].

Designed to supply station salesmen with ammunition, the folder is devoted entirely to furniture. Copyrighted by NAB, BAB’s parent, it carries a January date and is the first of a series of monthly releases on various industries.

In explaining the receptivity of furniture men to video, the folder says:

“The furniture dealer has already been sold on television . . . more than any other type of retailer . . . because a good part of his revenue in most cities comes from the sale of TV sets. He can see first hand the public reaction to television. He knows, almost before anyone else, the scope of public interest by the number of sets being sold to his customers.”

The point then is made that the television set, which itself is being successfully sold by television, has created a demand for new types of furniture — armchairs, corner tables, mobile furniture. The suggestion of selling both the sets and accessory pieces via TV should be presented to the retailer-prospect, the folder advises.

Among other suggestions made in the folder:

- Find out the local members of the National Retail Furniture Association and tie in with their nationally scheduled promotions.
- The women’s programs can be especially effective for retail furniture sponsorship. NRFA has recommended such shows to its members.
- Sell furniture retailers on the value of TV in pulling up the “valleys” in their sales curves, pointing out that when furniture sales are low (during the early months of the year) . . . TV viewing is high.

The stations are then advised to use success materials to show the furniture retailer that television will sell furniture. The folder gives one example of a success story — Castro Furniture Co., New York, manufacturer of hide-away beds. Starting with one one-minute film spot on one station in 1948, Castro now buys $800 worth of video time weekly on four New York stations. During the same period, the company expanded from one to four floors, attributing most of the rapid growth to TV.

UHF and NBC’s Connecticut Test Indicates Greater Vistas

RICHARD W. DAVIS, general manager of WELI New Haven, Conn., is a veteran of 18 years in the broadcasting industry. He became program director of WMAS Springfield, in 1932. In 1935 he was appointed general manager of WONS Hartford, and in 1944 became general manager of WELI.

TV'S GROWTH IN '49

By BRUCE ROBERTSON

DURING 1949 commercial television more than doubled the number of stations in operation—from 41 on the air in December 1948 to 98 a year later. The number of market areas whose residents received program service from these stations in the same period increased from 23 to 57. And gross TV time sales, according to TELECASTING estimates, from $8.7 million in 1948 to $24.75 million in 1949 [Broadcasting, Jan. 23].

An overall picture of last year's growth of commercial television may be obtained from a study of the various groups of TV advertisers presented here. Based on data provided by the TV stations and networks, these reports list the network, spot and local TV advertisers, the number of ads run, the dates and the programs or spots used to convey those sights-and-sound advertisements to the television audience. These records are not absolutely complete, as not all stations report every month, but they are complete enough to give a reasonably accurate picture of the development of video advertising.

The full lists of the network and spot advertisers on television during 1949 are printed elsewhere in this issue (the network list starting on TELECASTING 3, the spot list on this page), the year's growth is summarized in the tables on this page, comparing the records of the final month in 1948 and in 1949.

The four full lists of the network and spot advertisers by product groups, shows that the number of TV network advertisers rose from 37 in December 1948 to 72 in December 1949. In the network list of Dec. 5-11, 1948, 41 stations reported 211 spot advertisers. A year later, Dec. 4-10, 1949, 89 stations reported 416 spot advertisers. The changes in rank order of the various product classes perhaps provide an indication of the eventual pattern of TV advertising medium. Or it may merely indicate that this new medium is still in a state of flux. Certainly, the December 1940 rank order is quite different from that of a year earlier.

Among network advertisers in December 1948, radio and video set manufacturers ranked first as against a tie with automotive companies for third place in December 1949, when foods were first, as against second place the year before. Smoking materials—cigarettes, chiefly—ranked second in the network list in December 1949, with toiletries and gasoline and motor oil tied for fifth place. This is reasonably close to the rank order of the various product groups on the radio networks.

Food Advertisers High

Food advertisers also topped the TV spot list in December in both 1948 and 1949. In the final month of 1948, apparel advertisers ranked second, beer and wine third, household equipment fourth and radios and TV sets fifth. A year later, beers and wines had moved up to second place, while household equipment third, candy and soft drinks fourth and toiletries fifth.

A different sort of analysis is offered by Table II, which compiles the number of accounts—TV network, spot and local—using video time in each of the country's TV markets during the final month of 1948 and of 1949. In the network list, each sponsored program is considered as a separate account, so that an advertiser with two network TV shows is counted twice. In the spot and local lists, each product campaign is considered to be an account. The more than doubling in the

| TV'S GROWTH IN '49

*These advertisers also advertise household equipment on their TV programs.
number of cities with TV service during 1949 is naturally reflected in the distribution of business among these markets. New York, which ranked first in number of total advertisers in December 1948, had dropped to fourth place by December 1949, despite an increase in TV accounts from 179 to 242. Los Angeles, which ranked sixth in December 1948, with 91 accounts on its seven stations, a year later was in first place, with 325 accounts on the seven stations now providing TV service in that area. Philadelphia, which ranked second in number of TV accounts in December 1948, dropped to third a year later, being passed by Chicago which had ranked only seventh the previous year. Baltimore meanwhile dropped from third to fifth place among all TV stations.

When the network, spot and local accounts are considered separately, the relative city standings are even more varied. New York and Philadelphia were tied for first place in number of network accounts in December 1949, with Chicago third. New York also led the spot list, with Chicago second and Los Angeles third. Los Angeles, first in number of local TV accounts by a margin of two-to-one in second place Chicago (202 to 89), ranked no better than 21st on the network list, lacking cable or relay connections with the east where most of today's TV network programs originate.

A month-by-month analysis of the number of TV markets and stations supplying data for the Rorabaugh reports since their inception in June 1948, showing also the number of network, spot and local accounts reported each month, is given in Table III.

Editorial

Today's Text

AN ERUDITE observer of the TV scene sums up the allocations dilemma this way: "It comes, I think, to this: The FCC is holding up the development of the monochrome television service whilst it tries to decide whether or not industry is holding up the development of the color television service. See Matthew VI:3." 

*And why beholdest thou the mote that is in thy brother's eye, but considereth not the beam that is in thine own eye?*

Frostbitten

JUST 14 MONTHS ago TBA met in annual convention in New York to chart the course of the fastest moving object since science learned to measure the speed of light. Then the FCC's freeze on TV allocations was less than three months old. It was to be thawed in six months—there was hope it would be done not later than February.

Another whole year has elapsed since that target date. And, from all outward appearances, the only way the video ice-jam can be broken in the foreseeable future is by litigation—leading to a more challenging but perhaps more productive time for the FCC.

Much has transpired since the FCC, on that eventful September day, decided it would redo the admittedly faulty TV allocations to catch up the errors in separation and to open new bands which would make possible a "truly nationwide" competitive service.

Actually that which has happened is mere side-show. The main event isn't even definitely booked. The FCC was diverted into color-TV. It did not want to see the public muleted into buying prosaic black-and-white receivers when color might be just around that corner.

But the amazing thing is that the public doesn't seem a bit concerned. Wherever people are exposed, whether by coaxial cable, by microwave relay or by kinescope-recording, they clutch TV to their bosom. Even with a freeze, and with less than 100 stations on the air in 68 markets, 4,000,000 receivers have been sold to the tune of about $1 billion.

When the TBA last met there were 41 stations on the air and fewer than 700,000 receivers. Under existing authorizations, there can be only 111 stations—all authorized prior to the freeze and of which 99 are on the air. Yet TV is expected to double its set population in 1956, with output expected to reach 4,000,000 sets. The question of black-and-white or color or no, the public has indicated that it will buy TV if signals are within eyeshot.

Solutions galore have been proposed. The Commission has seldom, if ever, been called upon to handle a hotter issue. It is under the gun of the Senate Interstate & Foreign Commerce Committee, which has ensconced itself as a sort of super-FCC. And now the House Committee is seeking to muscle in, evidently unwilling to sit by in the shadow of some of the FCC's own legal minions.

It is still our view that if the FCC thaws the freeze, a substantial number of the 333 pending applicants would drop. Where there are no rules, there is no law, and when people snap up TV receivers as soon as service is available.

Those willing to risk capital should be accommodated. If additional VHF channels become available through realignment of frequencies now occupied by government, the band is wide open. As with the present band, the law of supply and demand will take over. If the UHF is workable, there will be bids for its use.

A mere 111 stations in 70-odd markets aren't going to provide "truly nationwide service" or provide lots of opportunities for the new industry.

TV can't wait for a "planned economy." If sound broadcasting had waited for the Government to devise model allocations through service prefacribed for every trading area of the nation, the gooseneck speaker and three-dial tuning probably would still be in vogue.

TV Taste

IT IS NOT a fanciful exaggeration to report that unless measures are taken to prevent repetition of recent lapses in program standards, the television art is inviting trouble.

Without identifying specific instances of questionable presentation, it can be remarked that their number is enough to warrant concern. Responsible telecasters will have to take serious notice of the condition.

Counteraction might lead to hamstringing creative effort. It can be avoided if individual telecasters are willing to discipline themselves.

Good taste is hard to define in a paragraph. Perhaps it can be said that a good way to judge the acceptability of a program is to remember that the television audience is not ten rows of bald heads at Minsky's, a table of tipsy celebrants in a saloon or a theatre full of sophisticated beings. The television audience is a family in a living room.

A Richmond Radio Pioneer Leads the Way in TV

RICHMOND gave birth to telecasting—broadcasting's giant baby—at WTVR (TV) on April 22, 1948. In a few months from now, WTVR will be two years old, and Virginia's only television channel promises to break into the profit column before the year's end.

It's not surprising that perhaps the greatest electronic feat in history was introduced to Virginians by a radio pioneer and maker of broadcasting history in the home state of the Presidents.

WTVR's interest in television antedates more than a decade. As early as 1939 when television was less than an infant, Wilbur M. Havens, owner and founder of the station, joined an RCA engineer in TV tinkering at Atlantic City.

Even in those days, Mr. Havens had visions of presenting this new sight and sound offspring of broadcasting to Old Dominions, who traditionally are quite addicted to historic events.

This is the same Wilbur Havens, holder of a first class engineer's license since 1925, who built Havens & Martin Inc.'s AM station's (WMBG) first transmitter on his kitchen table. Later, Mr. Havens also is president and general manager of WCOD (Capital of Old Dominion), Virginia's first FM station, which he helped place in operation in October 1946.

WOCD maintains an 18½ hour per day program schedule, offering separate and duplicate programming with WMBG.

On April 26, 1944, Havens & Martin filed an application for a television station in Richmond. This statement of intentions soon started the city talking when a public announcement was aired over WMBG and full page newspaper ads saluted the advent of Virginia's first TV outlet. Mr. Havens in that year let it be known, in no uncertain terms, that the former capital city of the Confederate States had its video future planned.

With an eye focused on untold possibilities foreshadowed by the new media, Mr. Havens in 1944 said:

"Of all post-war developments promised, by progress, in the art of science and radio, television shows the greatest opportunity. Television will open a new era of broadcasting entertainment, information and education to the home. Furthermore, it will be a development of great economic and social significance to labor, industry and government.

"In the immediate post-war era, NBC will deliver sight and sound television programs of the world's best entertainment, sports events
and educational features to you in Virginia and Richmond through the medium of WTVR's television transmitter.

"I promise you the best in television of the future, even as WMBG listeners will receive the best in radio today."

****

ABOUT two years later, on May 16, 1946, Richmond's stake in post-war video was assured when WTVR's construction permit was granted. It was the first TV grant in Richmond and in the state, and one of the first six TV grants.

From that time on, it was literally 18 hours per day devoted to the station's construction. The transmitter building, which houses AM, FM and TV facilities, had to be more than doubled in size, a television studio had to be completed and a film projector and control room constructed and equipped. Associated circuits and equipment were to be installed for permanent use. In order to fulfill the promise made the people by Mr. Havens, continuous research was conducted to assure the finest in services. Today, the station's studio building stands as a remarkable architectural as well as broadcasting unit. It was voted one of nine most noteworthy examples of modern architectural designs by Architectural Record.

Preparation for "T-Day" was carefully and intricately keyed to public information. An aggressive educational and promotional TV campaign featuring periodic reports via radio and newspaper kept residents posted on WTVR's progress.

Several months before the approach of "T-Day," an elaborate series of television manufacturer, distributor and dealer meetings were held in the station's auditorium. These served to educate the set handlers in all phases of merchandising and public service, thus paving the road for the smooth flow of receivers to consumers once the debut date was announced.

Finally, with the announcement of "T-Day," the heavens nearly broke with promotional rain in Richmond. Radio, direct mail, newspaper, posters, travelling news signs, counter cards and window space blanketed the eastern section of the Cavalier State for two straight months. When the station's signal was heard, WTVR made its debut with an inaugural program extending from 7:30 p.m. to 12:15 a.m. On the program were the state's governor, the mayor of Richmond, WTVR and NBC officials and other representatives and dignitaries from the industry. Bulk of the programming consisted of live studio productions.

Over 2,000 people were invited to look over the studios during the evening. TV dealers in the city held open house and capacity crowds caught their first glimpse of video. Initial programming by the station was two hours in the evening, 7:15 to about 9:30, Tuesday through Sunday, and made up principally of live studio shows.

****

ANOTHER landmark for WTVR was reached in June 1948 when the station linked with the NBC-TV Network and coincidentally became a pioneer NBC interconnected affiliate. It was this month that the station presented the first broadcast of the Republican National Convention. That day, June 23, WTVR was on the air from 9 a.m. to 3:00 a.m. A month later, the station carried the activities of the Democratic National Convention.

Set distribution in the WTVR area has increased 20-fold from 1,000 sets in 1948 to nearly 21,000 today. These figures show that Virginians are becoming more and more video-conscious.

WTVR has come a long way since its first thrust into commercial television. Now the station operates an average of 42% hours weekly. Minimum operating schedule is 5-10:30 p.m. Network programs occupy periods of from 5-6 p.m. and 7-10:30 p.m. with local programming confined to the 6-7 p.m. hour and/or before 5 p.m. At present, there is a total of 82 commercial accounts on WTVR with the breakdown showing the network placing the greatest chunk (46), with local (31) totaling greater number in than national (15).

WTVR's policy, the station states, "is to provide the viewing public with not only the first but the finest which television has to offer." In conjunction with this theme, Mr. Havens has added his belief that plans in this new art must be flexible and geared for adaptation to the rapid pace that this giant baby is setting.

A quick look at programming gives a somewhat clearer idea of the quality and flexibility that is the established WTVR tradition.

****

Of the more successful commercial shows, WTVR cities eight programs, each of them local. This double-stamps the station's enterprise in video programming in a non-competitive TV area.

Continuous mail response was received from a pre-Christmas show last December that was locally produced. Called Santa Reads His Mail and telecast Monday, Wednesday, Thursday and Friday from 6:30-30 p.m., it featured Santa reading mail sent in by the kiddies and Mother Claus, who assisted in the chores and recorded the names of the children. From one announcement prior to the initial program, Santa received 246 responses. The amount of mail he received in the first two weeks exceeded 2,500 pieces. Noble Bros. Bakery sponsored the program.

The other seven programs encompass the field of entertainment and education. Sportslight is shown twice weekly from 6:45-7 p.m. It features the station's sports commentator, Jack Lewis, who presents sports resumes together with interviews of personalities. Its drawing power is attested by sponsorship by a local brewer for more than a year.

Question hunters in the vicinity tune in on Quiz-A-Quiz, sponsored by Rockingham Clothes. Two civic clubs match wits weekly with the cash prize a donation to the winners' favorite charity. Questions are of visual nature. This show is presented 15-minutes weekly.

A public service type program is offered viewers in Richmond Roundtable, which is presented from 6:30-7:45 p.m. each Friday. Outstanding public officials, dignitaries and civic leaders are provided a forum to express their opinions on important current issues. This program has stimulated state-wide interest and has included members of the President's cabinet, the state's governor, the city's mayor, state departmental heads and leaders of business and industries.

For the women's taste, Woman's Video Journal, with Jerry Lane, WTVR women's commentator presiding, gives culinary hints, fashions and interviews with local feminine personalities. This is aired 6:30-6:45 p.m. each Wednesday.

A lifting format typifies three musical shows, Dede Rusch, On Wings of Song and Swenson Brothers Quartette. Each program has one thing in common in being a WTVR TeleVision Richmond production. The Rusch show fills the Saturday evening 6:30-7 p.m. slot with western musical stylings complete with ranch settings. The Wings program, 6:45-7 p.m. on Tuesday, a relatively new feature, presents easy-on-the-ear piano selections by Pianist Everett Sene and vocal renditions by local artists. This program is beamed for TV showing since no spoken audio chops the program. All announcements are presented via video slides over appropriate musical bridges. The Quartette program completes the musical show trio. On this program, presented Tuesdays, 6:45-7 p.m., the rendition of songs of the Southland, another Virginia tradition, has attracted wide and faithful audiences.

WTVR has compiled special programming achievements highlighted by the National Convention relays. Visual events, some of them (Continued on Telecasting 48)
EVERYTHING in LIGHTING

Incandescent Lamp Bank, Type TL-5A

Rotatable Lamp Mount, Type TL-15A
With extension bars for mounting individual or multiple flood lamps. Control spindle can rotate 360 degrees—tilt 170 degrees about the point of support.

Fairleads, Type TL-32A
A practical way to guide mechanical control lines to control board without noise. 170-degree tilt and 360-degree angle of rotation around its point of support provides maximum flexibility for mounting anywhere. Equipped with quick-release gridiron clamp. Nine chromed bushings reduce control-line friction.

High-Intensity Light Dolly, Type TL-26A
The ideal mobile floor unit that puts high-intensity side illumination where you want it. Uses the TL-1A High-Intensity Fluorescent Bank. Rotates the bank from horizontal to vertical position; tilts it through 90 degrees. No high-voltage floor cables, because lamp ballast is right on the dolly.

Light-Control Panel, Type TL-31A
Includes ten headlocks and ten rope locks for controlling ten light banks. Available in single units or on ready-to-operate panels, as illustrated.

Spot-Light Fixtures, Type TL-10A—TL-11A
Standard control spindle for use with a Mole-Richardson or Oleson 2-kw Solar Spot, or a 750-watt Baby Spot. Rotates 360 degrees. Tilts 170 degrees about its point of support.
New silent-control lighting equipment enables you to "tailor" the lighting system to fit your studio—correctly, without expensive experimenting.

Available for the first time—a complete line of studio-tested lighting equipment from a single manufacturer. Available for the first time—packaged studio lighting systems to match the response curves of modern studio cameras.

Combining high-intensity fluorescent banks, high-intensity spots, and incandescent banks for handling any studio set-up, RCA lighting systems are capable of delivering more than 200 foot candles of light energy. All lights can be rotated 360 degrees horizontally and 170 degrees vertically. All lights are designed for pyramid-mounting on studio ceilings. All lights are mechanically controlled through silent-operating fairleads that terminate in a central control board.

With this lighting equipment you can swing each light for basic work, modeling, or back lighting. You can direct each light to more than one acting area. You can "dim" by tilting, rotating, or cutting off half banks—and without upsetting light distribution. All equipment and wiring is off the floor. No ladder hazards or expensive catwalk installations. No danger of burning artists or technicians.

Here is the system that delivers correct illumination with as little as two-thirds to one-half the usual amount of equipment—and with proportionate savings in power. No more experimenting for the individual studio. No more junking of extensive lighting installations.

For help in planning your studio lighting—correctly—simply call your RCA Broadcast Sales Engineer. Or write Dept. 193A RCA Engineering Products, Camden, N. J.

**High-Intensity Fluorescent Bank, Type TL-1A**

Your TBA chairman, Charles “Bud” Barry (ABC’s VP in Charge of Programs), developed the shows on this page. They’re all good examples of the kind of entertainment-wise, budget-wise programs that Bud and his Boys are coming up with for ABC’s television clients.

Super Circus...a fabulous, thrill-packed full hour under the Big Top. The biggest thing for small fry on television! (First half-hour sponsored by Canada Dry). Every Sunday afternoon at 5:00 pm (EST).

That Wonderful Guy. Here’s lively, likeable comedy for all the family, featuring a brand-new, sure-fire television star, Jack Lemmon. He’s great! With Cynthia Stone, Neil Hamilton. Wednesdays, 9:00 pm (EST).

Paul Whiteman TV Teen Club offers an unbeatable combination: a full hour of sock entertainment...a real public service to youth. Saturdays, 8:00 pm (EST). (Second half-hour to be sponsored by Griffin Mfg. Co.).

local impact has made the Atlanta area one of America's more desirable television markets

The advertiser, whether national or local, primarily is interested in only one thing. And that is the local impact his message makes.

We at WSB-TV, likewise, have one primary objective. Which is delivery of that local impact.

The WSB-TV formula for building local impact does not vary. The method: intense programming on the local level . . . integrated with outstanding national productions.

Circulation growth in the Atlanta television area, and viewer loyalty to WSB-TV prove the effectiveness of this formula. Ask your nearest Petry man for the facts.

DuMont owned and operated

ABC - CBS - NBC - Affiliated

For Complete Coverage Of

The Nation's Eighth Market Area

WDTV—Pittsburgh's Only Television Station
Picture for Yourself

Picture for yourself the potential WFIL-TV’s special delivery opens up for you.

SPECIAL because WFIL-TV offers top coverage in the world’s second largest television market—nearly 4,207,000 people in 17 buying counties.

SPECIAL because the Philadelphia market’s 266 receivers per thousand families represent the highest concentration of television sets in the Nation.

SPECIAL because WFIL-TV’s primary coverage area includes cities like Allentown, Bethlehem, Reading, Wilmington and Trenton, in addition to the Philadelphia-Camden heart of the Nation’s Third Market.

And SPECIAL—especially—because results show that dollar returned for dollar spent, WFIL-TV is your best buy in Philadelphia television.

Consider all these things. You’ll see. You’ll agree. WFIL-TV delivers the picture for yourself.

**THE BOSTON TELEPULSE**

will be published on February 25, 1950, and monthly thereafter. Each report will cover a full week's televisioning from 12 Noon to 12 Midnight. Each daily 1/2 hour rating will be based on 150 television homes (Monday-Friday ratings on 750 Homes).

**OTHER** available TelePulse material includes monthly reports in:

- CHICAGO
- CINCINNATI
- LOS ANGELES
- NEW YORK
- PHILADELPHIA
- WASHINGTON

**THE** Multi-Market TelePulse gives weighted ratings of network programs in these cities, and is also issued monthly.

**For information about these and other Telefacts **...

**Ask The PULSE**

THE PULSE INCORPORATED
ONE TEN FULTON STREET
NEW YORK SEVEN
ACTOR'S STUDIO
is a big, dramatic, 
audience-building 
CBS Package Program 
that's top TV in 
script, performance 
and production.

A 1948 Peabody Award winner now on CBS... Television Daily notes it "goes along with a consistency of excellence that is hard to match."
THE NEWSWEEKLY OF RADIO AND TELEVISION

BY MORE AGENCY-
ADVERTISER EXECUTIVES
THAN ANY OTHER
RADIO OR TV JOURNAL

READ

Only BROADCASTING brings together the week in radio and TV. Spot news—largely unduplicated elsewhere—new business, agency-advertiser personnel changes, program, promotion ideas, talent news and costs... all easily read and quickly grasped.

ADVERTISERS read BROADCASTING—to know everything that will make their radio-TV advertising more productive, more economical.

ADVERTISING AGENCIES read BROADCASTING—to do a better, more complete job for their clients.

STATIONS, NETWORKS, SERVICES read BROADCASTING—to learn quickly and reliably what is happening, week by week, in their business.

If your business concerns radio-television you need BROADCASTING-TELECASTING—the only authentic reporter of every significant development in the field of mass radio communications.

O.S.U. Reports on Viewing Intensity
(Report 97)

VIEWING of television tends to be a “complete attention” activity, according to results just released of a study of home television watching habits of men and women during evening hours conducted at the Dept. of Speech, Ohio State U.

The study was made under the supervision of Dr. Richard Robbins, graduate student in radio programming. It was based on 6,742 attempted telephone calls to Columbus homes between 5:30 and 10 p.m. last Oct. 30.

Prof. Harrison B. Summers, of the Dept. of Speech, commented that the study appears to indicate that if television is to be used as widely during evening hours, some major adjustments in listeners’ work schedules may be necessary.

In surveying Columbus evening activities, the group of radio programmers completed 70% of calls, obtaining data from 1,676 men and 2,971 women. These basic findings were cited:

1—Television viewing tends to be a “complete attention” activity; 85% of the men and 75% of the women television viewers were “doing nothing else” but watching television at the time of the telephone call.

2—Radio, on the other hand, is largely a divided-attention activity; 70% of the men and women who were listening to radio programs, only about 30% were “just listening to the radio” at the time the telephone rang, while the remaining 70% were eating meals, reading, dressing, or doing housework of various kinds.

3—Assuming that television continues to be a “complete attention” activity, the amount of time which may be devoted television viewing per evening will be considerably less than that now given to radio listening, and the “complete leisure” as here shown by women and men interviewed approached to only one-fifth of the total time between 5:30 and 10 p.m., and other leisure activities, such as talking or visiting with others, playing cards or reading, account for only another 35% of evening time. Approximately 45% of all evening time is spent in various non-leisure activities, most of which could not be carried on by television viewers.

A survey of daytime household activities, conducted last spring under Prof. Summers’ direction, showed radio sets were in use in 31.6% of Columbus homes [BROADCASTING, June 6, 1949].

In the evening study, it is pointed out, data was obtained by telephone and represents only telephone families. Furthermore, information was obtained only on weekday evenings and omits talking on the telephone as an activity.

The use of television and radio by men and women in various non-listening activity groups is shown in the following table (figures in first column show minutes per evening devoted to non-listening activities indicated; those in other columns give percentages of men or women in activity groups who were using television or radio):

New Rate Card For ABC-TV

ABC announced its television rate card No. 3 Jan. 27 with these major rate changes: Class C time reduced to 50% of Class A rate instead of 50% of Class B, for the period from 10:30-11 p.m. Local time seven days a week made Class A instead of Class B in the hour from noon to 1 p.m. Local time Saturdays and Sundays dropped from Class C to Class A; total rate for 52 ABC-TV stations for 30 minutes of Class A time on 58-week basis set at $11,000 compared with former rate of $18,285 for 33 stations. Rates became effective Jan. 15.

‘Depth of Penetration’ Surveyed by WTMJ-TV

LANCASTER, Pa., a single station market, led all other cities in a “Depth of Penetration” study released by WTMJ-TV Milwaukee. The study included single station markets in the top 10 including Milwaukee, sixth; Schenectady, eighth, and Buffalo, tenth. The "Depth of Penetration" is defined as the station by the number of television sets per 1,000 families and is based on Jan. 1 set figures. The complete list as compiled by WTMJ-TV follows:

Pittsburgh Video Set Owners Surveyed

TELEVISION set ownership has almost doubled in the Pittsburgh area in the last three months, according to Gate-Post Research which has just surveyed 1,593 families within a 20-mile radius of the city.

The survey, conducted in the first two weeks of January, found

How to Increase Your Audience
(And Revenue)
With Film

In city after city, Hooper and Pulse ratings record phenomenal audiences for film programs.

The films that are building up these phenomenal audiences are mostly Westerns and Mysteries.

If you want to tap this tremendous audience potential you should get in touch at once with Associated Artists Productions, Ltd.

Associated Artists Productions, Ltd., has the largest catalog of Hollywood-produced-film for television.

These are the films that are breaking audience rating records!

The films distributed by Associated Artists Productions, Ltd., are tailored for salability. They are properly timed for program spotting. They will mean more revenue for you.

Send for our catalog today!

(January 11, 1950)

**SHOP BY TELEVISION**

Walter Crane, Jackson Weaver

20 Min., Tue., Wed., Thu.

**HECT CO.**

WMAL-ABC, Washington

This is a "first" for this town, and possibly for the country, in TV promotion, with a successful airing of its third month, the program has so pleased its sponsor, the Atlantic Co., last night the show hit home hard, that, after five weeks, it was rebroadcast andרי 15 minutes to a full-hour schedule.

Unusual gimmick of the show, that will add to its television value, rather than entertainment, is that merchandising value. A feature of the program is actually bought during and after the show, with the purchase of a phone order, ringing of the telephone bell is transmitted to the TV audience, thus adding authenticity as well as unobserved order taking for the other shoppers.

Format of the program is fairly conventional, with Ruth Crane, director of Women's Activities for WMAL-TV, conducting the show, while her announcer, Jackson Weaver, is roundly as "Mr. and Mrs." The articles displayed are reviewed by Miss Crane with an occasional wisecrack from Weaver, and usually has the added interest of 1 or more millionaires a few hours of the evening. At sponsor's insistence, the program has a selection of "no cost" items, thereby offering a sale on the program—the items are on low cost items. This tends to slow the program down, to keep it from the glamour of some high-priced articles, like women's clothes, and the weekly total more than warrants cost of the show.

Miss Crane, an accomplished emcee and thoroughly devoted, keeps the sale moving, even under the handicap of lack of variety, as in last Tuesday's show, and when a succession of face creams grew monotonous. She TV defends extremely well, and should impart her secret of success to video makeup to others in the field. Weaver's bid for laughs are not always successful, but there's no shortage of laughs. The program can be developed into successful TV promotion, in any other medium, as a team, for they've been at it a long time.

The idea for the show, which was dreamed up by the station, is a real one and a natural. The prospect of cramming the channel with too much TV would be a frightening one, but, in moderation, a channel differing and quite viewable.

**HINT PAYS OFF**

CONVINCED of TV's selling power is Ed Bowman, general manager of Enoch Chevolet Co., South Gate, Calif. Participating sponsor in the Friday night telecast of wrestling matches from Ocean Park Arena on KETC-TV Los Angeles, he was interviewed recently between matches and dropped a hint that potential auto buyers could save the Los Angeles city tax by purchasing their new cars in his community. In ensuing hours, over 5,000 persons jammed Enoch Chevrolet showrooms. Ten bought the cars he had in stock. Gratified salesman got 49 orders for future delivery of cars.

**WJAX-TV PLANS**

**FCC Proposes Time Extension**

**RECOMMENDATION that the City of Jacksonville, Fla., be allowed additional time to complete FCC rule revision of WJAX-TV was made by FCC Hearing Examiner Jack P. Blume in an initial decision issued last Thursday. WJAX-TV would be operating within six months of final extension approval, it was found.**

Examiner Blume, who presided over FCC's hearings to determine whether Jacksonville had been diligent in prosecution of its permit, said the record showed:

"The delays are not attributable to any preconceived plan on the part of the applicant to 'stall' with the object of reserving a channel to some indefinite future date when it would be considered prudent to construct." Rather, he concluded, "the delays are traceable to honest mistakes in judgment and an overly cautious, but understandable approach on the part of the city officials of Jacksonville to its fiscal affairs, and in particular, towards the spending of public monies beyond the financial arrangements have been completed." Permit for WJAX-TV was issued by the Commission in August 1949 with requirement that the station be on the air by April 1949. The extension request filed in March last year was the subject of FCC's hearing. Examiner Blume found that Jacksonville obtained permission from the state legislature to issue $300,000 worth of revenue certificates to finance the TV station and these certificates were to be repaid from earnings of the city's WJAX, AM outlet.

However, city officials considered this amount insufficient to also meet initial operating expenses and sought to amend the plan, the initial financing from the state legislature, and discovered the statute approving issuance of the certificate made no provision to include operating expenses. Funds for the latter are not available.

The decision further noted that construction of WJAX-TV already underway, that a manager has been selected and other plans made.

FILM PRODUCERS

3% Sales Tax Poses Problems

TELEVISION film producers in Hollywood are facing a complex problem in working out the 3% sales tax recently imposed on their products by the California State Board of Equalization.

Objecting to application of the tax, it is expected that wholesale protest will be made. Film producers and distributors want the Board of Equalization to clarify the many ramifications involved and "work out a fair solution."

Spot announcements and any other length commercial film shot before last June 30 is being assessed 2½% of advertisers purchase price. The 3% tax is on footage filmed and sold to or made for sponsors since that date.

It was pointed out that there are thousands of completed product on the shelves which have changed hands several times and that many of the original producers are out of business. Under the Board of Equalization setup, back tax is involved. In many instances present owners of these commercials will have to collect back tax from advertisers who used the film on TV or pay out of pocket.

Producers declare that although legally liable, many advertisers and their agencies who bought film refuse to pay because they weren't billed assessment at time of sale. It was further pointed out that many advertising agencies up to now hadn't heard about the new application of the state sales tax and will have to collect back from their clients, thus adding further confusion.

NBC-TV Signs WTTV

WTTV (TV) Bloomington, Ind., was announced last week by NBC-TV as the network's 59th television affiliate. The station also is an affiliate of ABC-TV, CBS-TV and DuMont Television Network.

Like those wise old owls, Time Buyers have no trouble at all picking the first station in Cincinnati.

There are the facts for all to see: No ifs, ands or buts, one station is out in front, leading the parade in Cincinnati... WKRC!

And about that 25.1% TV share of the audience (FM and others), don't forget those top CBS TV shows are on WKRC-TV!
WSB COLORCAST
To Air Hospital Assembly

WSB-TV Atlanta, Ga., is to telemass in CBS color today (Feb. 6) the opening ceremonies of the Atlanta Graduate Medical Assembly from Grady Hospital. Transmission will be on WSB-TV's regular Channel 2 (180-186 mc) and is claimed to be the first colorcast south of Washington using standard monochrome equipment.

The Atlanta Journal outlet on Tuesday evening will present a special closed circuit color program to an invited group of some 500 prominent Georgians at Atlanta's Municipal Auditorium, produced by Brad Candler and featuring WSB-TV talent. Color equipment being employed is that developed by CBS and owned by Smith, Kline & French Labs.

During the Feb. 6-8 medical assembly of practitioners from throughout the South, CBS and SKF will pick up operations at Grady Hospital and relay them by polyethylene cable to the color receiver in Municipal Auditorium as it has done before similar groups in other cities.

WSB-TV on Jan. 18 was luncheon host to local television distributors to acquaint them with details of the color demonstrations and to supply informational data for distribution to dealers and consumers. The Journal's Sunday magazine supplement on Jan. 22 featured a color spread and story on color TV and some 13,000 extra copies were mailed to the medical profession in the South.

‘FREEZE’ LIFT
Smith Urges FCC to Act

THE FCC was urged last week to remove the "freeze" on TV applications in a Philadelphia speech by David B. Smith, vice president of Philco Corp. Mr. Smith addressed a joint meeting of the Franklin Institute and the Institute of Radio Engineers last Wednesday.

Mr. Smith said: "One of the things which is seriously troubling the television industry is how to open up the aerial highways so that these remaining 20 million citizens (not now covered by TV) will not be deprived of TV programs. About 20% of these now having television service get their programs from a single station, whereas they could, if it were not for the 'freeze,' have more than one service."

In reference to color television, Mr. Smith said Philco is convinced that "the channels now being used for black-and-white television can be eventually be used for color television" and that existing receivers will be able to pick-up color in black-and-white without modification. To this end, he said color receivers designed to work on the compatible system are still in the industry's laboratories and will not be ready for public use "for some time."

WDEL-WDELA TV
WILMINGTON, DEL.
**PRISMACOLOR**

**FCC Seeks More Information**

ALTHOUGH not outrightly denying the petition of Prismacolor Pictures Inc. for permission to participate in FCC's color television proceeding, the Commission has indicated the Chicago color photograph firm has not made sufficient showing that its methods are adaptable to color TV. FCC suggested additional information be submitted so the petition might be considered further.

Prismacolor told the Commission in November, when it requested leave to enter the color TV hearing, that its method of additive color photography is "natural for adaptation to television." The system produces color pictures from black-and-white film [BROADCASTING, Nov. 21, 1949]. In its reply to Prismacolor, FCC said:

The Commission has considered your petition and proposed statement and is of the opinion that the facsimile showing has not been made that your system of color photography can be adapted to color television. On the contrary, it appears from your petition and statements that at the present time your proposed color television system is predicted on the asserted success of your system of color photography; that there has been no research and development of the proposed color television system in the laboratory to determine fundamentals and to explore basic problems; and that no transmitting or receiving apparatus has been constructed by you which would be suitable for either laboratory or field testing.

In the light of the above facts it appears that a grant of your petition for participation in the above proceedings would not contribute any substantial scientific data to the color television record of the above proceedings. If you have any additional information to submit to the Commission, or if you have any transmitting or receiving equipment which has adapted to color television, please submit such information and we will be glad to give your petition further consideration.

---

**GOLDMARK TALK**

**Phila. Hear's Color Data**

DETAILS of CBS' color TV system were presented to industry representatives in Philadelphia last week by Dr. Peter Goldmark, developer of the system, in an address at the Poor Richard Club, traditional Quaker City advertising organization. The speech was in climax to 15 TV reception in the city.

WCAU-TV (CBS) Philadelphia has been showing color transmissions over sets placed in the station's lobby and various times in other central city locations. Transmissions were received daily, 11-11:30 a.m. with special viewing groups made up of advertising agency men, WCAU clients, business and civic leaders, and students. WCAU reported viewers were favorably impressed.

---

**WBTV helps Duches with wooing**

"Great!" said the Duchess (Duchess Pie Company, that is), when three one-minute slide announcements on WBTV pulled 669 entries in her customer-wooing History Mystery Man contest.

"When you note," beamed the Duchess, "that this response has been generated among 10,000 set owning families it works out to a response for practically 1 out of every 15 TV sets in WBTV's realm."

"And consider, your grace," WBTV added humbly, "how the response is building—from 135 on the first announcement to 292 on the third."

To assure your product its rightful place among the Carolina sales nobility, associate with the Duchess on WBTV.

TEL ECASTING

Page 38 • TELECASTING

February 6, 1950

PACT giving WCPD-AM-TV Cincinnati television and radio rights to Cincinnati Reds baseball games for the next five years [BROADCASTING, Jan. 30.] was widely heralded by Queen City fans and officials alike. Discussing the new contract are (l to r): J. F. Koons Jr., Midland Adv. Agency; M. C. Watters, vice president of Scripps-Howard Radio Inc., licensee of the stations and general manager of WCPD-AM-TV; W. M. Moeller (background), secretary-treasurer, Burger Brewing Co., traditional Reds' sponsor; William J. Huster, president of Burger Co., and Byron J. Fischer, Midland agency. Announcer Waite Hoyt, former major leaguer, will describe the games, to be fed to 27-station network covering southern Ohio, west Virginia, northern Kentucky and eastern Indiana. Towards Jan carried by WHIO-TV Dayton and WTVN (TV) Columbus. Byron Fischer, radio-TV director of Midland Adv. Agency, Cincinnati, handling Burger account, stated WCPD-AM-TV five-year deal includes not only home games but as many road games as can be cleared via coax or microwave. He said WLWT (TV) and WKRC-TV, both Cincinnati, initially were in negotiations.

** REDS BASEBALL **

WCPD-TV to Air Road Games

BAN, if not all, of the road games played by the Cincinnati Reds will be telecast this year for the first time by WCPD-TV Cincinnati, M. E. Watters, general manager of the WCPD stations, announced last week.

In making the announcement, Mr. Watters said: "We've been working on this deal for a week in cooperation with the Cincinnati Baseball Club and the DuMont Television Network."

Chief obstacle to the arrangement, Mr. Watters stated, was obtaining use of a fourth daytime coaxial cable from New York to carry the games on the East Coast. The AT&T has notified both WCPD-TV and DuMont that the necessary cable would be available, he stated. In the case of cities which do not have "remote" trucks, such as Pittsburgh, mobile units will be sent from Cincinnati or Cleveland, he said. The road games also will be seen on WHO-TV Dayton and WTVN (TV) Columbus.

Canada Theatre TV

FIRST theatre TV in Canada has been licensed by the Dept. of Transport, Ottawa, for the Imperial Theatre, Toronto, and the Canadian Famous Players Corp., Toronto, a Canadian subsidiary of Paramount Pictures Inc. The Toronto theatre will carry spot TV news from an NBC mobile TV transmitter bought by Famous Players some months ago. The corporation has spent over $100,000 in theatre TV, J. J. Fitzgibbons, president, has announced.

** DENIES ZAHARI'S **

Experimental Renewal Refused

EXPERIMENTAL licence for TV station which projector license for KA2XAF which has been making equipment and other tests on commercial TV Channel 2 (54-56 mc), expired Feb. 1. FCC indicated that the experimentation proposed on antennas and synchronizing generators could be done in the laboratory without need for actual telecasting. The Commission said it didn't believe the other experiments proposed would advance the TV art.
FOR MUSIC IN

NOW AND IN THE FUTURE,

IT'S

BMI

The BMI license with television sta-
tions—in effect since 1940 and for
the next ten years—covers all per-
formances both live and mechanical
and whether by means of records,
transcriptions, or film soundtrack.

It provides for the performance of
BMI-licensed compositions without special clearance headaches.

The catalog of music licensed by BMI contains over one hundred thou-
sand copyrighted titles ranging from folk music and be-bop to classical,
and the BMIs offers to television film producers all the information and help
they need in obtaining the right to record music on films from indi-
vidual copyright proprietors.

BMI's television Service Department is headquarters for complete information
on performing and other rights in the music of BMI, AMP, and the hundreds of publishers affiliated with BMI.

MUSICAL CATEGORIES FOR SCENE SETTING

BMI has compiled a CATEGORICAL IN-
DEX as a basic guide in setting musical
scapes and providing appropriate back-
ground music for script situations. It
is proving itself indispensable to TV produc-
ers and program directors everywhere.

Write to BMI's Television Service De-
partment for your copy.

**You Can't See the Television Industry Through a Mental Knothole!**

Bankers, Investors, Broadcasters, Advertisers, Agency-men, Film Producers: You know there are no cheap mistakes in television. Yet everybody’s convinced there’s a gold mine in the TV sky somewhere. Wouldn’t you like to have a radar map showing what’s behind each TV cloud?

We haven’t got such a map. But we have got a book... a big book full of specific figures about the size, shape and cost of national television. For instance, we figure it would cost $7,400,352,500 per year to run 4 TV networks consisting of 1,200 stations for 70 hours a week.

It took six months of patient data gathering, factual research and thoughtful analysis to establish and document our figures and conclusions. We do not ask you to accept them—in half an hour, using our formulas and your own best estimates of the facts, you can arrive at a complete set of specific answers of your own about TV’s future as it affects your interests.

Our major objective was to devise a system of thinking about television—a means of reaching specific answers to the Billion Dollar Questions About TV. How much will "National television" cost? Can Advertising pay for it? What will TV do to Sports? Movies? Radio? What about "box office" television? How can we break TV’s program-cost bottlenecks? Is TV a good investment risk? An Upjohn has been buzzing about our heads ever since the study was released. The office is strewn with praise and brickbats, but nobody has questioned the thoroughness or the thought-provocative scope of our analysis.

*We Are Embarrassed* because at the moment we have no copies of our research document-turned-best-seller. The first printing has gone to radio and TV executives; advertisers and agency men; Hollywood studios; broadcasters; set makers; bankers; radio and TV artists and directors; people in London, Mexico, Canada and places we never heard of. The general reaction was so summed up by a big TV advertiser who told us, "The three hours I spent reading your document was the most valuable television time I ever expect to buy. It’s worth many times the $5.00."

The second edition is at the printers... due off the presses immediately. If you want $5.00 worth of insurance against some million dollar mistakes you will want to read "the best buy in television."

Use this coupon—or write—for your copy, today!

**COLOR PHASING**

FCC Gets RCA Description

TECHNICAL description of RCA's new method of automatic color phasing, as demonstrated in mid-January in Washington [Broadcasting, Jan. 28], was submitted to the FCC last week by E. W. Engstrom, vice president in charge of research.

The technique replaces the manually operated TV color system demonstrated last autumn and is believed to eliminate the lack of uniformity that marred pictures shown at that time.

In his letter Mr. Engstrom said that January tests of automatic phasing showed "satisfactory results even under conditions of very high noise." Accompanying the letter is a 12-page description of the process, based on transmission of a burst. It is described as solving problems of noise immunity and automatic color phasing simultaneously.

Mr. Engstrom emphasized that the RCA system is "fully compatible, all-electronic and provides the same picture definition in color as in standard black-and-white television."

**New Hopalong Sponsor**

GORDON BAKING Co., New York (Silver Cup bread), Sunday, Jan. 29, began sponsoring the Hopalong Cassidy film telecasts on three NBC-TV stations for 52 weeks. The stations are WNSP-TV (NY) New York, WSPD-TV Toledo, WWJ-TV Detroit. N. W. Ayer & Son, New York, is the agency.

**WOBNL (TV) IN BLACK**

Station Reports New Clients

With the signing in 10 days of 5½ hours weekly involving seven new clients, two renewals and an order for 250 one-minute spots, WOBNL (TV) Chicago (NBC) reported is in black. Station has only 2½ hours of unsponsored time, according to John McPartlin, sales manager.

New clients include Shonberger & Sons (Ohio), Pan doodles, through Robert Martin & Assoc.; John T. Shone, direct; Better Brands of Illinois (Miller beer), direct; Electric Assn. of Chicago, through J. R. Pershall Co.; Jewel Food stores, direct; Hauser-Nash Sales, through Guenther-Bradford Agency; Chicagoland Studebaker Dealers, through Roche, Williams & Cleary; Renewals: Edward Hines Lumber Co. and Evanger's Kennel Foods. Order for 250 one-minute spots, 52 weeks, is from Sears, Roebuck Chicago Stores, through Mayers Co.

**TV Writing Contest**

CBS and World Video Inc. last week announced a television drama writing competition for college students. Under joint sponsorship of the network and the production company, which produces Actors' Studio on CBS-TV, the competition will involve four awards at monthly intervals, the first to be given March 31. Students at any qualified college may compete for the prizes, which will amount to $500 if the winning script is a one-hour program and $250 if it is a half-hour.

**BROADCASTING**

February 6, 1950

Page 46 • TELECASTING
UHF Success

(Continued from Telecasting 7)
will mean more regional interchanging of programs. Each station will be able to pick up programs telecast by neighboring stations on an exchange basis, eventually bringing into being a series of area networks, much on the order of the rural FM broadcasting networks. The ease of these relays will also mean that each community will be able to carry top network shows without the cost of expensive coaxial cables or microwave relays. This will result in high quality television for areas all over the country now without TV and without hope of getting it under the present VHF channel allocations.

As for stations within the market area of a present VHF station the outlook is equally good. Converters will be inexpensive and efficient, antennas small and simple and reception will be better. There is no operation in New Haven a VHF station and the city is TV-conscious. In the past few months we have been broadcasting news stories and reports on the progress of UHF and have sent out releases in the area as a part of an educational program. We have also publicly announced that we will install converters at cost in present TV homes when UHF comes to our city. Consequently, interest in UHF in our area is high—among advertisers, too.

UHF is the answer for the small broadcaster who looks to the future with optimism, and it has already provided the answer to the pessimists. The UHF television station on Success Hill in Bridgeport is the forerunner of nationwide TV. UHF is here and it won't be long before every hill on which there is a UHF antenna will also be a Success Hill.

Closed Circuit TV

DuMONT Television Network last week announced a new plan to provide closed circuit telecasts of business and industry conventions. Convention proceedings in New York, under the plan, may be telecast by special closed circuit hookups to various cities among the 21 connected to the television network.

Esso Video Show Set

ESSO STANDARD Oil Co., New York, will sponsor the Alan Young Show on the CBS-TV network beginning in mid-March [CLOSED CIRCUIT, Jan. 16]. The show, originating in Hollywood, will feature Alan Young in a weekly half-hour comedy series. Agency for Esso is Marshalk & Pratt.

WHEN WNBW (TV) Washington wanted to come up with a real honest-to-gosh branding iron to lend realism to its popular Circle Four Roundup Rangers, it contacted Bill Day of KOA-NBC Denver for the real article. Mr. Day air-expressed it by way of Sen. Ed Johnson (D-Col.) for use on the children's TV show, which includes a feature film and a Ranger club meeting, Mon.-Fri., 4:5-1:15 p.m. [Broadcasting, Jan. 25]. Taking part in the official presentation are (l to r): Raymond Michael, who conducts Ranger's meeting after the movie; William R. McAndrew, WRC-WNBW general manager; Sen. Johnson; Charles de Lozier, WNBW sales manager.

Floating Action! for all TV Cameras

"BALANCED" TV TRIPOD

(Pat. Pending)

This tripod was engineered and designed expressly to meet all video camera requirements.

Previous concepts of gyro and friction type design have been discarded to achieve absolute balance, effortless operation, super-smooth tilt and pan action, dependability, ruggedness and efficiency.

Below:

3 wheel portable dolly with balanced TV Tripod mounted.

Complete 360° pan without ragged or jerky movement is accomplished with effortless control. It is impossible to get anything but perfectly smooth pan and tilt action with the "BALANCED" TV Tripod.

Quick-release pan handle adjustment locks into position desired by operator with no "play" between pan handle and tripod head. Tripod head mechanism is rust-proof, completely enclosed, never requires adjustments, cleaning or lubrication. Built-in spirit level. Telescoping extension pan handle.

Write for further particulars

Page 81 • Broadcasting February 6, 1950
IN back of the programming are the Havens & Martin staff numbering 55. The television staff includes those who devote their entire time to WTVR as well as personnel who work also for WMGB and WCOD. Exclusive TV staff consists of Conrad G. Rianhard, program manager, four production managers, and their three assistants, a TV special events director, an audio specialist, and four salesmen. The technical staff of nine engineers is headed by James W. Kyle. Continuity writers, promotion and publicity directors, announcers and secretaries work for all three facilities.

IT'S NEW!
... Even Newer Than Television

T-V CHECK INC.
Provides a television checking service and permanent picture record of TV shows and commercials exactly as the audience receives them: black and white still photos ... or sound-on-film motion pictures ... taken directly from video receivers.

Orders are accepted from Sponsors, their Advertising Agencies, Owners of Exhibit Shows or Television Stations on stations for checking and auditing purposes only.
Twenty-four-hour delivery on films or tapes, accompanied by certified statement of time, station, and conditions of telecast and accepted.
Available on local and network programs with Chicago outlets. Studios are equipped with newest 16-inch TV receivers, sound-on-film comers, and still cameras exclusively constructed for TV checking.
T-V CHECK INC, all services originated by and under the supervision of the Jos. W. Hamilton Telecasting, Public Relations Counsel.

For further information, write or call

T-V CHECK INC.
Suite 3213, 141 W. Jackson Blvd.
Chicago 4, Ill.
Phone WEBster 2-9500

made known "prior to their inclusion in program," according to the telegram. The series is slated to start Feb. 26. It will be variety type, the first hour originating in Chicago and produced by Ted Mills.

Payment Plan

"You will be paid regular network compensation computed as if each half hour were sold to sponsors at your network half-hour rate," the telegram declared.

Mortimer W. Loewi, executive director of the DuMont TV Network, to whom the telegram was sent, accepted an offer for DuMont's WDTV (TV) Pittsburgh, replied that the new plan "does not affect the basic objection of our original complaint."
Talent Unions

TV Agrees Partnership

Resolution calling for true 50-50 partnership between Television Authority and Screen Actors Guild, provided some plan be made for resolving deadlock, was passed at a meeting Jan. 31 of the Hollywood membership of five live unions of Associated Actors and Artists of America that make up the TVA. Motion followed an earlier resolution, voted down, that the only partnership acceptable to TVA must include a provision for joint membership and joint action.

Basic problem in such a partnership, without which solution no such arrangement could last, is the determination of what such a plan would be. TVA maintains that joint membership meetings should be called to resolve deadlock issues; SAG and Screen Extras Guild remain firm in clinging to their basic guild contracts calling for 75% vote from total membership by mail referendum in determining any important action, such as a strike vote.

Discussing the latest SAG proposals sent TVA Jan. 18, [Telecasting, Jan. 23], George Teller, TVA national executive secretary stated they "differ in many respects from ideas originally set forth by both groups and resulted in widening the area of disagreement. Among points disputed are the question of closed kinescopes and filmed spot announcement over which both groups claim jurisdiction.

Also presented to membership was a tentative proposal on wages and working conditions prepared by the TVA board wages committee. Proposal calls for 285 for a 90-minute show, plus $6 for rehearsals, with wage scales varying down according to length of show.

In the meantime, SAG is continuing its wages and working conditions negotiations with Television Film Producers Assn. Next meeting is scheduled for tomorrow night (Feb. 7).

Surgery on TV

Series of five operations at Sinai Hospital, Baltimore, were picked up by WMAR-TV there Friday and relayed by microwave closed circuit to the local Southern Hotel for observation by some 100 doctors who were attending a sectional educational meeting of the American Urological Assn. Done in monochrome, the program lasted about five hours. Operations were not telecast for the public by WMAR-TV which operates on Channel 2 (54-60 mc).

Program Displays

Photographic blow-ups of leading TV shows will be displayed by the four video networks at the TBA Televising Clinic on Wednesday at New York's Waldorf-Astoria Hotel. Each network is creating a display of its outstanding programs specially for the clinic attendees, to include advertiser, agency and program firm executives as well as TV broadcasters.

Griffin on ABC-TV

Griffin CO. (shoe polish) will begin sponsorship of a half-hour of the hour-long Paul Whitman's TV Teen Club over 11 ABC-TV stations March 4. The contract, for the 8:50-9 p.m. half is for 26 weeks through Birmingham, Castlemar & Pierce, New York.

115 W. 45th St., New York 19, N. Y.
DECLARING that a continuation of the FCC television freeze presents a threat to the jobs of thousands of New Jersey men and women, Dr. Allen B. DuMont will meet with New Jersey Senators and Representatives tomorrow (Feb. 7) morning in Washington to request Congressional action to terminate the freeze.

Dr. DuMont, president of Allen B. DuMont Labs which employs several thousand persons in its New Jersey manufacturing plants in Passaic, Clifton and East Paterson, pointed out in a statement released for publication today that the manufacture of TV broadcasting equipment, including cameras and transmitters, is already at a standstill. He added that it is only a question of time until the manufacture of receivers and viewing tubes also will be affected.

"The delay of the Commission is directly responsible," Dr. DuMont said, "and if the freeze drags on as it now threatens to do, its adverse economic effects can be tremendous. The big fellows can probably survive but the hundreds of little companies now in television are going to experience some very tough going. The long delay has opened the door to monopoly in both broadcasting and manufacturing and we at DuMont are not interested in monopoly."

When the freeze was put into effect 18 months ago, the DuMont statement noted, it was designed to permit a study of the possible utilization of UHF channels for TV broadcasting in addition to the 12 VHF channels now in use. At that time it was anticipated that the technical studies and hearings could be completed within four or five months and the freeze lifted immediately thereafter.

"That was a year and a half ago," Dr. DuMont said today, "and what has happened? Little or nothing to decide the original problems. Instead the Commission spends its time investigating the possibility of color television now, and the industry stands by doing all it can with a limited market. How soon the freeze will end or how soon the available market will be exhausted except for replacement sets, is the big problem now. Already the broadcast equipment part of the television business has been forced to close shop for lack of customers, and that part of the industry is almost entirely in New Jersey enterprise, located in Clifton and Camden. These plants should be employing thousands of skilled workers today, but they only have skeleton forces of a few key engineers."

New Jersey is one of the two leading states in the manufacture of TV equipment and component parts, Dr. DuMont said, employing at least 25,000 persons directly for the production of transmitters, cameras, receivers and cathode ray tubes and with at least another 25,000 indirectly employed by component manufacturers, retail sales outlets and TV servicing and installation companies.

Questions Raised

Noting that many of TV's technical experts, including officers of Radio Mfrs. Assn., feel that color television is much farther away than just around the corner, Dr. DuMont asked:

"Why then do we avoid the real issue of utilizing the ultra high frequencies to increase the number of television stations the country can operate; create a road block in the path of normal expansion of a great new industry, and threaten the economic stability of thousands of skilled workers in this and other states? We in DuMont will be ready for color television when color television is ready for the public but we see no reason except personal opinions of a very small minority and outside of the Commission to hold back the further progress of black-and-white television which is ready, is accepted by the general public where it has been permitted to start operations, and is offering employment to thousands and adding greatly to the country's economic welfare."

valuable to the Commission's staff facilities for interference tests, or observance of ghost phenomena, and for the operation of color television receiving equipment in peak signal areas." In making this announcement last week the commission also pointed out that the laboratories offer more space than was available for the first demonstration, and that an adequate power supply also is available there.

Last week's announcement also cleared up a point of procedure. Upon conclusion of the color phase of the hearings FCC "will proceed to consider evidence relating to the general issues" of the proceeding. At one point authorities had been inclined toward a recess and decision on the color question before taking up other phases.

The "general" subjects, or Part I, include changes in television rules and standards, the question of opening some 42 UHF channels, use of carrier offset, synchronization and directional antennas, Stratovision, Polycasting, channels for noncommercial educational TV stations, and a proposal that the 470-500 MHz segment at the bottom of the UHF region be allocated to common carrier service.

More Delay Forseen
Although some of these subjects have been touched in color television testimony, observers see little chance of this phase being completed in less than four or six weeks.

Then comes the final phase—FCC's proposed city-by-city UHF-VHF allocation plan, providing for 2,245 stations in some 1,400 communities. This is the time when applicants and would-be applicants will come in and tell FCC what is wrong with the allocations proposed for particular communities. The enormity of the task is suggested by the fact that some 200 participants are slated to appear.

This, authorities feel, will take care of another four weeks, at least.

Then the decisions.

Nobody can hazard a guess as to how long it will take the Commission to formulate them, but it is conceded that the questions are among the most vital and difficult to face FCC in recent years. The difficulty is multiplied by the obvious fact that each day's delay means another day's delay in getting television moving.

If a proposed rather than final decision is issued as is anybody's guess, Sen. Ed C. Johnson (D-Col.), chairman of the influential Senate Interstate and Foreign Commerce Committee, has reiterated his adjunction of "fair and sufficiently general standards." Though opposed in many quarters, he seems to be winning adherents in others.

Some FCC staff authorities reportedly are among those who feel this course would offer the most satisfactory compromise of the bitter fight. The industry generally

The minimum decision in this respect, it is felt, would be a conclusion that bandwidth and the inter-modulation characteristics for color will be the same as for black-and-white.

In this connection, FCC's assumption throughout the color hearings has been that color, like black-and-white, will employ 6-Mc channels, and all three of the demonstrated color systems operate on that basis. As to interference and propagation, RCA has submitted results of co- and adjacent-channel tests indicating a substantial similarity in color and monochrome.

Need General Standards

What FCC may finally do with respect to color is anybody's guess. Sen. Ed C. Johnson (D-Col.), chairman of the influential Senate Interstate and Foreign Commerce Committee, has reiterated his adjunction of "fair and sufficiently general standards." Though opposed in many quarters, he seems to be winning adherents in others.

SOME FCC staff authorities reportedly are among those who feel this course would offer the most satisfactory compromise of the bitter fight. The industry generally

favors a cautious approach to color, CBS advocates prompt color, and Comrs. Robert F. Jones and Frieda B. Henchock in particular, along with Sen. Johnson, favor color and are outspoken in criticism of what they regard as industry "stalling."

Whatever the answer on color, the pattern of TV development will be vitally and perhaps permanently affected by other decisions which must be reached.

Unless the UHF is found capable of being used without too great delay, for example, the development of a competitive, nation-wide television system will be retarded by that much. In any event it seems likely that a surplusage of applicants will make hearings necessary before further grants can be made in the nation's major markets.

One of the prime questions to be settled is one which contributed largely to the freeze in the first place—the effects of tropospheric interference, not taken into consideration in existing standards. The decision on this point will affect the separability to be provided between co-channel and adjacent-channel stations, and, there-

fore, the number of stations that can be accommodated.

The tropospheric problem was recognized after FCC had solved another interference problem by eliminating the sharing of television channels by non-broadcast services. To accommodate the non-broadcast services thus displaced, FCC deleted TV Channel 1.

This plan was made final on May 6, 1948. At the same time FCC came out with a proposed new allocations plan based on 12 instead of the former 13 channels and yet providing for twice as many stations in three times as many cities as the old plan.

Hearings on this new allocation were started in late June 1948. These sessions, continuing over some four weeks, raised serious questions as to tropospheric effects and such related subjects as directional antennas, antenna heights and powers. FCC therefore called an FCC-industry engineering conference to start Sept. 15, 1948, to consider:

1. Whether FCC should initiate proceedings to revise the television allocations plan and standards prior to a final decision on the reallocation plan then under consideration;
2. If standards were to be revised, what policy should be adopted with respect to pending applications; and
3. What procedures should be adopted in view that revised standards might be based on the best available engineering information.

This conference, held Sept. 13-14, led to a series of highly technical sessions Nov. 30 and Dec. 1-2, 1948. These resulted in formation of the so-called ad hoc committee whose compilation and evaluation of pertinent data was used largely by FCC in its now-pending proposal for revised standards.

Meanwhile, the freeze was ordered into effect on Sept. 30, 1948.

Ten days earlier, the question of opening the UHF had been canvassed in a four-day hearing which produced (1) a broad agreement that the 470-880 mc area should be opened, and (2) divergent views on how this expansion should be accomplished. The questions involved in this hearing, although it was a separate proceeding, inevitally became entwined with those involved in the VHF freeze.

Plan Withdrawn
In setting up the current overall proceeding, FCC resolved to make a fresh start. The May 1948 allocation plan, which had been the subject of weeks of hearings, was withdrawn and the industry was required to file new notices to be eligible to participate.

The color question was here injected for the first time since the 1946-47 hearings on the CBS color proposal ended in a decision that color was not yet ripe.

The allocation currently in effect is premised on 150 miles separation between stations on the same channel and 75 between those on adjacent channels, but in many cases it falls far short of these goals. Based on the ad hoc committee's data, the proposal now awaiting hearings would extend these spacings to 220 and 110 miles, respectively.

This proposal, however, does not require the use of either synchronous or offset-carrier operations, which proponents contend will curtail the venetian-blind effects of co-channel interference to a point where the old 150-mile separation standard could be followed. The desirability of requiring such operations, which FCC's present proposal would only "encourage," is among the subjects due for airing before the proceeding is over.

Spectrum Allocation
Meanwhile, there remains a widespread feeling that television's prime problem— inadequacy of spectrum space—could be largely overcome by assigning to video some of the unused or little used frequencies allotted to government services.

Efforts have been made intermittently to secure such space, preferably adjacent to the VHF television bands. The military and other government agencies thus far have resisted successfully, not yielding to industry argument that government's right to reclaim use of frequencies in time of national emergency is established by law.

The subject of government use of frequencies is currently under study in both houses of Congress. A Senate Interstate and Foreign Commerce Subcommittee, headed by Sen. E. W. McFarland (D-Ariz.), is looking into the question as part of a broad communications probe. In the House, the Sadowski Bill (HR-6949) focuses attention on the subject via its proposal to establish a Frequency Control Board which would allocate between government and nongovernment agencies and also make nongovernment assignments.

COLOR READY?
RMA, 'Coronet' Say No

IF COLOR television standards were adopted now and proved unsatisfactory, it would be impossible to change them "without involving obsolence of every piece of transmitting equipment and every set then in existence," RMA asserts in a brochure, "Is Color Television Ready for the Home?", published last week.

"When standards are set all future improvements must be within the framework of those standards," says RMA, which opposes immediate approval of color and has set up a National Television System Committee to work out and recommend color standards.

The booklet discusses the rival RCA, CBS, and CTI color television systems and FCC's current color proceeding. It contends that not all telecasts will be in color even when color TV is approved, and that not all new receivers will be equipped to receive in color, because of the cost factor.

Meanwhile, an article in the February Coronet entitled "How Much Bank in Color Television?" contends color TV is not ready and should not be offered commercially until "actually perfected." The article, by John L. Springer, quotes "color experts" as saying color TV is not just around the corner and warns that "a debacle" would result from premature approval.

MOCK TV set, on which spots and shows can be previewed by the Edward Petry Co., national station representative, was introduced to Chicago agency people at the firm's television room preview [Telecasting, Jan. 30]. In this group were (I to r): J. Rolston Fishburn, Petry Television staff, explaining the device's operation; Howard Ketting, vice president, Ruthrauff & Ryan; William Woddell, radio manager, Leo Burnett; Don Calvin, account executive, Leo Burnett.

THESE Radio Rowers were among those attending the Petry preview. They included (I to r): Norman Hayne, radio director, Ruthrauff & Ryan; Milton Blink, vice president, Standard Radio Transcription Service; Paul Schlesinger, timebuyer, Tatham-Laird; C. C. Tucker, vice president, R. J. Potts-Calkins & Holden, Kansas City, Mo.

OTHER Petry partygoers included (I to r): Keith Kiggins, Petry-TV; Ed Fitzgerald, timebuyer, J. Walter Thompson; Bill Condon, timebuyer, Wode Advertising; Richard Montgomery, account executive, Compton Advertising; Edward Voynow, Petry Chicago vice president.
When Mickey and Felix were our leading “TV” stars...

Those celebrated “movie actors” — Mickey Mouse and Felix the Cat — were pioneer helpers in television research.

No. 1 in a Series Tracing the High Points in Television History

Photos from the historical collection of RCA

Strange though it may seem, a pair of toy figures had a lot to do with television as you now enjoy it! As “stand-ins” during television’s early days, Mickey and Felix helped RCA scientists and engineers gather priceless information.

Choice of this pair was no accident. Their crisply modelled black-and-white bodies were an ideal target for primitive television cameras. The sharp contrast they provided was easy to observe on experimental kinescope “picture tubes.”

Would living actors have done as well? No, for what RCA scientists were studying was the effect of changes in instruments and telecasting techniques. With living actors it could never have been absolutely certain that an improvement in the televised image came from an improvement in equipment and techniques — or from some unnoticed change in an actor’s appearance, clothing, make-up. Mickey and Felix provided a “constant,” an unchanging target which led to more exact information about television.

Problem after problem was met by RCA scientists, with the results you now enjoy daily. For example: In the “Twenties” and early “Thirties,” there were still people who argued for mechanical methods of producing a television image, despite the obvious drawbacks of moving parts in cameras and receivers. Then Dr. V. K. Zworykin, now of RCA Laboratories, perfected the iconoscope, to give television cameras an all-electronic “eye” — without a single moving part to go wrong. Today, this same all-electronic principle is used in the RCA Image Orthicon camera, the supersensitive instrument which televisions action in the dimmest light!

Also developed at about this time, and again by Dr. Zworykin, was the kinescope tube whose face is the “screen” of home television receivers. On its fluorescent coating an electron “gun” — shooting out thousands of impulses a second — creates sharp, clear pictures in motion. Those who may have seen NBC’s first experimental telecasts will remember the coarseness of the image produced. Contrast that with the brilliant, “live” image produced by the 525-line “screen” on present RCA Victor television receivers!

Credit RCA scientists and engineers for the many basic developments and improvements which have made television an important part of your daily life. But don’t forget Mickey Mouse and Felix. They helped, too!

Felix the Cat and Mickey Mouse were, during television’s experimental period in the “Twenties and “Thirties, the most frequently televised actors on the air. Using them as “stand-ins,” RCA engineers and scientists gathered basic data on instruments and techniques.

The iconoscope, electronic “eye” of television, invented by Dr. V. K. Zworykin, of RCA Laboratories.
The Maurer 16 mm. camera is the answer to your exacting TV production requirements. Designed specifically for professional use, it produces steadier, sharper and more accurately composed pictures under all conditions. Ease of operation, combined with many other unique features make the Maurer Professional tops in performance and dependability.

The 16 mm. Camera Designed Specifically for Professional Use!

For details on these and other exclusive Maurer features, Write:

J. A. Maurer, Inc.
37-01 31st Street, Long Island City 1, N.Y.
Wilton Gunzenhower, formerly general manager of KROW
Oakland, (Broadcasting, Jan. 18), joins KYA San Francisco as sales manager.

Charles F. Milici, Daniel J. Bernstein and John S. Palmer
join sales staff of WHGM New York. Mr. Milici formerly was on ad staff
of former New York Sun; Mr. Bernstein attended Harvard Business
School, and Mr. Palmer was in television packaging business.

Dr. G. Rambeau, appointed national representative for WLIO East Liverpool, Ohio, effective immediately.

Robert M. Dooley, formerly with KFAE and KOIL Omaha and KFOE Lincoln, Neb., named national sales
manager for WOW Inc. He will represent WOW-AM-TV Omaha and KODY North Platte, Neb., all owned
by WOW Inc.

John Schenck joins WMLL (FM) Evanston, Ill., as account executive.

Wells Armer, formerly with KYAR Phoenix, Ariz., joins sales staff of KSMO San Mateo, Calif.

Ed Filion, formerly with Pan American Airways, joins New York sales staff of Robert Meeker Assoc., station representative.

Jerry Glynn, formerly sales service manager of WLS Chicago, will join Walker Co., station representative, as
Chicago manager, Feb. 13, replacing William Lee, who will join Katz
Agency, representative firm, as radio salesman. Mr. Lee will be assigned
to Chicago office of Katz.

Arthur Duram, sales promotion manager for CBS-TV since Jan. 1949, named network's television market research
counsel. He will be responsible for delivering major presenta-
tions and for liaison between research department and CBS-TV salesmen.

He went to CBS television in 1949 from WBBM (CBS) Chicago, where he was sales promotion manager. Previously
he was with O'Brien & Dorrance, New York, as copywriter and contact and with Hillman Publications as promotion
manager.

Fred Elliott, formerly of continuity department of WKRT Cortland,
N. Y., transfers to station's sales staff.

Jack Cosgrove, formerly with sales
staffs of WOC Davenport, Iowa, WJMS Ironwood, Mich., WATW Ashland,
Wis., and most recently with WEBC Duluth, Minn., appointed sales manager
of WEBC.

Harry T. Goerger has been appointed
executive assistant to Row-
land Guilford, sales manager for New
York sales office of Allen B. DuMont
Labs, Inc. Mr. Goerger was formerly
assistant district manager for the New
York area of Ford Motor Co., having
been with that organization 17 years.

Frank S. Blair, former general
manager of WSCR Scranton, Pa., joins
WQAN-AM-FM same city, as commercial
manager. He was most recently with WARL Arlington, Va., and
previously had been with WOL Washing-
ton.

Joe Bolles, program director for
WKFB-TV Cincinnati, named sales
executive for station.

Richard Hasbrook, manager of
Los Angeles office of Avery-Knodel
Inc., elected chairman of Los Angeles
Chapter, National Assn. of Radio Representa-
tives.

Thomas F. Flanagan, managing
director of National Assn. of Radio
Station Representatives, elected life
trustee of Trinity College, Hartford, Conn.

Jack Tipton and John McEniry,
salesmen for KLZ Denver, join night-
time faculty of U. of Denver radio school.

Zelon H. White, commercial
manager of KSUE Suskville, Calif.,
appointed chairman of National Founda-
tion for Infantile Paralysis for Las-
 Vegas County, Calif.

Adam J. Young Jr., Inc. appointed
national advertising representative for
Midnight Sun Broadcast Co. stations,
KFAR Fairbanks and KENI Anchorage, both Alaska. Firm will
represent stations throughout U. S.
excepting Pacific Coast states where
stations continue to operate their own
office in Seattle, headed by GIL Wel-
lington, national advertising man-
ger.

'Korn Kobblers' Old Judge Buys Ziv Show

SALE of Korn Kobblers Show to Old Judge Coffee Co. (product of
David Evans Coffee Co., St. Louis) was announced last week by the
Federal W. Ziv Co., producer of transcribed programs. Korn Kob-
blers, featuring novelty and dance
music on washboard, tin can, wash-
tub, etc., was purchased by Old Judge Coffee for 12 markets
in Illinois, Indiana and Kentucky.

Also announced is the leasing of
Ziv-produced Guy Lombardo Show
by Andrea Television in coopera-
tion with its Cincinnati distributor,
Johnson Electric Supply Co., to sell
television sets via radio. Program
was initiated on WCPO Cincinnati
Jan. 25. Some 81 store owners attended a "kick-off" sales meeting
at the Hotel Terrace Plaza spon-
sored by Haehnle Advertising
Agency for Andrea retailers in co-
operation with Joseph Kotler, Ziv
account executive.

ABC Bride and Groom show moves to new 5:00-5:30 p.m. (EST) time slot,
Monday through Friday. Program has
taken new quarters at Lido Room of
Hollywood Knickerbocker Hotel.

I wrote that over an article in our
newspaper last week, but I didn't like
doing it. After all, the man it was
aimed at—Slim Henderson—is a
good friend of mine.

Slim came into quite a windfall last
month, and bought the old Clarke
place. The deed gave him title to all
the land—right down to the street.
Then Slim started to take up the side-
walk to make his lawn look better.

I felt it wasn't fair to the town and
said so in my article. Next morning
Slim comes around and wants to
know what I mean—getting folks riled
against him. I felt ornery myself, and
we had quite a set-to over the whole
business.

From where I sit, that was foolish.
Once we'd cooled off (over lunch and
a bottle of beer at Andy's Tavern),
Slim decided the sidewalks should stay
—for the common good and I prom-
ised next time I'd take a good look at
the other fellow's point of view before
writing any articles about him!

Joe Marsh
how big can a 5,000 water be?

Plenty big...if the station has one of the half-dozen best frequencies in U. S. radio.

that's WMT -- 600 k.c.

Plenty big...when ground conductivity and freq. combine to push the 2.5 mv. line way out.

that's WMT -- with a 2.5 mv. contour of 19,100 sq. mi.

Plenty big...when there are people living in all those square miles.

that's WMT #1, a "city" the size of Washington, D. C., spread out over the richest land in the world.

WMT adds up to the kind of a station an advertiser needs to cover Eastern Iowa economically!

The Katz man will provide full details.

ILL TOMPKINS, former head of news department of WROW Albany, N. Y., appointed head of news bureau of KATZ Houston, Tex.

RICHARD A. HALL, new to radio, appointed farm director of KSNM Mason City, Iowa. He was 1st Army staff officer for food and agriculture in Europe during the war and was attached to supreme headquarters, working in food and agriculture department of military government in Germany until 1946.

DALTON HILLE, one-time program director of WLOK Lima, Ohio, joins WKZB Muskegon, Mich., as news editor.

A. R. KEMP appointed supervisor of national farm broadcast service of Canadian Broadcasting Corp., Toronto, A. K. MORROW, formerly of CFCC Charlotte, P. E. I., named assistant supervisor.

J. W. R. GRAHAM succeeds Mr. Morrow as farm broadcast commentator for the CBC Maritimes region at CBB Halifax. Mr. Kemp joined CBC in 1943 as commentator and has been assistant supervisor of department since 1945.

LONDON YOUNG, former commentator and public relations field man for KPRO-AM-FM Riverside, KROP Brawley, KEBQ Indio and KCUB Blythe, all California, joins WILS Lansing, Mich., as local commentator.

LARRY RAY, former sports broadcaster for KCKN Kansas City, Kan., joins WHB Kansas City, Mo., as sports director.

MARION DEL VECCHIO, former news editor at WTRF Bellary, Ohio, joins news staff of WCUF Akron, Ohio.

GENE DAVIS, former sports announcer for WOSU Columbus, appointed head of sports department of WCUE.

LOWELL THOMAS, CBS newsman, and his son, LOWELL THOMAS Jr., have written series, "Out of This World: A Journey to Lhasa," for Collier's magazine. Series is based on their recent trip to Tibet.

JACK TIMMONS, former farm director for KLEE Houston, named farm director for KTBS Shreveport, La.

STAN CRAFT, news editor for KXRO Aberdeen, Wash., chosen man of the year by Aberdeen Chamber of Commerce.

NED CALMER, member of staff of CBS World News Roundup, is the author of a novel, The Strange Land, to be published by Scribbners today (Feb. 8).

JOHN THOMPSON, manager of news and public affairs at KNBC San Francisco, reappointed instructor for Institute of Journalistic Studies at Stanford U. for third year. He will conduct courses in radio news writing and editing. He also is on journalism faculty of U. of California.

FRANK ALLAN, news editor and disc jockey for KECK Odessa, Tex., is the father of a girl.

Mr. Hall

DISABLED VETS

Urged To Buy Radio Time

SUGGESTION that Disabled American Veterans Service Foundation, New York, buy radio time just as it is buying full-page newspaper and magazine space, has been made to the foundation in connection with its request for free facilities.

Promoting its third annual $100,000 prize contest, the foundation sent a form letter to disc jockeys asking them to carry announcements "as a public service." Two announcements were enclosed with suggestion that they be used "as frequently as possible."

Maj. Gen. Irving J. Phillipson, Ret., chairman of the foundation's finance and budget committee, concurred in his letter as follows: "We earnestly hope we may have your continued, wholehearted cooperation in this vital work on behalf of America's war-disabled veterans."
A Touch of Disney

IT starts about 7 p.m., and sometimes sings until midnight. A crooner? A bird? No, a mouse. KAYL Storm Lake, Iowa, reports that this unique songster was captured in a Cherokee, Iowa, home after some folks heard what they thought was a bird singing in the house. KAYL further reports that it sounds exactly like a thrush or canary and the public has been flocking in to see it at the studio. The station made a tape recording of one of “Midnight’s” song tests and played it on the Jan. 19 noon hour newscast.

He Fences In

All Types of Homes

His audience is as wide as the country; he appeals to housewives in Oregon, farmers in Texas, laboring men in Michigan. Says Mr. D. W. Thompson, Secy-Treas. of the Angelina County Lumber Co., Lufkin, Texas, to Station KTRK:

“Mr. Lewis’ stand on old-time Americanism is just what this company likes to keep before the public. We are pleased to tell you that his program has a very wide listening audience in all types of homes; that is, among the laboring class, as well as among the business-men and management, and farmers. Our company owns forests in other counties . . . and the wide coverage afforded by KTRK facilitates our taking to the people a very fine daily news commentary.”

Lively, stimulating, widely followed, the Fulton Lewis, Jr. broadcast is currently sponsored on more than 300 stations. It offers local advertisers the prestige of a network feature, at local time cost with pro-rated talent cost.

Since there are more than 500 MBS stations, there may be an opening in your city. If you want a ready-made audience for a client (or yourself), investigate now. Check your local Mutual outlet—or the Co-operative Program Department, Mutual Broadcasting System, 1140 Broadway, NYC 18 (or Tribune Tower, Chicago 11).
Contractor saves penalty of $500 – by investing $3.84 in Air Express

**Time clause in housing project paving contract stood chance of being invoked when equipment broke down at 5 P.M. 10-lb. carton of replacement parts Air Expressed from 1200 miles away. Delivery in 8 hours. Air Express charge only $3.84 — and contractor completed job on time.**

**KLEBAN NAMED**

Is Simmonds & Simmonds V.P.

MONTIER KLEBAN, former member of the executive staff of KTRH, Houston, has been named vice president in charge of the new Southwest branch of Simmonds & Simmonds Inc., Phil Tobias, president of the advertising agency, has announced.

Prior to serving at KTRH, Mr. Kleban was program and production manager at WOAI, San Antonio. Mr. Tobias announced the opening of the new office to handle Southwest advertisers and to service national accounts advertising in the vicinity. The office is located at 535 Fidelity Bldg., Dallas 2. Phone number is Central 8504.

**TR CONTRACTS Placed in Five Markets**

CONTRACTS, including renewals and first-time sponsorships, were announced last week by Transit Radio Inc. for five separate transit markets.

A third successive renewal of TR advertising in Houston, Tex., for Bond Stores has been placed by Neff-Rogov Agency, New York, calling for 12 announcements per week, the firm said.

Other contracts were:

- Terre Haute Brewing Co. through Pollyea Agency, 24 announcements per week, 7 weeks; at Flint, Mich.; Baker & Black Inc. (bluejay products) through Henri, Hurst & McDonald, Chicago, 20 announcements per week for 13 weeks at Evansville, Ind.; Miles Lake, Inc. (One-A-Day Vitamins) through Wade Advertising, Chicago, 17 announcements per week for 26 weeks at St. Louis. Renewals in Cincinnati were John Shillito department store, 5 announcements per week for 36 weeks; Biederbender Clothing Co. and Cincinnati Gardens Inc. Need account, Song Shop, 26 announcements per week.

**P. LORILLARD CO.**

Names Three to Adv. Dept.

P. LORILLARD CO., New York (Old Gold cigarettes), has appointed three new executives to its expanded advertising department, H. A. Kent, president of the company, announced last week. The new executives are Fred G. Robb, formerly account executive with Young & Rubicam, New York, as assistant advertising manager; Claude W. Berkle, previously with the company’s sales department, as media director, and George Whitmore, formerly business manager of the Burke Dowling Adams Agency as supervisor of advertising control and analysis.

The expansion, according to Alden James, director of advertising and public relations, resulted from increased advertising programs, healthy growth of the company’s cigarette brands and creation of the cigar division.

**BAD AXE BABY’**

Song Heralds WLEW Debut

IN connection with its scheduled opening next Saturday (Feb. 11), WLEW, Bad Axe, Mich., has had published a song titled “I Found My Baby in Bad Axe.” With words by Chet Hey and music by Ted Shunk, the song is printed in standard size sheet music, brightly colored.

Owned and operated by the Saginaw Broadcasting Co., which also owns and operates WSAM Saginaw, WLEW will operate daytime on 1540 kc with 250 w. Milton L. Greenebaum is president and general manager of the Saginaw Broadcasting Co.

**TAX-FREE ISSUE**

WGGG Asks Limit on WRFU

CHARGE that Florida stations enjoying tax support while accepting advertising are unfairly competing with privately-owned tax-paying stations is made by WGGG Gainesville.

WGGG has asked the Florida State Board of Control to prevent WRFU Gainesville, U. of Florida outlet, from competing with it for local advertising, according to an Associated Press dispatch. WGGG operates with 250 w on 1230 kc. WRFU is a 5 kw outlet on 850 kc.

The state board took no immediate action on the plea other than to instruct the manager of WRFU to defer efforts to sign broadcast rights for local professional baseball games until a university committee studies the situation.

President R. M. Chamberlin, of WGGG, said WRFU competition for local advertising hurt his station’s prospects. WRFU could operate without loss by obtaining income from national advertisers. Should WRFU not get enough revenue from state appropriation or national advertising, he added, “it should at least raise its rates to the average charged by other 5 kw stations instead of competing with WGGG at 250 w rates.”

Hollis Pineheart, member of the state board, said he was inclined to agree with Mr. Chamberlin’s proposal except that Gainesville merchants may be relying on WRFU’s 5 kw coverage, according to the AP dispatch. The topic will be discussed by the board Feb. 16 at Gainesville meeting.

It is contended WRFU along with WJAX Jacksonville (city-owned) and WSUN St. Petersburg (city-owned) enjoy tax support. WGGG also points out that privately-owned outlets pay real estate and personal property taxes as well as license and other fees.

**PROMOTION for “Children’s Dental Health Day,” today (Feb. 6) was carried by more than 50 AM and FM stations in New York state. Each station carried one special 15-minute show pointing up importance of day.**

---

**Air Express always goes by Scheduled Airlines; this means extra dependability, experienced handling. And shipments keep moving ‘round the clock. Regular use of Air Express keeps any business moving.**

**$3.84 is small charge indeed, since it covers door-to-door service. Anytime delivery, 7 days a week, at all airport cities. This feature makes the world’s fastest shipping service the most convenient to use.**

- **Only Air Express gives you all these advantages**
  - World’s fastest shipping service.
  - Special door-to-door service at no extra cost.
  - One-carrier responsibility all the way.
  - 1150 cities served direct by air; air-rail to 22,000 off-airline offices.
  - Experienced Air Express has handled over 25 million shipments.

Because of these advantages, regular use of Air Express pays. It’s your best air shipping buy. For fastest shipping action, phone Air Express Division, Railway Express Agency. (Many low commodity rates in effect. Investigate.)
ISLAND "window," completely en-
cased in glass and "viewable" from all
sides is effective local promo-
tion used by WENT Gloversville, N.
Y. Using slogan, "WENT is in the 'Window,'" station moved its studio
operation into window, which belongs to
town's largest department store,
for Radio Week. Complete studio, plus
control room, newsroom and copy-
commercial room, carried on its ac-
tivities before the public eye with full
staff present. Two week promotion
over station preceded move, with slo-
gan lines at bottom of newspaper
promotion carried week before and
during window operations. Segments
of daily programming were carried
from window with public asking
questions and being shown intricate
operations during off-the-air
hours.

WERE is There 

PHRASE, "WERE, Cleveland," has
been used by WERT that since took
the air. Station's programming
often carries "We're" tag line also, for
example: On-the-spot news coverage
is tagged, "WERE, There, and
children's show, WERE Pretending.

Long Quiz

QUIZ show lasting 20 days cur-
rently being carried as part of 20th
anniversary promotion by WBTM-FM.
Ten prizes have been donated to station by local mer-
chants. Station visits two stores per
day, shows merchants' prizes and tells
them to "talk for it." Speeches are
recorded for judgment by panel of
judges at end of month, with prizes
going to 10 top winners. Show is
called Talk for It.

Coverage Folder

Navy, blue and white folder sent to
trade by WBTV (TV) Charlotte,
N.C., pictures of Carolinas Flag,
flag up from map carries quote of view-
ers who have seen WBTV from points
as such as 100 miles or distant. Line is
lined of remarks from set owners in points
throughout the Carolinas and adjoining
states, complete story. Station remarks,
"WBTV is providing satis-
factory television service to 57 Carol-
ina counties with over 3,000,000 pop-
ulatons."

Katz for Women's Shows

FOUR-page booklet issued to trade
by Katz Agency Inc., station representa-
tive firm, summarizes women's service
programs available on participating
viewer can see construction work. Loan
Assn. sponsored This Is Your Zoo on
WAAAM (TV) that city, for 17 weeks,
the building was torn down. Promotion for show,
still carried by station, is seen on
wheels.

Personnel

JACK McKENNA, in radio for more
than 10 years, appointed promotion
and program manager of WEBC Du-
nam, Miss., replacing BILL CONNOR,
resigned.

DON KELLY, director of public rela-
tions for WBBM Chicago for five
years, resigns. Before joining WBBM
he spent six years with WLS Chicago
as promotion and publicity director.

STANLEY G. BOYNTON RADIO
ADV., Boston, reappointed to handle
advertising for WJR Detroit.

ing and promotion staff at NBC's Cen-
tral Div. He formerly worked in sales
promotion for International Truck
Div. of Clark Equipment Co., Battle
Creek, Mich.

WILLIAM A. GORMAN, formerly with
Bert Dunne Inc., and before that with
Super Grocers News and Pub-
lishing Co., all San Francisco, joins KFI
Los Angeles promotion department.
He will work on station's grocery
promotions and other merchandising
projects.

AL ALPERSTEIN, member of promo-
tion staff of Pan American Broadcast-
ing, New York, is the father of a girl,
Eleanor Reba.

M-G-M ADDITIONS
36 Subscribe in January

METRO-GOLDWYN-MAYER Ra-
dio Attractions added 36 stations to
its list of subscribers during the
first three weeks of January, bring-
ing to more than 150 its total sub-
scriber list. Announcement was
made last week by Bertram Lebhar
Jr., director of WMGM New York
and head of the recently-created
transcriptions division.

Among stations which signed
contracts in January are three 50
kw outlets: WBAL Baltimore, KABC
San Antonio and KRMR Tulsa. Others signed were: KFBI
Wichita, 10 kw; WJZ Des Moines, 5 kw;
KTRI Sioux City, 5 kw; WJPS Evansville, Ind., 5 kw, and
KSO Des Moines, 5 kw.

Seventeen additional Inter-
town Network stations were signed
by M-G-M for network use, to be
broadcast over the West Coast net-
s. They were: KID Idaho Falls, KVMV Twin Falls, KFXD
Nampa, all in Idaho; KBMY Bil-
lings, KJFJ Miles City, KMON
Great Falls, KOPE Butte, KPRK
Livingston, all in Montana; KRAM
Las Vegas, Nev.; KSUB Cedar City, and KSVC Richfield, both
Utah; KQRS Rock Springs, KSIP
Casper, KWYD Sheridan, KPW
Powell, KOWB Laramie, KOVE
Lander, all in Wyoming.

Also signed: WVOA Tucson, Ariz.;
WEEP Peoria, Ill.; KFOR
Lincoln, Neb.; KBON Omaha, Neb.;
WABF Allentown, WCNB Bloom-
berg, WCPA Clearfield, WBPD
Lock Haven, WPPA Pottsville,
WBAX Wilkes-Barre, WRAK Wil-
liamsport, all in Pennsylvania.

Is frequency important?

...and it's doubly important in radio. For example, WHTN
has Huntington's most favorable frequency (800 kc) and
is Huntington's only clear channel station. That gives
WHTN the best 5 mv/m con-
tour of any station in town, regardless of power, plus a
strong signal that reaches the homes of over
100,000 families. Add to this an FM bonus on WHTN-FM,
most powerful FM station in the Central Ohio Valley, and
you've got a low-cost, high power medium for tapping
the gold in these hills. Take a look at the Huntington Market
...then make up your mind
to get your share by using
WHTN and WHTN-FM.

Respects

(Continued from page 32)

populace and the wooing of his childhood sweetheart, Mary Jane Nelson. Living there with his family, he got a statistical job with General Mills when his uncle sold the firm a flour mill. The uncle is still suspected of putting a clause in the sale contract which called for a job for his favorite nephew. Between then (1929) and now, Lowry Crites rose from statistical clerk to media director in 1942 and to Mr. Gale’s administrative assistant in 1947.

“Best work I ever did, though, was marry that Nelson gal,” he says. They were wed May 23, 1931 in Oklahoma City, where the bridegroom was working as assistant to the comptroller of GM’s southwestern division, which covered Oklahoma, Texas, Arkansas and New Mexico.

Resigning this post to become sales manager for GM’s bulk products—flour and feed—he was reassigned in 1935 to the deeper south, and went to Atlanta as comptroller of the southeastern division. In 1940, Mr. Crites steamed northward to Minneapolis headquarters, where he progressed from comptroller of advertising to his present post.

For several years now, he has had direct charge of the premium division, accounting and all media. Until a year ago, he also headed the motion picture unit, which was then separated from other media. General Mills produces numerous institutional and still films.

Screens Prize Ideas

Premium activity is one of the firm’s major projects, as General Mills has pioneered in offering Buck Rogers rings and the like to children with a voracious appetite for premiums. Eighty percent of the premium ideas, however, are submitted by the firm’s agencies—Knox-Reeves, Minneapolis; Dancer-Fitzgerald-Sample, and BBD, both New York; and Tatham-Laird, Chicago. Mr. Crites screens all prize suggestions submitted by private persons. One man from each agency works with him in selecting between 40 and 50 kinds of merchandise offered each year.

Because his duties are manifold, and because the theme of the entire corporation is teamwork, Mr. Crites’ functions are broad and lack specific definition. One responsibility, however, is coordination of policies and activities among the agencies. He also establishes procedure in getting General Mills’ time and space franchises.

As media director, he supervises radio and television. The talent or creative aspects are handled separately. The most advertised of the company’s products are Cheerios and Post, in the grocery line and five among mechanical appliances. Advertising on these represents about 55% of the total ad budget per year, although several hundred other products are manufactured by the milling firm, including feeds, flours and special items.

Between 40 and 45% of the 1949 advertising budget—some $6 million—went to radio with about 5% additional for television. At this point, the only TV investment is The Lone Ranger on ABC-TV and a few scattered spots around the country. All shows include Tuesday’s Children and Light of the World on NBC, and The Lone Ranger, Jack Armstrong, Modern Romances, Snap, Crackle, and Breakfast Club on ABC. For the fourth consecutive year, General Mills was the highest single ABC advertiser in 1949. Happy about the way televsioners are reacting to The Lone Ranger, Mr. Crites’ only comment about TV is “I kinda like it.”

Prevents Overlapping Duties

Working for maximum coordination as a member of a large team, he confesses his main administrative problem is stepping in where agency duties overlap. He presents to each agency his suggestions and ideas after checking closely with other top echelon GM men. Acting as a liaison “between different members of the same family,” he sees that agencies get statistical information on sales and returns as soon as the parent company. Agency executives, rather than taking cues from him directly, get enough basic data to work on their own. He accepts agency recommendations about 95% of the time.

Liked as well as respected by agency men with whom he works, Mr. Crites is noted for two jokes branded with “L.C.” A favorite definition, which he uses as a needle, is one of a smart man, “who always agrees with me.” And, when presenting a costly project, he explains that it is by “Crites arithmetic, one million off one way or the other.”

Long, lithe and lanky, with a Texas twang softened by a deep south drawl, Lowry Crites indulges his love for seclusion by living 25 miles outside Minneapolis on Lake Minnetonka. There, with his wife and 13-year-old daughter, Jane Ann, he dons blue jeans and sports shirt and fishes for bass from his front porch. Ice fishing is fine, too, “but not after it reaches 10 below.” He’s one of the few avid fishermen who admits he learned all about it from his wife.

His duo alter ego—complete with two nicknames, Pete and Skinny—enables him to combine the rustic with the modern, the unhurried with the hurried. That’s why he can confer with corporation presid- ents about a $10 million project in the morning and put on Texas boots that evening for a square dance in Wisconsin. “Only trouble, though,” he says, “I get worn down to a nub in 30 seconds—by Virginia reels, that is.”

Among his other social activities, Mr. Crites is a member of Kappa Alpha fraternity and the University Club of Minneapolis.

WARNER-HUDNUT

Two Firms Realign in One

WILLIAM R. WARNER & Co. and Richard Hudnut Co. will be realigned and be known as Warner-Hudnut Inc., it was announced at the board of directors meeting in New York last week.

At the same meeting Elmer H. Rosb, president and director of the parent firm, William R. Warner & Co., was elected president of Warner-Hudnut. He also becomes a director of the company. Others remaining in their posts are Robert J. Davis, Warner-Hudnut executive vice president and director, and Charles A. Pennock, director and president.

Microgroove Records

NEARLY 1,100 U. S. and Canadian stations are equipped to play Long Playing microgroove records, Robert J. Clarkson, general manager of Columbia Transcriptions Inc., has announced. Mr. Clarkson said that microgroove transcriptions have already been used by such CBS clients as Dancer-Fitzgerald-Sample, Benton & Bowles, March of Dimes and National Medical Health Assn.

All four major networks will carry broadcast. Mr. Robb is Air Force Reserve major.

MRS. N. EDWARD WORSTALL, women's news editor of WSTV Stu- benville, Ohio, appointed general chairman of women's club of American Red Cross fund raising campaign in Jefferson County, Ohio.

JACK MATRANGA, production manager of KSTU Yreka, Calif., resigns to attend technical school. He was formerly with Armed Forces Radio Service in Japan as civilian program director.

DON CORDRAY, disc jockey for WJR Detroit, is the father of a boy, David Stanton. Mrs. Cordray is former PAT FIELD, disc jockey for BBC.

HUGH JONES, newsreader at WBBM Chicago, is the father of a girl, Rebeccca, born Jan. 23.

JOSEPH WILLIAM KELLY, Jr., announcer at WLLC Battle Creek, is the father of a boy, Shawn Charles Kelly, born Jan. 23. Child is the second grandchild of Quinmaster Joe Kelly on NBC's Quiz Kids.

CKYM Villa Marie, Que., new 1 kw outlet on 710 kc, went on the air on Jan. 7, according to report of Radio Branch, Dept. of Transport, Ottawa.
CHRIS O'BRIEN, attorney and former executive in American Federation of Radio Artists, named assistant executive secretary for West Coast branch of Actor's Equity. He replaces I. B. KORNBLUM who had acted as special representative for AB. Mr. Kornblum will continue to be associated with union office as member of legal counsel.

PAUL O. RIDINGS, former president of Ridings & ferris Inc., Chicago public relations firm, and most recently director of publicity and head of journalism department at Texas Christian U., Ft. Worth, Tex., joins Guy Wither- spoon, public relations firm, Ft. Worth, as partner. Name of organization becomes Witherpoon & Ridings, with offices continuing at 1705 Electric Bldg.

RALPH ROCKAFELOW, in charge of publicity and sales promotion of Paramount Pictures Corp., appointed advertising and sales promotion manager. Before joining Paramount, he was with Buchanan & Co. and Young & Rubicam, New York, for several years.

FRANCIS CARTER WOOD Jr., partner and vice president of Sound Masters Inc., New York, assumes full responsibility for all television activities of firm. He reportedly plans to reorganize entire television department at Sound Masters.

JOHN NEWMAN, formerly advertising and publicity director of International Artists Corp., appointed director of advertising and program promotion for TV-Programs Inc., New York. DON ROSS named director of sales.

TED WICK, formerly radio director of David O. Selnick Productions, Hollywood, named assistant to Martin Lewis, radio director of Paramount Pictures Inc., that city. He will write spot announcements and talent interviews for broadcasting.

MARY ANN MERCER, singer, signed by Story-Ad Films Inc., Hollywood, for 15-minute television show.

Equipment

JOSEPH R. BRANSFORD, personnel director of Western Electric Co. since May 1, 1948, elected financial vice president succeeding GEORGE L. BOST who resigned to accept vice presidency with AT&T. In addition to his new duties, he will continue to be responsible for personnel administration. Western Electric engineer since 1928, he was in charge of WE shops producing radio and radio equipment for armed forces during war.

COLONIAL RADIO Corp., manufacturers of radio and TV sets and wholly-owned subsidiary of Sylvania Electric Prod. Inc., absorbed by that company.

E. E. LEWIS, formerly president of Colonial, elected vice president of Sylvania in charge of Colonial Radio and TV Div. Other personnel and policies of subsidiary company remain unchanged.

GENERAL ELECTRIC Co., Syracuse, N.Y., announces modified replaceable stylus assembly for use with its variable reluctance phonograph cartridge. New design is called Stylos.

Dr. HARVEY FLETCHER, former director of physical research for Bell Telephone Labs., appointed visiting professor of electrical engineering at Columbia U. School of Engineering for spring session, beginning today (Feb. 6).

Feature

(Continued from page 30) this activity is only a sample of his daily routine.

As an assistant professor of physics at Ohio Institute of Technology, Mr. Davis has a teaching schedule of 15 classroom hours per week plus many more hours of preparation. In addition, he attends classes at Temple U. three days a week for a total of nine hours in pursuit of a Ph. D. in physics.

Once-a-week he participates in night drill exercises as captain in the Air National Guard. To keep his “spare hours” occupied, Mr. Davis makes himself available at least one night a week as a speaker at club functions.

A few more talents are seen in radio-TV weather forecasting by Mr. Davis. He says “the television weather man must be a combination scientist, artist, technician, and diplomat.” According to WFIL’s student of the elements, “television will hardly make the weather man a better forecaster, (but) it could very well be the biggest aid in promoting good public relations the weatherman has ever had.”

GEORGE O. MILNE

ABC, NBC Pioneer Dies

FUNERAL services were held last Wednesday at Patterson, N. J., for George O. Milne, 47, director of technical operations for ABC, who died Jan. 28, in a Miami Beach hospital of a heart attack.

Mr. Milne joined WEAF New York (now WNBC) in 1923 as maintenance man. In 1928 he was advanced to operations supervisor at that station. He joined NBC in 1930 as division engineer and remained there until 1942 when he left to go with ABC. He is survived by his wife, Mildred, and two sons, George F., and Douglas.

THE EXECUTIVE committee of the North Carolina Assn. of Broadcasters, meeting Jan. 28-20 at the Mid Pines Club, Southern Pines, heard a report of the reorganization committee of the association, named a new legislative committee, selected May 22-23 as the dates of the 1950 annual convention and Chapel Hill as the location, and discussed other business matters.

Reporting as chairman of the reorganization committee, J. Frank Keenan, WDVX Durham, presented proposed plans which were adopted by the executive committee. The reorganization committee was directed by the executive group to present the plans which were written form to all stations in the state in advance of the May meeting. At the annual meeting the proposals will be placed before the membership for approval.

Richard H. Mason, WPTF Raleigh, was named chairman of the legislative committee which will study several matters of primary interest to broadcasters, looking toward action to be taken at the next session of the General Assembly.

Attending the Southern Pines meeting were: President Robert H. Wallace, WOHS Shelby; Vice President Earl Gluck, WSO Char- lotte; Executive Secretary-Treasurer Jack Younts, WEAK Southern Pines; Directors Harold Essex of WSJS Winston-Salem, Louis Howard, WHIT New Bern, and Cecil Hoskins, WNNC Asheville; Mr. Jarman and Walter Green, WAYS Charlotte, members of the reorganization committee.

OMAHA AD CLUB

Local Selling Stressed

EFFICIENCY in local advertising was stressed in an address by W. J. Bronman, division and sales manager for Frederic W. Ziv Co., transcription firm, before the Omaha Advertising Club Jan. 24. Omaha’s stations played host to leading business firms.

Pointing out that 75% of the nation’s business is of local nature, Mr. Bronman told the group that “today’s prosperity is dependent upon good buying, selling and distribution of goods” and that “sales programs are too often set up on chance.” Advertising creates the need, desire and demand for goods, he reminded, and must deliver “if our prosperity is to continue.”

REGULAR City council meetings are aired weekly Monday 9-9:30 p.m., direct from council chambers by KCMO Kansas City, Mo.
MUSICAST FM
Plans To Sell Franchises

MUSICAST, an FM continuous music service employing a novel multiplexing device, has announced its plans to grant franchises for a flat fee to other FM stations in the country sometime in February. The service was developed by Sun Dial Broadcasting Corp., owner of KDFC (FM) San Francisco which now services 60 individual firms—such as banks, beauty shops, restaurants, retail stores, etc.—in the Bay area. According to Musical, many broadcasters “who in the past could only foresee the failure of their FM investments can now look forward to future profits with Musical.”

The system which permits the FM station to eliminate on specially constructed receivers any portion of its programs that it desires, was perfected four months ago by Oscar C. Darsack, KDFC staff engineer.

A Musicast operation franchise, the firm explains, will include the rights to the copyrighted name, device, installation and maintenance of receivers and speakers which receive the continuous program of background music (8-1 a.m.) and exclusive territorial rights. A continuing monthly rental will be charged on each receiver leased to the franchise holder, which the company says would enable FM station to enter this type of background music service on a small capital investment.

Muzak Corp. has pending a petition before the FCC for a rule-making proceeding to permit it to use FM stations to carry its programming [Broadcasting, Jan. 23]. Muzak’s petition envisions the use of supersonic signals and of multiplexing.

NEW AP UNIT
Formed in South Carolina

AN ASSOCIATION of South Carolina Associated Press broadcasters was organized Jan. 21 by AP radio members in the state. The group met following a meeting in Columbia, S. C., of the South Carolina Broadcasters Asan.

James Hicks, manager of WCOS Columbia, was elected president. Scott Russell of WESC Greenville was chosen vice president, and Paul Benson of WJMX Florence, secretary. Directors in addition to the officers, are: Robert Bradham, WTMJ Charleston, and Frank Best WNOO Orangeburg.

Small City Hoopers

C. E. HOOPER, Inc. is offering to produce one-time Hooper station audience indexes for small cities at $350 each, which sum may be paid by one station or prorated among all stations covering that market. Surveys will be made by the mail ballot method developed by the research firm for its area coverage index and will cover both telephone and non-phone homes.

JUNKETING FARMERS

VISITS by farm groups to many parts of this hemisphere and to Europe will get underway this spring under sponsorship of three individual stations, each serving the nation’s rich farm belt. Stations are KCNO Kansas City, Mo., WOW Omaha and WKY Oklahoma City.

Mr. Hansen

PURPOSES of the tour are to acquaint the American farmer with his counterpart in other parts of the U.S. and in foreign lands.

KCNO’s tour will be composed of 20 farmers who will be Europe-bound this month for a 25-day study of the Old Continent. All of the party’s members are leaders in their communities. Journeys will be made to LaGuardia Field, New York, on Feb. 14, the tour’s first stop is France where the Americans will be guests of the General Confederation of Agriculture at Chartes. Next journey’s leg will be Italy.

From Italy, the KCNO tour will move into Switzerland at Brugg, headquarters of the Swiss Farmers Union. Other countries to be visited include Germany, France, Holland, England and Monte Carlo. At each place the group will meet with agriculture officials and visit farms typical of the country. The tour is scheduled to terminate in New York March 11.

WKY Tour Next Month

Meanwhile, WKY’s 30-day tour of Latin America—with stops in 10 countries—will have begun a week earlier on March 4. This tour will take southwestern farmers, business men and women on a 15,000-mile swing through the southern hemisphere with stops scheduled for Guatemala, Panama, Peru, Chile, Argentina, Uruguay, Brazil, Trinidad and Puerto Rico. According to Sandy Saunders, WKY farm director, the tour will end April 3.

Mr. Saunders reports interest in the trip by some 200 persons in Oklahoma and surrounding states. The journey’s itinerary will include inspections of farms, plantations and ranches, harvesting and marketing processes, industrial plants and oil fields. Programs will be recorded by Mr. Saunders for his daily Farm Reporter broadcasts over WKY. Films also will be made for showing on WKY-TV.

Mal Hansen, WOW’s farm director, has announced that the scheduled “New South” and Havana boat trip tour, scheduled to begin in mid-March [Broadcasting, Jan. 23], brought in 65 paid reservations and more than twice that many requests for applications. The special trip, in the first 10 days following the initial announcement. John J. Gil

LEHRBAS NAMED

GETS STATE DEPT. PROMOTION

LLOYD LEHRBAS, director of the Office of International Information which administers Voice of America broadcasts, has been appointed special assistant to Undersecretary James Webb, the State Dept. announced Jan. 27. He will handle special assignments while continuing administration of the Voice.

Mr. Lehrbas has directed the department’s overseas information program since June 1948, handling production and distribution of publications and documentary films, in addition to Voice programs. Before joining the State Dept., Mr. Lehrbas served as foreign and war correspondent, and newreel and magazine editor. During World War II, he was a colonel and aide-de-camp to General Douglas MacArthur in the Pacific.

STORECAST CORP.
Adds 14 Advertisers in Jan.

STORECAST CORP., of America signed 14 new advertisers during the month of January. This makes a sum of 110 products which use Storecast music and service programs in 600 super markets in Southern New England, Pittsburgh, Philadelphia and Chicago.

In the Pittsburgh area via KQV-FM, new products are: General Foods Corp., (Baker Schools), Lexington, Mass.; General Foods Corp., (Maxwell House coffee), New York; McCormick & Co. (McCormick teas), Baltimore, Puritan Co. of America, Chicago.

In the Philadelphia area Syvan Seal Milk will use Storecast. In the Chicago area via WEHS (FM) Chicago, both Helen Harrison Foods Inc., Bloomington, Ill., and Modlin Co. of Chicago (Perma Brooms), are using the service.

Sweetheart Sponsors

ALTERNATING day sponsorship by Manhattan Soap Co. (Sweetheart Soap) and one on every other day by Suppose will be in storecasting for the next 27 days. This is to start March 7 on 12 Columbia Pacific Network and three Arizona stations, 7:30-7:45 a.m. PST. Arizona stations are: KOOL Phoenix, KOPO Tucson, and KCKY Coolidge. Frank Goss is to handle newcast beginning Feb. 13, Menen Co., Newark, sponsors the other three segments. Agency is Duane Jones, New York.

From its antenna atop Sentinel Heights, 1,200 feet above Syracuse and vicinity, WSYR-TV’s full radiating power of 23,500 watts on Channel 5 assures Central New Yorkers clear, steady reception of the outstanding TV shows—on NBC—exclusive.

SCHICK CONTEST
Names WLW, KJBS, WCOP

WLW Cincinnati, KJBS San Francisco and WCOP Boston, and three newspapers, won the merchandising contest held last fall by Schick Electric Shaver Co., it was announced last week by the company in New York.

The winning newspapers are The Birmingham News-9ge Herald, The Seattle Times and The Des Moines Register & Tribune.

Fifty-eight stations and 44 newspapers competed for the awards. The winners, over 34,000 cards and news bulletins on Schick exclusively to key dealers in their territories; made 900 personal calls to follow-up, and used the Schick catalog story in station and newspaper publications totaling 725,000 total circulation.

In presenting Schick Supers to the winning stations and newspapers, S. D. Moorman, Schick sales manager, commended them for exceptional cooperation beyond what was requested.

The contest was organized and explained by the company's agency, BBD, New York, last September.

The agency requested that the stations and newspapers write letters to dealers, seek tie-in advertising and make at least five personal calls on the trade.

For a 12 week period during the fall the Schick radio and TV schedule included spot announcements on 142 stations.

WHITE NAMED
Is WEIR General Manager

PAUL G. WHITE, former manager of WLOI East Liverpool, Ohio, has been appointed general manager of WEIR Weirton-Steubenville, Ohio, Harry B. Chalfant, vice president of the Tri-State Broadcasting Co., owner of the new outlet, announced last week.

Mr. White also was engaged in the advertising business in East Liverpool. Earlier, he was affiliated with WCMW Canton and WKBN Youngstown. His early radio experience was with the Yankee Network. WEIR, Mr. White said, will be on the air in about four months with studios in Weirton and Steubenville. The new station is assigned 1 kw on 1490 kc.

WXWL-FM Suspends

PERMISSION was given by FCC fortnight ago to WXWL-FM Indianapolis to cease operations for 60 days pending negotiations by Radio Indianapolis Inc., licensee, to sell the 20 kw outlet on Class B Channel 234, 947 mc. WXWL, the AM station operated by the same firm, continues without interruption. FCC reported. Firm told the Commission that the FM operation has been entirely unprofitable.

RECEIVING Schick Supers from S. D. Moorman (v), sales manager, Schick Electric Shaver Co., are these three representatives of winning stations (1 to r): Martin Beck, The Katz Agency (WCOP); Ed Jansecon, WLW sales office (WLW), and Bill Shreves, Headley-Reed (KJBS).

GUILD STRIKE

A THREATENED strike by the Radio and Television Directors Guild against the networks was averted at the eleventh hour last week. After a series of negotiation sessions—one lasting through the night until 6 a.m.—it appeared probable the parties would reach agreement on a new contract.

The guild, an AFL affiliate, reportedly had at least tentatively accepted counterproposals by the networks of wage rises ranging to $15 a week. The guild originally had demanded a $70 a week increase for staff radio directors and a $170 a week increase for television directors.

Strike, which had been called for midnight Jan. 6, was forestalled when, at the request of a state mediator, the guild and the networks agreed to a 24-hour armistice and further negotiation. On Feb. 1 both sides met in the office of Mabel Lesie, of the New York State Board of Mediation, at 10:30 a.m.

Except for brief respite, the negotiation session continued until the next morning at 6 o'clock. The discussions were resumed that afternoon (Thursday) and continued into the evening.

Counter Offer

Until the counterproposals were offered by the networks, the guild had demanded that radio directors, who received top minimum scale of $130 a week under the old contract, be raised to $200 a week and that television directors, now earning top minimum of $150, be boosted to $300.

The network counterproposal tentatively agreed to, according to authoritative sources, was $145 top minimum for both radio and television directors.

Various details of salary levels in respect to other classifications of guild members remained to be worked out, it was said.

As of Thursday evening, the guild had not withdrawn its strike notice, but informed sources predicted that agreement by week's end was probable.

Involved in the negotiations were ABC, CBS, NBC and WOR and WOR-TV New York. The guild's contracts with all of them expired last Dec. 31, but were extended pending resolution of the negotiations.

TEXAS STORM

Several Stations Hit

ICE and freezing rain knocked out stations intermittently in North Texas last Tuesday and Wednesday in a storm that damaged power and telephone lines over a wide area.

Several stations in Dallas and Fort Worth were hit. WFAA-820; KJBS, Dallas and WRAP-820; Ft. Worth, sharing frequency, were off the air from about 1:30 p.m. Wednesday to the following morning. They are the NBC outlet for the area.

KRLD Dallas, a CBS station, KXIL-FM and KLIF Dallas also suffered interruptions to program service.

For a time Thursday WFAA-820 and WRAP-820, were feeding programs to transmitter plant at suburban Grapevine by FM and communicating with the engineers there by hand radio.

All the stations throughout North Texas, except those disabled, rendered service by broadcasting special announcements as normal communications were disrupted.

Scandinavian Jubilee

THE SWEDISH broadcasting system, Radioljungan, owned by the newspapers and radio manufacturers and supported by license fees from the public, began official celebration Jan. 6 of its organization 25 years ago. Sweden's neighbor, Denmark, also observes an anniversary April 8 when Staatsradiofonien, the state-owned broadcasting system, celebrates its 25th year.

TO DROP WTHT-FM
'Times' Asks FCC To Delete

THE HARTFORD Times, owner of WTHT-AM-FM Hartford, Conn., has asked FCC to delete its FM station. The Times said WTHT-FM was off the air for a week during January due to failure of high-voltage power supply, and that one letter was received noting the silence.

"We were consistently unable to demonstrate any visible need on FM," the Commission was told.

"We see nothing in the future to restore or increase the interest in FM in Hartford. We cannot justify continuing the operation of WTHT-FM."

The station went on the air the Feb. 11, 1948, less than three months after FCC issued the grant. It has been a fully licensed station since Feb. 1, 1949, a Class B outlet on Channel 291 (106.1 mc).

TRANSIT SCOPE
WCTS Aids Public Travel

TRANSIT RADIO, sometimes described as critics as an impression of "code listening," finds it can effectively perform a public service in times of emergency.

Transit Radio Inc. reports that WCTS, FM affiliate of WKRC Cincinnati, which supplies music to transients on the Cincinnati Street Railway, came to the railway company's rescue during a recent sleet storm. As a result, the firm plans changes in its advertising and supervisory technique.

During the storm, WCTS, at the request of the dispatcher, broadcast instructions to all bus operators to pickup passengers waiting for streetcars and trolley buses when they were delayed because of ice formation on trolley wires. The plan was quickly executed. Now, as a result of this experience, arrangements have been completed to make possible such announcements through WCTS when rerouting of transit vehicles is necessary because of traffic jams, accidents, fires or other disasters. Morris Edwards, president of the street railway, said WCTS also plans to make the service available to other public agencies for emergency annunciations.

President's Speech

FOUR MAJOR radio networks will carry President Truman's address at the Jefferson-Jackson Day dinner in Washington Feb. 16. Charles Luckman, dinner chairman, has announced. Speech will be aired by ABC, CBS, MBS and NBC from the National Guard Armory, 10:30-11 p.m. Other media coverage, including television, is to be expanded. This year's address will be the second consecutive year all networks have broadcast the President's address.
Papers Trail All, NAEA Told

NEWSPAPERS were stiffly reected—by a $16 million customer addressing a meeting of the Newspaper Advertising Executives Assn. —for complacently ignoring the progress made by other media in the past 25 years, it was learned last week.

The criticism came from Joseph P. Kasper, president of the Associated Merchandising Corp., whose 25 member department stores spent $16 million in newspaper advertising in 1948. He spoke at an NAEA meeting in Chicago Jan. 23.

Mr. Kasper, noting that there are 155 fewer daily newspapers in the U. S. than 10 years ago, said that the “tendency toward amalgamation and elimination of individual papers is, in my opinion, a serious trend.”

The virtual newspaper monopolies existing in “the majority of large and small cities” have been inevitable situation which “makes for complacency and smugness and can eventually lead to self-destruction,” he said.

“It appears to me,” said Mr. Kasper, “that there have been literally no changes, innovations, improvements, or evidence of progress in the newspaper business in the past 25 years.” He said there was a growing complacency on the part of newspaper advertising staffs.

“Most newspaper men, I believe, spend their time selling against other newspapers and regard each other as their major competitors,” said Mr. Kasper. "Perhaps you have been so busying this that you have failed to recognize the progress which has been made in practically all other media during this 25-year span I speak of.

"Take a quick look at what the average man is exposed to in the way of advertising today. My own case is fairly typical: I get up in the morning and while dressing I listen to a news program on the radio.

"Part of it is a commercial—a pretty lively selling job, too—ininitely better done than it was 20 years ago. I drive to the station and pass a number of billboards—bright, breezy, colorful; vastly better advertising than 20 years ago. Even on the station platform the posters bear almost no resemblance to their early beginnings.

No Advices Seen

"I open my morning newspaper and although the ads admirably are more attractive than they were 20 years ago because they are lively, that is about the only difference. Nor can the newspapers take much credit for this. If the advertising is better, it’s because stores and agencies have improved their art work and layouts and copy—in spite of the newspapers. Production is about as bad as it always was—a black dress continues to be just a smudge of printer’s ink . . .

"Going home at night, I read my newspaper again—same story: Nothing new or different there. And when I get home, I may pick up a magazine or two and what do I see? Superb four-color work, bleed pages, nothing remotely resembling newspaper advertising of 20 years ago . . .

"Midway through my perusal of the magazine, my wife says to me: ‘Come on now, we are going to watch—you guessed it—television. And the rest of my evening is a pleasant combination of entertainment and exposure to salesmanship. For here, out of the restlessness and imagination of another group, is potentially the greatest advertising force we have ever seen.

"Think of the millions and millions of dollars invested in the development of television. What investments have been made by the newspaper industry toward the rebirth of its product?" Mr. Kasper urged the newspaper executives to undertake expanded research that would help newspaper advertisers improve the productivity of their advertisements.

He said that despite his critical attitude, he could assure the newspapers that retailers would continue to “put the blue chips on the newspaper because we have not yet lost faith in your ability to produce results.”

KAKE Representatives

RADIO Representatives Inc. has been appointed national sales representative of KAKE Wichita, Kan., according to Jack Todd, general manager of the MBX outlet. KAKE operates on 1240 kHz with 250 w fulltime.

IN AN EFFORT to obtain for radio newsmen the same credentials newspaper reporters receive, Sheriff Eugene Bisciluzi of Los Angeles for Radio News Club, is sending letters to sheriffs of 11 Southern California counties inviting them to meet Feb. 10 at his office with officers of the club. Radio newsmen are seeking to obtain one pass that will be recognized in all the counties, thus allowing them to move unhampered from county to county. Thus far this privilege has been allowed only to newspaper reporters. Radio News Club officers who will attend the meeting are Bob Garred, Al Gordon and Clete Roberts.

Advertising Exams

ADVERTISING examinations conducted annually by the American Assn. of Advertising Agencies will be held this year in New York at the Waldorf-Astoria and Packard School on Feb. 18 and 25. In the first session, 15 aptitude-temporat test and a quiz on the economics of advertising will be given. The second session will be devoted to optional tests on advertising knowledge.

SPORTSCASTERS

Third Annual Dinner Feb. 14

THE THIRD annual Sports Broadcasters Assn. dinner will be held Feb. 14 at New York’s Hotel Park Sheraton. At the dinner, Baseball Commissioner (Happy) Chandler will be given the annual Graham McName Award presented by the association to the individual who in its opinion contributes most to sports during the year.

WMGM New York, whose sportscaster, Marty Glickman, is president of the association, has invited 150 executives of agencies and sponsors of sports broadcasts on the station as its guests at the dinner. Bertram Lebar Jr., director and sales chief of WMGM, will host to the group.

cancelled because of the UAW strike at Chrysler, but it is
believed that radio will be resumed as soon as the strike is settled.
Among advertisers to start campa-
igns during January 1950 are the following: French's Instant Potatoes, through J. Walter
Thompson Co., New York, which started a campaign in mid-Janu-
ary; Tide Water Gasoline, through Lenier & Mitchell, New York, on
Jan. 15 began its schedule in a
dozen markets; another L & M ac-
count, Lustre-Creme Shampoo also used radio spots starting about the
same time.
Lever Bros. Adds
Lever Bros.' Spyt account
through Ruthrauff & Ryan, New
York, normally a network adver-
tiser only ( Aunt Jenny on CBS),
has added a spot announcement
campaign which started in Janu-
ary.
Another Lever Bros. product,
Snow, through Benton & Bowles,
New York, also has been using a
heavy radio spot announcement
schedule.
Procter & Gamble's Ivory Snow,
through Benton & Bowles, is using
spots in a number of markets, which started in December and will
continue through June.
A new radio spot advertiser is
Nicoa Margarine, through Benton
& Bowles, which started in Janu-
ary in Ohio and then extended its

WE DON'T TOSS BOUQUETS TO DAISY (Ky.)!

Hard-boiled as we don't cultivate Daisy (Ky.); it's probably a gar-
den spot, botanically speaking, but just too rustic and remote for sales-minded WAVE!

We stick to our State's one great blossoming market, the Louis-
villa Retail Trading Area. Nearby
Retail Sales a billion dollars, Retail Sales an annual from these 27

counties, and our flourishing
farmers market has an average
family's Buying Income 40% higher than the Kentucky norm!

If you want to put a little adver-
tising fertilizer into Kentucky's
tried WAVE's concentrated for-
mula, it'll really put you in
clover.

LOUISVILLE'S WAVE

RCA THESAURUS has released Here's June Christie, new program
series, to subscribers to its transcribed
library service.

For that matter, is putting the ad-
vertising budget on this far too un-
sound ground if he is not extremely
cautious how he says that any ad-
vertiser should pay a national rate
when he can get a local rate.

In other words our first interest
should be the advertiser and it may
be rather difficult to defend the
position that any advertiser should
be forced to pay a higher rate if
the stations are willing to give him
a local rate.

I think we know all of the angles
on this situation—and I mean all of
them—and I make this comment
having all of these considerations in
mind.

Help Small Towns

EDITOR, BROADCASTING:
Radio will celebrate its 30th
birthday in 1950. Wouldn't this be
a good year for radio engineers to
get together and settle the problem
of the small town listener.

We have no trouble in tuning in
Mutual network programs at night
in Statesville, N. C., because we are
fortunate in having a Mutual radio
network station here. We can re-
ceive CBS programs through a
50,000 w radio station in Charlotte.
But unfortunately when we try to
dial ABC or NBC programs we are
at the mercy of atmospheric condi-
tions and Cuban and Mexican ra-
dio stations. . . .

Although directional antennas
are excellent for protecting radio
stations from interference, they play
havoc in the way they detour
programs around the small town.
I'm not complaining, just asking for
help. Will some radio engineer
explain how the small town listener

We do not cover all of Con-
nnecticut, but we do cover
NORWICH and most of New
London county. . . . 1948 re-
tail sales $129,364,000.00.

Have you been bypassing this market? Remember you can
BUY it on a station that has
ONE rate both day and
night.

Claims DB 'First'

EDITOR, BROADCASTING:
I noted with interest the letter
sent to you by Bob Mackall of
WFMJ in Youngstown, claiming to
be the first one to DB the Drew
Pearson program.

Just for the record, let me say
that WSRS, at my instigation in con-
junction with ABC and the
William Weintrab Advertising
Agency, DB'd the Drew Pearson
program. . . .

I sold the plan of the live broad-
cast at 6 p.m. with the DB at 11
p.m., the same evening, which was
considered an excellent idea by
ABC and the Weintrab agency.

All of this took place in the early
days of the 1948 baseball season,
because of the inability of the local
ABC outlet to consistently schedule
this program properly. So let's
clean the record up and put WSRS
on top of the heap with a certain
big "first" in this particular mat-
ner.

Sam Sengue
President
WSRS Cleveland

AD WOMAN OF THE YEAR

AFA Names Contest Judges

ADVERTISING Federation of
America (on council women's ad-
vertising clubs) has chosen a panel
of judges to select the Advertising
Woman of the Year in its annual
contest. Judges are: Mrs. Ella B.
Myers, former advertising director
of General Foods Corp. and pres-
ently of the 1948 baseball season,
who was the 1948 award winner;
Frederic R. Gamble, president of
the American Assn. of Advertising
Agencies, and Dr. Kenneth Dam-
mer, Ohio State University.

Winner of the contest will be
decided during the annual conven-
tion of the Advertising Federation
of America, to be held in Detroit,
May 31-June 2.
By JOHN OSBON

INTERNATIONAL and federal machinery dealing with extensive radio frequency allocations and assignments will command top priority on the agenda of the House Telecommunication Committee subcommittee when it begins hearings the next fortnight on major radio legislation. [Broadcasting, Jan. 30.]

This was apparent last week as the subcommittee, headed by Rep. George Sadowski (D-Mich.), whose measure (HR 6949) embraces sweeping substantive changes on government and FCC levels, revealed its tentative hearing agenda.

Sessions may last up to six weeks though authorities indicated last week the subcommittee hopes to conclude them in four weeks' time. Rep. Sadowski already has indicated his group “may not” press legislation.

Bulk of testimony during the first week of the hearing, tentatively set for Feb. 20, will deal broadly with the allocation problems on the “international, hemispheric and national” levels, committee spokesmen said last week.

Second Week Agenda

Second week will be devoted to views on FCC's chain broadcasting regulations, monopoly anti-trust phases and, finally, sanctions as covered in the Sadowski Bill introduced Jan. 24, and the Senate-approved FCC procedural bill ($1973) authored by Sen. Ernest W. McFarland (D-Ariz.).

Discussion is expected to center around legislation (HR 2410) proposed by Rep. Harry Sheppard (D-Calif.) which would divest network and equipment manufacturers of radio station ownership and restrictions on FCC's anti-trust authority as provided in the McFarland bill.

The following weeks primarily would concern the various other facets of the new Sadowski Bill and Sen. McFarland's measure, according to present plans. Among points to be taken up is Rep. Sadowski's proposal to give licensees immunity from criminal or civil actions for libelous remarks in political broadcasts.

Subcommittee Chairman Sadowski's measure also would set up an independent five-man Frequency Control Board—a “super FCC”—which would hold broad powers over the Commission and usurp some of its major functions. Also, it would give FCC a new set of administrative sanctions or penalties in the form of license suspensions, fines and cease-and-desist orders.

Asked To Testify

Invitations to testify the first week are being issued to government officials including, in addition to FCC, the State Dept., each of the military branches, IRAC (the Interdepartmental Radio Advisory Committee, which the Sadowski bill would replace with the Frequency Control Board), Telecommunications Coordinating Committee, and certain private consultants and attorneys. Names were not disclosed.

All spokesmen said the subcommittee is hopeful of clearing up the allocations phase in the first four days. In that event, they speculated, the fifth day (Feb. 24) could be devoted to FCC proposals. It is known that Chairman Sadowski has asked the Commission to present a broad outline detailing international and U. S. frequency needs and requirements falling within the scope of “wireless and wire” facilities.

Another Bill Unlikely

The network-sanctions-monopoly phase, now set to begin Feb. 27, is expected to encompass debate on the McFarland-Sadowski-Shedd bills. Authorities last week thought it not unlikely that Rep. Sadowski still might introduce another bill, designed to cover other phases now contained in the McFarland measure. If he does, that would be considered, too, they felt.

Networks, independent broadcasters, Justice Dept. and others will be invited to air their views on present network-affiliate relationships; complaints that networks violate government anti-trust laws and the McFarland Bill provision which would remove FCC's power of revocation over licensees whom the courts have found guilty of anti-trust violations, and the comparative merits of sanction clauses in the Sadowski and McFarland bills.

The Sadowski bill provides for institution of revocation or suspension proceedings against station licensees, and networks, alike for tending to “induce or coerce” other licensees or permittees to violate FCC rules and regulations, or for following any “course of action” which would justify a license or permit denial. FCC could demand forfeitures up to $500 per day for any offense in lieu of suspensions or revocations.

The subcommittee also plans last week that it considers Sections 4 and 5 of the McFarland Bill of prime importance on its hearing agenda. They are certain to be brought out—both in FCC's written comments on the McFarland bill for the record and oral testimony before the group.

These sections deal with "job-jumping" prohibitions covering FCC commissioners, bureau heads and their assistants; salary provisions (now outdated in view of pay boosts passed last year); appointment of a legal assistant to each commissioner; requirement of a legal assistant to each commissioner; requirement that FCC submit annual reports to Congress on broadcast application data, deadline on FCC action on applications. The FCC and Senate Committee have indicated disapproval of some of these provisions.

ASSOCIATED SHOWS

Yankee Network Contracts

ASSOCIATED Program Service last week announced arrangement of a contract with the Yankee Network for Associated's transcribed library service and special series of "shows that sell."

The agreement, Associated stated, covers all owned or operated Yankee stations in New England including WNAC-AM-FM-TV Boston, WENX Providence, WICC Bridgeport, WMFT Portland, WAAB Worcester, WONS-AM-FM Hartford. Contract negotiations were completed by George W. Steffy, vice president of the network, and Richard Testut, vice president and general manager of Associated.

WHERE DOES THE N.A.B. GET RETAIL SALES DATA?

Data on retail trade in the Market Data Handbook published by the National Association of Broadcasters is reproduced from—

SALES MANAGEMENT'S "Survey of Buying Power."

(1950 issue May 10; Reservations Close Feb. 17; Copy March 10)
Free Time Abuses
(Continued from page 15)
device familiar to all station officials.
In adopting resolutions to implement the free-time device the committee favored the use of free-time agreements. Groups would be asked to sign pacts including the question, “Do you plan to spend money in any advertising medium?”

Going further, the time applicants would agree to pay for any time donated should they later decide to pay for advertising in any other medium.
The committee felt that program material by public service agencies should provide opportunity for participation by local sponsors. In the case of newspaper mats, it was pointed out, local advertisers can include credit mention.

Another angle relates to a purported practice among defense agencies. Under this technique, military personnel are assigned to take mats to newspaper advertising prospects and solicit them. If this is done for other media, committee members argued, it should be done in the case of radio recruiting and similar campaigns.
The committee figures broadcasters should get a larger share of the money spent by government agencies to advertise for recruits. Independent stations, it was argued, are especially good prospects in recruiting campaigns because they direct much of their appeal to the younger audience.

NAB representatives are to confer with advertising agencies placing government business in an effort to persuade them to spend more money for radio time, the committee was told. Members suggested independent stations should be represented on the NAB committee. They contend they have been among the most generous broadcast groups in providing free time.

Some of the current public service campaigns, and some with meritorious motives, were discussed among committee members. One instance cited was that of the Disabled American Veterans Service Foundation, which sold radio time through its full-page and double-space in newspapers and magazines (see story page 92).

Going into other problems facing independent stations, the committee voiced concern over abolition of the NAB Program Dept., a project that developed out of a past committee recommendation. The department was dropped by the NAB board in last summer's reorganization.

Functions of the Program Dept. will be handled through the Radio and Television Divisions, the committee was promised.

Much of the two-day discussion centered around plans for the Sunday "Independents' Day," a session that drew some 400 broadcasters at the 1949 NAB Convention, under Mr. Cott's chairmanship.

Cott to Serve
Because WNEW is withdrawing from NAB membership Feb. 28, Mr. Cott will not serve as chairman of the program. Furthermore, he is resigning the committee chairmanship effective Feb. 28. At the committee's request he agreed to serve as program consultant for the Sunday session in Chicago.

Chairman of the Sunday program will be Lee W. Jacobs, KBKR, Bakersfield, Calif. Among the speakers will be of the no-speeches type. Panel sessions will be wide open, with specialists leading the discussion.

Facts on out-of-home listening will be given by Dr. Sydney Roslov, president of The Pulse Inc., New York. Dr. Roslow's findings will be distributed to NAB members in printed form. Pat McDonald, WWHM Memphis, will chair a panel discussion on the practices of capturing and increasing the out-of-home audience. Related subjects will cover promotion material and specialized programming for this audience.

William B. McGrath, WIDH Boston, will be chairman of a sports session. Sponsor and agency representatives will take part, along with an attorney to cover anti-trust angles. The problem of using Western Union play-by-play reports is on the tentative agenda. Sports are a mainstay of independent stations, the committee pointed out. The NAB general counsel's office was asked to supply a legal summary of sports broadcasting problems, to be available at the convention.

Another panel will deal with use of magnetic tape recording in programming and sales expansion. Demonstration of techniques is planned, including tape editing.

A debate is scheduled on the pros and cons of in-person and mail order business. Dangers and virtues of these practices will be explored. NAB is traditionally opposed to P. I. as an association but individual member stations have diversified views on the subject.

Other topics slated for a thorough working over by the independents are new program tools, new and unusual program devices, BMI services and government and overseas program sources. Among overseas sources is the upcoming series of Orchestrations of the World's Transcriptions obtained through the Economic Cooperation Administration (see story page 118). In this series of 13 one-hour transcriptions the leading symphony orchestras of Europe will be made available to broadcasters. NAB agreed to send out letters to stations describing this series, originally produced for broadcast on European networks.

The Monday morning meeting, first convention session covering foreign language station problems, will be directed by co-chairmen. They are Ralph Weil and Arnold Hartley, both WOV New York, vice presidents.

The foreign language session will be held at the same time as the PM meeting (Broadcasting, Jan. 30). NAB officials suggested the Monday morning scheduling because the foreign tongue problems are highly specialized and of direct interest to only a portion of the membership.

In its two-day discussion last week the committee members unleased some sharp suggestions about NAB's headquarters operation and the special services independent stations desire.

No appointment will be made to fill the chairmanship after Mr. Cott's resignation becomes effective, the committee was told, because NAB President Justin Miller plans to name a new committee after the April convention.

Committee members attending the meeting were Mesers. Cott, Jacobs and McDonald; Melvin Drake, WDGY Minneapolis; Robert Maynard, WAVS Croydon, Va., and Ben Strouse, WWDC Washington, alternates. Glenn Shaw, KLX Oakland, director-member, was unable to attend.

GOLD plated microphone awarded to high scorer on the Sound Products Group team which won a sales contest sponsored by the RCA Engineering Products Dept., goes to S. D. McIntosh of Dallas. This group at presentation ceremonies (I to r) T. A. Smith, sales manager, Engineering Products Dept.; H. V. Somerville, administrator of field sales of the department; Mr. McIntosh; W. W. Watts, vice president in charge of the department, who made the award; H. C. Elows, merchandise manager, Sound Products Group; K. M. Aitken, of Cleveland, and H. T. Schrul, of Philadelphia, field representative, Sound Section.

Agriculture
We've been programmed for the farmer for 24 years. That's why WIBW-advertised goods sell so well in Kansas and adjoining states.

WIBW The Voice of Kansas in Topeka
Who Are We?

WHENEVER the members of NAB's committee for independent stations hold a meeting, the members ask themselves, "Who are we?" Part of the committee's discussion last week dealt with the problem. Officially the committee at one time was called the Unaffiliated Stations Executive Committee. Then the name was changed to NAB, Nonaffiliated, etc. Last week they were referred to as both. Members say they can't understand why NAB stubbornly refuses to call it the Independent Stations Committee.

Transit Radio

(Continued from page 22)

was underscored once when the United States developed the atomic bomb. It was underscored a second time when the Soviet Union did likewise. It is being underscored a third time by debate over the forthcoming development of a thermonuclear bomb, potentially 1,000 times more powerful than the A-bomb. One of the obvious and essential requirements of civil defense will be a means by which the public is kept informed. This means in part that the transportation systems can be mobilized to great numbers of people out of threatened areas and to move civil defenders to their posts of duty. The means, of course, is PM radio, which was used by tanks, artillery, planes, fantry, etc., during World War II.

Thanks to Transit Radio, the buses and streetcars of 19 American cities are already equipped with radio which in the event of an emergency could be used for guidance. This is done without the cooperation of the transportation companies themselves. And the pictures of people using radio on the public transit companies. It is being done while giving the riders the best radio service available. It is being done while giving that same service to the entire community. Arrangements are under way to provide Transit Radio to 25 or 30 other American cities.

Against this imposing array of advantages, only one argument has been advanced by its critics. "It violates the rider's right not to listen," they say. "In this way it violates his right to privacy and assails the freedom of his mind."

First, how many riders of public transportation do not like Transit Radio? Take the eight out of 10 riders who like Transit Radio. Add those who are undecided. Add those who do not care. Add those who do not like it but who withdraw their objections in deference to the majority preference. As the Edward G. Doody Co. says, "... only a fractional group of active objectors remains." This fractional group ranges from 1.5 to 2.5 percent.

But the critics brush these figures aside. "It isn't a question of percentages," they say. "It is a question of the rights of the minority, however small."
The offensive thing about Transit Radio is that it holds its audience captive.

Is advertising over Transit Radio too different from advertising generally? The answer is no. All advertising tries to hold the attention of its audience. Take the ads in newspapers and magazines. Does the reader escape seeing them? Not if he wants to read the paper or magazine. The periphery of his vision takes them in, willy-nilly.

Highway Signs

Take advertising on aural radio or TV. Can a person in his home escape hearing and seeing the "plugs?" Not if he wants to listen and watch. Of course, he could switch the program off or turn it down during the commercial. But he doesn't. And to do so would require a greater attention and a greater exertion than not doing so.

Take advertising signs along the highway, particularly those head pieces, so-called "billboards." Can a driver escape seeing them? Not if he wants to keep the car on the road.

This list could be expanded—the show windows of stores, the card advertising in busses and streetcars, the posters on subway pillars, etc.

In each case, the individual who does not want to hole up like a hermit is exposed to advertising.

But he certainly is not a captive. He frees himself by controlling his attention, either consciously or, more often, unconsciously. The stream of stimuli assailing the senses is limitless and unending even on a desert island. The mind selects those it wants to use and of necessity ignores the others. This is elementary psychology. Everybody does this every minute of every day, even when asleep. One does it so naturally that one isn't aware of doing it. Nobody but those who don't like Transit Radio need pay attention to it. One can bring to bear the same habits by which one is able to ignore other things one wants to escape.

People who ride public transportation systems are already prepared to "tune out" Transit Radio as they must. Nobody has ever been trained to do so by the noises that inevitably attend public transportation, the sound of the motor, the clash of gears, the jolts and jars, the clatter, etc.

Privacy on a Bus? The same kind of privacy that there is in Madison Square Garden: the privacy of concentration. If a rider doesn't want to listen to the conversations of his fellow-passengers, he doesn't have to. ("This morning when I got up I didn't feel well. I wasn't really sick. Just butterflies in my stomach.") If he wants to, he can pay attention. ("And I told my husband, if you want to keep your little girl friend, you can, but you can't keep me.") In the same way the rider can tune Transit Radio in or out at will.

Rights at Stake

Minority rights are not at stake. But the rights of the majority are at stake. Ruth Stuckey led thirteen out of 10 riders, who want Transit Radio. Those the competitors of Transit Radio would deprive. They would deprive them of the radio service they enjoy. They would deprive them of an agency that may some day save millions of lives.

The real reason for most of the opposition to Transit Radio is not ideological at all. It is mercenary self-interest.

Transit Radio is able to do effecti
tively what all advertising tries to do. It reaches a mass audience. It can tell its clients precisely what kind of audience, how big. It reaches special kinds of audiences. It can tell its clients precisely what kinds and the precise times when they can be reached. It provides these services to the advertisers in the best tradition of advertising—while providing a public service that the people need and like. It provides for the pieces of the pie of the advertiser's dollar has always been keen. It has never before been so keen as it is today. Established media have always tried to block newer competitors. AM radio was opposed. FM radio was opposed. Car card advertising was opposed. Billboard advertising was opposed. And so on.

Now, and for the same reasons, Transit Radio is being opposed. The only differences are two; the opposition of Transit Radio is hiding their commercial motives behind a facade a bit more fancy than usual. And the opponents of Transit Radio are resorting to tactics of unprecedented viciousness and desperation.

WISH Moves

WISH Indianapolis moved Jan. 27 to 1440 N. Meridian St., Indianapolis, George Higgins, general manager, announced. The AM station of the ABC outlet formerly were located at 215 Board of Trade Bldg.

Mr. Charles Oppenheim, Director of Program Promotion

Useful Promotional Ideas

New York City

Dear Charles:

There are several ways to get back from Cincinnati when you want "WCHS was a first place winner in the Kroger Contest this fall. Charlie, there's a contest at West Americana this week. Number One Series Contest. Certainly did put on a big promotion for them. Kroger Shoe Store. People really threw them back at that one — used everythin'. "How does everythin' go on that show?" Charles ter show that WCHS don't get set back on its laurels. We'd like to let the radio shows carry them. Ter foller you like it, hear that, eh Charles?"

Mr. Oppenheim

415 Madison Avenue

Charleston, W. Va.

(Continued from page 17)

made possible by the faith of the subscriber and by the firm belief of the sponsoring organizations (the NAB, AAAA and ANA) in the need for scientific audience measurement. We trust that the result achieved by the bureau will emphasize again the need for continuing audience measurement in some form or other, maintaining radio's front position as the medium that knows most about itself and tells more to its clients."

Mr. Gamble—"This is good news day for buyers of time, those advertising agency executives whose job it is to select the broadcasting stations to deliver their clients' messages to America's buying public. Agency time buyers have long been looking forward to this occasion. The BMB station audience reports, bringing up to date a measurement of subscribers' station audiences on a uniform basis, will be welcomed and used by advertising agencies from coast to coast. The American Ass'n of Advertising Agencies is glad to have acted as one of the three sponsors of this nationwide study and is particularly grateful to those broadcasters who continued to support the basically sound principle of tripartite research represented by BMB."

Phila. Safety Awards

ROGER W. CLIFF, general manager of WFIL-AM-FM-TV Philadelphia, and Owen F. McConnell of the Philadelphia Inquirer will be honored jointly tomorrow at the Philadelphia Highway Traffic Board's first annual award luncheon for "Traffic Safety Man of the Year." Luncheon will be held in the Bellevue-Stratford Hotel. Both will be cited for their "outstanding contributions to highway traffic safety in 1949." Both WFIL and the Philadelphia Inquirer are owned by Triangle Publications Inc.

AN INSCRIBED, silver vase, the Virginia Ass'n of Broadcasters' tribute to former Gov. William M. Tuck, honoring his past four years of service as the Old Dominion's chief executive, is presented to Mr. Tuck by Philip Allan (1) of WLVA Lynchburg, Va. President. Taking part are two Va PAB presidents, C. T. Lucy (2nd r), manager of WRVA Richmond, and E. S. Whitlock (r), manager of WRNL Richmond.

New Study Out
(Continued from page 17)

but that BMB contemplates working out an average loyalty index figure for all stations, with perhaps further averages computed for stations by power and by city size groups. These average index figures, he said, would enable any station to see how its own loyalty index compares with the average and whether it is a strong selling point or a warning signal that changes should be made.

Whenever a broadcaster sees his station's BMB figures his first question is invariably, "How's the competition doing?" and by "competition" he invariably means other stations and never newspapers or billboards. Dr. Baker reported. He noted somewhat wryly that most broadcasters seem to have forgotten that BMB was established in large part to provide radio with circulation statistics comparable to the ABC figure for newspapers and the Graphic Audit Bureau statistics for outdoor advertising.

For comparative and competitive media use, the three-to-five days a week listening figure is probably most comparable to a newspaper's

ABC, Dr. Baker commented. He added that in many cases the station could use the six-to-seven days a week audience and still compare favorably with its newspaper competitor on the cost per thousand people reached.

"BMB is a horizontal measurement of coverage, comparable to engineering coverage measurements, except for BMB stations where people do listen instead of merely where they can listen," Dr. Baker explained.

"BMB does not measure the amount of listening" he declared. "There is nothing in the BMB reports to show how many hours a day any family listens to any station."

100 Copies Per Station

Following the transcripts of the tabulating machine records reviewed by BMB's station subscribers last week, each station will get 100 copies of a printed report which will include these audience figures and the station's day and night coverage maps. Copies of reports for all subscribing stations will be sent without charge to members of the American Ass'n of Advertising Agencies and to members of the radio-television group of the Ass'n of National Advertisers. (AAAA and ANA, together with NAB, comprise the tripartite governing body of BMB.) Subscribing stations may get reports of other subscribers from BMB at 40 cents each, or may swap with other stations.

Data on non-subscribing stations in their area will be released to subscribers for the cost of processing them, Dr. Baker said, running from $50 for a station covering up to 50,000 families to $450 for a station covering three million families or more. Subscribers may obtain extra copies of these non-subscriber reports for $1 each, Dr. Baker said, for use in presentations to advertisers and agencies, but they are not publicly reproducible. That is, the non-subscriber data may not be used in advertisements or promotional brochures of the subscribing station in any way that might reveal the identity of the non-subscriber.

This is a much tougher restriction than is imposed on the use of subscriber data, Dr. Baker said. He explained that the rules governing the use of BMB data, a copy of which was sent to each subscriber, are designed merely to prevent misrepresentation.

Advertisers and agencies may obtain non-subscriber data only by requesting them from subscriber stations. This procedure was adopted to protect subscribers, Dr. Baker said. And also to show them the extent of the use of BMB data by the buyers of time, which some broadcasters have questioned. If it proves too cumbersome, he said, it may be altered by the BMB board as experience dictates.

Cards for Networks

The three subscribing networks—ABC, CBS, NBC—will get complete sets of IBM cards for all of their affiliated stations which they will tabulate themselves. They have all asked BMB for a copy of the data and BMB is now calculating the cost.

Data on FM and TV stations is in the same partially processed state as for non-subscriber stations. Dr. Baker said, and can be completed if the sample adequately reflects FM and TV set ownership, which BMB will run a sampling test to determine. If the samples prove too small the payments of the four or five FM and single TV subscribers will be refunded, he said. He added that a number of counties in the New York, Philadelphia and Chicago metropolitan areas show TV station audiences exceeding the 10% of all radio homes figure which is BMB's minimum for tabulating the county data.

The overall cost of the second study is $12 or $13 million, Dr. Baker reported. He said that this represents all BMB expenses since July 1, 1947, and all came from subscribers except for an NAB

BELLEVILLE GRANT

FCC Issues Revised Decision

REVISED initial decision by FCC Hearing Examiner Leo Resnick, Thursday, a second time, granted a new station at Belleville, Ill., on 1200 kc with 1 kw, directional, to the Belleville News-Democrat, was reported by the Commission last Monday. Bid of WTMV East St. Louis, Ill., to switch from 250 w on 1490 kc to 1 kw on 1200 kc would be denied.

The Commission meanwhile also issued an initial decision by Hearing Examiner Elizabeth C. Smith recommending denial as in default of the application of Olney Broadcasting Co. for 1500 kc, 250 w daytime, at Olney, Ill. Parts Robert E. Thompson and Sidney R. Sanders failed to appear at scheduled hearings and present evidence, ruling said.

In the Illinois case, Examiner Resnick favored Belleville East St. Louis because the latter already has one full-time local outlet (WTMV) while the former has only one daytime station, WIBV. The first initial ruling was set aside for further hearing by the Commission last summer upon CAA's disapproval of the proposed site [BROADCASTING, July 25, 1949]. The News-Democrat is owned by Richard P. and Robert L. Kern.

SENATE CONFIRMS

Miller, May, Allen Approved

NAB President Justin Miller was confirmed by the Senate last month as member of the U. S. Advisory Commission on Information for a three-year term expiring Jan. 27, 1953 [BROADCASTING, Jan. 16]. Judge Miller has served on the five-man commission since he was authorized by the 80th Congress. Senate also confirmed Mark May, human relations director, Yale U.

Simultaneously the Senate also approved the nomination of George V. Allen, former Assistant Secretary of the State for public affairs, to be ambassador to Yugoslavia. In his former State Dept. post, Mr. Allen supervised all international and educational exchange activities, including the Voice of America.

OPERATING 24 HOURS DAILY

Member N.A.B.—M.A.B.
ORGANIZATION of Promotion Specialists, packager of program for 250 w or smaller market stations, has been announced by Lloyd Nixon, account manager of the new firm. "Our aim," Mr. Nixon said, "is to affiliate good, experienced radio entertainers from smaller radio stations and to syndicate their programs by tape, with commercials included, at low cost." Jay Berry is president of Promotion Specialists. Offices are at 325 Park Row Bldg., New York.

GOOD FRIEND
Panama Paper Cites Johnson

WHEN HE speaks as chairman of the Senate Interstate & Foreign Commerce Committee, Sen. Ed. C. Johnson (D-Col.) not infrequently has fiery words of woe for FCC and segments of the radio industry—but down "south" he is an "amiable North American" and "good friend of Panama."

This was indicated in an editorial published recently by the Panama Star and inserted in the Congressional Record last week by Sen. Ernest W. McFarland (D-Ariz.), colleague committee man and head of the communications subcommittee. The editorial referred to Sen. Johnson's visit last December to the Panama Canal zone in connection with pending proposals before his committee, authorized by Senate resolution last year.

Sen. Johnson's visit apparently dealt with four points—communications, political stability, transportation and new industries. He told government officials he thought there was need for "better communications of all kinds," according to the editorial, and stressed the valuable geographical location of Panama. The visit did not constitute "intervention," the article concluded, for "legal advice, kind words are guideposts...they demonstrate good will, and sincere and human concern."

PACKAGE FIRM
Formed for Smaller Stations

SEEN celebrating the 10th anniversary of the incorporation of the Keystone Broadcasting System, Chicago, are system executives (1 to r) Naylor Rogers, executive vice president; Arthur Wolf, vice president; Edwin R. Peterson, special representative, and Sidney J. Wolf, secretary-treasurer.

A special breakfast Feb. 8 will honor Swift & Co's nine years of sponsorship of The Breakfast Club on ABC. ABC Central Division Vice President John H. Norton Jr. will host to network officials attending, including: President Robert E. Kintner; Fred Thrower, vice president in charge of sales; Robert Saudek, vice president in charge of public affairs, and Charles Harry, vice president in charge of programs, Swift executives and the program's cast will also attend.

WKY Oklahoma City, reportedly third oldest station in the U. S., is celebrating its 30th year of operation. Station took to the air in 1920 as a 20 w experimental station, 5XT, and was purchased by the Oklahoma Pub. Co. in 1928. In the same year, WKY joined NBC.

Feb. 3 marked the 15th anniversary of WEAV Plattsburg, N. Y., Station, the former WMFF, is owned and operated by Plattsburg Broadcasting Corp., headed by George F. Bissell, president and general manager.

The Court of Current Issues will enter its third year of consecutive telecasting tomorrow (Feb. 7). The program, a sustainer, is seen Tuesday, 8-9 p.m. over WABD(TV) New York and the DuMont Television Network.

Grady Cole, commentator-announcer for WBT Charlotte, N. C., has completed his 20th consecutive year with station.

The 1,200th consecutive broadcast of Morning Devotions on WABD Pl. Worth, Tex., has been observed.

WSTV Steubenville, Ohio, this year is celebrating its 10th anniversary.

Carl Ide celebrated the first anniversary of his Carl Ide Calling disc show on WNJR, Newark, N. J., Jan. 31 by holding open house at the WNJR studios.

Dramatized historical sketch titled Cavalcade of WING, highlighted 25th anniversary program of WING Dayton, Ohio, Jan. 22. Program was presented from National Cash Register Auditorium.

Mort Nusbaum Jan. 10 began his second year as morning man on WHAM Rochester, N. Y. He is the conductor of a weekly talent show which will soon make its debut over WHAM-TV. This is his 15th year in radio.

Paul Gibson, story-teller and commentator for WBBM Chicago, passed the 7,000 mark in his number of daily broadcasts last month.

MONOPOLY UNIT
No Radio Probe This Year

PROGRAM agenda and hearing schedule of the House Judiciary monopoly subcommittee for the second session of Congress was announced Jan. 24 in a news conference held by Rep. Emanuel Celler (D-N. Y.).

Rep. Celler, chairman of the full House Judiciary Committee, told Broadcasting that he contemplated no hearings involving the radio industry in this session. He said he had received "some but not many complaints" dealing with radio and that he saw no pressing need for a probe at this time.

Among specific industries cited for exploration beginning this month are Lever Bros., and its whole network of American and foreign subsidiaries, newprint, U. S. Steel and monopoly in the legitimate theatre.

Mr. Celler told reporters that Charles Luckman, retired president of Lever Bros., would be asked to testify and would be subpoenaed "if necessary." A similar probe of company has been demanded also in the Senate in a proposal (S Res 213) by Sen. William Langer (R- N. D.) [Broadcasting, Jan. 29].

The subcommittee will also hold a hearing on forthcoming legislation which would require the Justice Dept. to report periodically to Congress on the "nature, number and reasons" for all consent decrees and pleas of nolo contendere in anti-trust cases.

WCTU HITS NAB
Criticizes Liquor Ad Stand

NAB was charged last week by Mrs. D. Leigh Colvin, president of National Woman's Christian Temperance Union with "hypocrisy and deceit" in its defense of alcoholic beverage advertising over its member stations. She referred to NAB's letter to the Senate Interstate Commerce Committee's hearings on the Langer bill (S-1847) to ban advertising of alcoholic beverages.

Mrs. Colvin contended the stations have, ever since repeal, ignored state and local rights by pouring wine and beer advertising, and sometimes whisky, into large areas dry by local option. Promotion for drinking appears in programs, she added. She suggested this advertising "is no doubt responsible for more juveniles taking to drink than any other single influence." NAB itself refers to manufacture and sale of alcoholic beverages as a moral problem, she said.

DO AGENCIES obtain local market data from any one accepted source?

A survey of 14 leading advertising agencies by the Special Libraries Association found that the only two annual reference books used by all 14 agencies polled are the World Almanac and—

SALES MANAGEMENT'S "Survey of Buying Power."

(1950 issue May 10: Reservations Close Feb. 17; Copy March 10)
DREOOK MEET SET
Group To Convene Feb. 10-11
MEMBERS of the Oregon State Broadcasters will hold their annual meeting Feb. 10-11 on the U. of Oregon campus at Eugene, according to President Lee W. Jacobs, KBBK Baker.

The state group was invited by the university to dedicate several new campus buildings, particularly Willard Hall which will be devoted to radio speech and drama. Gov. Douglas McKay will take part in the dedication and will be principal speaker at the Saturday luncheon. Maurice B. Mitchell, director of Broadcast Advertising Bureau, will address a joint Friday luncheon of the Eugene Chamber of Commerce and the state association. Election of association officers is scheduled Saturday. Lee Bishop, KORE Eugene, is chairman of the Eugene committee arranging the meeting.

KXXL RENEWAL

FCC Affirms Denial

DENIAL of license renewal to KXXL Reno, Nev., on grounds of transfer without FCC consent, was ordered by FCC last week in a final decision affirming an earlier hearing examiner’s recommendation [BROADCASTING, Jan. 2]. FCC also dismissed as moot an application for proposed sale of the station.

KXXL, assigned 250 w on 1230 kc, was destroyed by fire in November 1946 and has been off the air since that time. Hearing Examiner Panney N. Litvin found that Byron J. Samuel, now sole owner, had acquired without FCC approval the one-third interests each held by Frederick W. Kirke and Edward Margolis, who had been partners with him in the licensee. Mr. Samuel proposed to sell KXXL to Chet Gonce, original owner of the station.

PRICE of its seven-inch long-playing records has advanced five cents, according to Columbia Records Inc.

45.0 "HOOPER"

TREASURY SHOW

Okahoma U. Widens Coverage

A NEW and increased method of network distribution of This Is Okahoma, produced for the Savings Bond Division of the U. S. Treasury by the Broadcasting Workshop of the U. of Oklahoma, was inaugurated Jan. 26 over the facilities of the Oklahoma Group Broadcasters.

Previously carried weekly for a year and a half by transcription, the programs will be produced live in the studios of KOCY Oklahoma City and relayed by FM to the cooperating stations. Several stations will record for delayed broadcasts, while others will relay the program live. Stations not included in the network will continue to receive the program by transcription. The list of stations now carrying the program includes: KOCY Oklahoma City. KHDR Duncan, KSUI Seminole, KOWA Clinton, WNN El Reno, KADA Ada, KTAT Frederick, KTJS Hobart, KABA Elk City, KBBG Okemah, KBRX Muskogee, KWNW Bartlesville, KHHN Hugo, KVLH Pauls Valley, KTMC McAlester, KSW Woodward, KSWO Lawton and KWCO Chickasha.

BROADCAST AT HEARNINGS

Becomes City Council Issue in Chicago

CHICAGO City Council aldermen will consider a resolution permitting radio stations to record testimony at a public hearing at its next session March 11.

Resolution, expected to be presented by Ald. Nicholas Bohling, follows uproar in City Hall Jan. 31 during a Chicago Transit Authority hearing before the council’s transportation committee. At that time WGN-TV's "Chicagoan and Newshound" staff was refused permission to film proceedings for a video show by William Fort, public relations assistant to the mayor.

WMAQ (NBC) Chicago Newsman Len O’Connor was turned down also when he wanted to tape record some discussion for his daily "News on the Spot" program. Ald. Bohling, after asking the committee why stations were being censored, was told by Ald. James F. Young, chairman of the transportation committee who conducted the meeting, "perhaps the city architect had refused permission."

A simple majority vote will carry or dismiss the resolution. In the meantime, Mr. O’Connor is interviewing Aldermen on tape for his show, asking (1) Do you think Council and Council committee proceedings should be broadcast, (2) Would you as an alderman personally support such a resolution, and (3) Could you conclude any reasons why the council should be afraid of such broadcasts? Aldermen declining to comment are mentioned U.

Mr. O’Connor told BROADCASTING no provision ever has been made in the council for radio station personnel, although individual seats and desks are assigned to newspaper reporters. The situation was reported also on WMAS by John Holtman and Jim Hurlbut.

SOUTHERN Democratic Conference in Raleigh, Va., covered Jan. 28 by WMAG Richmond. All speeches were tape recorded and presented following day in special program.

WHITE HOUSE

Plans Radio, TV in Every Room

THE NATION’s “modern” White House will be well communications-equipped in this atomic age. Public Buildings Administration engineers, designers of a complex and intricate master control system, revealed their plans fortnight ago.

The Executive Mansion, now under repairs at an estimated cost of $5,400,000, will be outfitted with a central control communications network of estimated but expensive cost. The network calls for a television screen in every room, radio (both A.M. and FM), Muxac facilities for wire and tape recordings and a public address system. Any one of these can be received by dialing a number similar to the procedure for telephones.

Any program can be recorded by a dial spin. In addition, direct lines will connect the White House to all major radio networks for programs which do not happen to be broadcast by a Washington station. TV screens are tuned in by a swish of the dial. A giant 6-ft. by 8-ft. TV screen will be built into the movie theatre located in the executive office part of the building.

FORD MOTOR CO.

Buys 9 Additional Shows

FORD MOTOR CO., Detroit, through its agency, J. Walter Thompson Co., New York, has purchased another group of nine network shows for a short term in addition to its schedule already announced [BROADCASTING, Jan. 16]. Starting today through Feb. 15 the following programs will be used on MBS: "Adventures of Peter Salem," Official Detective, Can You Top This?, I Love a Mystery, Crime Fighters, Mutual Newshour. On ABC, Bonide will be used, and on CBS, Escape and Lumm ’n’ Abner.

PRELIMINARY hearing on Sterling L. Hicks' alleged involvement in the blast attempt on WBT Charlotte, N. C.'s tower [BROADCASTING, Jan. 26] was postponed last Thursday to Feb. 23 at the Mecklenburg county recorder's court.

Mr. Hicks, business manager of the IBEW in Charlotte, has been charged with conspiracies in the dynamiting try at the foot of WBT's 429-foot tower on Jan. 22. Acting on a tip, police said had a fortnight ago that they intercepted Chesley M. Lovell, a Columbia, S. C. house-painter, who they said had a "long criminal record," as he reportedly lit the fuses of the dynamite sticks which had been detonated.

Police said subsequent questioning of Mr. Lovell led them to the arrest of Mr. Hicks and the lodging of conspiracy charges against him. Two other men, whom the police named as being implicated, were free on license in Carolina. They were said to have been instrumental in assisting the explosion plot.

EXPORT section of Allen B. DuMont Labs. instrument division has increased its activities in European reorganization, creating 25 distributorships in major cities, including London, Paris, Milan and Stockholm.

NEW FIRM

FORMATION of a new company, Standard Electronics Corp., Providence, R. I., to handle Western Electric Co.'s design and manufacture of broadcasting and studio equipment for radio and television, for distribution through Graybar Electric Co., was announced last week.

Graybar has been the principal distributor of broadcasting equipment made by Western Electric Co., but the latter company is about to withdraw from the field.

The new company, whose formation was announced by George F. Hessler, Graybar vice president, will succeed Western Electric as Graybar's supplier of transmitting equipment.

Mr. Hessler said Graybar would have no financial interest in the new concern.

Heading the new company is Edwin M. Martin, as president and chairman of the board. Mr. Martin was formerly chairman of the board of American Bosch Corp., and before that was vice president, secretary and director of Farmwards Radio and Television Corp.

Robert F. Moyer, president of Standard Machinery Co., of Providence, will become vice president and treasurer of Standard Electronics.

Agreement With Hazeline

Standard has an agreement with Hazeline Electronics Corp., to manufacture products which Hazeline—employing a staff of 300 engineers—has developed through research.

Hazeline is currently planning a complete television equipment package, for production by Standard, Mr. Hessler said.

The new company has been privately financed, Mr. Hessler announced. It will operate its own plant at 4175 Elmwood Ave., Providence. Members of the board of directors are David G. Baird, financier; Sylvester M. Molnowsky, president of Security Bank Note Co.; Wesley Peoples, president of United States Radiator Corp., and Daniel Schaffer, director of the Pennsylvania Railroad, Curtis Wright and Universal Pictures.

Mr. Hessler said Western Electric had entered an agreement with Standard for the latter company to provide maintenance parts and service to all users of Western Electric equipment.

According to the announcement, the company plans to develop and manufacture TV, microwave and radio communications equipment and gradually add other electronic equipment.

WLEC EXTENSION

FCC Sets March 1 Deadline

FINAL extension of authority to remain silent was given WLEC Clearwater, Fla., by FCC last week pending financial reorganization. March 1 was set as the deadline. Station has been off the air since early November.

WLEC has pending an application for assignment of its license to Florida West Coast Broadcasters Inc. for $32,500 [BROADCASTING, Jan. 30]. Assignee includes Arthur B. Mundoff, 50% owner, and William S. Perry, 20% owner, formerly with WPAT, N. J. WCLE owners, Houston Cox Jr. and M. L. and S. L. Rosenweig had proposed to sell the station to Dr. William T. Watson but this transfer was dropped in December after FCC had ordered an investigation of Dr. Watson's qualifications for a license [BROADCASTING, Oct. 31, 1949]. WCLE is assigned 1 kw daytime on 680 kc.
